EPIGRAPHIA INDICA

VOL. XXVIII

1949-1950

No. 1—NAGARDHAN PLATES OF SVAMIRAJA

(1 Plate).

V. V. MIRASHI, AMRAOTI

These copper-plates were discovered in 1948 at **Nagardhan**, a small village, about 3 miles south of Ramtek, the chief town of a tahsil of the same name in the Nagpur District. Shri Hiralal, Upasrao Mahadule of Nagardhan, who obtained possession of the plates, handed them over to me for decipherment. I am obliged to him for permission to publish this interesting record.

They are **three copper-plates**, each measuring 7·9" in length and 4·1" in breadth. The first and third are inscribed on one side and the second on both the sides. The plates are held together by a ring, $\frac{1}{8}$ " in thickness and 2" in diameter, on which slides a small circular band with a rectangular **seal** measuring 1·2" by 1" soldered to it. The surface of the seal is divided into two almost equal parts by a horizontal line. The upper part contains a symbol, apparently a goad, lying horizontally, while the lower has the legend *Gaṇa-dattih* 'A gift of the Corporation', inscribed in the same characters as the grant. The plates together weigh $67\frac{1}{2}$ *tōlas* and the ring and the seal $2\frac{1}{2}$ *tōlas*. This mode of stringing the plates together resembles that of the Vākāṭaka grants, though the seal here is rectangular, not round as in the latter grants. The plates are in a state of good preservation and there is no uncertainty in the reading of any part of the text.

The record consists of 28 lines, which are evenly divided on the four inscribed faces of the three plates. The **characters** are of the box-headed variety, the boxes at the top of letters being scooped out hollow. They are very beautifully formed, being more cursive and round than those of the Vākāṭaka grants. They resemble very closely the characters of Early Gāṅga grants¹ of the sixth or seventh century A.C. As regards individual letters we may note the forms of initial *u* which occurs in ll. 8, 14, 19, 24 and 27, of initial *ē* in l. 13 and of initial *au* in l. 10. The right stroke of *l*, which is mostly vertical in Vākāṭaka grants, sharply turns to the left and encircles the letter as in later records of the Kalachuris and the Gurjaras of Gujarat, see *kuśalī*, l. 2; a final consonant is indicated by its small size, see *Nāndivarddhanāt*, l. 1; punctuation is generally indicated by a small horizontal stroke, but in some cases by two vertical strokes, the first of which is sporadically hooked at the top.

The **language** is Sanskrit and except for two verses at the end in ll. 24-27, the record is in prose. As regards **orthography**, the only peculiarities that call for notice are the use of *ri* for the medial vowel *ri* in *bhrātri*, l. 2 and *nisriṣṭaḥ*, l. 20; of the guttural nasal *ṇ* for *anusvāra* in *dvāviṇṣē*, l. 23, and of *anusvāra* for final *n* in *drāṅgikādīn*, l. 3. In other respects the record is remarkably free from errors of orthography, though in places it is not altogether devoid of uncertainty of meaning.

The plates were issued from **Nāndivardhana** by Nannarāja who meditated on the feet of his brother, the illustrious Svāmīrāja, during whose reign the grant was made.² Svāmīrāja also

¹ See, e.g. the Jirjāṅgi plates of Indravarman, Gāṅga year 39 (A. C. 537-38), above, Vol. XXV, pp. 281-8, and plate; and Tekkali plates of Indravarman, Gāṅga year 154 (A. C. 652-653), *ibid.*, Vol. XVIII, pp. 307-11, and plate. The Gāṅga era began in Śaka 420 (A. D. 498) as shown by me, above, Vol. XXVI, pp. 326-36. [A. C. and A. D. both stand for the Christian era.—ED.]

² This is shown by the word *kuśalī* 'in good health' applied to Svāmīrāja, in l. 2.

is described as meditating on the feet of a *Bhaṭṭāraka* or lord paramount, which indicates his feudatory status. Neither the family to which the princes belonged, nor the suzerain to whom they owed allegiance, is mentioned in the present grant. No ancestors of Svāmīrāja have been named. In all these respects the present grant resembles those of the *Mahārājas* of Khandesh.¹

The object of the inscription appears to be to record two gifts—(i) one of twelve *nivartanas* of land in the village Chiñchapattikā which was made at the request of the President (*Sthavira*) and Members of the Executive Committee (*Pramukhas*) of the assembly (*Samūha*) of the Corporation (*Gaṇa*) Mahāmātragana, and (ii) the other of the village Āṅkollikā which was made by Nannarāja (or perhaps by Svāmīrāja) on his own account near Chaṭuka Vaṭa² situated in the stream of the Gaṅgā on the occasion of an eclipse which occurred on the new-moon day of Chaitra in the cyclic year Āshāḍha. The donated village Āṅkollikā was situated on the right bank of the river Śūla, to the west of the *agrahāra* of Achalapura and to the east of Śrī-Parṇikā. The donees were certain Brāhmaṇas of the White and Black Yajurvedas and of the Sāmaveda. The inscription contains another date at the end when the plates were issued, viz., the fifth *tithi* (expressed by a symbol) of the bright half of Kārttika in the year three hundred and twenty-two (expressed in words) of an unspecified era. The engraver was the Kshatriya Durgāditya, the son of Chandra.

The present record is interesting in several respects and sheds important light on the history of Vidarbha in the post-Vākātaka age. As stated before, the royal family to which Svāmīrāja and Nannarāja belonged is not specified in the present grant, but since these names occur in two early Rāshtrakūṭa records discovered in Vidarbha, viz., Tivarakhēḍ³ and Multāi⁴ plates, with the slight change of Svāmīrāja into Svāmīkarāja, it seems very likely that the princes mentioned here also belonged to the same lineage. Nay, *prima facie*, it appeared quite plausible that Svāmīrāja and Nannarāja of the present plates were identical with Svāmīkarāja and Nannarāja mentioned in the aforementioned two Rāshtrakūṭa grants. The date of the present record seemed also to lend colour to this view; for the year 322 mentioned in it, if referred to the Gupta era, would correspond to A. C. 641-42 which is not very remote from Śaka 553 (A. C. 631), the date of the Tivarakhēḍ plates of Nannarāja. A close examination of the aforementioned Rāshtrakūṭa grants and their dates, however, soon convinced me that the identification is untenable. I shall now proceed to state my reasons for this view.

As stated before, two grants of the Rāshtrakūṭa Nannarāja discovered in Vidarbha have been published, viz., the Tivarakhēḍ plates, dated Śaka 553 (A. C. 631-32) and the Multāi plates dated Śaka 631 (A. C. 709-10). The genealogy and, to some extent, the wording of the two grants are identical, but there is a difference of 78 years between the two dates. The two grants were, therefore, in all probability, not made by the same ruler; for a reign of more than 78 years is extremely unlikely. Dr. Altekar has already discussed this question in his work on the Rāshtrakūṭas.⁵ He has concluded that the Multāi plates were spurious on the following grounds:—‘The genealogy

¹ See the Indore grants of Svāmidāsa dated (K.) 67 and Bhulunḍa dated (K.) 107 and the Śirpur grant of Rudradāsa dated (K.) 167. These grants have been shown by me to have been dated in the Kalachuri era (*A. B. O. R. I.*, Vol. XXV, pp. 159-68). They therefore belong to the fourth and fifth centuries A. C.

² The grant was apparently made at the *akshaya-vata* near the confluence of the Gaṅgā and the Yamunā. It is also possible that the grant was actually made by Svāmīrāja and was only recorded by his brother Nannarāja. For a similar grant made at Prayāga at the confluence of the Gaṅgā and the Yamunā by a ruling king of Vidarbha and recorded afterwards by his relative at Nandivardhana, see the Rithapur plates of Bhavadatta, *Varman*, above, Vol. XIX, pp. 100 f.

³ Above, Vol. XI, pp. 276 f.

⁴ *Ind. Ant.*, Vol. XVIII, pp. 230 f.

⁵ Altekar, *Rāshtrakūṭas and their Times*, pp. 6 f.

of the Multāi plates starts in verse, but after the first verse there is a sudden break. A sentence in prose follows, but the concluding portion of it, *tasy=ātmavān=ātmajaḥ* is again the fragment of a verse.' These reasons are not quite convincing; for similar mixture of prose and verse is noticed in several genuine ancient grants. They, however, led Dr. Altekar to regard the date of the Multāi plates as suspicious. I also adopted this view in my article on the Rāshtrakūṭas of Mānapura and taking the date A.C. 631 of the Tivarakhēḍ plates as genuine, I suggested that Gōvindarāja mentioned in the plates as the grandfather of Nannarāja flourished in *circa* A.C. 590-610 and was thus probably identical with Gōvinda who, as mentioned in the Aihole inscription, invaded the territory north of the Bhīmarathī at the time of Pulakēśin II's accession. I suggested further that the great Chālukya Emperor Pulakēśin II placed Gōvindarāja's successor Svāmikarāja in charge of Berar when he conquered it from the Kalachuri Buddharāja.¹ These conclusions will now have to be revised in the light of the information derived from the present plates.

A close examination of the two aforementioned Rāshtrakūṭa grants has convinced me that the Tivarakhēḍ plates are spurious. My reasons are as follows—(i) The text of the Tivarakhēḍ plates is very corrupt. The mixture of fragments of prose and verse appears in it in a more flagrant manner than in the Multāi plates. (ii) The inscription purports to record two grants in favour of the same Brāhmaṇa Muṇḍibhaṭṭa,—one made by the Rāshtrakūṭa Nannarāja on Mahā-Kārttikī (full-moon *tithi* of Kārttika), and the other by Śaṅkaragaṇa² of an unspecified lineage, on the occasion of a solar eclipse. There is, however, no mention of Śaṅkaragaṇa in the genealogical portion of the grant. Besides, there was no Śaṅkaragaṇa ruling in Berar in Śaka 553 (A.C. 631-32) when the plates purport to have been issued.³ There was, again, no solar eclipse before Kārttika in Śaka 553. There were, however, two in the previous year Śaka 552—one in Śrāvaṇa and the other in Māgha. It is stated at the end that the gift was recorded when eight months of the Śaka year 553 had expired. We shall therefore have to suppose that the grant, made on the occasion of the solar eclipse in Māgha in Śaka 552, remained unrecorded for nearly nine months. No reason is stated for this unusual delay. (iii) The date of the plates is recorded in decimal figures as 553.⁴ As I have shown elsewhere,⁵ the decimal notation came to be used in Mahārāshṭra in the last quarter of the eighth century A.D., the earliest genuine instance of it, so far known, being the Dhūlia grant of the Rāshtrakūṭa prince Karkarāja, dated Śaka 701 (A.C. 779-80). The Tivarakhēḍ plates which purport to belong to the second quarter of the seventh century A.C. could not therefore have been dated in decimal figures.

The Tivarakhēḍ plates thus appear to be spurious. This conclusion is corroborated by the recent discovery, in the Akola District of Berar, of another set of plates issued by the same Rāshtrakūṭa Nannarāja.⁶ These plates, in their formal portion, closely agree with the Multāi plates. They are dated in Śaka 615 (A.C. 693-94). This date plainly shows that the Multāi plates are genuine; for there is a difference of only 16 years between the dates of the two grants made by the same king Nannarāja, which is not unusual.

¹ A. B. O. R. I., Vol. XXV, p. 47.

² *Samraganēnā* in l. 9 of the Tivarakhēḍ plates is evidently a mistake for *Śaṅkaraganēna*. For a similar mistake see *Bhavattavarmā* for *Bhavaddattavarmā* in l. 3 of the Rithapur plates, above, Vol. XIX, p. 102.

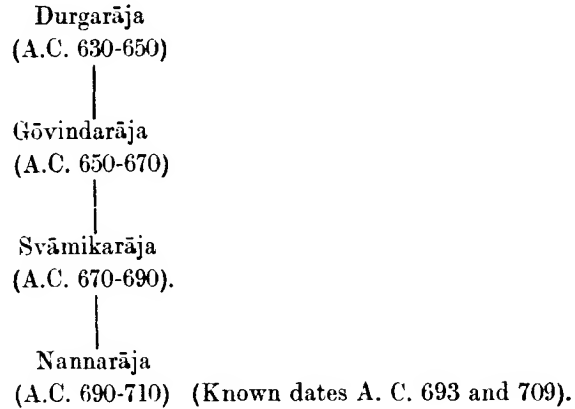

³ The only Śaṅkaragaṇa who is known to have flourished in this period belonged to the Kalachuri dynasty. He however closed his reign in c. A. C. 600. Two grants of his successor Buddharāja, dated K. 360 and K. 361 (A. C. 610) have been discovered. See above, Vol. XII, pp. 30 f. and VI, pp. 294 f.

⁴ The year is specified in words in text lines 15-16, and the corresponding numerals occur, one below the other, on the left-hand margin of the plate, at the commencement of text lines 12-14. The figures recording the date are not 'after additions' as supposed by Hirala. The form of the figure 5 is as in the Sāmāṅgaḍ plates of Dantidurga. *Ind. Ant.*, Vol. XI, pp. 108 ff.

⁵ *Journal of Ganganath Jha Research Institute*, Vol. I, pp. 391 f.

⁶ These plates were discovered in a village near Akōla. It is No. 59 of the copper-plate inscriptions, *Annual Report on Indian Epigraphy* for 1949-50.

The Multāi grant being thus proved to be genuine, the Tivarakhēḍ grant, which though purporting to be made by the same king Nannarāja, is dated 78 years earlier, must be held to be spurious. The approximate reign-periods of the Rāshtrakūṭa princes mentioned in the Multāi and the Vaṭapuraka grant of Nannarāja discovered near Akōlā may therefore be stated as follows—

We have seen above that the year 322 of the present plates, if referred to the Gupta era, would correspond to A.C. 641-42. But there were no kings named Svāmīrāja and Nannarāja ruling in Berar in that period, as shown above. Besides, apart from the difference in their age, the princes Svāmīrāja and Nannarāja could not have been identical with the two rulers mentioned in the Multāi plates; for (i) Svāmīrāja was probably different from Svāmikarāja as the latter name occurs invariably in this form in all the three grants—two genuine and one spurious—of Nannarāja; and (ii) Nannarāja is mentioned in the present plates as the *brother* of Svāmīrāja, while Nannarāja of the three other grants was the *son* of Svāmikarāja.

The date of the present grant is thus *not* recorded in the Gupta era. There is one other circumstance which supports this conclusion. The plates state in ll.14-15 that the grant of Nannarāja was made on the occasion of a (solar) eclipse on Chaitra *amāvāsya* in the cyclic year Āshāḍha. This year was evidently of the twelve year cycle of Jupiter. The system of citing the years of this cycle was current in early times and continued till the sixth century A.C.¹ In North India five such dates with the word *mahā* prefixed to the name of the year were discovered in the grants of the Parivrājaka *Mahārājas* Hastin and Saṅkshōbha, from which Fleet and Sh. B. Dikshit calculated the epoch of the Gupta era. Some more dates of the same type have since been discovered. In South India some dates of this kind have been discovered in the records of the Early Rāshtrakūṭas² Kadambas³ and kings of Kālīṅga⁴ but they do not admit of verification, in the absence of details necessary for calculation. The present grant is thus unique in that it mentions such details together with the name of the cyclic year and the date of an era. Let us see whether these details work out regularly for any of the known eras.

If the year 322 is referred to the Gupta era, it would, as stated above, correspond to A.C. 641-42. But there was no solar eclipse in the *amānta* or *pūrṇimānta* Chaitra of that year. Besides, the cyclic year was Phālguna, not Āshāḍha as stated in the grant.⁵ The nearest solar eclipse in Chaitra

¹ The last known date of this type is G. 209 (A.C. 528) which occurs in the Khoh grant of the Parivrājaka *Mahārāja* Saṅkshōbha.

² See my article on the Rāshtrakūṭas of Mānapura, *A. B. O. R. I.*, Vol. XXV, p. 42.

³ *Ind. Ant.*, Vol. VII, pp. 35 f.; Vol. VI, pp. 24 f.

⁴ See Siripuram plates of Anantavarman, above, Vol. XXIV, pp. 47 f.

⁵ This is according to the mean-sign system. See Cunningham, *Indian Eras*, p. 156. The year according to the heliacal rising system also would be the same according to the calculations of Dr. K. L. Daftari of Nagpur.

occurred on the 21st March A.C. 638, but then too the cyclic year was Mārgaśīrsha, not Āshāḍhā. Again, there is no evidence that the Gupta era was ever current in Vidarbha or, for the matter of that, anywhere else in Mahārāshṭra. For all these reasons the date 322 of the present grant cannot be referred to the Gupta era.

The only other era to which this date can be referred is the Kalachuri era which, as I have shown elsewhere, was current in the neighbouring districts of Khandesh¹ and Nasik.² Let us see if the details work out satisfactorily for this era.

The epoch which suits early dates of the Kalachuri era is A.D. 248-49.³ If the year 322 is referred to this era, it should be equivalent to A.C. 570-71 or 571-72 according as it was current or expired. But in neither of these years was there a solar eclipse in the *amānta* or *pūrṇimānta* Chaitra. There was, however, one in the immediately following year A.D. 573, on the 19th March, which was the *amāvāsyā* of the *amānta* Chaitra. The year of the twelve-year cycle was also Āshāḍhā according to the mean-sign system. The agreement of these three details, viz., the solar eclipse, the lunar month and the cyclic year shows that the **19th March A.D. 573 is undoubtedly the correct date of the grant.** The palaeography of the grant also supports this date, for, as stated before, the characters of the grant closely resemble those of the early Gāṅga grants and must therefore be referred to the sixth century A.C. Besides, the wording of the formal portion of the present grant shows that it must be classed with such early grants as those of the *Mahārājas* of Khandesh, Subandhu of Māhishmatī and the *Traikūṭakas* of Western Mahārāshṭra.

As stated above, the epoch of A.C. 248-49 does not hold good in the present case. Supposing the year of the present grant to be *Kārttikādi* and expired as in most other early dates, the epoch of the era applicable in the present case should be A.D. 250-51. The solar eclipse in Chaitra when the grant was made must have occurred in the *Kārttikādi* Kalachuri year 321. The *amāvāsyā* of the *amānta* Chaitra in the expired year 321 fell, according to this proposed epoch of A.D. 250-51, on the 19th March A.D. 573. On this day there was a solar eclipse visible in India and the *Bārhaspatya saṁvatsara* was Āshāḍhā as stated in the grant.

But, it may be asked, have we any other date of the Kalachuri era to which this new epoch of A.D. 250-51 is applicable? In reply to such a question, I would refer to the date of the Ellōrā grant of Dantidurga. This date has been read as Monday, the thirteenth *tithi* of the bright half of Āśvina in the year 663 of an unspecified era.⁴ This year has been referred to the Śaka era. The details of the date do not, however, work out satisfactorily either for Śaka 663 current or for Śaka 663 expired. The date is thus irregular. It is, therefore, doubtful if it really refers to the Śaka era at all. A close examination of the wording of the date strengthens the suspicion. The date is given as follows—*Sam 600 60 3 Āśvayuja śuddha trayōdaśyām Sōmavārē*. This is, however, not the usual mode of citing dates of the Śaka era. In all early Śaka dates whether occurring in the records of the Early Chālukyas or the Rāshṭrakūṭas, there is a clear reference to the Śakas or to the Śaka kings. See, for instance, the wording of the following Śaka dates from Mahārāshṭra preceding and following the date Śaka 663 in question—

- (i) Śaka 609—Jējuri Plates of Vinayāditya (above, Vol. XIX, p. 64)—*Nav-ōttara-shat-śatēshu-Śaka-varshēshv-atītēshu*.
- (ii) Śaka 680—Poona Plates of Kṛishṇarāja I (*B. I. S. M. Q.*, Vol. VIII, pp. 165 f.) *Śaka-nṛipati-saṁvatsara-śata-shat-kē aśīty-uttarē Hēmalamba-saṁvatsarē Āśvayuj-āmāvāsyāyām Sūrya-grahaṇē*.

¹ See my article 'An ancient dynasty of Khandesh' in *A. B. O. R. I.*, Vol. XXV, pp. 160 f.

² See the Añjanēri plates of Bhōgaśakti, dated K. 461, above, Vol. XXV, pp. 225 f.

³ See my article 'The Epoch of the Kalachuri-Chēdi Era' in *A. B. O. R. I.*, Vol. XXVII, pp. 18 f.

⁴ Above, Vol. XXV, p. 31.

- (iii) Śaka 690—Talegaon Plates of Kṛishṇa I (above, Vol. XIII, p. 279)—*Śaka-nṛipati-saṁvatsara-śata-śaṭkē navaty-uta(tta)rē Plavaṅga-varshē Vaiśākh-āmāvāsyaṁ-Āditya-grahē.*

Several dates of a similar type can be cited. In his examination of the dates of the Śaka era Kielhorn also noticed this peculiarity.¹ Says he, 'What strikes one at once in looking over the dates of the lists, and what distinguishes these dates in a remarkable manner from those of the other principal eras, is this that, with insignificant exceptions, all are explicitly referred to the era to which they belong. Of the 400 dates of my chronological list only five do not contain the word *Śaka* or its derivative *Śāka*.' And even in regard to the five dates Kielhorn showed that the absence of the word *Śaka* was due to the exigencies of the metre, spuriousness of the record or doubtful reading. This explicit reference to the Śakas or Śaka kings in the dates was quite necessary; for there were then two eras current in Mahārāshṭra, viz., the Kalachuri era and the Śaka era. The latter had therefore to be clearly specified to prevent confusion.

Since the date of the Ellōrā plate contains no reference to the Śakas or Śaka kings, it is plainly *not* in the Śaka era. A close examination of the numerical symbols reveals that the reading of the year is incorrect. The first symbol, which consists of a sign for 100 followed by another² denoting 4, evidently stands for 400, not for 600. The date is thus 463 which must be referred to the Kalachuri era. The usual epoch of A.D. 248-49 which is seen to hold good in the case of other early Kalachuri dates does not suit this date; for, according to it, the thirteenth *tithi* of the bright fortnight of Āśvina in the current year K. 463 fell on a Saturday (the 17th September, A.C. 712) and in the expired year K. 463 on a Friday (the 6th September, A.C. 713). In either case it will have to be regarded as irregular, as it did not fall on a Monday. But if we apply the epoch of A.C. 250-51 suggested by the grant under consideration, the date becomes regular; for according to that epoch, the thirteenth *tithi* of the bright fortnight of Āśvina in the expired Kalachuri year 463 ended at 1 h. 45 m. on the 16th September, A.D. 715 which was a Monday as required. These two grants thus show that **the epoch of the Kalachuri-Chēdi era at least in some parts of Mahārāshṭra was A.C. 250-51.**³

The grant under discussion is unique in another respect. **It is the only grant dated in the Kalachuri era which has been found in Vidarbha.** The earlier grants of the Vākāṭakas found in Vidarbha were dated in regnal years while the later ones of the Rāshtrakūṭas are recorded in the Śaka era. The present grant which belongs to the intervening period is dated in the Kalachuri era evidently because that era had spread to Vidarbha with the extension of Kalachuri power. The unnamed suzerain of Svāmīrāja was probably the Kalachuri Kṛishṇarāja (circa A. C. 550-575). It is noteworthy that the silver coins of this Kalachuri Emperor have been discovered at several places in Vidarbha, viz., at Dhāmori in the Amraoti District and Paṭṭan in the Betul District.

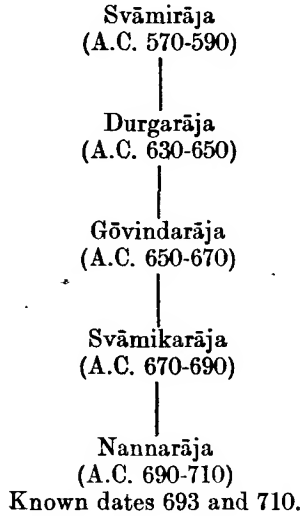

¹ *Ind. Ant.*, Vol. XXVI, p. 148.

² This sign is a curious combination of the symbols for 4 and 6. Its upper portion which contains a loop resembles the symbol for 6, while the lower portion which has the shape of *ka* clearly shows that it was intended to signify 4. Except for the loop in the upper portion, the symbol closely resembles that for 4 used in the Kasāre plates of Allaśakti.

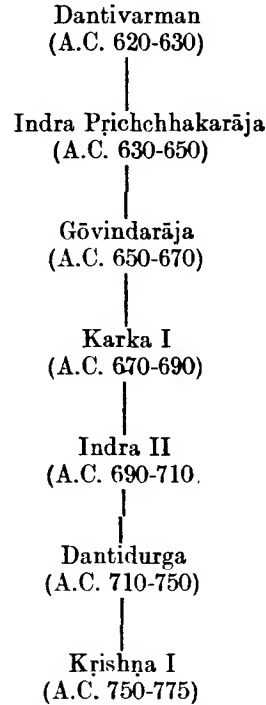

³ From a large number of later Kalachuri dates Kielhorn showed that the epoch of the Kalachuri era was A. C. 247-48, but two early dates presented difficulties which he acknowledged in a foot-note to his *List of Northern Inscriptions*, Ep. Ind. Vol. V, Appendix. From several other dates discovered since then, I have shown that the epoch which suits early dates is A. C. 248-49 and I have reconciled the two epochs on the hypothesis that the current years of the era were wrongly supposed to be expired when the era was introduced by the Kalachuris in North India. The commencement of the era thus came to be antedated by one year. See *A. B. O. R. I.*, Vol. XXVII, pp. 34 f.

This Rāshtrakūṭa family of Vidarbha, which owed allegiance first to the Kalachuris and then to the Early Chālukyas, must be distinguished from the family of Dantivarman which was originally ruling over Mūlaka (Aurangabad District).¹ That the two families were ruling contemporaneously and not successively will appear from the following chronological table :—

The Rāshtrakūṭas of Vidarbha.

The Rāshtrakūṭas of Mūlaka.

The family of Dantivarman attained imperial status after overthrowing the Early Chālukyas and soon extended its sway to Vidarbha. The earliest record of this family found in Vidarbha is the grant of Krishṇarāja I, dated Śaka 694 (A.C. 772), discovered at Bhāndak in the Chanda District. The Rāshtrakūṭas of Vidarbha then sank to a feudatory status and probably ruled from Achalapura² (Ellichpur). We find occasional references to their conflicts with the imperial house of Mānyakhēṭa.

The present grant is interesting in several other respects also. It is one of the few copper-plate grants to which a *Gaṇa* (Corporation) is seen to have affixed its own seal. The corporation was

¹ The earliest genuine records of this family, viz., the Ellōrā plates and the Daśāvatāra Cave inscription—both of the reign of Dantidurga— have been discovered in the Aurangabad District. The Sāmāṇya plates of Dantidurga found in the Kolhapur State are spurious. To the reasons stated by Drs. Sukthankar and Bhandarkar may be added this, that the date of the plates is given in decimal figures. See above, p. 3.

² Nāndivardhana from where the present plates were issued may have been their earlier capital. It was previously the capital of the Vākātakas and then of the Nala kings, Bhavadattavarman and Arthapati. Later on the capital may have been shifted to Achalapura (modern Ellichpur in the Amraoti District). The Tivarkhēḍ plates of Nannarāja were issued from Achalapura, but, as shown above, they are spurious. His Multāi plates mention no place of issue. The plates recently discovered in the Akola District were issued by Nannarāja from Padmanagara which may be identical with Padmapura mentioned in an unfinished plate of the Vākātakas and in Sanskrit literature as the ancestral home of Bhavabhūti. Later references to this branch of the Rāshtrakūṭas as well as the description of a fight in the *Viddhaśālabhañjikā* suggest that its capital was at Achalapura. See also *Ind. Hist. Quart.*, Vol. XV, pp. 611 f.

of Elephant-riders (*Mahāmātras*).¹ Its President was called *Sthavira*² and the members of the Executive Committee, who seem to have numbered twelve, *Pramukhas*.³ The assembly of the Corporation was called *Samūha*.⁴ The *gaṇa* evidently consisted of elephant-riders;⁵ for one of the elders was called *Pilu-pati* (Chief of the Elephant Force) and another was *Ha-ti-vaidyā* (Physician of Elephants). The Corporation had apparently no authority to make any grants of land; for it had to request the ruling prince to make one on their behalf, but it was allowed to affix its own seal containing its own peculiar emblem of a goad.⁶ This shows that it wielded considerable power in the State.

As for the **localities** mentioned in the present grant, **Nāṇḍivardhana** from which the plates were issued has already been identified with Nagardhan. This identification has been corroborated by the discovery of the present record. Another name of the place is said to have been Nandardhan which corresponds to Nandivardhana. There is a small village named Nandipuri, about a mile south by east of Nagardhan which may represent ancient Nandivardhana. **Achalapura** is usually identified with Ellichpur in the Amraoti District, but there is no river named *Śūlanadī* flowing by its side. The Achalapura mentioned in the present plates as an *agrahāra* village was probably situated not far from Nandivardhana. The **Śūlanadī** on the bank of which it lay is probably identical with the river *Sūr* which flows only about 4 miles, east of Nagardhan.⁷ **Aṅkōllikā** which was situated on the bank of the *Śūlanadī* may be identical with modern Aroli, on the right bank of the *Sūr*, about 8 miles south by east of Nagardhan, but there are no places corresponding to Achalapura and *Śrī-Pāṇikā* in its vicinity. **Chīṇchapattikā** is probably represented by the village Chichāl, about a mile and a half, north by east of Nagardhan.

TEXT*

First Plate

- 1 ओम्⁹[१*] स्वस्ति [१*] नाण्डीवर्द्धनात्¹⁰ [१*] भट्टारकपादानुद्धयातः परममाहेश्वरः श्रीस्वामि-
2 राजः कुशली । तदनुद्धयातभ्रात्रि(तृ)नन्नराजः सर्व्वनिव स्वाय्याजस्थानी-

¹ The Marathi word *māhāt* meaning an elephant driver is derived from *mahāmātra* (Prakrit, *Mahaātta*).

² *Sthavira* seems to be used in the same sense as *Jetthaka* of which it is a synonym. The latter term occurs in the *Jātakas* as the head of a corporation.

³ The Indor Copper-plate inscription uses *pravara* in the sense of *pramukha*. *C. I. I.*, Vol. III, p. 70 text line 8.

⁴ For *samūha* meaning the assembly of the *gaṇa*, see *Bṛhaspati-smṛiti*, XVII, 20.

⁵ It is noteworthy that Viśvarūpa, the oldest commentator of the *Yājñavalkya-smṛiti* explains *gaṇa* as a corporation of elephant-drivers and others. Cf. *vaṇik-samūhō gaṇaḥ, hasty-ārōh-ūdi-samūha ity=anyē*: Viśvarūpa on *Y. S.*, II, 196.

⁶ For another grant to which the Corporation of *Mahāmātras* has affixed its seal, see the Banaras plates of Hari-rāja; *Transactions of the All-India Oriental Conference*, Twelfth Session, pp. 590 f. This seal also contains the emblem of a goad (not a flag-staff as stated by the editor). In this case the plates also were issued by the Corporation, though the grant was made with the consent of the reigning king and his chief queen.

⁷ This river is called *Suranadī* in l. 39 of the Ramtek Stone Inscription of the time of Rāmachandra, above, Vol. XXV, p. 16. The name of the river seems to have changed from *Śūlanadī* to *Suranadī* in the course of the seven centuries that separate these two records.

⁸ From the original plates and ink impressions kindly supplied by Shri V. K. Aiyar, Superintendent, Government Press, Nagpur.

⁹ Expressed by a symbol.

¹⁰ The place is called **नाण्डीवर्द्धन** in the Poona Plates of Prabhāvatī-guptā (above, Vol. XV, pp. 41 f.) and the Belorā plates of Pravaraśēna II (above, Vol. XXIV, pp. 260 f.). In two other grants (*viz.*, Rithapur plates of Bhavadattavarman, above, Vol. XIX, pp. 100 f. and Kothūraka grant of Pravaraśēna II, above, Vol. XXVI, pp. 155 f.) the place-name appears as **नण्डीवर्द्धन**.

TRANSLATION

Om ! Hail ! From **Nāṇḍivardhana**—The illustrious **Svāmīrāja**, who is a fervent devotee of Mahēśvara (Śiva) and meditates on the feet of the lord paramount, is in good health. His brother **Nannarāja** who meditates on his feet, honours all his³ (*Officers*) such as *Rājasthānīya*,⁴ *Uparika*,⁵ *Dāṇḍapāsika*,⁶ *Chāṭa*, *Bhaṭa*,⁷ *Dūta-saṁprēṣhanika*⁸ and *Drāṅgika*,⁹ communicating (the following order to them)—

(Line 4) Be it known to you that at the request of the Assembly of the Corporation (*Gaṇa-samūha*), whose Executive Officers (*Pramukhas*)¹⁰ are *Kalīṅga*, the President (*Sthavira*) of the *Mahā-Mātragaṇa*, (and) *Kēṭabha*, *Rōladēva*, *Pradiptabhāṭa*, two *Śivadēvabhāṭas*, *Mātrīsvāmin*, *Gaṇadēva*, *Kōṅkabhāṭa*, the Physician of Elephants (named) *Sāmasvāmin*, *Asaṅgata*, the Chief of the Elephant Corps (named) *Māllāyika* (and) *Prabhākara*, (and) for augmenting the religious merit and fame of (my) mother and father and of myself (*I have granted*) by a charter, twelve *nivartanas* (of land) in (the village) *Chīṇchapattikā* to (the *Brāhmaṇas*) (*viz.*) the learned *Divākara* of the

¹ This *akṣhara* is superfluous.

² Read द्वाविंशत्युत्तरे.

³ As the text stands, these officers would be of Nannarāja, but they are probably meant to be of his brother Svāmīrāja who was reigning.

⁴ *Rājasthānīya* means Viceroy, or Crown Representative.

⁵ *Uparika* was the Governor of a province.

⁶ *Dāṇḍapāsika* was a police officer.

⁷ *Chāṭas* and *bhaṭas* were policemen and soldiers whose duty was to apprehend criminals.

⁸ *Dūta-saṁprēṣhanika* was one who appointed *dūtas* for the execution of royal charter.

⁹ *Drāṅgika* was probably the Mayor of a town (*drāṅga*).

¹⁰ The *pramukhas* correspond to the *kāryachintakas* mentioned in *Smṛitis*. See *Yājñavalkyasmṛiti*, II : 91.

Upamanyu *gōtra* and Vājasanēya *śākhā*, Dēvasvāmin of the Maudgalya *gōtra*, Śaṅkara of the Kauśika *gōtra*, Āditya of the Bhāradvāja *gōtra*, Dāmodara of the Upamanyu *gōtra* and others, these (*being*) of the Kāṇva (*śākhā*); Gaṇa, Sōma, Vatsa, Chaṇḍi, Suprabha, Kumāra and others, (*these being*) of the Taittiriya (*śākhā*); Īśāna of the Sāmavēda; Ravichandra and Ravigaṇa of the Kauṇḍina *gōtra* (*and*) Kāṇva (*śākhā*); (*and*) Karkasvāmin of the Vatsa *gōtra*.

(L. 13) And to the same Brāhmaṇas (I),¹ while staying at the Chaṭuka banyan tree² in the midst of the Gaṅgā on the occasion of **an eclipse on the new moon day of Chaitra in the year Āshāḍha**, donated with a libation of water, according to the maxim of uncultivated land,³ the village named **Aṅkōllikā** on the left bank of the river Śūla, (*situated*) to the west of the *agrahāra* Achalapura and to the east of Śrī-Paṇḍikā, which is to be enjoyed by a succession of sons and sons' sons as long as the moon, the sun, the oceans, the mountains, fire, wind and sky would endure, which is free from the obligations of gifts, forced labour and cess for providing meals⁴ (*to royal officers*), which is exempt from all taxes and is invested with the powers of internal adjudication,⁵ in order that they (*i.e.*, the Brāhmaṇas) should enjoy it and perform religious duties such as *bali*, *charu*, *vaiśvadeva*, (*and*) *agnihōtra*.

(L. 20) Wherefore our descendants as well as others who will, in future, be the rulers of this *Vishaya* and *Bhōga*, should consent to and preserve this, our gift. And whoever, with his mind tossed by the waves of the river water, namely, the greed for enjoying even the least product of this (*gift*) and with his intellect clouded by a mass of ignorance, would (*seek to*) attain life which is transitory like the ripples on the water of a mountain stream and fleeting wealth which is as unsteady as the leaves of the *Aśvattha* tree, will incur the five great sins.

(L. 24) And it is said by the venerable Vyāsa—
(*Here follow two benedictive and imprecatory verses.*)

(L. 27) This order has been engraved by the Kshatriya Durgāditya, the son of Chandra, for the attainment of religious merit by (*his*) mother and father.

In the year three hundred (*increased by*) twenty-two on the lunar day 5 of the bright fortnight of Kārttika.

Seal

A gift⁶ of the Corporation.

¹ This may refer to the reigning king Svāmīrāja.

² *Chaṭuka-vaṭa* may be *akshaya-vaṭa* at Prayāga, but I have not come across this designation of it elsewhere.

³ *Avani-randhra-nyāya* is the same as *bhūmi-chchhidra-nyāya*. It refers to the conferment of full proprietary rights as when one brings fallow land under cultivation.

⁴ *Jēmaika-kara* was a cess levied on villagers for providing boarding to royal officers camping in the village. Cf. *Rāja-purushāṇām-āvāsakō jēmakas=cha ētan=n=āsti* in the Anjaneri plates (second set) of Bhōgaśakti, above, Vol. XXV, p. 237. In later records, the expression *vasati-daṇḍa* is used in the same sense, *ibid.*, Vol. XXV, p. 218.

⁵ *Antah-siddhika* means 'invested with the powers of internal adjudication'. Such villages were not required to send their criminal cases for adjudication outside. In some records the expression *sa-daṇḍa-daś-āṇ arādha* is used in the same sense. For the fines which used to be levied in such cases, see Anjaneri plates (second set) above, Vol. XXV, p. 237.

⁶ For *datti* in the sense of a gift, see the expression *a-pūrvadattā* 'as a gift not previously made' which occurs frequently in Vākātaka records.

(1 Plate)

DINES CHANDRA SIRCAR, OOTACAMUND.

IN February 1944, the Amin of the Umarkōṭ Police Station in the Jeypore State (Koraput District, Orissa) reported to the authorities of the State that a set of copper plates had been discovered in a forest adjoining the village of **Kēsaribēḍā** within the jurisdiction of the said Police Station. The plates are said to have been found exposed on the ground at the foot of a mango tree in the forest. The news of the discovery soon reached the ears of Mr. G. Ramadas of Jeypore, who is an enthusiastic student of Indian epigraphy, and he secured the plates from the Pūjāri of the village with the help of his friend, the late Mr. Talisetty Rama Rao who was then the Assistant Diwan of the Jeypore State. Mr. Ramadas cut the ring passing through the plates in order to read the inscription on them; but soon afterwards he sent the entire set of plates for registration to the Government Epigraphist for India at Ootacamund. I edit the inscription with the permission kindly accorded to me by Dr. B. Ch. Chhabra, Government Epigraphist for India.

Mr. Ramadas has earned the gratitude of the students of Indian history by publishing recently an interesting note on the Kēsaribēḍā copper-plate inscription in the *Journal of the Bihar Research Society*, Vol. XXXIV, pp. 33-42. Unfortunately the text of the record as made out by him as well as his interpretation of it is not free from errors. Besides, most of his suggestions regarding Nala history appear to be mere wild guesses. As I am inclined to disagree with almost all of Mr. Ramadas's theories about the Nalas, I would prefer not to comment on them in detail for the present.

The set consists of **three copper plates** strung together on a copper ring. The circumference of the ring, which is fixed in a thick and somewhat oval mass of copper having three square holes in a line at the top, is 7·4" and its diameter 2". The plates are roughly 7·5" in length and 1·5" in breadth and have their corners rounded off. The hole for the ring to pass through is at the proper right end of the plates and has a diameter of $\frac{1}{3}$ ". The weight of the ring is 6·75 *tolas* and that of the plates together with the ring is 31·75 *tolas*. Of the three plates, the second and the third are inscribed on both sides, while the first has writing on one side only. Altogether there are fourteen lines of writing, each side having three lines, except the second side of the third plate which has two lines only.

The **alphabet** used is of the 'scooped out' type of the box-headed variety of South Indian script. The characters are not of the angular type like those in the Rithapur plates¹ of Bhavadattavarman and Arthapati and suggest a rather earlier date than that record, although both the Kēsaribēḍā and Rithapur charters were drafted by one and the same official (the *Rahasyūlhi-kṛtā* Chulla) and issued by the same king (Arthapati-bhaṭṭāraka), and have therefore to be referred to the same epoch sometime in the sixth century A.D. Attention may be drawn to the forms of the initial vowels *a*, *ā* and *u* in lines 5 (*a*, *ā*, *u*), 6 (*a*), 9 (*a*), 11 (*u*), 12 (*ā*) and 13 (*a*). Final *n* occurs in line 3 and *m* in line 13; but *t* is found in lines 6, 9, 10 and 11. The letter *t* is found in three different forms. In some cases it has the ordinary form with the right hand side straight and the left arm slightly bent downwards. Often, however, both the arms are bent towards the left. In a few cases, the left arm has formed a loop and become undistinguishable from *n* (cf. *ta* in line 3 and *nā* in line 7). The figure for 7 occurs in the date in line 13.

The **language** of the record, which is not free from errors, is Sanskrit. It is written in prose, but has two imprecatory verses in the *anushṭubh* metre about the end. Of **orthographic** peculiarities, mention may be made of the usual duplication of the consonants when preceded or followed

¹ See discussion on this record below, p. 13.

by *r*; but *v* in one case in line 7 and *d* in line 9 have not been doubled. The *visarga*, followed by a sibilant, is represented by a sibilant in line 3. The duplication of *v* in *saṁva* (for *saṁvatsurē*) in line 13 is also interesting to note. There is a case of Prakritism in *muha* for *mukha* in the same line. The rules of *sandhi*, which are optional for prose composition, have not always been observed.

The date of the record is given as **the new moon day of the month of Mārggaśīrsha in the year 7**, no doubt indicating the seventh regnal year of king Arthapati of the family of king Nala. As the issuer of the Kēsaribēḍā charter and the dynasty to which he claimed to belong are already known from epigraphic and numismatic sources, I propose, before entering into the details of the grant, to give below a short sketch of Nala history taken from one of the chapters that I have contributed to Vol. III of the *History of India* (in the press), which is being published by the Bhāratiya Itihāsa Samiti of Bombay under the editorship of Dr. R. C. Majumdar of Calcutta.

The Rithapur copper-plate inscription¹ which may be assigned on grounds of palaeography, to the fifth or sixth century, records the grant of a village called Kadambagiri by Mahārāja Bhavattavarman while he (probably together with his queen) was staying as a pilgrim² at Prayāga (Allahabad), "the place blest by the favour of lord Prajāpati at the confluence of the Ganges and the Jumna". The charter, however, was actually issued from Nandivardhana by a successor of the king. We know that this city was the capital of the Vākātakas of the main line before the foundation of Pravarapura by Pravarasēna II. The village of Kadambagiri has been identified with Kalamba in the Yeotmal District of Berar. It is thus apparent that a new line of kings was in possession of the territories formerly occupied by the Vākātakas.

The name Bhavattavarman is probably a mistake or a partly Prakritized form of *Bhavadattavarman*. This suggestion is supported by the evidence of coins and of another record of the family. The king is called *Nala-nṛpa-vaṁśa-prasūta* and apparently claimed descent from Nala, the ancient king of Nishadha known from epic and Puranic literature. He is said to have obtained royal fortune through the grace of Mahēśvara (Śiva) and Mahāsēna (Skanda-Kārttikēya).³ The king's banner bore the *tri-patākā* which has been explained as the representation of 'the hand with three fingers stretched out' or 'three pennons'. The charter is dated in the eleventh regnal year. But the document is said to have been actually made, for the merit of his own parents, by Mahārāja Arthapati-bhaṭṭāraka who was favoured by his *āryaka*, i.e., grandfather.⁴ Arthapati has sometimes been taken to be an epithet of Bhavadattavarman, but is now usually regarded as the name of the latter's son and successor. It is, however, probable that Bhavadattavarman was actually the *āryaka*, i.e., 'grandfather', of Arthapati. It seems that year 11, the date of the Rithapur grant, refers not to the reign of Bhavadattavarman but to that of Arthapati.

¹ Above, Vol. XIX, pp. 100 ff.

² The fact that the grant was made in favour of certain Brāhmaṇas who appear to have "blessed the matrimonial relationship" of the king and the queen may also suggest that it was made on the occasion of the royal marriage. In that case it has to be conjectured that the father of the queen was a chief or ruler of the Allahabad region. Note also the reference to 'the lord of off-springs' in this connection.

³ The passage *Mahēśvara-Mahāsēna-ātisriṣṭa-rājya-ribhava*, 'upon whom has been bestowed the glory of royalty by Mahēśvara and Mahāsēna', may also be interpreted to mean that the king dedicated his kingdom and wealth to the gods Śiva and Skanda (cf. similar cases cited by me in *Journal of the Kalinga Historical Research Society*, Vol. I, pp. 251-53). Reference may be made in this connection to the Bhītā seal (*ARASI*, 1911-12, p. 51), bearing the legend *Mahēśvara-Mahāsēna-ātisriṣṭa-rājyasya vṛishabha-dhvasasya Gautamīputrasya śrī-Vindhyabē(vē)dhana-mahārājasya*. What relation king Vindhyavēdhana may have had with the early Nalas, cannot be determined in the present state of our knowledge; but, like Bhavadattavarman and Arthapati, Vindhyavēdhana seems also to have been a southerner as the characters used on the Bhītā seal closely resemble those of the records of the Ikshvākus of the Krishna-Guntur region. Vindhyavēdhana's emblem was, however, not the *tri-patākā* but the bull.

⁴ Cf. Fleet, *CII*, Vol. III, p. 187n; *Sel. Ins.*, Vol. I, pp. 225-6.

Another Nala inscription¹ in verse has been discovered at Poḍāgaḍh in the Jeypore State, not far from the borders of the Bastar State (C.P.). It is dated in the twelfth regnal year of a king whose name seems to be Skandavarman, although the reading of its first part is not beyond doubt. This king is described as the son of king Bhavadatta of the Nala family, very probably the same as Bhavattavarman of the Rithapur plates. Skandavarman is said to have recovered the lost (*bhrashṭa*) royal fortune of his family and to have re-peopled the deserted (*śūnyā*) city of Pushkarī. The city, which seems to have been situated in the Poḍāgaḍh region, was probably the capital of the Nala kings. The inscription refers to the construction of a shrine (*pīṭhamūla*) of Viṣṇu by Skandavarman apparently at Poḍāgaḍh. The relation that must have existed between Arthapati and Skandavarman cannot be determined; but the former may have been the son and successor of the latter.

There has been some speculation as regards the identity of the enemy who defeated the Nalas and sacked Pushkarī, but was afterwards defeated by Skandavarman.² As there was apparently a struggle between the Nalas and the Vākātakas of the main branch, this enemy has been identified by some writers with Vākāṭaka Prithivishēṇa II who claims to have twice rescued the fallen fortunes of his family. Skandavarman's adversary may also have been the Pāṇḍuvarṇśī king Nanna of South Kōsala. Nanna's occupation of practically the whole of the western C.P. is possibly indicated by an inscription at Bhandak in the Chanda District, although it is sometimes believed that the record originally belonged to a place in the eastern C.P. in the heart of South Kōsala.³ Most probably, however, the enemy of the Nalas was the Chālukya king Kīrttivarman I (A.D. 567-97) who claims not only to have subdued the Nalas, sometimes represented as the traditional enemy of the Chālukyas, but also to have destroyed their residence (*nilaya*).⁴

A hoard of gold coins was discovered at Eḍeṅgā, a village in the Koṇḍegāon tahsil of the Bastar State.⁵ The issuers of the coins of this hoard are Bhavadatta, Arthapati and another king named Varāha who may have belonged to the same family. From epigraphic and numismatic materials, it seems that the territories of the Nalas lay in the Bastar-Jeypore region about the southern part of the C.P. About the first half of the sixth century, they extended their power towards the north at the expense of the Vākātakas; but their northern possessions soon appear to have passed to the Pāṇḍuvarṇśī kings of Kōsala. There is, however, some indication that the Nala empire had extended over a still wider area.

Inscriptions of the time of Chālukya Vikramāditya I (655-80 A.D.) mention the Naḷavāḍi-vishaya which was apparently named after the Nalas.⁶ As a village situated in that *vishaya* has been identified with modern Ratnagiri in the Madakasira taluk of the Bellary (now Anantapur) District, it seems that Naḷavāḍi under the Chālukyas comprised parts of the Anantapur and Kurnool Districts. This may have been the southernmost province of the Nala empire, originally under a viceroy of the royal blood. Whether the Nalas were responsible for the fall of the Vākātakas of Vatsagulma and the Rāshṭrakūṭas of Mānapura cannot be determined in the present state of our knowledge. But the suggestion may not be altogether improbable.

A stone inscription⁷ at Rājim in the Raipur District of the eastern C.P., which may be assigned on palaeographic grounds to about the close of the seventh century, records the construction of a temple of Viṣṇu probably by Vilāsatuṅga, apparently a successor (son ?) of king Virūpāksha

who was the son of king Prithivīrāja. These rulers claimed descent from Nala and were very probably later members of the family of Bhavadattavarman. It seems that the Nalas, who were cornered in the Bastar region by the Pāṇḍuvamśīs and the Chālukyas, retrieved their position and conquered South Kōsala sometime after the rule of Śivagupta¹ Bālārjuna in the seventh century. It is unknown if they continued to rule in that country till the rise of the Sōmavamśīs about the middle of the tenth century. If, however, they did, they were probably matrimonially related to the Bāṇa king Vikramāditya I (c. A.D. 870-95) who constructed a temple at Pāli about twelve miles from Ratanpur in the Bilaspur District,² no doubt on the occasion of a visit that he might have paid to his relatives' kingdom.

A king named Prithivīvyāghra, who seems to have performed an Aśvamēdha sacrifice, is styled *Nishada-pati* in the Udayēndiram grant of Pallavamalla.³ Supposing that the form *Nishada* is a mistake for *Nishadha* and not for *Nishāda*, Prithivīvyāghra may possibly be associated with the epic *Nishadha-pati* Nala. He may thus be identified with Prithivīrāja of the Rājim inscription as both of them lived about the same period.

As the Rithapur grant is dated in the eleventh regnal year probably of the same king, the present charter is earlier than the other record by four years only. The inscription records the grant, made by *Mahārāja* Arthapati-bhaṭṭāraka, of the village called Kēsēlaka-grāma to the Brāhmaṇas Durgārya, Ravirārya (?)⁴ and Ravidattārya all belonging to the Kautsa *gōtra*. The charter was issued from Pushkarī, addressing the agriculturist householders (*kuṭumbināḥ*), headed by the Brāhmaṇas, as well as to the village *śirshaka* (headman). The king is described as *tri-patākā-dhvaja* and *Mahēśvara-Mahāsēn-ātisriṣṭa-rājya-vibhava* just as king Bhavadattavarman has been in the Rithapur inscription. He is also called *Nala-nripati-kul-ānvaya*, 'belonging to a family of the clan of king Nala'. Thus the inscription under discussion seems to support the evidence of coins that Bhavadattavarman and Arthapati mentioned in the Rithapur record were not identical but were two different rulers. The expression *Arthapati-bhaṭṭārakasy-ānugrah-ārttham* (l. 5) possibly suggests that the king made the gift after receiving some sort of help from the Brāhmaṇas. The donated village was exempted from the entrance of *bhaṭas* (soldiers or police men) and from all taxes (*a-bhaṭa-pravēśaḥ sarvvakara-visarjjitāḥ*). The donees were not to be disturbed by anybody (*na kēnachit kiñchid=vaktavyāḥ*). This is the same as *bhuñjatām na kēnachid=vyāghātāḥ kartavyāḥ* of some other records and forbids all persons to trouble the donees in any way. The grant was also made *a-vaha* which seems to mean the same as *a-paruṃparā-balivarda-graḥaṇa* of some other records indicating the exemption from the obligation of supplying conveyance to the royal officials on tour. The villagers were advised to live happily without fear of molestation and to go on with work in the lands settled unto them (*bhavadbhiś=cha dhruva-karmānt-ārambhāḥ⁵ sunirvrīta-viśvastair=vvastavyam*). They were further asked to be careful about their obligations to the landlords (donees) in accordance with customs prevalent in the district (*vishay-ōchitās=cha śuśrūṣhāḥ kartavyāḥ*) and to pay regularly their dues such as *hiranya* (rent for land payable in coins besides the share of the produce) and others. Fulfilment of these conditions, the record goes on to say, would lead to the satisfaction of Bhaṭṭāraka-rāja (*i.e.*, king Arthapati-bhaṭṭāraka). This seems to show that the word *bhaṭṭāraka* was sometimes regarded as an integral part of the

¹ He is commonly called Mahāśivagupta.

² Above, Vol. XXVI, p. 53.

³ *Indian Antiquary*, Vol. VIII, p. 276. It may be supposed that it was Pallavamalla who performed the Aśvamēdha. But if such was the case, there would certainly have been reference to that event in one of the numerous records of the later Pallavas. The claim would also have been more specific and prominent in the Udayēndiram grant.

⁴ [The name *Ravira* sounds queer indeed, but there is no doubt about the reading. Compare *Ravira*, the name of the composer of the Mandasor inscription of the Mālava year 525=467-8 A.C., above, Vol. XXVII, p. 12.—Ed.]

⁵ The word *karmānta* means 'cultivated land'. It may also be taken in the sense of 'business' in this context.

king's name. The charter was drafted, on a verbal order of the king, by the Privy Councillor (*Rahasyādhiprīta*)¹ Chulla, who is also known from the Rithapur grant.

Of the **geographical names** mentioned in the Kēsaribēḍā grant, Pushkarī, as already indicated, has to be located in the Poḍāgaḥ region of the Jeypore State, now in the Koraput District of Orissa. Kēsēlakagrāma has been identified with the village of Kēsaribēḍā, the findspot of the charter, in the same State.

KRISHNA DEVA, NEW DELHI

This set of copper plates was unearthed on the 2nd May 1943 from an agricultural *inām* land bearing Survey No. 2, *hissā* No. 2, belonging to Mohamed Yusuf Haji Amir Saheb, at the village of **Manor**, taluka Palghar, District Thana, in course of digging for agricultural purposes together with another set of plates of Dantidurga, dated Śaka 671. Soon after its discovery, the set was acquired by the Collector of Thana who sent it to the Superintendent, Archaeological Survey, Western Circle, Poona, for disposal under the Treasure Trove Act. I am grateful to the late Rao Bahadur K. N. Dikshit and Dr. N. P. Chakravarti for their kind permission to edit the plates here as well as for many valuable suggestions which they kindly gave me in the preparation of this article.

This well-preserved set consists of **two copper plates**, each measuring 14" long and 9.4" broad. Though each of them is pierced by a pair of ring holes, they slide, through only one set of holes, on a copper ring the ends of which are soldered into a circular seal, measuring 2-10/12" in diameter. The seal is slightly damaged in the upper right corner and shows faint traces of the design of crescent in the upper field and of lotus in the lower, with the legend *Śrī-Jay[ā*]śraya* in the middle in the script of the main inscription. The edges of the plates are fashioned thicker and raised into rims to protect the writing which is engraved on the inner face of each plate. The inscription, neatly engraved and excellently preserved, runs into 34 lines which are evenly distributed on two plates. The average height of single letters is $\frac{1}{4}$ " and of conjuncts $\frac{1}{12}$ ". The plates together with the ring and the seal weigh 296 *tolas*.

The **characters** belong to the southern variety of the 7th century A. D. and closely resemble those of the Nirpaṇ plates⁷ of Tribhuvanāśraya Nāgavardhanarāja and of the Nausari⁸ and Surat⁹ plates of Yuvarāja Śrīyāśraya Śīlāditya, dated in the years K. 421 and 443 respectively. The noteworthy signs are the initial *ē* in *ēka* (11.18 and 22), final *t* in *vasēt* (1.29) and two forms each of letters *l* and *ṇ*. The simpler form of *l* is seen in *lāmchhana* (1.4), *likhitam*-(1.34), etc., while the curly cursive form occurs in *sakala* (1.2), *Chulukyānām* (1.4), etc. *Ṇ* is similarly indicated by two forms, one of the looped variety as in *kshōbhīt-ārṇava* (1.1) and *kalyāṇa* (1.3); and the other of the unlooped variety as in *sagōtrānām* (1.2), *maṇi-gaṇa* (1.6), etc.

As regards **orthography** the following points are worth noting. Consonants following *r* are generally doubled as in *Vishṇōr=vrārāham* (1.1), *varttamāna* (1.16), etc. The medial *ri* is mostly misspelt as *ī*, as in *mātrībhih* (11.2, 3), *prithivī* (11.5, 8, 12, 15), *vridḍhayē* (1.24), etc.

¹ The figure has been so formed as to look like the letter *rē*.

² Read *māsi*.

³ The first two *aksharas* of the following word have cursive form.

⁴ Read *mukh-ājñāptēna*. [The form *ājñāptēna* is also correct. See above, Vol. XXVII, p. 44, n. 6.—Ed.]

⁵ For *Rahasyādhikṛitēna*, the Rithapur inscription has *rahasi niyuktēna*.

⁶ There is a mark indicating the end at this place.

⁷ *Int. Ant.*, Vol. IX, pp. 124 ff. and Pl.

⁸ Above, Vol. VIII, pp. 232 ff. and Pl.

⁹ *Vienna Or. Cong.*, p. 225 and Pl.

The language is Sanskrit. With the exception of the opening verse and the usual benedictory and imprecatory verses towards the end, the entire record is in prose. The text, however, is full of serious grammatical mistakes, such as °*mālinasya* (1.19) in place of °*mālinah*. As may be seen from the foot-notes and from the brackets in the transcript, many letters and words are either omitted, misspelt or corrupt. The grant portion is particularly faulty and shows numerous blunders of grammar and syntax.

Like other Chālukya grants, the present inscription opens with an invocation to the boar-incarnation of Vishṇu. Then it recounts the genealogy of the Western Chālukyas of Bādāmi, of whom Satyāśraya-Prithivīvallabha-Kirtivarṇarāja (I); his son, Satyāśraya-Prithivīvallabha Pulakēṣi-Vallabha-Mahārāja (II), who defeated Harshavardhana; and his son, Satyāśraya-Prithivīvallabha-Kokkuli-Vikramāditya-rāja (I), who meditated on the feet of Nāgavardhana and who conquered the three kingdoms of Chēra, Chōla and Pāṇḍya, are referred to in the order of succession (11. 2-12). After Vikramāditya (I) is mentioned his younger brother, Dharāśraya Jayasimhavarman (1.13), who was the founder of the Navasāri branch of the Western Chālukyas and father of the donor of the present grant. The inscription refers itself to the **Western Chālukya prince of the Navasāri branch, Vinayāditya-Prithivīvallabha-Yuddhamalla-Jayāśraya-Maṅgalarasa** (1.15), who like his father is called a *Paramamāhēśvara*. The object of it is to record the grant by Vinayāditya-Maṅgalarasa of some villages and domestic sites for the benefit of the temple of sun-god at Mānapura with a view to ensuring the supply to the shrine, of perfumes, flowers, incense, lamps, music and offerings and to provide for repairs to the temple (11.22-23). The endowments comprised the village of Dīṇaka which was situated to the east of the Mānapura village, owned, by the sun-god and included within the Kurāṭa *vishaya* (district); the domestic sites called Kukuṭi and Miṭimmiti in Vēlugrāma; and the Urachhaka village and the Bōḍatta hamlet included within the Vēṅgi¹ *vishaya* (11. 19-22). The grant is **dated on the 15th day of the bright half of Vaiśākha in the Śaka year 613 (expired)**, which falls in A. D. 691-92 and which is expressed in words as well as in numerals (11. 17-18; 33-34). The grant was drafted by *Bhaṭṭa* Rudranāga, son of Kumārasvāmīdikshita, who held the high offices of *divirapati* (chief of the secretariat), foreign minister and revenue minister and is further styled as *niravadya-paramēśvara*.

The inscription is important as it throws welcome light on the obscure history of the Gujarat (Navasāri) branch of the Western Chālukyas and helps to settle some doubtful points of chronology in respect of this little known branch. Hitherto the definite date of the foundation of this branch by Dharāśraya Jayasimhavarman was shrouded in mystery. By specifying that the year of the grant, *viz.*, A. D. 691-92 was the twenty-first *rājya-samvatsara* (1.18) or regnal year, this record places it beyond doubt that the **Navasāri branch was founded in the year A. D. 669-70**. The regnal year mentioned in this record has to be referred to Dharāśraya Jayasimhavarman, since there is no evidence to show that Vinayāditya Maṅgalarasa ruled in his own right as early as A. D. 691-92. This is confirmed by Yuvarāja Śrīyāśraya Śilāditya's Nausari and Surat plates of K. 421 and 443 which testify that Dharāśraya Jayasimhavarman was ruling from A. D. 669-70 to at least A. D. 691-92.

The record supplies another information of historical and chronological importance. So far the only definite date for Vinayāditya Maṅgalarasa was known from his unpublished Balsar plates,² dated Śaka 653 (A. D. 731-32). The present inscription, dated in Śaka 613 (A. D. 691-92), supplies for this prince a date, forty years earlier than that hitherto known for him. It is interesting

¹ [See below p. 20 n. 1. —Ed.]

² J. B. B. R. A. S., Vol. XVI, p. 5; *Ind. Ant.* Vol. XIII, p. 75.

to note that the Surat plates of Yuvarāja Śrīyāśraya Śīlāditya of K. 443 also fall in the same year as the present record.

From the information gathered from this record as well as from other published inscriptions of the dynasty, the history of this house may be reconstructed as follows. Dharāśraya Jayasimhavarman ascended the throne in A. D. 669-70. From the very beginning of his reign his eldest son, Yuvarāja Śrīyāśraya Śīlāditya, was associated with him in the administration and was invested with the authority of issuing land-grants in his own name. Subsequently one of his younger sons, Vinayāditya Maṅgalarasa was also made a viceroy and given charge of a province together with the privilege of issuing land-grants in his own name. In A. D. 691-92 both Yuvarāja Śrīyāśraya Śīlāditya and Vinayāditya Maṅgalarasa were simultaneously administering different portions of their father's dominion. The former held charge of its northern portion comprising the districts of southern Gujarat where the Kalachuri era was prevalent, while the latter governed the southern portion including the modern district of Thana where the Śaka era was in vogue. From the omission of any reference to Śrīyāśraya Śīlāditya in the later records of the dynasty, it is evident that he did not come to the throne and apparently predeceased his father sometime after A. D. 691-92, his last known date. His younger brother, Vinayāditya Maṅgalarasa, whose known dates range from Śaka 613 to Śaka 653, in all probability survived and succeeded his father as may be inferred from the following considerations. Dharāśraya Jayasimhavarman must have been at least forty years old on his accession to the throne in A. D. 669-70, as his son Yuvarāja Śrīyāśraya Śīlāditya was then grown up enough to take an active part in administration. It is, therefore, extremely unlikely that he should have lived up to A. D. 731-32, the last known date of Vinayāditya Maṅgalarasa, unless we credit him with an unusually long life of a century. Now, even assuming that he reigned till a grand old age of eighty, he must have died sometime about A. D. 710, leaving a margin of a little over two decades during which Vinayāditya Maṅgalarasa ruled in his own right. This is corroborated by the testimony of the Nausari plates of his younger brother and successor Avanijanāśraya Pulakéśin¹ of K. 490 (A. D. 738-39) wherein Vinayāditya Maṅgalarasa is given full regal titles and mentioned as having succeeded Dharāśraya Jayasimhavarman.

In the last mentioned plates Vinayāditya Maṅgalarasa is given the epithet of *nija-bhujaprabhāv-ōpārjita-svakiya-bhūmaṇḍalāḥ*. Does this epithet coupled with the omission of any reference to the contemporary Chālukya sovereign in his own grants, signify that he had ceased to owe allegiance to the paramount power? The omission, however, seems to be due to an oversight, as we find both his predecessor and successor acknowledging the authority of the suzerain power; The eulogistic references made to him in his own grants as well as in his successor's are purely conventional, and probably indicate that he was an influential and powerful prince. This is also attested by his seal being stamped on the undated Nirpaṇ plates of Tribhuvanāśraya Nāgavardhana who appears to be another younger brother of his, subservient to him.

This inscription supplies many other interesting pieces of information. Firstly, it testifies to the existence of a solar temple at Mānapura, which is identical with Manor, the findspot of the plates. The endowments recorded in this grant were specifically made for the maintenance of worship in and conservation of this temple. Secondly, this record mentions a hitherto unknown functionary called *Dēśillaka* (1.16) who appears to be connected with the administration of a *dēśa* i.e., a district or a subdivision. Thirdly, like the Sanjan plates of Buddhavarasa,² this inscription invests Vikramāditya (I) of the Western Chālukya dynasty with the surname of *Kokkuli*.

As regards the **place-names** mentioned in the inscription **Mānapura** is surely the present village of Manor in the Palghar *taluka* of Thana district where these plates were discovered. *Dīṇaka*

¹ *Vienna Or. Cong.*, p. 230 and Pl.

² Above, Vol. XIV pp. 149 ff. and Pl.

which is specifically mentioned in the record as situated to the east of Mānapura is represented by the modern village of Tena, which is 2 miles east of Manor. The name of **Kurāṭa-vishaya**, wherein Mānapura was included, has perhaps survived in the modern name Kirat, a village, lying 12 miles north-east of Palghar town. The **Vēlugarāma** of the inscription seems to be identical with Velgaon, 3 miles south-east of Kirat and 14 miles east-north-east of Palghar. As regards **Vēngi¹-vishaya**, it is extremely doubtful if by this is meant the well-known homonymous tract between the Gōdāvari and the Kṛishṇā on the eastern coast, as from aught we know of this ruler, his territory could never have extended so far. I am therefore unable for the present to identify Vēngi as also Urachhaka and Bōḍatta which were included therein.

I edit the inscription from the original as well as from a set of excellent estampages supplied through the kind courtesy of the Director General of Archaeology.

² This *anusvāra* is redundant. After चञ्चलं should be supplied a synonym 'of human life like जीवितं to make the sense complete. [The letter *ma* in *mabhāvānu* has a closed top. It looks as if the engraver first wrote *ma* and then tried to make *vi* of it. However, the expression remains imperfect. The corresponding expression occurs more frequently in the early Kalachuri records. A perfect example may be seen in the Vaḍṇer plates of Buddharāja: *prabala-pavana-prêrit-ôdadhî-jala-taranga-chañchalam jīvalōkam=abhāv-ānuगतान=asārān=vibhāvān=âsrygha-kāla-sthēyasaś=cha guṇān=ākalaayya sāmānya-bhōga-bhū-*, etc. Above, Vol. XII, p. 34. text 11. 23-25.—Ed.]

³ Read दिचचीषुभि-.

⁴ The last foot of this verse is corrupt and meaningless. [The intended reading is *kapilā-sata-ghāṭīyam-ēnaḥ-sa-pratīpadyatē*.—Ed.]

⁵ Read विग्रहिकाक्ष-.

NO. 4—HARASUR INSCRIPTION OF KING SOMA

(1 Plate)

P. B. DESAI, OOTACAMUND

THE epigraph was found on a piece of stone built into the platform in front of the temple of Anantaśayana at Harasūr, a village in the Gulbarga District of the Nizam's Dominions. I visited this place in 1933 when I was a college student and copied the inscription.¹ I am editing it here for the first time from ink-impressions prepared by me.

The inscription is incised in Nandi-Nāgarī characters of the 12th century A. D. There are few orthographical peculiarities to be noted. Except in a few instances (*e. g.*, cerebral *ṇ*) the convention of doubling a consonant combined with *r* is generally not observed. The language is Sanskrit and the whole composition is in verse of the ornate classical style. The poetry is not of high order and the writing contains some errors. As a part of the stone bearing the inscription is broken and lost, the record is incomplete. In lines 17-20 a few *aksharas* at either end are damaged and missing. Even in the absence of explicit statement to the effect in the inscription, it is clear that the charter belongs to the southern Kalachuri dynasty familiarly known as the Kalachuryas of Kalyāṇa.² Save two copper plate documents³ which are in Sanskrit, the epigraphs of this family are generally in Kannaḍa. So this claims to be the first stone record of the house in Sanskrit so far discovered.

The epigraph describes the origin and the genealogy of the Kalachuri family. The genealogy stops with the king Sōma or Sōmēśvara who bore the *biruda* Rāya-Murāri. Then we are introduced to the king's minister and general Mādhava. In the following passage the poet refers to a temple of Viṣṇu⁴ constructed by Mādhava and indulges in describing the beauty of its golden pinnacle (verse 14). The lost portion of the epigraph appears to have contained information regarding the provision made for its maintenance by Mādhava.⁵

If the record bore a date, it must have been obviously in the lost portion. However, it is clear from the genealogical context that it was drafted during the regnal period of the Kalachuri king Rāya-Murāri Sōvidēva (Sōmēśvara) who is known from other sources to have ruled from A.D. 1167 to 1176.

Damaged and incomplete as the record is, it is highly important in as much as it draws in, directly and indirectly, much new material for the reconstruction of the history of the southern Kalachuris, which is still shrouded in mystery.⁶ The statement regarding the origin of the family

¹ Inscriptions copied at Harasūr have found their place in the Mackenzie Collection preserved in the University of Madras. But this inscription in particular appears to have escaped the notice of the copyists. I am indebted for this information to Mr. M. Venkataramayya.

² Not Kalyāṇi as is often mentioned; for the correct name of the place is Kalyāṇa. The above name of the family can not stand full justification. Firstly, the family is not always referred to as Kalachurya, which is supposed to have been derived from Kalachuri. The name Kalachuri is met with in a large number of epigraphs; which shows that both the forms were in use simultaneously. Secondly, Kalyāṇa was not the one and the only capital of these rulers. In fact Kalyāṇa enjoyed this privilege for a brief period during the reign of Bijjala II. Even he had his alternate headquarters at Maṅgaḷavēḍhe (Sangli State, near Pandharpur), which was the original and long-standing capital for many princes of this house. Hence, the Southern Kalachuris or Kalachuris of Karnāṭaka would, in my opinion, be a better denomination of this family.

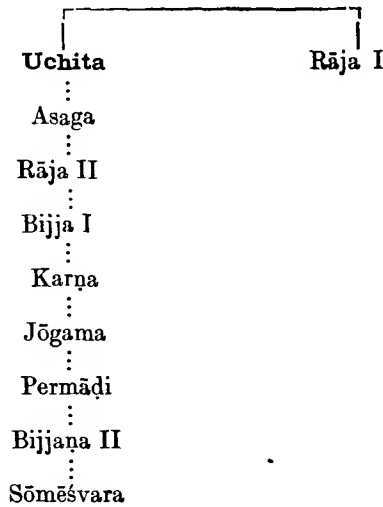

³ *Ind. Ant.*, Vol. IV, p. 274 and *J. B. B. R. A. S.* (Old Series), Vol. XVIII, p. 269.

⁴ The present day Anantaśayana temple, near which the inscription was found, most probably represents the Viṣṇu temple.

⁵ More details about this Mādhava are known from another inscription at Harasūr, found in the Bhōgēśvara temple. These will be utilised in a later context. Mādhava figures in this epigraph as one of the donors. The date of this epigraph is A.D. 1172. As the present epigraph might have come into existence about the same time, we may place it somewhere about that year.

⁶ No systematic attempt to reconstruct the history of the family from the sources discovered during the past half a century has so far been made. The account of the late Dr. Fleet (*Bom. Gaz.*, Vol. I, pt. II) deserves to be thoroughly revised.

is characteristically significant and not found in other records. It is revealed here for the first time in clear terms that the members of this house claimed their descent from the lunar race.¹ The genealogy narrated in the epigraph is as follows :

But the evidence of other inscriptions of the family shows that this genealogy, though it ushers in a few new names, is not complete.² To start with, another inscription from Harasūr itself, found in the Bhōgēśvara temple differs from the above in the following respects : Asaga had a son named Kannama. The record next mentions the latter's son whose name is irretrievably lost. This unknown son of Kannama had two sons, Rāja II and Bijja I. Bijja I was followed by his son Karṇa.³ Thus it may be seen from this epigraph that between Asaga and Karṇa there intervened

¹ Fleet's reference to the lunar descent of the family is based on an inscription in the Bhōgēśvara temple at Harasūr. The record is unpublished and I possess full copy of the text in my private collection. The passage in question from the epigraph runs thus :

Line 6 *Neredu sur-āsurar=kkadeyal=Ingadalim=ogedaṁ nij-āṁśu-saṁstara-paripū-*

Line 7 *rit-ākhiḷa-liśāvalayam Kamalā-sahōdaram Sura-gṇja-sōdaram Śaśi tadīya-kuḷābharaṇarkkaḷ=āpta-Samkara-varar=ūdar=amd=uchi-*

Line 8 *ta-chaṇdra-kuḷ-ācharanar=mmahibhujar ||*

This may be compared with verses 3 and 4 of the present epigraph. Also see *Ep. Carn.*, Vol. VII, Sk. 236.

² Most of the genealogical statements contained in the several genuine records of the family are scrappy and incomplete and one can also detect much divergency in these accounts. This shows that very little was known regarding the origin and the early history of the family which sprang to prominence in the time of Jōgama and his successors. This, therefore, makes it necessary to collate the varying information from different epigraphs and reconstruct an authentic genealogical picture of the family.

³ Fleet's genealogical account at this stage is based on faulty understanding of the text and hence misleading (*Bom. Gaz.*, Vol. I, pt. II, p. 468). As the record is unpublished and it is necessary to know the original text properly to find out the errors in his interpretation, I reproduce the relevant portion below :

Line 8 *Ant=avarol=akhiḷa-vasudhā-kāmt-ōchitan=Uchitan=āldan=akhiḷ-āvanīyam santam=ene tat-tanū-*

Line 9 *jan=anantarav=Asagarsan=āldan=akhiḷ-ōrvvareyam || Tat-tanayam Kannama-nripan=ottambadin=āldan=ileyan=ātana tanayam matt=ēk=i-*

Line 10 *... .tanng=uttaṇar=ene Rāja-Bijjar=ogedar=ṭanayar || Amt=avar=kkramadiṁdav=āld=ileyam nimirchi-*

Line 11 *d=arātgaḷ=Amtak-ōpaman=āgi Bijja-nripālakaṅg=ogedaṁ sutaṁ Kantu-vairi-vara-prasāda-sulabdhadōr-vraḷa-dhairyya-vikrāntan=arṇnava-*

Line 12 *ghūrṇa-kīrttiy=enippa-Karṇa-nripālakaṁ ||*

From this it may be seen that there are no names like Santama or Santasama and Sagararasa as made out by Fleet.

three generations and that Rāja II and Bijja I were brothers.

Our record again does not furnish a full picture of the genealogy at this stage. We shall therefore take the help of a record from Harihar,¹ Mysore State, to fill up the missing gaps. In doing so we shall confine ourselves in the first instance to the account of the two brothers Rāja II and Bijja I. Of these, the latter, we are told, was the elder. Rāja II had four sons : Ammugi, Śankhavarma,² Kannara and Jōgama. After Bijja I the succession passed on to his brother's sons. Ammugi was thus the next ruler who was followed by his youngest brother Jōgama. According to this inscription Śankhavarma and Kannara probably did not rule. We may observe in this context the identity of Karṇa of the present epigraph with Kannara of the Harihar inscription.

According to the inscription from Hire-Muddanūr,³ Jōgama married Tārādēvi and had a daughter by her named Sāvaladēvi. She was probably older than Permāḍi. She was given in marriage to the Western Chālukya king Vikramāditya VI. Jōgama's son Permāḍi is mentioned by all the epigraphs.⁴

Permāḍi's son was Bijjala II, who usurped the Western Chālukya throne.⁵ Bijjala II had a younger brother named Mailugi and he is not mentioned by our record. He is known from three epigraphs in the Mysore State.⁶

Coming to the next generation our record speaks of Sōmēśvara as having ruled after Bijjala II. The former is more familiarly styled Rāya-Murāri Sōvidēva. Though he was probably the eldest surviving son,⁷ the succession from Bijjala II to Sōmēśvara was neither smooth nor

¹ *Ep. Carn.*, Vol. XI, Dg. 42.

² Śankhavarma is the same as Saṅkama of the Mādgiḥāl inscription (above, Vol. XV, p. 319). Bijjala II's son Saṅkama II is mentioned as Śankhavarma in a later record (*S. I. I.*, Vol. IX, pt. 1, No. 297).

³ *Bom. Gaz.*, Vol. I, pt. II, p. 448, n. 3. In this record solar lineage is ascribed to Jōgama. An inscription from Inḡaḷēśvara, Bijāpur District, opens with an invocation to the Sun god and mentions Kārtavīrya as the first ancestor of the Kalachuris, indicating thereby their solar descent (*B. K.* No. 11 of 1930-31). The two apparently divergent statements regarding the lineage of the southern Kalachuris are but reflections of similar statements found in the records of the northern Kalachuris. Whereas the two branches of the northern Kalachuris, viz., of Tripuri and of Sarayūpāra claim their descent from the lunar race, the third one, the Kalachuris of Ratnapur, substitutes the sun for the moon as their primeval ancestor. (Above, Vol. II, p. 3; Vol. VII; p. 88; Vol. XII, p. 210; Vol. XVIII p. 131; Vol. XIX, pp. 78 and 211, etc.) This disparity can be reconciled by pointing out that Purūravas, the ancestor of Kārtavīrya was an offspring of Budha and Ilā, who were son and daughter of the Moon and the Sun respectively.

⁴ An inscription from Waḷasang, Jath State (*B. K.* No. 128 of 1940-41), incidentally reveals the hitherto unknown relationship of Permāḍi with the Western Chālukya king Vikramāditya VI. In this record Chandaladēvi, wife of the king is referred to as the grand-mother (*multarve*) of Bijjala II. This relationship could be explained only on the assumption that a daughter of Vikramāditya VI, evidently by the above-named queen, was given in marriage to Permāḍi and that she was mother of Bijjala II. This was in keeping with the Indian tradition of family alliances. As we know in the case of Jōgama who gave his daughter to Vikramāditya VI, the latter also would have reciprocated a similar turn of matrimonial obligation by bestowing his daughter in marriage to the former's son.

⁵ Permāḍi appears to have forestalled his son Bijjala II in defying the authority of his suzerain. An inscription from Tadalbāgi, Jamkhandi State (*B. K.* No. 66 of 1938-39), is dated in the 12th regnal year of Permāḍi, which corresponds to A.D. 1129 and falls right within the regnal period of Sōmēśvara III. But it is curious to note that it neither mentions the name of the suzerain, nor does it associate the feudatory title Mahāmaṇḍalēśvara with Permāḍi. This was perhaps condoned at the time on consideration of intimacy of relationship that subsisted between Permāḍi and the royal house and the dignified status held by the former in the kingdom. But it was a bad example to set which culminated in a grave catastrophe in the course of the next generation, viz., the overthrow of the Chālukya rule by Bijjala II.

⁶ *Ep. Carn.*, Vol. VII, Hl. 50, Sk. 197; Vol. XI, Dg. 44.

⁷ Bijjala II had a son named Vajradēva by Ēchaladēvi (*Bom. Gaz.*, Vol. I, pt. II, p. 477 and above Vol. XV p. 109). I am inclined to take him to be the eldest. He must have died before the nomination of Sōvidēva to the Kalachuri throne.

undisputed. Bijjala II had other sons¹ and daughters² regarding whose existence our record is silent. The picture of the disturbed state of affairs that prevailed in the Kalachuri kingdom after the death of Bijjala II is available from other records and it would be worth while to take a glimpse of it here.

According to some inscriptions³ Bijjala II was succeeded by his younger brother Mailugi, who was followed by the former's grandson, whose name is given as Kandāra⁴ in one epigraph and Kalidēva⁵ in another. But actually his name appears to be Karṇadēva.⁶ After Karṇadēva came his junior uncle Sōvidēva. The Bhōgēśvara temple inscription from Harasūr throws revealing light at this point.⁷ While narrating the circumstances of the accession of Sōvidēva, it states that the Kalachuri sovereignty was reduced to a chaotic condition by the evil counsellors such as Kasapaya⁸ and others; Karṇa usurped the throne and ruled illegally; but he was eventually killed and the kingdom duly restored into the hands of Sōvidēva.

Piecing together the information furnished by these different sources, the facts appear to be as follows: At the time of his abdication⁹ Bijjala nominated Sōvidēva, his eldest surviving son, as his successor. If this be accepted, it should have created resentment and opposition in a section of the royal household and the official ranks of the kingdom. Soon after the death of Bijjala, which itself was brought about by an assassin,¹⁰ rival parties headed by claimants to the throne contended for power. Bijjala's younger brother Mailugi was the first to raise the standard of revolt. But he was removed from the scene. Next came Bijjala's grandson Karṇadēva, who

¹ Besides Saṅkama, Āhavamalla and Singhana, Bijjala had yet another son named Mallugi, Mailugi or Mallikārjuna. He seems to have been junior to Sōvidēva and senior to Saṅkama. He usurped the Kalachuri kingdom and set up his rule for a very brief period at the end of Sōvidēva's reign. (*Ep. Carn.*, Vol. VII, Sk. 197; Vol. XI, Dg. 44; *B. K.* Nos. 63 and 96 of 1936-37; No. 81 of 1937-38; etc.)

² He had at least two daughters: one Siriyādēvi by Ēchaladēva was married to the Sinda chief Chāvūṇḍa II (*Bom. Gaz.*, Vol. I, pt. II, p. 477); another was the wife of Barmarasa of Bandanike. (*Ep. Carn.*, Vol. VII, Sk. 242.)

³ *Ep. Carn.*, Vol. VII, Hl. 50 and Sk. 197 and Vol. XI, Dg. 44.

⁴ Kandāra or Kandara can be derived from Kṛishṇa or Karṇa. In the present case it has to be derived from and equated with Karṇa.

⁵ Kalidēva appears to have been his title.

⁶ It is beyond doubt that it was Karṇadēva. (*Vide* the citation from the inscription in the Bhōgēśvara temple below.) *Saṅkharāṇuvaharitra* of Rāghavāṅka mentions one Karṇadēva (IX-2) and the reference is obviously to the same person. But his relationship with Bijjala is wrongly stated therein to be that of brother (*tamma*) instead of grandson (*namma*).

⁷ In view of its great importance I quote below the original passage of the inscription from my private collection.

Kalachuri-mapa-kuṭa-rājyaṁ
balavāt-durmatrī-Kasapayādigalindam
galakulam āgare nija-dō-
r-bhūḍimul-āḥavalisi Mādham pesar-vadeḍam ||
Ad-ent-ene :
Īkramisi rājya-Lakshmiya-
ī-īkramadōl-āḍḍa Karṇanam kondu dharā-
chakraman-āḥavadis=iṭṭan=a-
mukramadim Sōma-nripāna bhūja-mandaladol : (lines 35-38)

⁸ Kasapivva Nivaka was a minister and wielded much influence in the state during the time of Bijjala II (*Bom. Gaz.*, Vol. I, pt. II, pp. 460 and 472; *Ep. Carn.*, Vol. VII, Sk. 102; Vol. XI, Dg. 35 and 42).

⁹ *Ibid.*, Vol. VII, Sk. 92; *Bom. Gaz.*, Vol. I, pt. II, p. 477.

¹⁰ *Ibid.*, p. 479.

appears to have been a son of Bijjala's eldest son,¹ who was now no more. But he was opposed by Sōvidēva's party and in the encounter that ensued Karṇadēva was killed by Sōvidēva's general Mādhava. Eventually Sōvidēva succeeded to his father's kingdom. These events might have taken place in the course of a few months during the latter part of A.D. 1167.²

An attempt may now be made to furnish a chronological setting to the above genealogical account. In order to achieve this we have to start from Bijjala II and trace backwards towards his ancestors. The earliest date available for him is from an inscription at Waḷasang,³ Jath State. The epigraph which is dated in the 5th year of the Western Chālukya king Jagadēkamalla II (=A.D. 1142) introduces him as the latter's subordinate and mentions his administration over the province of Karahaḍa Four Thousand. Hence we might approximately assign A.D. 1140 for the commencement of his career. Permāḍi must have started his career by A.D. 1118 as an inscription from Tadalbāgi⁴ refers to A.D. 1129 as his 12th year. Jōgama was governing the province of Karahaḍa Four Thousand in A.D. 1087-88 as a feudatory of Vikramāditya VI according to an epigraph from Kōlagiri,⁵ Jath State. Hence we may reasonably place the initial date of his career by A.D. 1080.

Between Jōgama and Uchita, the earliest ancestor, there intervened five generations. Counting at an average of 25 years per generation we obtain A.D. 955 as the approximate date of Uchita. It may thus be concluded that **Uchita was the founder of the Kalachuri line** and that he laid its foundation⁶ by the middle of the 10th century A.D.

But indications are⁷ not wanting to surmise that Uchita was not the first and direct immigrant from Central India to the south and that the southern movement of the Kalachuris might have taken place a few generations earlier. The growth of the Gurjara Pratihāra power in the north and its impact on Central India, the homeland of the Kalachuris in the 9th century A.D.,⁸ seem to have brought about the disruption of the latter. It was under the force of such circumstances that some dispossessed members of the Kalachuri house seem to have migrated to the south and settled at Maṅgalivē(vā)ḍa.⁹ It is possible to gather from the Mādgiḥāl record that some generations might have passed in obscurity with the early settlers in the Deccan before the family rose to some distinction.⁹

¹ As suggested previously Vajradēva might have been the eldest son of Bijjala II, who predeceased his father.

² As shown by Fleet, Bijjala abdicated after 19th July 1167 A.D. (*Bom. Gaz.*, Vol. I, pt. II, p. 477.) The records of Sōvidēva show that his reign commenced in the same year. The commotion created by the rival claimants must have followed in the immediate wake of his accession and he might have succeeded in putting down the disturbances before the end of the year. So we have to fit in the statements regarding the rule of Maṅgi and Karṇadēva within the brief period of a few months that intervened between the abdication of Bijjala and the final accession of Sōvidēva. There is nothing improbable about this.

³ *B. K.* No. 128 of 1940-41.

⁴ *Ibid.*, No. 66 of 1933-39.

⁵ *Ibid.*, No. 103 of 1940-41.

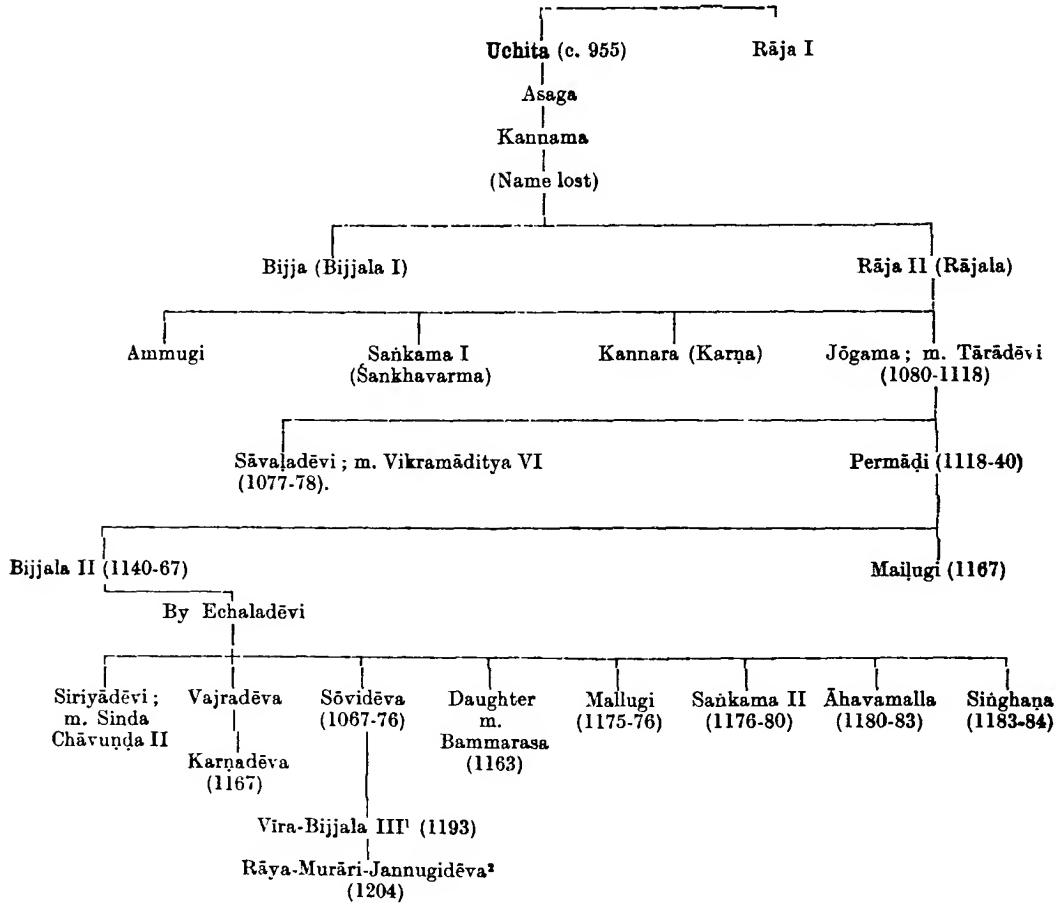

⁶ The name of Uchita as the founder of the southern Kalachuri line is known for the first time from the present record and also from the inscription in the Bhōgēśvara temple, Harasūr. (See n. 3 above, p. 24, line 8 of the quoted text.)

⁷ Kālañjara-maṇḍala, the ancestral seat of the Kalachuris of Central India was under the sway of the Gurjara Pratihāra ruler Bhōjadēva in A.D. 836 (above, Vol. XIX, p. 18).

⁸ Maṅgalivēḍa or the modern Maṅgalavēḍhe (near Pandharpur) was the early seat of the Kalachuris migrating to the south. It was the chief town of the Tarikāḍu nāḍu (tract). (Above, Vol. XV, p. 315.) This area became the ancestral home for the later members of the family, who are at times introduced in association with these local terms. For instance, Jōgama is spoken of as Tarikāḍu Jōgamarasa and the Maṅdalēśvara of Maṅgalavēḍa. (*Ep. Carn.*, Vol. XI, Dg. 42 and *Bom. Gaz.*, Vol. I, pt. II, p. 448.) His son Permāḍi is spoken of as Tarikāḍa Permāḍidēva in *B. K.* No. 95 of 1936-37. Maṅgalavēḍhe never ceased to be the headquarters of the Kalachuris even during the hey-day of their power in spite of their occasional preference for other centres.

⁹ Above, Vol. XV, p. 319.

In the light of the foregoing discussion the revised and consolidated genealogy of the family will tentatively be as follows :

Regarding Mādhava, the minister and general of the Kalachuri king Sōma, not many details are known from the present record. The Bhōgēśvara temple inscription mentioned above, however, furnishes an authentic account of his achievements which, as described before, shows that he played a distinguished role in the troublous days following the death of Bijjala. He sponsored the cause of Sōvidēva and successfully crushed the machinations of his rivals. It was through his valour combined with diplomacy that Sōvidēva was restored to his father's throne. This entitled Mādhava to the well-deserved praise, *Kalachuri-bhūpāla-vipula-rājyōddharana* (upholder of the mighty rule of the Kalachuri king), which is bestowed upon him in that epigraph.

¹ This son of Rāya-Murāri Sōvidēva is known from an inscription at Saṅkh, Jath State (*B. K.* No. 108 of 1940-41). The ruler of Maṅgaḷavēṣṭaka whom Bhillama is described as having vanquished (*jaghnivān*) could be this same person. The name Billāṇa in the passage narrating the exploits of Bhillama by Hēmādri, *yō vā maṅgaḷavēṣṭakam kṣhitipatiṁ śrī-Billāṇaṁ jaghnivān* (*Bom. Gaz.*, Vol. I, pt. II, p. 271), appears to be a mistaken reading for Bijjaṇa. Or, if we accept the other reading *Vajriṇam*, it may be taken as a Sanskritised form of *Bijjaṇam*.

² *B. K.* No. 44 of 1936-37. It is suggested tentatively that Rāya-Murāri Jannugidēva of this record might have been son of Vira-Bijjala III and grandson of Rāya-Murāri Sōvidēva.

ABSTRACT OF CONTENTS

- V. 1. Praise of the Boar Incarnation of Vishṇu.
- V. 2. Victorious is the Milk Ocean who sprayed Mukunda with drops of water emanating from
(the mountain) Mandara, auspicious grains of rice, as it were, showered at the time of marriage
of (his daughter) Śrī.
- V. 3. From him (Milk Ocean) arose the moon, the joy of the world.
- V. 4. In his (lunar) race was born Uchita. He had a brother named Rāja.
- V. 5. In his family came forth Asaga, aggressive with his mighty arms. Next in descent was
Rāja. After him rose to power king Bijja, whose feet were touched by the crests of rulers
of the earth.
- V. 6. In his house appeared Karṇa who was renowned by the titles, such as *Śūrāṁkuśa* (Goad
to the Brave), etc., the veritable Agastya to the ocean of hostile kings. He was succeeded
by Jōgama who was unsurpassed in valour.
- V. 7. He was followed by Permāḍi, an ornament of the circle of kings.
- V. 8. After him rose to eminence his son Bijjaṇa who was distinguished by the titles, *Giridur-
gamalla* (Champion of the Hill-fort), *Subhatāditya* (Sun among the chosen warriors) and
others. He, the mighty one, wrested by force the sovereignty from the race of the Chālukyās
and secured the paramount position of the lord of Kuntala, adorned with a single parasol.
- V. 9. Who can describe his triumphant expeditions that put his enemies to flight?
- V. 10. His successor is king Sōma of extraordinary prowess. He is praised as Rāya-Murāri
(veritable Murāri among the kings). The enemy is motionless before him.
- V. 11. King Sōma, the veritable Arjuna to Karṇa, the Karṇāṭa, is the thunderbolt to the mountain,
the Āndhra; submarine fire to the ocean, the Vaṅga; elephant to the tender plantain, the
Chōla; whirlwind to the rumbling cloud, the Gūrjara; fire to the wood, the Nēpala king.
- V. 12. When he prepares for an expedition, his enemies are struck with terror and run away
helter skelter to save their lives.
- V. 13. He has a minister in Mādhava-daṇḍanātha. Born of parents, Māyidēva and Sāvitrī, he
is a descendant of the sage Vasishṭha.
1. 17-20. A temple of Vishṇu was constructed by him. Seeing its golden pinnacle, the divine
mountain (Mēru) felt anxious that the gods would forsake him and resort to this, the more
distinguished new Mēru of the South.
- The heroism displayed by this (general Mādhava) on the fields of battle is beyond description.

No. 5.—ALAND INSCRIPTION OF YUVARAJA MALLIKARJUNA

(1 Plate)

P. B. DESAI, OOTACAMUND

This inscription was copied by me in the summer vacation of 1933, when I was a student in the Karnatak College, Dharwar. The stone slab bearing the epigraph was built in a wall of the *dargah* of Lādle Mashāk Sāheb at Aland, a fairly big village in the Pāyagāh Jāgirs of the Gulbarga District, Hyderabad State. The record was published in the *Karnāṭak Historical Review*, Vol. IV (1937), pp. 61-71. But in view of certain imperfections of the publication and the importance of the epigraph mainly for the study of the family history of the eminent Western Chālukya ruler Vikramāditya VI, I propose to re-edit it here.

In the process of trimming the slab to fit it into the construction, damage has been caused to the writing in some places. Consequently, a few letters at the commencement of almost all the lines are lost. The rest of the inscription is in a fair state of preservation. The characters are Kannāḍa of the 11th century A. D. and generally conform to the style of the age. The length of the medial *ī* is invariably clearly distinguished by a spiral to the left of the curve at the top. Regarding orthography there are no special features worth mentioning except for those common to the period. The *upadhmānīya* is used in ll. 38, 41 and 42. The language is Kannāḍa and the composition is partly in prose and partly in verse. The imprecation towards the end is, as usual, made up of Sanskrit verses.

The record refers itself to the reign of Tribhuvanamalladēva or Vikramāditya VI and is dated the Chālukya-Vikrama year 7, Dundubhi, Pushya, śu. 5, Sunday, [Uttarā]yaṇa-samkrānti. The date is irregular. In the cyclic year Dundubhi, Uttarāyaṇa commenced on Pushya śu. 3, Sunday. Its Christian equivalent would be A. D. 1082, December 25.

The object of the epigraph is to record the gift of income derived from tolls and levies such as *perjuṅka*, *bilkode*, etc., in the district of Alande Thousand for the daily worship and offerings to the god Sōmēśvara of Alande by the king¹ at the request of the queen Chandaladēvi. The gift was entrusted to the hands of the teacher Surēśvara Paṇḍita² who was in charge of the temple. Further donations to the god were also made by Yuvarāja Mallikārjuna and others.

Yuvarāja Mallikārjuna was a son of Vikramāditya VI. Kumāra Sōmēśvara was another son who also figures as the donor in the inscription (ll. 55-56). Mallikārjuna is addressed as *Yuvarāja-Vallabha* and described as the crest-jewel among the princes (*Kumāra-śikhāmaṇi*). He was brave and valourous in war. Impressed by his ability, the king installed him as his heir apparent. He was the seniormost among the princes.³ Under instructions from the king he was governing the district of Alande Thousand.

¹ It is clear from the context that the expression *Ballavarasar* occurring in lines 36 and 51 refers to the reigning king. The word *Ballava* which is a general term, is evidently derived from the specific title *Vallabha* borne by the Western Chālukyas of Bādāmi and the Rāshtrakūṭas of Maḷkhēḍ. It is met with in its above-noted derivative form in some records of the Chālukyas of Kalyāṇa also, who followed the ancient tradition. See for instance, *S. I. I.*, Vol. IX, pt. i, No. 104, l. 26; No. 119, l. 11; No. 121, l. 12; *Ind. Ant.*, Vol. X, p. 127, l. 11. Also see the *Ajitatīrthakarapurāṇatilakam* (āśvāsa i, verse 45) of the Kannāḍa poet Ranna, wherein *Ballaha*, the variant form of the same title, is used to denote the reigning king who was Taila II.

² This teacher is identical with his namesake who figures in an inscription from the Bellary District, as the administrator of a small tract, 17 years later; *S. I. I.*, Vol. IX, pt. i, No. 165.

³ *B. K.* No. 1 of 1937-38.

Mallikārjuna figures in a fairly large number of inscriptions¹ almost from the commencement of his father's reign and it would be useful to summarise the main facts gathered about him from these records. He is consistently spoken of as *Yuvarāja*² and the epithet *Mahāmaṇḍalēśvara* is never applied to him as in the case of the other sons of the king. This testifies to the unique and exalted position held by this prince among the princes of the royal household. He is specified as the son of the crowned queen (*Paṭṭamahādēvi*) who was most probably Lakshmādēvi.³ He had a daughter named Mahādēvi. Besides the territory under his administration noted above, he was administering the tract of Tardavāḍi Thousand in A. D. 1095, 1109, 1112 and 1115 and the province of Karahāḍa Four Thousand in A. D. 1116. The last date so far known for him is A. D. 1123.

Before reverting to Sōmēśvara alluded to above, we have to take note of another son of Vikramāditya VI, named **Jayakarṇa**. He seems to have stood next in seniority to Mallikārjuna. Chandaladēvi was his mother.⁴ He figures in five records⁵ ranging in date from A. D. 1102 to 1122. From the provenance of these epigraphs it may be gathered that he was connected with the administration of the area now comprising portions of the Gulbarga, Bijapur and Belgaum Districts.

We now come to **Sōmēśvara** who appears to have been junior to Jayakarṇa. Born of Chandaladēvi,⁶ he was the co-uterine brother of the latter prince. He is mentioned in later records ranging until the last year of his father's reign.⁷ He bore the title Chālukya-Gaṅga-Permāḍi,⁸ which he must have inherited from his father.⁹ As the epigraphs containing information about him come from the Warangal, Karimnagar and Nalgonda Districts of the Hyderabad State and are of A. D. 1106-7 and 1124-25, it may be surmised that he was connected with the administrative machinery of those areas in these years.

The fourth and the last known son of Vikramāditya VI was **Taila** or **Tailapa**. He seems to have been the juniormost of the lot. From the epithet *Chandaladēvi-nayana-sarasija-sūrya* (delight to the lotus eyes of Chandaladēvi) applied to him in some inscriptions, it follows that he

¹ I have listed 12 records referring to this prince which range in date from A. D. 1079 to 1123. They are as follows: above, Vol. XV, p. 29; B. K. Nos. 90 of 1929-30, 3 of 1930-31, 183 of 1933-34, 1 of 1937-38, 120 of 1940-41, No. 13 of 40-41 of the Kannada Research Office, Dharwar; Bandaravāḍi inscription (*Mackenzie Collection*); one inscription each at Aland and Ruddavāḍi and two inscriptions at Māsyaḷ (my private collection). Most of these are unpublished. In B. K. No. 90 of 1929-30, dated in A. D. 1095, Mallikārjuna is given the title, *Mālava-baḷa-baḷāhaka-samīrana* (whirlwind to the clouds, the forces of Mālava). This shows that he had distinguished himself in one or more campaigns against Mālava. B. K. No. 3 of 1930-31, dated in A. D. 1112, mentions two more titles of this prince, viz., *Padmanāḷa-giri-vajra-daṇḍam* and *Viśaḷarāya-kuvara-java-daṇḍam*. As Padmanāḷagiri which is identical with modern Panhālā, was under the sway of the Śilāhāra princes, these titles seem to contain a reference to an expedition conducted by Mallikārjuna against the rulers of that house (*vide Bom. Gaz.*, Vol. I, pt. ii, p. 549).

² It is interesting to note that Jayasimha, the younger brother of Vikramāditya VI, is also styled *Yuvarāja* in a good many inscriptions ranging from A. D. 1077 to 1082; *vide* B. K. Nos. 237 of 1928-29, 128 of 1926-27 and *Bom. Gaz.*, Vol. I, pt. ii, p. 449.

³ *Bom. Gaz.*, Vol. I, pt. ii, p. 448.

⁴ *Ibid.*, p. 449.

⁵ Kāḷaḡi record (*ibid.*, p. 455); Bandaravāḍi inscription (*Mackenzie Collection*); B. K. Nos. 93 and 94 of 1936-37; Konṇūr inscription (*J. B. B. R. A. S.*, Vol. X, p. 287). I am indebted to Mr. M. Venkataramayya for the references to the *Mackenzie Collection*.

⁶ This piece of information is furnished by an inscription from Tengaḷi, Gulbarga District, dated Śaka 1084 (=A. D. 1163) in the reign of Taila III (my private collection).

⁷ *Telangana Inscriptions*, Western Chālukya records: Nos. 13, 35 and 36.

⁸ The last two of the above-noted inscriptions associate his name with this title.

⁹ Vikramāditya VI bore the title Chālukya-Gaṅga-Permāḍi on account of his relationship with the Gaṅga family through his mother who was a princess of that house (*S. I. I.*, Vol. I, pt. i, Nos. 95 and 118; *Ep. Carn.*, Vol. XI, Dg. 140).

was born of her.¹ He figures in ten records² of his father's reign, which range in date from the 38th to the 46th year (A. D. 1113 to 1122). For most of this period he appears to have been holding a responsible office in the southern part of the kingdom. Inscriptions from the Anantapur District show that he was in charge of the tract Sindavāḍi Thousand with his headquarters at Tumbūla.³ About A. D. 1122 his sphere of activity shifted to the north and we find him functioning in the area of the modern Nalgonda and Mahboobnagar Districts of the Hyderabad State. His headquarters was now at Kōḍūru. His wife Lakshmīdēvi and son Permāḍi also figure with him in these northern epigraphs.⁴

It may be seen from the above discussion and from the subsequent history of the Western Chālukya house that neither Mallikārjuna nor Jayakarna survived their father to assume the reins of the kingdom. Vikramāditya VI was succeeded by Sōmēśvara III. This leads to the inevitable conclusion that both of them must have predeceased their father at the close of his long reign somewhere between the years A. D. 1122-23 and 1126. But Taila survived and he figures in an inscription⁵ dated in the 7th year of his brother Sōmēśvara's reign (=A. D. 1132). Being the brother of the reigning king and seniormost member of the royal family, his status must have improved by this time, for we find him addressed as *Yuvarāja* in that epigraph.

The present epigraph contains the following **place-names**. Alande, mentioned in a number of contexts and also referred to as Alandāpura, is the present-day Aland,⁶ the provenance of the record. It was evidently the headquarters of the territorial division Alande-Sāsira, which must have taken the name after it. This position is further confirmed by the specific statement, in l. 35, that it was the first and foremost village (*modula bāḷa*) in Alande-Sāsira. Alande-Sāsira or Alande One-Thousand comprised a political and geographical unit made up of one thousand villages. It represented roughly parts of the modern Gulbarga District and the adjoining area.⁷

¹ The suggestion thrown out on p. 89 of the *Madras Epigraphical Report* for 1921-22 regarding the identity of Jayakarna with Tailapa, is untenable. Firstly, the two are names of two distinct individuals; and secondly, epigraphical evidence is clear enough to show that they were functioning in two different and distant parts of the kingdom at a particular period of time.

TRANSLATION

Verse 1. Sōmēśvara, whose lotus feet are butted by the jewelled diadems of all the gods, descended from the glorious Kailāsa to this Alandāpura, an ornament of the earth.

V. 2. The illustrious Alande is holy on account of the god Sōmēśvara and this earth is holy on account of Alandāpura. How much more is it holy on account of the sage Surēśvara !

V. 3. How great is the delight accorded by this son, Surēśvara, an ornament of the monks, to (his teacher) Lōkābharaṇa, replete with knowledge, truthful and embellished with sterling virtues !

V. 4. Is he an ordinary human being, the illustrious ascetic Surēśvara, a bee at the lotus feet of Sōmēśvara, pleasingly gentle in speech, whose lotus feet are praised by the emperor ?

V. 5. As the king **Vikramāditya** is ruling according to the behests of this prince among monks, the Kali age has become Kṛita age and the kingdom has become supremely righteous. Is Surēśvara ordinary ?

V. 6. The illustrious Vikramāditya, lord of the earth, has earned renown being aptly praised by all the people in this manner : " His feet are butted by the coronets of hostile kings ; he is the unrivalled overlord of the earth encircled by the seven seas ; he is a great and constant donor, in his own characteristic way, to the deserving assemblage of bards and the learned ; his reputation has been engraven on the tusks of the rows of elephants of the quarters ".

V. 7. From king Vikramāditya is born prince Mallikārjuna who is an abode of all virtues and is praised by the people, in the same manner as was born the Crocodile-bannered God (i.e., Cupid).

V. 8. Prince **Mallikārjuna**, an ornament of the earth, and Vīra-Nārāyaṇa (Vishṇu in heroism), appears graceful like the pillar-like arms of king Vikramāditya, having routed the hostile kings who encountered him with sham bravery, protected those who approached him with awe and reverence saying, " you are our saviour ! What command ? " and exterminated those who were a source of trouble.

V. 9. The far-famed emperor Vikramāditya seeing his irresistible prowess and thus appreciating with genuine affection, " He alone is worthy of the great office of the **heir-apparent** ", installed Mallikārjuna, the crest-jewel of princes, as his successor with due ceremony.

V. 10. Distinguished is the general Kālidāsa, foremost among the commanders of the forces, praised by the world, supreme among the scions of Manu, exalted in prowess, glorious with the eminence earned by the worship of the gods and the Brāhmaṇas, a charming receptacle of authority vested by the Chālukya emperor and counsellor to the household of the senior queen.

V. 11. Thus renowned Kālidāsa's son is the famous Nāchaṇa, a follower of the path of Manu and the veritable moon imparting delight to the *chakōra* birds, namely, the assembly of the learned.

¹ Metre : *Anuṣṭubh*.

² Metre : *Kanda*.

³ One or two lines after this appear to have been damaged and lost.

V. 12. The commander of the forces, Nāchi, became the repository of renown when the world sang (*his virtues*) in admiration in the following terms : “ His conduct is in keeping with the path of Manu ; in serenity he compares with the ocean ; in eminence.....and in valour he is on par with the son of the Lord of the Day (*i.e.*, Karna)”.

V. 13. Being aptly described by the world in commendable expressions Nācharasa earned the epithet, *Parārtha-Vidyādhara* (*i.e.*, the *Vidyādhara* among the philanthropists).

V. 14. The commander of the forces, Nāchi, who possessed excellent virtues and was like his own mind to the king, assumed the office of principal counsellor as directed by the emperor.

Lines 29-33. Hail ! The asylum of the entire earth, lord of the Goddess of Fortune and the Earth, the paramount overlord of sovereigns, the great ruler, the supreme master, ornament of the lineage of Satyāśraya, embellishment of the Chālukyas, the illustrious king Tribhuvanamalladēva is carrying on his victorious rule with ever-increasing prosperity in happiness and entertainment of pleasing conversation, to endure as long as the sun, the moon and the stars, from his residence Kalyāṇa.

Ll. 33-51. On Sunday, the fifth day of the bright half of the month of Pushya of the illustrious Chālukya-Vikrama year 7, corresponding to the cyclic year Dundubhi and on the holy occasion of the Uttarāyana-samkrānti, the king, hail !—at the request of the queen Chandradēvi who is privileged to enjoy the thousand-fold fruit accruing from the unceasing supreme welfare and prosperity ; who strolls like an intoxicated elephant in the royal premises ; the Goddess of Love to the Mind-born God (*i.e.*, Cupid, *in the form of her husband*), the illustrious sovereign ; subduer of the sense of elation of the jealous co-wives ; bearer of the face-moon that swells the milky ocean (*in the shape of*) the mind of (*her husband*) the distinguished suzerain ; abode of splendour ; moving creeper hugging the wish-fulfilling tree, namely, the illustrious monarch ; adept in supporting those who seek her protection ; who is the blow of adamant fist on the heads of malicious and conceited co-wives ; who showers gold incessantly ; whose immaculate lineage has purified the whole realm¹ of the harem ; who imparts delight to the heart of the god Nārāyaṇa among kings, to wit, Vikramāditya VI ; who is worshipper of the lotus feet of the goddess Gauri (=Pārvatī) ; who derides the ladies of the harem, indecorous with the elation of their good fortune ; who dwells in the expansive chest of the illustrious lord Tribhuvanamalladēva and who bears the title, ‘Fairy Queen in the art of dancing’ ;—made over with the pouring of water a gift of income, free from all impositions, derived from tolls and levies such as *perjuṅka*, *bilkode*, *vaḍḍarāvula*, on a thousand pack-bullocks in the region of Alande Thousand, for the offerings to the god Svayambhu Sōmēśvara of Alandāpura, the first and the foremost town in the district of Alande Thousand, to the illustrious divine Surēśvara Paṇḍita, in charge of the temple of Sōmēśvara ; hail !—who is endowed with self-restraint, self-discipline, spiritual study, meditation, conservation, silence, religious practice, incantation, absorption and exemplary character ; who is an outcome, as it were, of the heart-felt wishes of the wise persons ; who quenches the wild fire of hunger of the helpless and the destitute ; who quells the intoxication of the elephant of sinfulness ; who is ever wakeful in protecting his creed ; who is the never-failing abode of plenty ; a crest-jem among the learned ; wish-fulfilling jewel to the elite ; who has secured the gracious boon by propitiating the feet of the eminent divine Vādidēva Paṇḍita ; who diverts himself in doing good to others.

Ll. 51-55. And Yuvarāja-vallabha Mallikārjuna who is holding the administrative charge of the province of Alande Thousand by the favour of the king, exempted the taxes, *jalla*, *kaḷḷavalike*, *sāda* and *baṇṇige* in the twelve villages endowed to the god Svayambhu Sōmēśvara of Alande, after making a request to the king, at the instance of Daṇḍanāyaka Nācharasa, the *pergaḍe* of the province.

¹ As required by the context, I have translated the expression *jaḡaḍaḷa* as ‘realm’. Its other meaning ‘illustrious’ does not suit here. See above, Vol. XV, p. 357, verse 18.

Ll. 55-57. And again at the request of Gommalaya Nāyaka, the *heggaḷe* of the town, **Kumāra Sōmēśvara** made a gift of ten coins per month out of the money income accruing from the cess in the town of Alande for a perpetual lamp to the god (Sōmēśvara).

Ll. 57-58. Sillapayya, the brother-in-law of Gommalayya, made a gift of four mango trees in the garden of Baladēva lying to the west of the road leading to Harṇṇa[gi] for the benefit of the ascetics, their disciples and the lay-students.

Ll. 58-59. The merchant guild of Alande made a gift of fifty (betel) leaves on the sale of every load to the god.

Ll. 59-60. The merchant guild, the *Mahījanas* of the town and the establishment of the five *mathas* will maintain all these charities as long as the sun and the moon endure.

Ll. 60-64. (Imprecation against the transgressors of charity.)

No. 6—JAVANTINATHAPURAM INSCRIPTION OF VARAGUNA-MAHARAJA

(1 Plate)

M. VENKATARAMAYYA, OOTACAMUND

The subjoined inscription¹ is engraved on a slab now built into the front wall, right of entrance, of the Lakshmīnārāyaṇa temple at **Javantiṇāthapuram**, Lālgudi *tāluk*, Tiruchirāpaḷḷi District. The engraved stone must have originally stood elsewhere in the vicinity since the wall in which it is now built appears to have been recently constructed. It is fragmentary, the lower part containing the concluding portion of the inscription being broken and lost. Nevertheless in the extant portion is retained the main purport of the record, which belongs to the reign of the early Pāṇḍya king, Māraṇḍaiyaṇ *alias* Varaguṇa-Mahārāja.

The inscription is engraved in Tamil **characters** of about the 9th century A.D. found in the locality.² A few Sanskrit words and letters are in the Grantha characters. The script does not call for any special remarks. The **language** of the record is Tamil.

The inscription is dated in the 4+9th year of the reign of the Pāṇḍya king, Māraṇḍaiyaṇ *alias* Pāṇḍya-adhipati Varaguṇa-Mahārāja. It registers the gift, made by the king, of gold for the expenses of burning, day and night, two perpetual lamps before the god, Perumāṇḍigaḷ of Tiru-Mayilraṅgam, (a suburb) of Idaiyāṅṅumaṅgalam. The gift was placed, for management, in the hands of a Vēḷaṇ of Aṇḍanāḷu, whose name is lost in the missing part of the inscription.

The record is important for the details of **date** contained in it as they help in calculating the corresponding date in A.D., thereby solving a few problems pertaining to the chronology of the reign of this Pāṇḍya king. The record bears the date 4+9th year of reign, Dhanuṣ, Monday, Avittṭam. The form in which the year of reign is quoted, in years 'opposite to the 4th year', is to be noted in particular in view of the existence of a large number of records dated similarly, in years added on to 4, issued in the reign of Māraṇḍaiyaṇ.³ There are again some others men-

¹ *Annual Report on Indian Epigraphy for 1946-47*, No. 104.

² As in the Toṇḍūr inscription of Dantivarman, *S.I.I.*, Vol. XII, plate V; Tillasthānam and Nerkuṇam inscriptions of Rājākēśarivarman (Āditya I), *S.I.I.*, Vol. III, plate VII.

³ No. 480 of 1917 of the Mad. Ep. Coll. (4th year + 360 day) at Kuttālam (Tinnevely Dt.); 90 of 1908 (4+593 day) at Tiruppattūr (Ramnad Dt.); 364 of 1907 (4+1+1st year) at Āḍuturai (Tanjore Dt.); 358 of 1907 (4+1+1+1+1st year) at Āḍuturai (Tanjore Dt.); 13 of 1908 (4+4th year) at Kumbakōṇam (Tanjore Dt.); 136 of 1908 (4+6th year) at Tiruppattūr (Ramnad Dt.); 414 of 1904 (4th year + 2501st day) at Tiruchirāpaḷḷi; 413 of 1904 (4+9th year) at Tiruchirāpaḷḷi; 84 of 1910 (4+9) at Tiruveḷḷarai (Tiruchirāpaḷḷi Dt.); 105 of 1905 (*Ep. ind.* IX, 84) of 4+12th year at Ambāsamudram (Tinnevely Dt.); 185 of 1926 (4+12th year) at Tiruchirāpaḷḷi; No. 137 of 1908 (4th year + 4635th day) at Tiruppattūr (Ramnad Dt.); No. 51 of 1895 (4th year) at Tillasthānam (Tanjore Dt.) mentioning Varaguṇa Mahārāja and Kōṇ-Parāntaka (i.e., Vīraṇārāyaṇa Śaḍaiyaṇ?).

tioning Varaguna alone but likewise dated in years 'opposite to 4.' At Lālgudi, about 4 miles from Javantināthapuram, were found two records, one of which refers itself to the reign of Mārañjadaiya *alias* Pāṇḍya-kulapati Varaguna-Mahārāja and dated in the 4+9th year of his reign. The other which does not specify the ruling king is dated in the regnal year 4+1. The former contains the additional details of date, *viz.*, Dhanus, Tuesday, Śadaiyam. These details show that this record was issued just one day later than the Javantināthapuram inscription under study. Mr. K. V. Subrahmanya Aiyar who has edited these two inscriptions¹ worked out the date of the record containing astronomical details, as equivalent to A.D. 824, Nov. 29, Tuesday, after taking into consideration several alternatives. The other record, which mentions as donor the Pallava king Nandivarman III, the victor of Teḷḷāru, he assigned to A.D. 816. He assigns both the inscriptions to Varaguna I. Accepting for the nonce the correctness of the date proposed by Mr. K. V. Subrahmanya Aiyar for the record giving astronomical details, the date of our record would be Monday, Nov. 28, A.D. 824, which is the day on which the details found in it tally. But as will be shown presently, the above dates for the Lālgudi inscription and for our epigraph are not acceptable on several grounds, one of which is the existence of still another set of corresponding dates for them which compels acceptance in preference to any other alternative.² These are A.D. 875, December 5, Monday for our record and December 6, Tuesday for the Lālgudi record B. It is found that by accepting these dates we get A.D. 861-2 as the year of accession of this Pāṇḍya king, a date which is precisely the same as the one obtained for Varaguna from the Aivarmalai (Ayyampālayam) inscription which couples his eighth year of reign with Śaka 792.³ Scholars are agreed that this Varaguna is identical with Varagunavarman II, the son and successor of Śrīmāra, of the Pāṇḍya genealogy furnished in the Bigger Śiṅṅamanūr plates of Śadaiyamāraṇ (Rājasimha).⁴ Yet another record of Pāṇḍya-Mahārāja Mārañjadaiya at Tiruvellarai dated in the 4+9th year of reign contains the astronomical details, Vriśchika, Monday, Aśvati which correspond to A.D. 874, November 22, Monday, yielding A.D. 861-2 as the initial year of the king's reign.⁵ It would follow from all this that the king who consistently issued his records in the years 'opposite to 4' though variantly called Mārañjadaiya, Varaguna and Mārañjadaiya *alias* Varaguna-Mahārāja may be considered as one and the same ruler and identical with Varagunavarman II, the eldest son and successor of Śrīmāra Śrīvallabha and whose accession took place in A.D. 861-2. It will not be wrong to arrive at this conclusion since we have a similar instance in respect of another Pāṇḍya king, Śadaiyamāraṇ, most of whose records being dated in regnal years 'opposite to 2' enable us to identify him with Śadaiyamāraṇ Rājasimha, the donor of the Bigger Śiṅṅamanūr plates which were issued in the 2+14th year of his reign.⁶

Another important consideration which would make the dates proposed by Mr. K. V. Subrahmanya Aiyar for the Lālgudi inscriptions A and B assigning them as he did to Varaguna I unacceptable is that while the Lālgudi record A, the date of which is fixed at A.D. 816 by Mr. Aiyar, mentions as donor Pallava Nandivarman III, the victor of Teḷḷāru, latest researches show that this king ruled approximately between c. 851 and 873 A.D. and not between c. 812 and 844 A.D., as held by Mr. Subrahmanya Aiyar; for, it can now be accepted as more or less correct that Nandivarman II, the

¹ Above, Vol. XX, pp. 46 ff.

² Mr. M. S. Sarma in a paper entitled *Prithvīpati, Varaguna and Aparājita* in *J.O.R.*, Vol. IX, pp. 227-8, equates the date of the Lālgudi record B with December 5th, Tuesday, A.D. 780. This date is rather too early to be accepted in view of the reasons set out by us above.

³ No. 705 of 1905 of the Mad. Ep. Coll.

⁴ *S.I.I.*, Vol. III, p. 449; *Pandyan Kingdom* (1929), p. 45.

⁵ No. 84 of 1910 of the Mad. Ep. Coll.; above, Vol. XI, p. 253. Mr. Sarma, however, gives A.D. 780, November 13, Monday as its equivalent (*J.O.R.*, Vol. IX, p. 228). Mr. K. V. S. Aiyar ascribing the record to Varaguna I gives the corresponding date as A.D. 824, November 7, Monday (above, Vol. XX, p. 50 and n. 3, p. 51).

⁶ *S.I.I.*, Vol. III, pp. 441 ff.

grandfather of Nandivarman III of Tellāru fame, ascended the throne somewhere about A.D. 733.¹ In consequence, Nandivarman III could not have come to the throne before c. 851 A.D. (733 *plus* 65 and 52 years, the duration of the reign of Nandivarman II and Dantivarman). The victory at Tellāru is mentioned in his records from the 18th year² of reign onwards, *i.e.*, c. 868-9 A.D., though it is not unlikely that it was secured several years earlier.³ Hence the date of the Lālgudi record A cannot be earlier than c. 850-1 A.D., the approximate date of the accession of Nandivarman III. Our date for the record, assigning it as we do to Varaguṇa Mahārāja II, would be A.D. 867. This date falls well within the reign of Nandivarman III, besides indicating that the king's victory at Tellāru was won before that date.

On the strength of the foregoing considerations, the Javantiṇāthapuram epigraph under study may be assigned to Varaguṇa II who ruled from A.D. 861-2 and consequently the equivalent of the details of date cited in it would be A.D. 875, December 5, Monday. It can, therefore, be concluded that inscriptions of Māraṇjadaiyaṇ *alias* Varaguṇa Mahārāja issued in the regnal years 'opposite to 4' may be assigned to this king in preference to Varaguṇa I. At present there are no means of identifying Māraṇjadaiyaṇ, whose inscriptions are dated in a peculiar roundabout way like such and such year opposite to the 35th year,⁴ with his namesake whose records are dated in the more common fashion of giving simple regnal years, like 5, 10 and so on.⁵ It is not unlikely that some of them may belong to Varaguṇa II. Nevertheless, taking into consideration only those records of Varaguṇa II dated in the years 'opposite to 4', a tolerably good account of the events of his reign may be given.

From these records of his reign it is learnt that he conducted a campaign against Iḍavai in the Chōḷa country and after overrunning it proceeded as far as Araiśūr on the bank of the Pennār in Toṇḍai-nāḍu,⁶ which was the dominion of the Pallavas. The attendant circumstances of this campaign seem to be somewhat as follows: he entered the Chōḷa territory on the Kāvērī about A.D. 866.⁷ Thence he seems to have directed his campaign against the Pallava Nandivarman III who perhaps had earlier caused discomfiture to the Pāṇḍyas by a victory over them at Tellāru and had occupied the Chōḷa territory, the bone of Pāṇḍya-Pallava contention. By A.D. 867 the Pallava was humbled, since we find him figuring as donor in the record of the Pāṇḍya king at Lālgudi (ins. A.). The Lālgudi (A) and the Javantiṇāthapuram records actually testify to the presence of Varaguṇa II in A.D. 867 and 875 at Iḍaiyāṛṛumaṅgalam in the Iḍaiyāṛṛunāḍu, evidently the Iḍavai in the Sōḷa-nāḍu against which the Pāṇḍya Māraṇjadaiyaṇ is specifically stated to have gone on a campaign.⁸ Iḍaiyāṛṛumaṅgalam

¹ See *J.O.R.*, Vol. XV, p. 119. Approximately the same date for the accession of Nandivarman II can be arrived at from the recently discovered Ulchāla record of Chālukya Vijayāditya. (*Ancient India*, No. 5, Jan. 1949, p. 54.)

² No. 283 of 1901 of the Mad. Ep. Coll. In *Madras Christian College Magazine*, Vol. VIII, p. 98, Venkayya publishes another record of the king from the Ulagaṇḍaperumāl temple, Conjeeveram, dated 18th year of reign and mentioning his victory at Tellāru. (*S.I.I.*, Vol. V, 567.)

³ Nos. 52 of 1895 and 11 of 1899 of the Mad. Ep. Coll. are dated in the 10th and 12th years of a king whose name is not stated, the records commencing with the word 'yāṇḍu' only. But they record benefactions by Nandivarman, the victor of Tellāru. Should the records be assigned to his reign, we may believe that by his 10th year, *i.e.*, c. 861-2 A.D. Nandi won the victory. This date would tally with the facts of the Lālgudi record A of c. A. D. 867 in the mention it makes of Nandivarman of Tellāru fame.

⁴ Nos. 423 of 1906 (*Ep. Ind.*, Vol. XXII, 5), 431 of 1914, 298 of 1916, 863 of 1917 and 12 of 1929, all of the Mad. Ep. Coll.

⁵ Nos. 9 and 10 of 1899; 311 and 313 of 1904; 104 and 128 of 1905; 37 and 43 of 1908; 422 and 430 of 1914; 605 of 1915; 295 of 1916; 10 and 85 of 1927; 21 of 1930-1; 297 of 1940-1, all of the Mad. Ep. Coll.

⁶ No. 105 of 1905 of the Mad. Ep. Coll.; published *above*, Vol. IX, p. 84.

⁷ No. 21 of 1930-1 of the Mad. Ep. Coll.

⁸ No. 690 of the 1905 of the Mad. Ep. Coll.; *above*, Vol. IX, p. 84.

means the Maṅgalam (*agrahāra*-village) between (two) rivers (*iḍai* + *āru*) and the present Javantināthapuram and Lālgudi are situated just between the rivers Kāvēri and Kolliḍam (Coleroon) which was the region called Iḍaiyārru-nāḍu or perhaps Iḍavai for short. It is not unlikely that it was during one of these campaigns that Varaguṇa II destroyed Vēmbil (Vēmbarrūr) and encamped at Niyamam (Nēmam, Tanjore taluk) as stated in his Tiruchirāppalli records¹ (c. A.D. 874-5). His Ambāsamudram inscription² of A.D. 878 states that he encamped at Araiśūr on the bank of the Peṇṇār in Toṇḍai-nāḍu, an event which might have taken place in the course of the subjugation of Nandivarman III which achievement, as pointed out above, occurred before A.D. 867. The text of the Ambāsamudram record does not militate against such a possibility. Perhaps it was on the occasion of his presence in the Pallava country that Teṇṇavaṇ Pallavaraiyaṇ *alias* Māraṇ Āchchaṇ of Pōliyūr (*i. e.* Pōlūr near Arkōṇam), the seat of a minor Pallava family³ sought service under him. This chieftain figures in a record⁴ of Varaguṇa at Tiruppattūr, Ramnad District, of A.D. 867-8. It cannot be said, however, that even after these military marches across the Chōḷa country into the Pallava dominion, Varaguṇa II was able to establish anything like sustained or supreme control over the regions. For, we find that the Pallavas were not completely dislodged from the Chōḷa territory in these years. Records of Nandivarman III of the 21st and 22nd years of reign (c.A.D. 872-3)⁵ and of Nṛipatuṅga of the 2nd year of reign (c. A.D. 875) are found⁶ in the Chōḷa country which, apparently, continued to be a disputed land till Nṛipatuṅga, by his resounding victory against the enemy in or about A.D. 880 established his rule firmly over this territory, too.⁷ In a record of the 18th year of the reign (c. A.D. 890) of the Pallava king at Tiruvadi in the Cuddalore *tāluk*, Pāṇḍya Varaguṇa-Mahārāja figures as the donor.⁸ Subsequent to this date we rarely meet with any records of Varaguṇa II in Chōḷa territory while records of Nṛipatuṅga of regnal years 22⁹ (c. 894), 23¹⁰ (c. 895) and 24¹¹ (c. 896) are found in the same region. It would, therefore, appear that in the latter part of the reign of Varaguṇa II, the Pāṇḍyas lost both in power and in prestige.

Turning now to the text of the Javantināthapuram record under study, a few remarks may be offered regarding the places mentioned in it. **Iḍaiyārrumaṅgalam**, the meaning and derivation of which have been explained above, may be Javantināthapuram itself. The residents of this village say that it had another name **Mayilraṅgam** which is evidently what is mentioned in the inscription as Iḍaiyārrumaṅgalattu-Tirumayilraṅgam. **Tirumayilraṅgam** was perhaps another name for Iḍaiyārrumaṅgalam or, more likely, a suburb of it. **Aṇḍanāḍu**, the region whence the Vēḷaṇ hailed, is identical with the country round about Diṇḍigal,¹² in the Madura District.

No. 7—CURZON MUSEUM INSCRIPTION OF KANISHKA'S REIGN ; YEAR 23

(1 Plate)

B. CH. CHHABRA, OOTACAMUND

This short but highly important record appears on the pedestal of a Bōdhisattva image, now deposited in the **Curzon Museum of Archaeology at Mathurā**. It has been briefly noticed in the *Annual Report, Archaeological Survey of India*, for 1920-21, p. 35. A pointed reference to this has subsequently been made by Prof. V. V. Mirashi, urging the desirability of its proper edition.²

The inscription is not well preserved. Portions of it have apparently been destroyed. The writing is arranged as follows : the upper band of the pedestal contains one line uninterrupted ; below that, in the centre, appears the *tri-ratna* symbol flanked by two human figures, apparently one male and one female ; behind each figure occurs a short line of inscription ; to the extreme left there is a figure of rampant lion ; corresponding to this there must have been a similar figure on the extreme right also, which is now damaged ; the last line of the inscription occurs on the lower band, right at the bottom ; a portion of this line seems to have been obliterated. In this way the inscription occurs in four sections rather than in four regular lines.

The **characters** are Brāhmī of the usual Kushāṇa type. The form of *m* in the very first word is noteworthy inasmuch as it is of the southern class. That in *Masyagutasya* is of the northern class, which is more common in the Kushāṇa inscriptions, while *m* in [ma]hārasya, which immediately precedes the word *Masyagutasya*, is not clear. In fact, it is doubtful whether it is *m* at all. The subscript *y* in the first word is of the tripartite kind, while elsewhere in the inscription it is throughout of the bipartite type.

¹ The rest of the inscription is lost.

² Above, Vol. XXVI, p. 295, n. 2.

The **language** is the mixed dialect that is generally found in the Mathurā inscriptions of the Kushāṇa period. It may be observed that the scribe has either wrongly omitted a few letters or else purposely used abbreviated forms in certain words. The very first word, for instance, reads *maharasya* which obviously stands for *mahārājasya*. The next is *Kani*, by which no doubt Kanishka is meant. It is, however, strange that the scribe should have shortened the usual expression *Kanishkasya samvatsarē*, or something to that effect, into a simple *Kani*. The title of Masyaguta is also given as [*ma*]hārasya. As has already been indicated, the form of *ma* here is very uncertain.

The **object** of the inscription is to record the setting up of a Bōdhisattva image by a lady, called **Puśya**[*datā?*] (**Pushyadattā**), daughter of *Mahāra Masyaguta* (*Mahārāja Matsyagupta*), in her own¹ monastery, in the first fortnight of the *Grishma* season of the year 23 (of the reign) of *Mahārāja Kanishka* (which in continuation is counted as the Kushāṇa era).

The importance of the date has already been recognised. The year 23 is proved to be the last year of Kanishka's reign, because we have got an inscription of his son and successor Huvishka, which is dated in the year 24 of the era thus established.

What is of much greater importance is the mention of a *Mahārāja Matsyagupta*² as a contemporary of Kanishka. This is evidently a new name, and, what is more, an indication of the existence of a contemporaneous royal family. Whoever this Matsyagupta was, it is apparent that he was on friendly terms with Kanishka, as is to be inferred from the fact that he or his daughter had built a *vihāra* in the kingdom of the Kushāṇa monarch, as the inscription has it.

It may be argued that Matsyagupta might have been an ordinary individual and not a king, and the word read as *maharasya* might in reality be something different, may be one denoting the name of the place from which Matsyagupta might have hailed. The reading of the first letter as *ma* has been admitted to be doubtful. It may not be *ma*, but just two horizontal strokes, one above the other, meant for a sign of punctuation.

Two considerations are against the foregoing argument. The first is : *Maharasya Kani*, it may be admitted, stands for *Mahārājasya Kanishkasya*, and just as here the first word is imperfectly written, so may it be in the case of *Maharasya* preceding *Masyagutasya*. Secondly, the name ending in *guta*, i.e., *gupta*, strongly suggests itself to be that of a king. Besides, the contraction *Kani* may equally be significant here. Possibly the scribe was an employee of Matsyagupta, who attached more importance to the contents of the record than to the particulars of the date. He thought, his abbreviation *Kani* was clear enough to serve the purpose, whereas he had to mention his master's name in full. Finally, it may be observed that the two human figures, noticed above as flanking the *triratna* symbol, that are not usually met with in such cases, in the present instance, may be taken to represent *Mahārāja Matsyagupta* and his daughter *Pushyadattā*. This lends some further weight to the supposition that in Matsyagupta we have a king and not an ordinary individual.

It will be worth while to search for more particulars about this *Mahārāja Matsyagupta* in literature and in epigraphy.

¹ That is how the syntax would have it, but possibly the meaning intended to be conveyed is 'in his own monastery', 'his' referring to the father of the lady.

² The equation of *Masyaguta* with *Matsyagupta* was kindly suggested to me first by Mr. N. Lakshminarayan Rao. I have no doubt about its correctness. Personal names in the period concerned are often after the names of various constellations such as Pushya, Viśakha, Prōshtha, etc. And in the present instance, *Matsya*, i.e., *Mina*, is also one such.

TRANSLATION

The first fortnight of Summer, the year 23 of *Mahārāja* Kanishka—on this day, Pushya[dattā], the daughter of *Mahārāja* Matsyagupta, establishes [this] Bōdhisattva in her own monastery.⁵

No. 8—MADRAS MUSEUM PLATES OF THE TIME OF NARENDRADHAVALA

(Plate 1)

DINES CHANDRA SIRCAR, OOTACAMUND

THERE are in the office of the Government Epigraphist for India at Ootacamund several sets of impressions of a copper-plate inscription which is now preserved in the Madras Museum. The impressions originally belonged to the office of the Assistant Archaeological Superintendent for Epigraphy, Southern Circle. The find-spot of the record is unknown; but there is little doubt that it was secured from some locality in Orissa. According to the *Catalogue of Copper-plate Grants in the Government Museum, Madras*, 1918, p. 58, the plates were received from the Collector of the Ganjam District. They were examined by the Assistant Archaeological Superintendent for Epigraphy and a short note on the inscription was published in his report for the year 1916-17, No. 11. This note was utilised by the compiler of the *Catalogue of Copper-plate Grants in the Government Museum, Madras*. It was, however, not noticed at that time that the record reveals the name of a new king of a hitherto unknown royal family of ancient Orissa. Considering the importance of the inscription, I examined the original plates which had been kindly lent to the Government Epigraphist's office by the Superintendent of the Madras Museum. I edit the record for the *Epigraphia Indica* with the kind permission of Dr. B. Ch. Chhabra, Government Epigraphist for India.

The set consists of three oblong plates each measuring $6\frac{1}{8}$ " in breadth and 4" in height. They contain four sides of writing in all, the first and the third plates having inscription only on one side. There are ten lines of writing on the first plate, nine lines on the obverse and eight on the reverse of the second plate, and only five lines on the third plate. The size of an *akshara* is about $\frac{1}{2}$ " \times $\frac{1}{4}$ ". The plates have no rims, but the incision is deep and the writing is in a good state of preservation. A layer of metal has, however, peeled off from some parts of the outer or blank

¹ From inked estampages kindly supplied, in July 1942, by Mr. M. M. Nagar, the then Curator, Curzon Museum of Archaeology, Mathurā

² What follows *Puśya* looks like the upper portion of a *da*. Possibly the name was Puśyadatā (Pushyadattā). The change of *sh* into *s* is common in this type of inscriptions. Compare *Puśyamitra* and *Puśyamitriya* of certain other inscriptions from Mathurā (Lüders' *List of Brāhmī Inscriptions*, Nos. 16, 34).

³ This word is faintly visible. The subscript *r* of *pra* looks more like medial *u*. The medial *i* of *ti* is hardly to be seen. The subscript *th* and medial *ā* of *shṭhā* are indistinct. The right-hand stroke of *pa* is mixed up with the left-hand stroke of *ya* that follows. While *ya* is fairly clear, the last *ti* is not at all clear.

⁴ This must have been followed by *hita-sukhāy=āstu* or some such expression.

⁵ Or 'in his own monastery'. See above, p. 43, f. n. 1.

INSCRIBED SCULPTURE

(FROM A PHOTOGRAPH)

face of the first plate and this has also affected some letters of the inscription on the other side of the plate (*cf.* lines 1, 2 and 10). All the three plates have a ring-hole which is about $\frac{1}{2}$ " in diameter and is about $\frac{1}{8}$ " from the proper right margin. When the plates were examined in the office of the Assistant Archaeological Superintendent for Epigraphy there was no ring with them. This is known from a short note found with the impressions. The ring was apparently taken out by making a slit at the margin near the ring-hole, which is still noticed in the second and third plates. The margin near the ring-hole in the first plate is broken. The *Catalogue of Copper-plate Grants in the Government Museum, Madras*, however, describes the plates as "strung on a ring without a seal", and this ring is seen with the plates even today. Whether the ring was found with the plates or was later made for them cannot be easily determined.

Regarding the **palaeography** of the inscription, the Assistant Archaeological Superintendent for Epigraphy says in his report, "The characters are of about the thirteenth century like those of the plates of Daṇḍimahādēvī (*Epigraphia Indica*, Vol. VI, p. 136)". He is no doubt right in assigning the record on palaeographic grounds to a date not much later than the age of the Bhauma-Kara queen Daṇḍimahādēvī of Orissa: but it is impossible to believe now, with Kielhorn¹ whom he follows, that the characters of Daṇḍimahādēvī's inscriptions belong to the thirteenth century. They are certainly earlier than the first half of the twelfth century, when the greater Gaṅgas were in possession of the lower part of Orissa. Daṇḍimahādēvī must have ended her rule considerably before the Gaṅga king Anantavarman Chōḍagaṅga who was crowned in 1078 A. D.² Some records of Daṇḍimahādēvī are dated in the year 180 or 280 probably of the Harsha era.³ The date would thus correspond to A. D. 786 or 886. It has also to be remembered that the date is written in the old style with symbols for 100 or 200 and 30 and that this system is not usually found in inscriptions of a date later than the tenth century.⁴ The plates under discussion should, therefore, be assigned to a date not later than the tenth century A. D. As we shall presently see, this dating is supported by the internal evidence of the inscription.

Interesting from the palaeographical point of view is the use of the initial vowels *a* (lines 8, 14, 16, 18, 23, 27, 28), *ā* (line 6), *i* (lines 14, 26), *u* (lines 12, 13, 19, 30) and *ē* (lines 15, 17). Medial *ē* has two forms being used often above the consonant as in modern Dēvanāgarī and sometimes to the left of it as in Bengali and Oriya. The first type is quite common, while the second is employed only in a few cases. There is no distinction between the signs for *v* and *b* and between those for subscript *v* or *b* and *dh*. What resembles a *visarga* sign has in all cases been put before the *daṇḍas* apparently as a part of the punctuation mark.

The **language** of the record is only seemingly Sanskrit and is greatly influenced by the local dialect. The rare use of the case-endings, especially the first and the second, has rendered the real interpretation of the inscription greatly difficult. Attention may be drawn to the use of words like *bṛihata* (line 10) or *bṛihula* (line 8) for Sanskrit *bṛihat* and *pāthara* for Sanskrit *prastara* (lines 8, 10, 12, 13). Words like *māhāsāmanta* or *māhāsāmanta* (for *māhāsānanta*, lines 13-14), *pāsai* (for *pāsaiḥ*, line 26), *jasya* (for *yasya*, line 24) and many others are interesting from the view point of **orthography** and exhibit influence of local pronunciation. The duplication of *dh* in *Ardhḍhaśōtri* (line 8) is also interesting. The *daṇḍas*, which have been quite extensively used, are in most cases not necessary at all.

¹ Above, Vol. VI, p. 136.

² Bhandarkar, *List*, No. 1099. The lower part of Orissa was conquered by Chōḍagaṅga from the Sōmavāṇīśis and not from the Bhauma-Karas.

³ Above, *op. cit.*, p. 139; Bhandarkar, *op. cit.*, No. 1413. The correct reading of the hundred symbol seems to be 100 and not 200.

⁴ G. H. Ojha, *The Palaeography of India* (in Hindi), 1918, p. 115.

The record is **not dated**. But as pointed out above, it has to be assigned to a date not much later than the tenth century. In this connection, it may be pointed out that the inscription refers to one Śilābhañja who seems to be no other than Śilābhañja I Āṅgaddi, founder¹ of the Bhañja royal family of Khinjalī-maṇḍala (about the Keonjhar State) ruling from Dhṛitipura and Vañjulvaka. This is suggested by the fact that the record under discussion was engraved by Padmanābha who was a son of the *Vaṇik* Pāṇḍi and was an inhabitant of Gandhaṭapāṭī. Now this person seems to be identical with the *Vaṇik-savarṇikāra* Padmanābha, son of Pāṇḍi and engraver of the Sonpur plates² of Rāṇaka Raṇabhañja who was the son of Śatrubhañja and the grandson of Śilābhañja-Āṅgaddi. It is interesting to note that Śatrubhañja was also known as Gandhaṭa and was possibly the founder of Gandhaṭapāṭī, the native place of Padmanābha son of Pāṇḍi. The Patna Museum Plates³ of Rāṇaka Raṇabhañja mentions his queen Vijyā who was the daughter of Rāṇaka Niyārṇama. It is very probable that this Niyārṇama is no other than Rāṇaka Niyārṇava mentioned in the Santa-Bommālī plates⁴ of the Gaṅga king Dēvēndravarmān (dated Gaṅga year 520 falling in 1016-18 A. D.)⁵ as the father of Bhīmakhēḍi and the grandfather of Dharmakhēḍi of the feudatory Kadamba family of Jayantyāpura. The Mandasa plates⁶ (dated Śaka 917-995 A. D.)⁷ mentions Kadamba Dharmakhēḍi as the feudatory of Gaṅga Anantavarman. His grandfather Niyārṇava or Niyārṇama thus appears to have flourished about the middle of the tenth century which, or rather the third quarter of the tenth century, seems to have been the age of Raṇabhañja. It is then possible to assign Raṇabhañja's grandfather Śilābhañja to about the first quarter of the same century. As, however, the name of Gandhaṭapāṭī mentioned in our record seems to presuppose the rule of Śilābhañja's son Śatrubhañja-Gandhaṭa and as Padmanābha is known to have served under Śilābhañja's grandson Raṇabhañja, the inscription under discussion may be roughly ascribed to the age of the Bhañja kings Śatrubhañja and Raṇabhañja of Khinjalī-maṇḍala who, as already indicated above, probably ruled about the second and third quarters of the tenth century.

The record under discussion is a *kṛaya-śāsana* (cf. lines 4 and 7) which literally means 'a deed of purchase' and indicates actually a sale deed. It may also indicate 'land sold by means of a *kṛaya-śāsana*'. The village that formed the subject of the *kṛaya-śāsana* is called Taḍēsva-(śva)raḡrāma (line 7) which was apparently situated in **Khinḍarasiṁgha** (i.e., Khinḍaraśiṁga) forming part of the **Gōmuṇḍa-maṇḍala** (or Mōmuṇḍa-⁸) in the kingdom of the illustrious **Narēndradhavalā** (line 1). Gōmuṇḍa-maṇḍala (or Mōmuṇḍa-⁹) may actually have been the name of Narēndradhavalā's kingdom (cf. Khinjalī-maṇḍala forming the entire kingdom of a branch of the Bhañja family). In lines 1-5 of the epigraph, it seems to be said that a person named Sēḍā, who was the son of the *Bhaṇḍāri* (Sanskrit *Bhāṇḍāgārika*) Raṇiyā and the grandson of the *Kulaputraka* (nobleman) Vaṇadēva, purchased the above village from the illustrious Śilābhañjadēva, as a *kṛaya-śāsana*, paying some *rūpyaka*, i.e., silver or money; the purchase appears to have been made through the illustrious Rāṇaka Ghōṇghāka who was the son of the illustrious Rāṇaka Vikāra and the grandson of the illustrious Rāṇaka Mudhavarāha¹⁰ (probably *Wārḍha-varāha*) and was a scion

¹ The Jangalpadu plates (*JKHRS*, Vol. I, pp. 181 ff.) of apparently the 14th regnal year of Śatrubhañja appear to represent this Śilābhañja as the son of Malla-Gambhīradē[va] and the grandson of Yathāsukhadēva. The identification of Śatrubhañja of this inscription with the homonymous ruler of Khinjalī-maṇḍala is, however, not entirely beyond doubt.

⁷ *Select Inscriptions*, Vol. I, p. 458, note 1.

of the Nāga family hailing from a locality called Dharaṇimpha or Dharaṇai¹ : the *rūpyaka* seems to have been paid through *Rājaputra* Vighraha who may have been the son of Rāṇaka Ghōṇghāka.

Lines 5-6, together with line 17, appear to say that, some years later, the village was resold by Sēḍā as a *kṛaya-śāsana* to three persons called *Thākura* Kōṇvi, *Thākura* Umbā and *Ḍombī* on receipt of an amount of *rūpyaka* specified as *pla 10 ā | mā 2 gu 4*. In this specification *pla* stands for the well-known weight called *pala* which is equal to four *karshas* or sixty-four *māshas*. It is, however, interesting to note that the form *pla* instead of *pala* is found usually in other early inscriptions of Orissa in connection with *rūpya* or *rūpyaka*. A copper-plate charter² of the Sōmavamśī king Mahābhavagupta I Janamējaya which records a *kṛaya-śāsana* (i.e., a revenue-paying grant and not a revenue-free gift), has the following interesting endorsement : *prati-varshē ch-ātra śāsanē kara[m*] pañcha rūpya-plāni nishtāṅkya kara-śāsanam=idaṁ dattaṁ yatra rū pla 5*. The annual rent of the village granted to some Brāhmaṇas by the Sōmavamśī ruler was thus fixed at five *palas* of *rūpya*. The Talcher copper-plate inscription of the Orissan ruler Gayāḍatuṅga, edited by N. N. Vasu³ and by R. D. Banerji,⁴ records a similar grant of a village in favour of three Brāhmaṇas with the following endorsement : *rūpya-pla chatvāri aṅkē rūpya pla 4*, although the learned editors of the inscription failed to decipher the passage correctly.⁵ It is not made clear in the record whether the four *palas* of *rūpya* were realised as the nominal price of the village granted or were to be annually levied as revenue. Of the two other contractions used in our record, *ā | mā* is difficult to explain, although it is tempting to suggest that *mā* stands here for *māsha*. *Gu* is very probably an abbreviation of the well-known weight *guṇjā*, otherwise called *raktikā* (modern *ratī*), which is one-sixth of a *māsha*. Thus the price or annual rent of the village of Taḍēśvaragrāma seems to have been fixed at silver weighing ten *palas*, two *māshas* and four *guṇjās*. The reference to silver instead of coined money is interesting from the view point of the economic condition of ancient Orissa. Probably there was dearth of coined money. It may, however, be suggested that the three contractions actually indicate three varieties of coins. But the paucity of ancient coins from Orissan sites as well as the fact that *gu* or *guṇjā* could not have been a coin possibly goes against the suggestion.⁶

Lines 7-13 of the inscription describe the boundaries of Taḍēśvaragrāma. In this description, the words *sāndhi* and *prākachhēda* are repeatedly used. The meaning of both the words is uncertain. The former word apparently also occurs in some other early Orissan records. The Ganjam plate⁷ of Daṇḍimahādēvi seems to use the same word in the form *sāndhi* (*sāndhi*?). I have tentatively taken it to mean the same thing as Sanskrit *sandhi* or junction. *Prākachhēda* has been similarly taken to stand for Sanskrit *prākachhēda* or the dividing line (i.e., boundary) well-known from former times. The village is said to have had in the east the big stone at the *sāndhi* of Chāmpā, the *gāḍa* (Sanskrit *gartha*) at the *sāndhi* of Paḍumbā and the *prākachhēda* of Ardhāśrōtri ; in the south the *prākachhēda* of a *gāḍa* (fort) : in the west the *sāndhi* of the Vōri *stūpa* ; in the north-west the *prākachhēda* of Kōsu[mbrā], that of Galachhinā on the big hill, that at the centre of the Sṛivīḍā hill and that at the stone of Galachhinā to the north of the Sṛivīḍā ; in the north the boundary at the stone of Guḍēsara : and in the north-east the *prākachhēda* of the stone hill at Viṇa.

¹ JPASAB, Vol. I, pp. 12-13. Cf. the word *pala* in *prati-varshē-dātavya-rūpyak-āṣṭa-pala-kṛaya-dānaṁ viniśchitya* (ibid., p.5.)

² Archaeological Survey of Magarbhūj, Vol. I, pp. 152-54.

³ JASB, N. S., Vol. XII, pp. 292-94.

⁴ Vasu (op. cit., p. 160) and Banerji (above, Vol. XII, p. 158) could not also read correctly the passage *Singagrāmah triṇ-ōḍakī ru(rū)pya-pla 2* in the Talcher plate of Śulki Kulastambha. Similarly we have to read *ru(rū)pya-pla || 4 ||* in lines 33 and 34 of the epigraphic text printed above. Vol. XXIV, p. 20.

⁵ For the miserable economic condition of Orissa in early times, note the observations of the seventeenth century writer Thomas Bowrie quoted by me in JNSI, Vol. VII, p. 83.

⁶ Above, Vol. VI, p. 140.

Lines 13-17 say that the village was offered as a *kṛaya-sāsana* with the consent of *Mahāsāmanta* Karēthī, of Sōnapa who was the son of *Mahāsāmanta* Aīcharā, of Khātāvādāmaya,¹ of *Thākura* Bahulā and of Kaḍukullīṅga. Lines 17-18 appear to contain the names of the following witnesses: Bhātaputra Amkura, Bhātaputra Vāghaḍa, Bhātaputra Kaṇḍḍiyā, Bhātaputra Heu and Māhā (i.e., *Mahā* or 'senior,' or *Māhāsāmanta* for *Mahāsāmanta*) Kuḍḍapōlu. In lines 18-28 are quoted some of the usual imprecatory verses in Sanskrit, although they contain all sorts of mistakes.² Line 28 also contains the *maṅgala*: 'Let there be peace to the cow, the Brāhmaṇa and the world as well as to the king'. In lines 28-29 there is a passage which seems to mean ' (the village is) to be enjoyed according to the custom prevalent in the country in succession by grandfathers, fathers and sons'. Another interesting passage in lines 29-30 says that, even if there are passages in the deed which are short of letters or in excess of them, they should be regarded as genuine.³ Lines 31-32 say that the deed was engraved by Padmanābha who was the son of the merchant Pāṇḍi and was an inhabitant of Gandhaṭapāṭī.

The name of king Narēndradhavalā is very interesting, as the name-ending *dhavalā* seems to suggest the existence of a ruling family called Dhavalā in ancient Orissa side by side with the families of the Bhañja kings whose names end with the word *bhañja*. It is also interesting to note in this connection that there is a tract of land in the Singhbhūm District of Bihar still known as Dhalbhūm or Dhavalabhūmi, 'the land of the Dhavalas'. This name of the territory is associated with a line of kings whose names end with the word *dhavalā*. Indeed some late-medieval rulers of Dhalbhūm, such as Gopīnāthadhavalā and his son Anantadhavalā who was the patron of the poet Jagannātha Sena, author of the *Hitopadēśa Pāñchālī*, are famous in the history of Bengali literature.⁴ These Dhavalā kings were neighbours of the Bhañjas of Orissa. As a matter of fact, part of the Singhbhūm District containing Dhalbhūmgarh lies immediately to the north of Mayūrbhañj ruled by a Bhañja royal family up till today. There is, however, another Dhavalā ruling family in the heart of Orissa. Mr. P. Acharya of Baripada (Mayurbhanj State) informs me that the Rājās of Dompara in the Cuttack District of Orissa belong to a Dhala or Dhavalā family. What relation may have existed in former times between the Dhavalas of Dompara and those of Dhalbhūm cannot be determined. It is, however, not improbable that both these families are offshoots of an ancient royal family of Orissa to which king Narēndradhavalā of the record under discussion belonged. It is also possible to suggest that both the Bhañjas and Dhavalas were originally feudatories of the Bhauma-Karas and that they began to rule more or less independently only after the decline of the latter.

Of the geographical names mentioned in the charter, the location of only one place is certain. Gandhaṭapāṭī, mentioned also in several other Orissan records, is undoubtedly modern Gandhadāḍī in the Baudh taluqa. I am unable to identify Khinḍarasīṅgha, Gōmūḍamaṇḍala or Mōmūḍa⁵, Dharaṇimpha or Dharaṇai⁶ and Taḍēśvaragrāma. The localities mentioned in the description of the boundaries of Taḍēśvaragrāma also cannot be identified. The kingdom of the Dhavalas, however, appears to have been contiguous to that of the Bhañjas of the Keonjhar

¹ This expression may represent more than one personal name. Whether they were also the sons of Aīchar cannot be determined.

² These verses were apparently inserted in order to represent the sale of land as a gift. Cf. *Mitāksharā* on the *Yājñavalkya-smṛiti*, II, 114: *sthāvarasya vikraya-pratishēdhāt...dāna-praśamśāch=cha vikraye=pi kartavyē sa-hiranyam=udakam dattvā dāna-rūpēna sthāvura-vikrayam kuryāt*. See Kane, *History of Dharmaśāstra*, Vol. III, p. 567.

³ For the same passage in other early Orissan records, cf. the Dhenkanal plate of Jayastambha, *JBORS*, Vol. II, p. 407. [See also above, Vol. XII, pp. 265, etc.]

⁴ S. Sen, *Vāṅmālā Śāhityer Itihāsa*, Vol. I, second edition, p. 359. These Dhavalā chiefs are said to have lived at Ambikānagara and enjoyed the title *Śāhazāda*.
MGIPC—SI—40 DGA—10.1.52—450.

region. Whether Khipḍarasīṅgha has to be identified with the territory called Gidrisīṅgi mentioned in the Dirghasi stone inscription¹ or Kandarsīṅgha in the S.I. sheet map 73H/5a2, cannot be definitely determined.

TEXT*

First Plate

- 1 [Siddham||]³ **Khipḍarasīṅghē**⁴ | ⁵ Śrī-Narēndradhavalā⁶=rājyē | Gōmūṇḍa⁷-maṇḍalē |

¹ Above, Vol. IV, p. 318.

² From the original plates preserved in the Madras Museum and impressions preserved at the office of the Government Epigraphist for India, Ootacamund.

³ Expressed by symbol.

⁴ Possibly the reading intended is °sīṅghē for °śrīṅghē.

⁵ The *danda* is superfluous. The *visarga*-like sign before the *danda* is a part of the stop (cf., e.g., *Annual Report of the Dacca Museum for 1939-40*, p. 8 and plate). With the exception of a few only, the *dandas*, so abundantly used in the inscription, are superfluous. In many cases the *danda* has been used just as a hyphen is done in English.

⁶ Metal has peeled off from some places on both sides of plate I. The damage is fortunately on the blank side. Due to the peeling off, the passage *śrī-Narēndradhavalā-rājyē* | *Gō*² (or *Mō*²) has been partially damaged. Whether the partial effacement of the king's name was intentionally done by some person is difficult to say. But it seems to me that the peeling off is natural. Cf. remarks at p. 44 above.

⁷ What has been read as *Gō*² may possibly also be read as *Mō* or *Gā*.

⁸ What I have read as *ni* may possibly be also read as *nai*.

⁹ Read *vinissṛita-Nāgavaṇṣa-sambhava*.

¹⁰ The correct form of the name was possibly *Mūrdha*².

¹¹ It is better to omit the name here.

¹² *Sva-hastēna* seems to be intended.

¹³ *S-ōpadhinā* is possibly intended.

¹⁴ The correct form of the name would be *Vana*².

¹⁵ The idea seems to be : *Raṇiyā-sutēna Sēḍā-nāmakēna śrī-Silābhaṇḍadēvat kṛitah*.

¹⁶ Possibly *ūṇam* which stands for Sanskrit *trayaṇām* and refers to the three persons, viz., Kōṇvi, Umbā and Dōmbi. Does *syōbhanadaggē* stand for *Śōbhanadurgē* and indicate the place where the three persons were living? The superscript of the *akshara* read *ggē* looks like *dh* and the *akshara* may be *dhgō*; but the *ā* sign should then have been longer. The idea may be : *ṭhakkura-Kōṇviś-cha ṭhakkur-Ōmbā-nāmakāś-cha Dōmbi-nāmakāś-cha ēti trībhyaḥ brāhmaṇēbhyaḥ*.

¹⁷ This *danda* is not straight like the others but is slanting and peculiar.

¹⁸ Possibly *rūpyaka-pala 10 māsha 2 guṇjā 4* is intended.

¹⁹ In Sanskrit the passage would stand : *Taḍēsvara-grāmah chatuh-simā-paryantah sa-saila-vana-kānanna-samētah pūrva-diśi*. The following passage (lines 8-13), describing the boundaries of the village Taḍēsvaragrāma, is greatly influenced by the local Prakrit. As already noticed above, the words *sāndhi* and *prākachhēda* are repeatedly used; but their meanings are not absolutely certain. *Sāndhi* possibly means the same thing as *sandhi* or *sandhi-sthita*, while *prākachhēda* possibly stands for *prāk-chhēda* meaning *pūrva-kālīna-chhēda*, dividing line of former times', i.e., the well-known boundary.

Second Plate ; First Side

- 11 chhinā-prākachhēda | Sṛividā-parvvata-madhya-prākachhēda | Sṛividā-uta-

 25 bhumi | tasya¹⁰ tasya tadā phala[m*] | haratē¹¹ hārayatē bhumi |
 26 manda-vudhū tam-āvṛita | sa vadhō vāruṇai pāsai |
 27 tirya-vōnisa jāyati | A(Ā)dityō Varuṇō Vimnu | Vrahmā¹²

Third Plate

- 28 Sōma(mō) Hutāsa()na[h*] | Su(Śū)lapāni(ṇi)s=tu bhagavām(vān) | abhinandanti bhu(bhū)-
 29 midam(dam) | gō-Vrā(Brā)hmaṇa-visvē(śvē)bhya[h*] | rājñā(jñē) sās(śā)ntir=bhabhavati¹³ |
 pitā-¹⁴
 30 mōha-pātēni | bhōtka(ka)vyam | dēsa-maryādayā | niun-āksharam=a-¹⁵
 31 dhik-ākshu[rām*] mvā(vā) | sarvvē pramāṇam=iti | Gaudhaṭapāṭi-vāstavya-
 32 vaṇika(k)-Pāṇḍi | suta-Padmanābha¹⁶ | śāsana udagiritam=iti
 33 [A number of *danḍas* together with a lotus indicating the end]

¹ See above, p. 48, n. 1. Possibly we have to suggest °mayāḥ in the plural.

² The idea seems to be: *ētēśhā n sarva-sammatēna* referring possibly to the assent accorded to the deed by the persons mentioned in lines 13-15. *Māhāsāmanta* is no doubt the same as *Mahāsāmanta*.

³ The idea may be: *dāyādyā-maṇḍala-kramēna*.

⁴ The meaning of the passage is not clear. It may suggest that the income of the village had to be used for *āsana* and *karpata*, i.e., for food and cloth.

⁵ Correctly speaking: *grāmō=yam kraya-śāsanatvēna pradattah*.

⁶ The idea may be: *ētē vēlūtārāḥ* referring to the persons who are mentioned in lines 17-18 and who may have been witnesses to the deed. *Māhā* may be a contraction of *Māhāsāmanta* standing for *Mahāsāmanta*.

⁷ The verses in Sanskrit are hopelessly corrupt owing to the want of the writer's knowledge of that language and to the influence of the local pronunciation. Read *yāvad=dattā bhavēd=bhūmih sama-chchhēdā śusōbbhanā | tāvad=yugu-sahasrāṇi rudra-lōkē cha tishṭhati ||*

⁸ Read *sa-datām para-datām vā yō harē'ta vasundharām | sa viśṭhāyā n kṛimir=bhūtva pitṛibhih śaha pachyatē ||*

⁹ Read *gō-sahasra-pradānēna bhūmi-hartā na sudhyati ||*

¹⁰ Read *bhūmis=tasya*. The first half of this verse (*bahubhir=vasudhā dattā rājibhih Sagar-ādibhih*) is carelessly omitted.

¹¹ Read *haratē hārayēd=yas=tu manda-buddhis=tamō-vritah | sa baddho vāruṇaih pāsais=tiryag-yōnishu jāyatē*

¹² Read *Vishnur=Brahmā*.

¹³ *Bhavatu* or *bhaviśhyati* is apparently intended.

¹⁴ The idea may be *pitā-putra-kramēna*.

¹⁵ Read *nyūn-ākshara°*.

¹⁶ Read *Padmanābhēna śāsanam=utkirṇam=iti*.

No. 9—MADANPUR PLATE OF SRICHANDRA ; YEAR 44

(1 Plate)

R. G. BASAR, Calcutta

This copper plate was found in June, 1946, while earth was being dug out for the foundation of a wall on the land belonging to one Sekh Newajuddin in the *mauza* of Madanpur, near the old and famous village of Sabhar, situated about 15 miles north-west of the city of Dacca in East Bengal. After its discovery, the plate was made over to the father of Babu Santi Ranjan Roy, a pupil of Mr. Guru Prasad Ganguli, B.A., B.T., Head Master of the Sabhar H. E. School, to whom the former brought it for presentation. I am thankful to Mr. Ganguli, who was himself a student of mine during my professorship at the Rajshahi College long years ago, for his kindly sending the plate to me for decipherment. The plate was, at first, in many places of its surface, covered with a thick coating of hard earth and verdigris, but after it was cleaned by me, it was found that the inscription on it was in a fair state of preservation. Unfortunately, a portion of the plate towards its proper right corner at the bottom was obliquely cut away by some one amongst the ignorant finders, probably for testing its metal out of greed for gold. This has caused a loss of a few letters from the beginning of each of the lines 15 to 23 on the obverse side, and also at the end of each of the lines 29 to 42 on the reverse side. Most of these missing letters could, however, be restored with the help of the published plates of Śrichandra.

The chronology of the discovery of the five copper plate grants, including the present one, of king Śrichandra of East Bengal may be interesting to epigraphists and historians. The Edilpur (Faridpur) plate, the existence of which in the house of a rich man of the locality for several decades past was known to scholars in Bengal, but which has not yet been available to them for decipherment of the inscription thereupon inspite of strenuous attempts on their part, was the subject of a note on its contents gathered from a hurried study by the late Babu Ganga Mohan Laskar, published in the October issue of the now defunct journal, the *Dacca Review*, in the year 1912, and extracts thereof were quoted by the late Dr. N. K. Bhattasali, in the pages of the *Epigraphia Indica*, Vol. XVII, pp. 189-190. The second grant of this king, the Rampal (Dacca) plate, was first brought to light by the present writer in April, 1913, and was edited and published by him in this journal, Vol. XII, pp. 136-142 and plates. The third one, the Kedārpur (Faridpur) plate, was found in April 1919 by Dr. Bhattasali, the then Curator of the Dacca Museum, and was edited and published by him in this journal, Vol. XVII, pp. 188-192. The fourth epigraph, the Dhulla (Dacca) plate, was also discovered by Dr. Bhattasali in 1925. It is deposited in the Dacca Museum. It remains unpublished, but a short account of its contents was published by the late Mr. N. G. Majumdar, in an Appendix to his edition of *Inscriptions of Bengal* (Vol. III, pp. 165-6), published by the Varendra Research Society, Rajshahi. The present plate is, therefore, to be regarded as the fifth amongst the grants, hitherto discovered, of this king. Thus within the course of 34 years (1912-1946) Bengal historians have come in possession of five grants of king Śrichandra to help them in reconstructing the history of East Bengal under the Chandra dynasty.

This is a single plate inscribed on both sides. It measures about $8\frac{1}{2}'' \times 6\frac{1}{2}''$. Its edges are raised into rims on the obverse side, evidently for the preservation of the writing. It bears a seal attached to the middle of the top, measuring about $4\frac{1}{2}'' \times 3\frac{1}{4}''$. It projects about $1\frac{1}{4}''$ into the inscription thereby causing a break in the middle of the first three lines of writing on the obverse. This seal has a protuberant top and a pedestal-like bottom. It contains in the middle four concentric circles, the outermost having floral decorations which adorn the base. The innermost circle, the diameter of which is nearly 2'', has in its upper part the famous Buddhist emblem of the *Dharmachakra* (the wheel of law) flanked by two couchant deer, which device must be representing

the *mṛiga-dāva* (the deer park) of Kāśī (now Sarnath, Banaras) where the Buddha delivered his first sermon on Dharma. Just below this representation, between two lines, occurs the legend *Śrī-Śrīchandrādēvaḥ* written in relief. There is also a floral base for the support, as it were, of the legend, as is the case with the wheel emblem within its own circle. It may be noted that the Buddhist Pāla kings of Bengal also used the same emblem on the seals attached to their copper charters.

The inscription consists of 42 lines, the obverse containing 23 lines and the reverse 19 lines. The execution of the writing is excellent, the letters in all lines being almost of uniform size, which is about $\frac{1}{4}$ ". The **characters** employed in the inscription belong to a variety of the northern alphabet which was used, specially in Bengal, in the 10th-11th century A.D. From a comparison of the script of the Vishṇupāda (Gayā) temple inscription¹ of the 7th year of king Nārāyaṇapāla and of that of the Narasimhadēva (Gayā) temple inscription² of the 15th year of king Nayapāla, with that of our inscription (though engraved on copper), it may be assumed that our inscription belonged to a period intermediate between these two kings' reigns. It may also be surmised that the script of this inscription does not belong to any period much earlier than that of the inscriptions³ of the time of the Varman kings of East Bengal. Of initial vowels we have the signs for *a* (in *avāpa*, line 15, *arldha*°, line 24, *a-chāta*°, line 27, *a-kiñch*° line 27 and *Agāstyā*, line 28); *ā* (in *ādharō*, line 11, *ādīsati*, line 25); *i* (in *it*°, line 7, *iti*, line 31 and 40, *iv*°, line 33); *u* (e.g. in *ubhau*, line 38) and *ē* (in *ēva*, line 3, *ēkūta*°, line 15, *ēkadēsa*°, line 35). It is noteworthy that as in Nārāyaṇapāla's inscription referred to above and in the Silimpur stone-slab inscription⁴, the initial *i* is represented in this plate also by two ringlets placed side by side with a short horizontal bar above them. There are to be noticed some peculiar forms of consonantal conjuncts, such as *ksh* (in *bhikshu*°, line 4, *didriksha*°, line 9, *dhyaksha*, line 23, *°kshān*°, line 25, *°samakshē*, line 33); *kty* (in *bhaktiā*, line 7, *°kty-antah*° line 20); *tva* (in *snātva*, line 28, *kritvā*, line 28, *bhūtvā*, line 39); *shṇ* (in *[Ji]shṇō*°, line 13); *hy* (in *°grāhyā*, line 27); *tm* (in *=ātma*°, line 29), *jñ* (in *nayajñah*, line 15, *°rājñā*, line 21); and *rṇṇ* (in *pūrṇṇa*°, line 5, *-Pūrṇṇa*°, line 5, *Suvarṇṇa*°, line 8 and line 9, *suvarṇṇ*°, line 9).

As regards **orthography**, as almost in all the eastern epigraphs specially in Bengal, the letter *b* is throughout expressed by the sign for *v*. Other peculiarities which call for special notice are the following :—(1) almost all consonants such as *g*, *ch*, *n*, *t*, *m*, *y* and *v* are doubled after a *r*; (2) *s* is substituted for the *visarga* before a following *s* (in *Jinas=sa*, line 1, *dus-sādhyā*°, line 24, etc., but the *visarga* sign has been retained after *pitribhiḥ saha*, line 39); (3) the sign for *avagraha* has sometimes been used (as in *°chandro=°bhavat*, line 5) and sometimes omitted (as in *Dharmmo=py*°, line 2); (4) final *t*, *n* and *m* are indicated by signs of the letters smaller in size, but the final *m* has a peculiar shape of its own in *[chihna] m*, line 15, *°tritīyāyām*, line 28; and (5) the guttural nasal *ṇ* has been used instead of the *anusvāra* before the palatal sibilant *ś* (*vañśē*, line 4, *°karāṇśuḥ* line 7).

The **language** is Sanskrit, which is generally correct, except where some mistakes occur due to the inadvertence of the scribe or the engraver. After the introductory words *Om svasti* the inscription contains 8 verses in praise of the predecessors of the royal donor, which are followed by about 13 lines of prose after which we have 6 verses describing the genealogy of the donee and eulogising the donee himself. The grant then has again 2 lines of prose and this is followed by three of the usual benedictive and imprecatory verses. It may be noted here that the first 8 verses which describe the history of Śrīchandra's dynasty are identical with the 8 verses in the Rāmpāl plate of the king. So far as these verses in the present plate and the (yet

unpublished) Dhulla plate of this king are concerned, the draft seems to be almost identical, the latter having only a ninth verse added to it which is the seventh one of the Kedārpur plate mentioned above. These three plates come from the Dacca District. The Edilpur and Kedārpur plates which belong to the Faridpur District have greater affinity between themselves with regard to these eulogistic verses. The opening verse in honour of the Buddhist *triratna* (the Buddha, the Dharma and the Saṅgha) is, however, common to all the five plates of Śrīchandra, hitherto discovered.

Our grant is **dated** the 44th year, evidently referring to the regnal year of the king, and the 28th day of the month of **Mārgga** [śīrsha], i.e. November-December. This date is followed by the abbreviated forms of two official endorsements, viz., *Mahāsā nī anu nī Mahā(ksha ?)* which indicate 'approved by the *Mahāsāndhivigrahika* and then by the *Mahākshapaṭalika*'.

The **object** of the inscription is to record the grant of rent-free land measuring 8 *drōṇas* exceeded by 8...., in a locality called **Vaṅgasāgara-sambhāṇḍāriyaka** in **Yōlāmaṇḍala** (mentioned also in the Dhulla plate¹), situated in the **Puṇḍrabhukti** (i.e., Puṇḍravardhana-bhukti), by the *Paramasaugata Paramēśvara Paramabhaṭṭāraka Mahārājādhirāja*, the glorious **Śrīchandrādēva** who meditated on the feet of his father, *Mahārājādhirāja Trailōkya-chandrādēva*, to a Brāhmaṇa, named Śukradēva, son of Hara, grandson of Varāha, and great-grandson of Mahādēva who was himself born in the family of three *sōmapīṭin* Brāhmaṇas, named Mākha, Rāma and Dhruva, having the three wellknown *pravaras*. The *gōtra*, *vēḷu* and *śākhā* of the family are, however, not mentioned. The grant was issued from the royal victorious camp (or capital) situated at **Vikramapura**. The king dedicated the grant in the name of Lord Buddha-bhaṭṭāraka, after having bathed on the Agastitṭipiyā day, for the sake of enhancing the merit and fame of his parents and of himself.

A summary of the historical information that can be gathered from the plate may be given here for ready reference. King Śrīchandra calls himself a *Saugata* and all the charters issued by him bear the royal seal containing the emblem of the Buddhist *dharmachakra* and describe with devotion, in the opening verse, the Buddhist "three jewels", the Buddha, Dharma and Saṅgha. The next verse describes the place of origin of the **Chandras** who possessed vast fortunes, enjoyed by them at a locality called **Rōhitāgiri**. Bengal scholars differ in their view regarding the identification of this place-name. Some take it to be Rohtasgarh in the Shahabad District of Bihar and others headed by Dr. N. K. Bhattasali suggest it to refer to the Lalmai Hills, situated west of Comilla in East Bengal.² So it remains yet a question as to whether the Chandras emigrated to Eastern Bengal from outside, or were original inhabitants of that part of Bengal. It appears, however, that the first nobleman in the dynasty, named **Pūrṇachandra**, became very famous; his name could be "read on the pedestals of images and on (stone) pillars of victory and copper-plates in which new epigraphs were inscribed." Such is his description in verse 2 of this inscription. This description and the reference in verse 2 of the Kedārpur plate to Pūrṇachandra's parasol, in the form of the canopy of dust raised by his vanguards, being resorted to by his enemies, make it possible to presume that in his own land he behaved like an independent ruler, though not declared as a formal king. The next two verses (vv. 3 and 4) disclose the fact that Pūrṇachandra's illustrious son, **Suvarṇachandra**, was known in the world as Bauddha. So it is clear that he was the first in the dynasty to embrace Buddhism. He also is not described in the inscription as having ruled as a king. His son, **Trailōkyachandra**, with his title *Mahārājādhirāja* mentioned in all the records became the first independent king, ruling probably from Vikramapura as the capital of his kingdom.

¹ *Inscriptions of Bengal*, Vol. III, pp.165-6.

² *History of Bengal*, Vol. I (Published by Dacca University, 1943), p. 194.

He is described in verse 5 of the Kedārpur plate as having his desire of conquering the earth, (bounded) by the four oceans, fulfilled, and he is further spoken of as having extinguished the fire of his enemies by means of the water of his creeper-like sword in many a battle. This description certainly corroborates the view of Dr. R. C. Majumdar,¹ that "Trailōkyachandra laid the foundation of the greatness of the family." In verse 5 of our inscription we have an indication as to how he strove to expand his territories. The most important epithet of Trailōkyachandra, as we find in this verse, "*ādhārō Harikēlarāja-[ka*]kuda-chchhatra-smitānām śriyām*", read along with "*yaś-Chandr-ōpapadē va(ba)bhūva nṛipatir=dvīpē*", conveys the fact that at first he was a king of **Chandradvīpa** and later became "the repository of the Fortune (goddess) whose smile was the (white) umbrella, the symbol (of royalty) of the king of **Harikēla**". Bereft of rhetorical figurativeness, the epithet leads one to believe that Trailōkyachandra acquired the royal fortunes of the Harikēla kingdom. The interpretation put on this phrase by the late Mr. N. G. Majumdar and quoted by Dr. R. C. Majumdar in the *Dacca University History of Bengal*, Vol. I, does not stand scrutiny. The net result of the political achievements of Trailōkyachandra seems to be that he was at first a king of Chandradvīpa but later became the ruler over the whole of Harikēla. Who can vouchsafe that in the period under discussion Vikramapura was not the capital of Harikēla itself? Of course it is difficult to ascertain the exact political relation previously prevailing between the kingdoms of Chandradvīpa and Harikēla. Although in the seventh century A.D. the country of Harikēla is referred to by I'tsing² as 'the eastern limit of Eastern India', yet during the 10th-11th century A.D. we should follow the lexicographer Hēmachandra³ (born 1089 A.D.) who identified Harikēla with Vaṅga (*Vaṅgās=tu Harikēliyaḥ*) and explain the reference to Harikēla in our inscription as identical with Vaṅga whose capital was Vikramapura in those centuries. As to Chandradvīpa, it was a territory in the South-east of Bengal in the district of Bakerganj and in mediaeval period it was known as Bāklā Chandradvīpa which⁴ comprised within its boundaries some portions of the modern districts of Bakerganj, Khulna and Faridpur. Trailōkyachandra's wife was **Śrikāñchanā** who gave birth to her illustrious son, who was destined to be a great king, having been born in an auspicious *muhūrta* of *Rāja-yōga* (vv. 6-7). Then we have a description of this son, **Śrichandra** (v.8), which indicates clearly that this Buddhist king attained full paramount power, by putting his enemies into prison-cells. That this king had to fight some enemies and become victorious in battles (*raṇēshu jayī*) is mentioned in verse 7 of the Kedārpur plate also. But it is difficult to surmise as to who these enemies of Śrichandra were. It only seems evident that this king's father, Trailōkyachandra, who was at first a king of Chandradvīpa only, in the south-eastern portion of Bengal, began gradually to extend his dominion towards the north, i.e., towards the localities represented by the modern districts of Faridpur and Dacca, and ultimately took possession of the citadel of Vikramapura which was in all probability in the hands of the Pāla kings of Puṇḍra-vardhanabhukti and Magadha. In still earlier centuries we have epigraphic evidence to prove that Kāntidēva and later Laḍahachandra ruled independently in East and Southern Bengal, the former's kingdom having probably comprised a portion of Western Bengal also. We know that a great calamity overtook the Pāla kingdom during the reigns of Gōpāla II and his son and successor Vīgrahapāla II during the latter half of the 10th century A.D. It is quite probable that the Chandra rulers of East and South Bengal were able to found an independent kingdom during that epoch, and that Śrichandra, whose rule continued at least for 44 years, might have been a contemporary of the great Pāla king, Mahīpāla I (c. 988-1038 A.D.). On this chronological basis it may be surmised that the king Gōvindachandra of Vaṅgalādēśa (East and South Bengal) who had to make

¹ *Ibid.* pp. 194-195.

⁴ Cf. Hunter's *Statistical Account of Bengal*, Vol. V, p. 224.

good his escape, after having descended from his elephant when the Chōla king, Rājendra Chōla-dēva I¹, invaded Bengal in about 1023 A.D., probably belonged to Śrichandra's family and was a successor to that king. It may profitably be mentioned here that we have reference² to the 12th and 23rd years of the reign of Gōvindachandra on the pedestal inscriptions of the Kulkudī (Faridpur) Sun-god and the Betkā (Dacca) Vāsudēva images respectively.

It may be remarked in passing as to how in those early days prevailed in all parts of India the spirit of religious toleration amongst the people. Here in this copper-plate grant we find Śrichandra, a Buddhist king, making a gift of land to a Vēdic Brāhmaṇa in the name of his own worshipped god, Buddha-bhaṭṭāraka. The first historical instance of advocacy for religious toleration can be traced to the famous edict (Rock Edict XII) of the Maurya Buddhist Emperor, Aśōka.

It has been stated above that the land donated by Śrichandra was situated at a place in **Yōlāmaṇḍala**. The name of this *maṇḍala* occurs also in the hitherto unpublished Dhulla plate of the same king. Some of the localities, mentioned in the latter plate as situated in the same *maṇḍala*, have been identified by Dr. N. K. Bhattasali with some places to the north of the river Dhaleswari in the Manikganj sub-division of the Dacca District, which is not far away from Sabhar and the find-place of our plate. So it seems quite likely that Yōlāmaṇḍala was once situated in that same area of the modern Dacca District.

The gift of the land of our plate was made by Śrichandra on the **Agasti-tritīyā** day (line 28). Most probably this *tritīyā* belongs to the dark fortnight of the month of Bhādra. It is believed that with the rise of Agasti or Agastya (*Canopus*) the waters of rivers, etc., begin to become clear and it also ushers in the *śarat* (autumn) season. In Bengal offerings are made to Agastya in Bhādra. So it may be that the king made the gift of land to Śukradēva in Bhādra and that the charter was formally issued on the 28th of Mārgaśīrsha (Agrahāyana) in the 44th regnal year of the king.

It now remains for me to make an attempt to explain the following new names of officials occurring in the list of functionaries addressed by the king while making his land-grant : *Mahā-tantrādhyaṅksha* (l. 23), *Gōchchhakapati* (ll. 23-24) *Arddhu-nauvātaka* (l. 24) and *Nauvātaka* (l. 24). The term *Mahātantrādhyaṅksha* undoubtedly refers to the highest priest in charge of the religious rites which are performed on the king's behalf in accordance with the injunctions of the *Śrutis* and the *Smṛitis*. The Ramganj copper-plate³ of Īśvaraghōsha has a similar officer named as *Mahātantrādhikṛita*. These two terms can easily be explained with the help of the definition of a Tāntrika as we find in the *Śukranītisāra*.⁴ As for the term *Gōchchhakapati*, it is difficult to explain it unless we imagine it to represent under Prākṛit influence the Sanskrit word *Gōshṭhakapati*, 'the administrative head in charge of the pasture-land and cowsheds'. His functions may aptly be compared with those of the *Vivītādhyaṅksha* of Kauṭilya's *Arthaśāstra*.⁵ The word *nauvātaka* is very important. It is for the first time that we find this term used in a Bengal copper-plate along with the names of officials addressed by the donor king in land-grant documents. It occurs in another context (the description of Pātaliputra situated on the Ganges) in the Khalimpur plate⁶ of Dharmapāla. The word was there interpreted by Kielhorn as 'a fleet of boats' and he equated it with *navitāna* used in Vijayasēna's Deopara inscription.⁷ We may in this connection also

¹ Above, Vol. IX, pp. 232-233.

² Above, Vol. XXVII, pp. 24 ff.

³ *Inscriptions of Bengal*, Vol. III, p. 153.

⁴ Cf. v, 185 in Chapter II (*Śruti-smṛit-ītarair=mantr-ānushṭhānair=dēva-ārchehanam kartum hītamam matvā yatatē sa cha Tāntrikaḥ*).

⁵ Cf. Chapter 34, Book II.

⁶ Above, Vol. IV, pp. 249 and 252, n. 5.

⁷ *Ibid.*, Vol. I, p. 309.

mention the word *taraṇi-sambhavēna* used in the *Rāmācharita*¹ of Sandhyākaranandin which is explained by the old commentator as *naukā-mēlakēna* (a fleet of boats). All these three words refer, however, to fleets of boats plying in the Ganges. Some other inscriptions² of the Pāla kings of Bengal and Magadha have introduced the word *nau-vāṭaka* in their description of the riparian capital towns like Pāṭaliputra and Mudgagiri (Munghyr) and also other towns like Vilāsapura and Rāmavati, which possessed, in addition to elephants, cavalry and infantry, also *nauvāṭaka* 'a fleet of boats'. The reference to the word *nauvāṭa* in the Kamauli plate³ of Vaidyadēva in connection with his victory in a battle in *anuttara-Vaṅga* (probably South Bengal) makes it clear that the word must be interpreted as a fleet of boats and the war-cry of the navy is what is described in that inscription as *nauvāṭa-hi-hi-ravaḥ*. In the context of our plate the word *nauvāṭaka* may, therefore, refer to the Head of the royal navy, and a junior officer in charge of half a division of the fleet may have been referred to by the term *arddha-nauvāṭaka*.

¹ A portion of the plate is broken and lost on this side. The letters within square brackets here and in the following lines are supplied from the published records of the king.

² The Rāmpāl plate reads here *vidhāya* which appears to be a better reading, in the absence of a *cha* in the verse for grammatical concord.

³ The term *gōchchaka* is not clear.

⁴ The original reading looks like *Agastyā*. The engraver appears to have used his chisel twice to correct his error. The proper reading should be *Agastyā* (adjective), or, *Agastī* or *Agastyā* (both noun).

TRANSLATION⁵

(V. 9) It is said that there were Brāhmaṇas (lit. gods on earth) like Mākha, Rāma and Dhruva who were ritualist and sōma-drinking and who had the three well-known *pravaras* (noble ancestors).

(V. 10) In their family was born a Brāhmaṇa (*dvija*) named **Mahādēva** who was as prominent amongst the Brāhmaṇas (*bhūdēvas*), as was the god Mahādēva, amongst the gods (*of heaven*).

(V. 11) His son was, by name, **Varāha** who, after death, attained the same world with the Primeval Boar (*incarnation*) of Hari (Vishṇu).

(V. 12) His son, self-restrained (or full of modesty, or well-disciplined), was **Hara**, who was, as it were, a second Hara (i.e., the god Śiva), in presence of the Dharādharma (the mountain, or Vishṇu).

(V. 13) From him were born (*three*) sons, **Yaduka**, **Kramuka** and **Śukradēva**, each of whom was noble (*āryya*) and eminent amongst good men, and displayed maturity (*of wisdom*) in the three Vēdas.

(V. 14) King Śrīchandra who belonged to the same country (*of his donee*) made a gift (*of the land*) to this illustrious Brāhmaṇa, Śukradēva, who used to speak (*with people*) with a smile.

¹ This verb is evidently to be connected with some such words as *imām bhūmim* understood, as its object.

² These two words are to be connected with the words *bhūmir=iyam* in line 26.

³ Such a word as this, or *°dēva-rājya-* seems relevant here.

⁴ The unpublished Dhulla plate of this king has *Mahāksha* here.

⁵ I need not translate the whole inscription, as the translation of the first 8 verses already occurs in my edition of the Rāmpāl plate of Śrīchandra in this journal (Vol. XII). I, therefore, put in here the translation of the six new verses (vv. 9-14) which describe the genealogy of the donee Śukradēva.

No. 10—GODACHI PLATES OF KATTI-ARASA ; YEAR 12

(1 Plate)

P. B. DESAI, OOTACAMUND

These copper plates were discovered in 1927 by Dr. S. C. Nandimath, Principal, Basavēśvara College, Bagalkot, Bijapur District. They were in the possession of a Svāmi of a Virāśaiva Maṭha at **Goḍachi**, a village in the Torgal *tāluk* of the Kolhāpur District, Bombay State. Nothing is known in regard to their previous history and how they came into the possession of the Svāmi. Dr. Nandimath has edited the record on these plates twice.¹ But on account of certain misreadings in the published text and other defects, I edit it here again in this journal.²

The plates which are **three** in number and contain holes bored at the extremities must have been originally held together by a ring which is now missing. It is not known whether the ring bore the seal also. The writing is engraved on one side only of the first and the third plates and both sides of the second. The plates are of almost equal size and each measures 6·75" in length, 2·6" in breadth and about $\frac{1}{16}$ " in thickness. The diameter of the circular hole is $\frac{5}{16}$ ". The total weight of the three plates put together is 31 *tolas*. Though the rims of the plates are not raised, the writing is in a good state of preservation. The record comprises twenty lines which are distributed evenly on the four sides.

The **characters** are boldly incised and belong to the southern class of alphabet which was prevalent in the Kannada country in the 6th century A. D. They are quite regular for the age and the locality. The initial *a* occurs in three places, *viz.*, lines 2, 5 and 11. The letters *r* and *k* present two-fold forms, *viz.*, one having its lower loop half developed (l. 4) and the other fully developed (l. 3). The medial short and long *i* are distinguished by a complete circle and a spiral respectively drawn at the top of the letter ; for instance, *Hārītī* in l. 2, *°pavitri* in ll. 3-4, *nīti* in l. 9, etc. The sign for the ligature *ri* of the letter *kri* is made out in two different ways, one by a hook attached to the lower end of the letter *k* (l. 4) and the other by suffixing a knotted curve underneath it (ll. 8 and 16). The form of the letter *dh* in the expression *Aśvamēdha* in l. 3 is rather peculiar in that it looks more like *b* (cf. ll. 11 and 12) as contrasted with its more normal forms in ll. 4, 5, etc. The Dravidian letters *r* and *ḷ* are used once each in the expressions, *maṛumannaṁ* and *Nulḡāla* respectively in l. 13.

In regard to **orthography**, the consonant following *r* in a conjunct letter is invariably doubled with the exception of *rsha* in l. 19. The writing is generally free from errors. The following two instances of wrong spelling may, however, be noted : *śāstrārṭta* for *śāstrārtha* in l. 5 and *dattām vṛā* for *dattām vā* in l. 19. The last mistake may be attributed to the undue stress laid on the syllable *ṁvā* in pronunciation.

The **language** of the record is Sanskrit.

The inscription is of great importance in more than one respects. It is the earliest epigraphical record of the Western Chālukya house with the solitary exception of the Bādāmi Rock Inscription of Chalukya Vallabhēśvara, of Śaka 465, discovered recently in 1941. No copper plate records of the early rulers of this family have been discovered so far till we come to the reign of Pulakēśin II. So it may be further claimed that this is the **first copper plate document of the family**.

¹ *Journal of the University of Bombay*, History, Economics and Sociology series, Vol. V, pp. 165 ff.; *Prabuddha Karmāṭaka*, Vol. XXIII, No. 1, pp. 25 ff.

² My thanks are due to the Government Epigraphist for India for having kindly secured the copper plates for my study and to Dr. Nandimath for his kind permission to edit them here.

The epigraph commences with the *praśasti* of the Western Chālukya family and introduces the king **Katti-arasa** as the favourite son of Raṇavikrama Dharmamahārāja. At the request of Vyāghrasvāmin, the king made a gift of land to a learned Brāhmaṇa by name Kṛṣṇasvāmin in the 12th year of his reign.

Katti-arasa is a new name¹ in the genealogy of the Western Chālukya house. But there seems to be little difficulty in regard to his identification with Kirtivarman I. For he was the son of Raṇavikrama, i.e., Pulakēśin I.² Kirtivarman is similarly referred to by his other names or titles, such as Kīrtirāja³, Pururaṇaparākrama⁴ and Śrīvikrama.⁵

The charter is dated the **full moon day in the month of Kārttika of the 12th year of the king's reign**. The Bādāmi Vaishṇava cave inscription of Kirtivarman I mentions all the details of the above date with the addition of the Śaka year 500.⁶ So taking this clue from the latter record we may assign the date of the present record as A.D. 578.

The title *Dharmamahārāja* applied to Raṇavikrama or Pulakēśin I in this record is significant. This is the first and the only record so far discovered, wherein a Western Chālukya king is given this epithet. The title with its variants, such as *Dharmarāja*, *Dharmamahādhīrāja* and *Dharmamahārājādhirāja*, was borne by many rulers of the Western Gaṅga, Kadamba and Pallava dynasties of South India.⁷ The Kadambas were the last to exhibit this title which is found even in the records of the last rulers of the house, viz., Harivarman and Kṛṣṇavarman II.⁸ The Western Chālukyas who succeeded the Kadambas to the sovereignty of Karṇāṭaka appear to have adopted in the beginning the larger portion of the Kadamba *praśasti* including this title. The Kadamba *praśasti* which was concise, expanded after its adoption by the Chālukyas.⁹ The form of the Chālukya *praśasti* appears to have been in a fluid state until the time of Pulakēśin II, in whose reign it was regularised by giving a fixed form.¹⁰ It is no wonder therefore that the Chālukya *praśasti* of the

¹ The following instances seem to bear affinity with this name: (i) Mahāsāmanta Katyera of the Chālukya family, *S. I. I.*, Vol. IX, pt. 1, No. 64. (ii) Kattiyara of the Chālukya lineage in the Didgūr inscription, above, Vol. VI, p. 253. (iii) Kattiyaradēva probably identical with Kirtivarman I or II of the Western Chālukya family; above, Vol. V, p. 20. (iv) Kattirāju in an archaic Telugu record, *A. R.* No. 529 of 1913. (v) Kattirāja, *S. I. I.*, Vol. IV, No. 798.

² *Ind. Ant.*, Vol. XIX, p. 17.

³ *Bomb. Gaz.*, Vol. I, pt. II, p. 345.

⁴ *Ind. Ant.*, Vol. XIX, p. 14.

⁵ Above, Vol. XXVII, p. 37.

⁶ *Ind. Ant.*, Vol. X, p. 57.

⁷ Above, Vol. XXIV, pp. 139-40.

⁸ The title *Dharmarāja* is met with in one of the three copper plate records of Harivarman, viz., the Sangolī plates which give him the latest regnal year, above, Vol. XIV, p. 166. Kṛṣṇavarman II is associated with the title *Dharmamahārāja* in three out of four copper plate records of his, so far discovered. In the remaining one, viz., the Bannahalli record, the same title is applied to his great grandfather Kṛṣṇavarman I, above, Vol. VI, p. 18.

⁹ The original expression in the Kadamba records was only *Svāmi-Mahāsēna-Mātrigaṇ-ānudyāt-ābhishik-tānām*; and it assumed the expanded form in the Chālukya records as *Sapta-Lōkamātribhiḥ Sapta-Mātribhir-abhi-vardhitānām Kārttikēya-parirakṣhaṇa-prāpta-kalyāṇa-paramparānām*.

¹⁰ That the Chālukya *praśasti* had not attained fixed form in the beginning, is illustrated by the following instances. The Bādāmi Vaishṇava cave inscription of Kirtivarman I and the Nerūr copper plate record of Mangalīśa contain the simple expressions, *Svāmi-pādānudyātānām* and *Svāmi-Mahāsēna-pādānudyātānām*. (*Ind. Ant.*, Vol. X, p. 59 and Vol. VII, p. 161.) The Sātārā grant of Viṣṇuvardhana I bears in addition the following uncommon epithets; *Mātrigaṇaprasāda-parirakṣita-bhujārgalānām Kṣhīrōdadhī-śayana-supt-ōthita-prasāda-parilabha-Varāha-lāñchhanānām*. (*Ibid.*, Vol. XIX, p. 309.) The enlarged Chālukya *praśasti* is met with for the first time in the Hyderabad grant and Koppāram plates of Pulakēśin II. (*Ibid.*, Vol. VII, p. 72 and above, Vol. XVIII, p. 257.) Even in these records we may note the following variations in the standard form of one of its components, *Kārttikēyanugraha-parirakṣhaṇa-prāpta-* and *Kārttikēya-paripālan-ādhipata*.

present charter which falls within this transitional period, is not only in accord with the Kadamba *prāśasti*, but retains the characteristic title *Dharmamahārāja* which was dropped in the Chālukya records of subsequent date.

Kīrtivarman I carried on extensive expeditions against the enemies¹ and consolidated the kingdom founded by his father. According to the implications of the statement in the Chipluṅ grant of the time of Pulakēśin II, he rebuilt and made improvements in the capital of Bādāmi.² The conditions conducive to an undertaking of this nature would have prevailed after he had completed his conquests and established internal peace in the country. Such a state of affairs appears to have been in existence by A.D. 578, the date of the present record which expressly avers (lines 6-8) that 'he had vanquished all the foes by virtue of his diplomacy and valour and kept all the subjects contented by protecting them according to the rule of the *varṇas* (four-fold classes) and *āśramas* (four-fold orders of life)'.³

Vyāghrasvāmin who figures in this record for the first time, appears to have been a very eminent and versatile personality. He was learned in the Vēdas and Vēdāṅgas ; he was well-versed in the science of polity ; he owned exceptional mastery in grammar, logic, poetry, drama, historical literature, music and *Purāṇas*. He is styled Mahā-Brahmaṇa and Brīhaspati (the preceptor of the gods) of the present age (lines 9-11). Lastly he is described as holding the foremost responsibility of the entire kingdom (*rājya-sarvasva-dhurandhara*, ll. 11-12). From this description we might infer that he was the chief minister and head of the administrative affairs of the Chālukya kingdom.

The donee Kṛishṇasvāmin, we are told, belonged to the Kaundinya *gōtra*, was proficient in the Vēdas and Vēdāṅgas and was *sa-dvātīthi*. The last expression consists of three words (*sahita*, *dvi* and *atīthi*) and means 'along with two guests'. This sounds like a queer epithet of the donee and does not afford proper sense by literal interpretation. In the Vedic context *atīthi* means 'fire' and Agni is familiarly addressed as *atīthi* in the Vedic hymns.⁴ This metaphorical sense of the word *atīthi* fits in the context. Thus the expression connotes 'he who possessed or maintained two fires'. The 'two fires' are the 'Śrauta-agni' and the 'Smārta-agni', which every householder is expected to maintain according to the injunctions of Vedic ritualism.⁵

The gift land comprised twenty-five *nivartanas* measured by the royal standard (*rājamāna*) and belonged to the village Nulḡāla. The gift was inclusive of all the produce (*sarva-jātakaṁ*), garden cultivation (*sa-tōṭṭaṁ*), *jīraka*, water, and house—site (*nivēśa*). *Jīraka* need not be interpreted literally as cumin seed.⁶ It may be taken to represent any wild or cultivated crop of the cumin variety ; or equating it with *jīrṇaka*⁷ or *jīrṇa* it may mean 'whatever is inured in the soil'. Another expression figuring in the context is *marumanna*. This word along with another *uñchhamanna* is met with in the records of slightly later period.⁸ The interpretation of this word is still a puzzle.⁸ This is the earliest occurrence of the word so far known. The village Nulḡāla cannot be identified.

¹ Above, Vol. VI, pp. 4-5 and *Ind. Ant.*, Vol. XIX, p. 7

² Above, Vol. III, p. 50.

³ Macdonell : *Vedic Mythology*, p. 95.

⁴ Compare *The Institutes of Vishṇu*, pp. 190-91 (*Sacred Books of the East*, Vol. VII).

⁵ Dr. Nandimath construes that the gift was made by pouring water along with the cumin seed. This is unwarranted. (*Bomb. Uni. Jl.*, Vol. V, p. 170.)

⁶ This interpretation compares well with the familiar expression, *nīdhi-nikshēpa-pāshāṇa-sahitaṁ*.

⁷ *Ind. Ant.*, Vol. XI, p. 66 ; *J. B. B. R. A. S.*, Vol. XVI, p. 244, etc.

⁸ For a discussion on the interpretation of these terms see *Journal of Oriental Research*, Vol. XI, pp. 165-7. Mr. R. S. Pancharukhi suggests that *manna* may be equated with *man* meaning 'land' and *manu*=waste or dry. This suggestion is invalid particularly in the context of the present passage which shows that the gift land was neither waste nor dry. Further, little credit will redound to the donor of a waste land.

There are clear traces of the influence of Kannaḍa in this record. Apart from the words *Nuḷgāla* and *maṛumanna* which contain the Dravidian letters ḷ and ṛ, the name *Katti-arasa*¹ appears to be purely Kannaḍa. More pronounced is the compound expression *sa-tōṭṭam* (l. 13) wherein the word *tōṭṭa* or *tōṭa* is glaringly Kannaḍa. In this passage which is prose, the poet could have easily substituted its Sanskrit equivalent.

¹ In the literal sense *katti* means 'a sword' and *arasa* 'a king.'

² From the original plates.

³ This word is engraved in the left-hand marginal space between ll. 1 and 2.

⁴ The dot denoting the *anusvāra* is wrongly engraved on the top of the previous *akshara* *klā*.

⁵ This *akshara* looks more like *shī*. Dr. Nandimath has read this *akshara* as *mmā*, which has no justification.

⁶ The *sandhi* has not been observed here.

⁷ This *akshara* is not clear enough. It looks more like *ba* and the mark denoting the length is not fully drawn up.

⁸ This expression has been read as *varmma-mahārājasya* by Dr. Nandimath.

⁹ A small horizontal curve denoting punctuation is engraved after the *visarga*; but it is unnecessary.

¹⁰ It would be better to read *pār-āvagāhan-āvabōdha*.

¹¹ This *akshara* is rather peculiar and may be taken to be the cursive form of *ṇa*.

¹² Dr. Nandimath's reading is *buddhi-naya*.

¹³ The *sandhi* has not been observed here.

¹⁴ This word is omitted in the text of Dr. Nandimath's Kannada article.

¹⁵ This *akshara* looks like *śō*.

¹⁶ The *sandhi* has not been observed here.

¹⁷ A small horizontal curve is engraved after this for punctuation, but it is superfluous.

¹⁸ This *akshara* looks like *dvau*.

¹⁹ Dr. Nandimath reads the expression as *dattam dānam* and corrects it into *dattavān*.

²⁰ The reading given by Dr. Nandimath is *shashtī-varsha*.

No. 11—POLSARA PLATES OF ARKESVARADEVA ; YUGABDA 4248

(1 Plate)

DINES CHANDRA SIRCAR, OOTACAMUND

In the last week of December 1949, I received for examination some copper-plate inscriptions belonging to the Utkal University, Cuttack, from its learned Vice-Chancellor, Mr. Chintāmaṇi Āchārya. The inscription under discussion was one of them. It was collected by Mr. Sadāśiva Ratha Śarmā, who has been appointed by the University a Research Assistant to go round different parts of Orissa and collect materials for the compilation of an authentic history of the country. On the 7th August 1949, in course of his tour in the Ganjam District, Mr. Ratha Śarmā found the present set of copper plates with an inhabitant of the village of **Polsara**, named Dwitiya Parida, who had discovered them while tilling a piece of land about the beginning of May 1949. I thank Mr. Āchārya for kindly allowing me to publish the inscription.

The set consists of **three plates** each measuring 7 inches by 3·7 inches. They are held together by a ring to which a **seal** is soldered. The seal, although smaller in size, closely resembles the seal attached to the copper-plate charters of the imperial Gaṅgas and bears the figure of a seated bull in full relief, facing front and bedecked with ornamental drapery and a bell tied to its neck. The first and the last plates are engraved on the inner side only, while the second is written on both sides. The incision is deep and the writing is clear, although most of the letters show signs of additional scratches probably due to some defect of the engraver's tool. There are altogether 40 lines of writing of which the first plate bears 11 lines and the third 9 lines only, while the second plate has ten lines of writing on the obverse and ten on the reverse. The plates without the ring weigh 80 *tolas*, while the ring with the seal weighs 24 *tolas*.

The **characters** belong to that variety of the East Indian script of the early mediaeval period which is usually called proto-Bengali, although, as I have suggested elsewhere,¹ a more appropriate name for the script is Gaudī. On palaeographical grounds, the inscription is ascribable to the 12th or the 13th century. The characters closely resemble those employed in a copper plate charter of Gaṅga Anaṅgabhima III (*circa* 1211-38 A. D.) recently examined by me.² Of initial vowels, we have in the inscription only *a* (lines 33, 40) and *ri* (cf. *Rishikulyā* in line 14), the latter little differing in shape from *jh* in *Jhāḍakhaṇḍa* (line 18). As usual with East Indian epigraphs of the age in question, *b* is generally indicated by the sign for *v*. But in some cases both *b* and *v* appear to have a slanting stroke across the loop (cf. °*āmvu-samvarddhita*° in line 9 and *vaḥ* in line 35) which resembles the stroke distinguishing *b* from *v* in Dēvanāgarī. It, however, seems to me to be nothing but a scratch, to the existence of which in the formation of most letters of the inscription reference has already been made. The inscription employs the numerical figures, 2, 4 and 8.

The **language** of the inscription is Sanskrit. There is, however, Prakrit influence in the name Śrīyādēvi (lines 11, 40) as well as in the word *śrīyā* standing for Sanskrit *śrī* in line 10. With the exception of the four imprecatory verses at the end, the entire record is in prose. As regards **orthography**, little calls for special mention besides the reduplication of *dh* before *y* as in *bhāṇḍāddhyaksha* (line 27) and *Maddhyadēśa* (line 16), the preference for the *anusvāra* to the *vargiya* nasals in spelling words like *kumḍ-ēṇḍu* (line 4), *saṁgata* (line 9), etc., the occasional reduplication of certain consonants after *r* and the non-observance of the rule of *sandhi* as, for instance, in °*dēvi-Arkēśvara*° in lines 39-40.

¹ Cf. *J. R. A. S. B.*, Letters, Vol. XIV, pp. 115-16.

² This inscription will also be published in the *Epigraphia Indica*.

The charter is dated in the year 4248 of the Yugābda, i.e., the Kaliyuga era. The second (i.e., the hundred) figure in the date resembles the Telugu and English numeral 3 and is found in Indian epigraphs and manuscripts to indicate 3 in some cases but 2 in others.¹ Some inscriptions of the Gaṅga king Narasiṃha II (circa 1278-1305 A. D.), however, show beyond doubt that this was the form of 2 and not of 3 in medieval Orissa.² Thus the year corresponds to A. D. 1147/8. The astronomical details relating to the date and occasion of the grant in lines 12-15 show that the grant was made on the occasion of a lunar eclipse on Friday, the day of the full moon of Māgha, in the 24th regnal year of the king who issued the charter. The date of the grant was therefore Friday the 6th February A. D. 1148, although Swamikannu Pillai's *Indian Ephemeris* does not recognise any lunar eclipse on that day.

The inscription records the grant of one-half of the village called **Valigrāma**, situated in the **Varttani vishaya** forming part of the **Jhāḍakhaṇḍa dēśa**, by **Arkēśvaradēva**, son of **Pramāḍidēva** and grandson of **Guṇārṇavadēva** who is described as a member of the **Gaṅga** family and a devotee of Mahēśvara (Śiva) and is styled **Paramabhāṭṭāraka**. The grant was made in favour of a Brāhmaṇa named **Vṛiddhikaraśarman**, son of **Madhukaraśarman** and grandson of **Jivakaraśarman**, who was a student of the Kāṇva branch of the Yajurveda. The donee belonged to the **Parāśara gōtra** and originally hailed from the **Madhyadēśa**. The occasion of the grant is said to have been the lunar eclipse on the date referred to above, when king **Arkēśvara**, accompanied by his chief queen **Śrīyādēvī**, came from the **Hiṅgulā kaṭaka** to the banks of the **Ṛishikulyā** apparently for a bath in the waters of the river. It is well known that the **Dharmaśāstras** enjoin a purificatory bath after the solar and lunar eclipses as well as the offering of gifts, especially to Brāhmaṇas, on the occasion. It is said that on the occasion of solar and lunar eclipses the bath in the waters of any pool or river is as meritorious as one in the holy waters of the Ganges.³ It is not known whether the use of the rather unusual Kaliyuga era, instead of the Gaṅga or the Śaka era, had anything to do with the special importance attached by the king and the queen to the auspicious occasion of the grant. The **kaṭaka** (camp or town) of **Hiṅgulā**, where the king and queen must have been residing, was apparently not far from the banks of the **Ṛishikulyā** river. The grant was made on the occasion of the lunar eclipse jointly by the royal consorts and, in lines 39-40, it is specifically said to have been approved of by both the queen **Śrīyādēvī** and the king **Arkēśvaradēva**. It is interesting in this connection to note that the aim of the grant was not only the usual "increase of the merit and fame of my own self as well as of my parents", but also "the increase of the progeny such as sons, grandsons, etc. (*putra-pautr-ādī-santati-vivṛiddhayē*)". The half of the village that was granted was made free from the obligation of paying revenue and was endowed with a **tāmra**, i.e., **tāmra-śāsana** or charter, which was incised for the purpose and "was free from all troubles", meaning apparently that the charter carried the usual privileges of enjoying the land without obstacles. The privileges specified in the record included the donee's right of enjoying the half of the village together with land and water, with fish and tortoise, with trees, shrubs and creepers as well as with hidden treasures and unclaimed wealth (*sa-nidhi-s-ōpanūluka*). The land was also made free from the entry of **chaṭṭa** (or **chāṭa**) and **bhaṭa**, usually interpreted by scholars as regular and irregular soldiers, but possibly meaning actually constables

¹ Cf. Bühler, *Indian Palaeography*, Table No. IX, lines viii, x and xii of the chart showing figures of the decimal notation; Ojha, *Palaeography of India* (in Hindi), Plate LXXII (a), LXXVI (a and b).

² See *J. A. S. B.*, Vol. LXV, Part i, 1896, Plate X, margin. The figure 3 in medieval Orissan records sometimes resembles *Dēvanāgarī* 2; cf. *op. cit.*, Plate XII, margin. For the numerical figures, see also Mazumdar, *Orissa in the Making*, Plate between pp. 202 and 203, line 22, where, however, 3 is properly written as in *Dēvanāgarī*. The views expressed in *J.O.R.*, Vol. XVII, pp. 216-7 are due to confusion.

³ Cf. quotations in the *Śabdakalpadruma*, s. v. *grahaṇam*: *chandra-sūrya-grahē śnānam śrāddha-dāna-jap-śikam | kāryāni mala-māsē=pi nityam naimittikam tathā ||* Also *sarvaṁ bhūmi-samān dānam sarvē Vyāsa-vamā dvijāḥ | sarvaṁ Gaṅgā-saman=tōyaṁ grahaṇē n=ātra samśayaḥ ||*

and peons.¹ The list of *rāj-ōpajīvins*, to whom Arkēśvara's order regarding the grant was issued, includes *narapati*, *rājaputra*, *amātya*, *mahāsāndhivigrahika*, *mahākshapaṭalika*, *mahāpātra*, *mahā-sāmanta*, *dauvārika*, *bhāṇḍādhyaksha*, *daṇḍapūśika*, *khaṇḍapāla* and *vishayapāla*. Of these, the official designation *mahāpātra* seems to be peculiar to Orissa. *Pātra* and *Mahāpātra* are still popular surnames in the Orissa region. According to the *Tārīkh-i-Firūz Shāhī* of Shams-i-Sirāj, "In the country of Jājnagar (i.e., Orissa), the *mahtas* (i.e., *mantrins*) are called *pātars* (i.e., *pātras*), and the Rāj of Jājnagar (i.e., Gaṅga Bhānudevā III, circa 1352-78 A. D.) had twenty *pātars*, otherwise called *mahtas*, under whose advice he conducted the affairs of his state".²

Considering the fact that the 24th regnal year of Arkēśvara corresponds to A. D. 1147-8, he must have ruled from A. D. 1124-5 to a date falling sometime after the 6th February A. D. 1148. Thus he was ruling contemporaneously with the imperial Gaṅga monarch Anantavarman Chōḍagaṅga (A. D. 1078-1147). It is difficult to believe that an independent Gaṅga monarch was ruling side by side with the Gaṅga emperor in the second quarter of the twelfth century. This coupled with the fact that no royal or imperial epithet is used in connection with the names of Arkēśvara and his father Pramāḍi may suggest that they were mere feudatories of the Gaṅga emperor, although the issue of the present charter without any reference to the overlord is rather difficult to explain. Arkēśvara's grandfather Guṇārṇava is given the imperial title *Paramabhaṭṭāraka*. But whether he is to be identified with one of the known monarchs of the imperial Gaṅga house or whether this is to be regarded as an improper use of the epithet can hardly be determined in the present state of our knowledge. We know that kings of the Gaṅga house of Śvētaka were ruling side by side with the kings of Kaliṅganagara for a long time, sometimes as feudatories and sometimes as independent rulers. The latest known member of the Śvētaka branch of the Gaṅga family may have been Dēvēndravarman³ who flourished in the second half of the eleventh century as an early contemporary of Anantavarman Chōḍagaṅga. It may not be impossible that Guṇārṇava, was another name of this Dēvēndravarman, who was apparently subdued by Chōḍagaṅga, and that his son and grandson were subordinate to the Gaṅga emperor. The absence of any reference to the overlord in our record may have been due to the expectation of regaining independence raised in the hearts of the feudatories by Chōḍagaṅga's death.

Of the geographical names mentioned in the record, the reference to Jhāḍakhaṇḍa-dēśa is very interesting. It was the name applied to the wide area of rather jungle land extending from South Bihar to Orissa, although its exact southern boundary is difficult to determine.⁴ The grant of Narasimha II referred to above mentions Dakṣiṇa-Jhāḍakhaṇḍa. In the north, the temple of Vaidyanātha at Deoghar near the junction of the Santal Parganas, Monghyr and Bhāgalpur Districts is often described as lying in Jhāḍakhaṇḍa. A sixteenth century inscription is said to describe a Rāja of Jaipur in the Ganjam District as the ruler of Jhāḍakhaṇḍa, while the Rājas of Baud are known to have claimed the same title. The village called Valigrāma and the *vishaya* or district named Varttani cannot be satisfactorily identified, although the latter may be the same as the Varāha-varttani or Kōlu-varttani *vishaya* mentioned in many other Gaṅga records.⁵ The

¹ [See above, Vol. XXIV, pp. 134.—Ed.]

² See Ray, *Dynastic History of Northern India*, Vol. I, p. 493. Verse 90 of the charters of Narasimha II (cf. *J. A. S. B.*, Vol. LXV, Part i, 1896, pp. 351-52) refers to the 16 *pātras* serving the king's father Bhānu I (circa 1264-78 A. D.).

³ He is known from such sources as the Mādagrāma grant of Śaka 988 (A. D. 1066) and the Kambakaya grant apparently of Śaka 1003 (A. D. 1081). See *J. K. H. R. S.*, Vol. I, pp. 220-21.

⁴ Mazumdar, *Orissa in the Making*, pp. 63-65. According to B. Singh Deo (*Nandapur*, p. 18), the chiefs of Jaipur or Koraput call themselves "Lord of Jhāḍakhaṇḍa" even today.

⁵ Cf. above, Vols. IV, p. 185; IX, pp. 94-98; *Ind. Ant.*, Vol. XIII, p. 275; *J. A. H. R. S.*, Vol. I, pp. 43, 108; *A. R. S. I. E.*, 1896, p. 17, No. 220, etc.

ancient village of Khōnna in Varāhavarttanī has been identified with modern Korni near Kalingapatam in the Ganjam District. This shows that Varāhavarttanī comprised parts of the Ganjam District where king Arkēśvara also apparently ruled. Hiṅgulā, probably the capital of the particular branch of the Gaṅga family to which Arkēśvara belonged, seems to have been situated, as already indicated, on the banks of the Rishikulyā, no doubt the river of that name flowing past the town of Ganjam in the Ganjam District of Orissa. The river has retained its old name in the list of rivers issuing from the Mahēndra range (*i.e.*, the Eastern Ghats) mentioned in the geographical sections of the *Purāṇas*.¹ The exact location of Hiṅgulā is, however, unknown, although it may be modern Hinjili of the Survey of India sheet maps 74A/11 c 1 and 74A/15 a 1. Madhyadēśa, to which the donee's family originally belonged, was the name applied to the central region of Northern India roughly between the Himalayas and the Vindhya and between the Eastern Punjab and the Eastern United Provinces (Uttar Pradesh).

No. 12—MADRAS MUSEUM PLATE OF BHUVANATRINETRA

(1 Plate)

P. B. DESAI, OOTACAMUND

A set of five **copper plates** was received from the Superintendent, Government Museum, Madras, in the office of the Superintendent for Epigraphy in 1935-36. They were strung together on a bare elliptical ring and gave the appearance that the whole formed one set. But on decipherment of the writing, it was found that they comprised three distinct records¹ belonging to different rulers.

¹ Better read *chāṭa-bhaṭa* usually found in this context in epigraphic records.

² Read °naś=cha.

³ Better read *Śrīyādēvy-Arkkēśvaradēvayōḥ*.

⁴ These inscriptions have been noticed as Nos. 5 to 7 of Appendix A in the *Annual Report on South Indian Epigraphy* for 1935-36. The first two of these records belong to the Rēnāḍu Chōla chiefs, Śrīkaṇṭha Chōla and Balliya Chōla Mahārāja. They have been published in the *Journal of Indian History*, Vol. XV, pp. 30-49 and 255 ff. and plates.

The present inscription which is being edited here for the first time¹ is engraved on the **fifth plate** of the set described above. The plate measures $9\frac{3}{4}$ " in length and about 3" in breadth. It has slightly raised rims all round. The record is engraved on one side only and consists of 8 lines. The **alphabet** is Telugu-Kannāḍa of the transitional stage and perhaps it is for this reason that a certain measure of indifference is noticeable in the formation of the letters.

In regard to **orthography**, the use of *anusvāra* in place of class nasals may be noted in a large number of cases. The expression [*sannimi*]*tra* in line 3 appears to be a mistake for *sannihita*. The record contains a few minor clerical mistakes which have been corrected in the body of the text.

The **language** of the inscription is archaic Telugu.

The document belongs to the family of subordinate chiefs known as the Vaidumbas. All the records of this family discovered so far are inscriptions on stone. This is the only copper plate record of the family.

The record is brief. It commences with the familiar *praśasti* of the **Vaidumba family** and introduces the chief **Bhuvana-Trinētra** who had assumed the title *Mahārāja*. It is dated **Śaka 893, Āshāḍha śu 7, Thursday, Dakṣiṇāyana-saṅkrānti**. The inscription states that this chief, residing at Pottepi in the Pāka-nāḍu, made a gift of the village *Kāṭicheruvu*² situated in the tract of Kaḍapa-Twelve to the god Lōkēśvara Bhaṭāra of *Artirēvula*. The gift was entrusted into the hands of *Kuchibhaḍālu*,³ a resident of *Maṁjaram*, who was to protect and enjoy the charity for the merit of *Bhimarāja* and *Bāchayva*. *Sirama Peggeḍa* was the executor of the document and *Dēsarati Bhimana* the engraver. The charter ends with the expression *śrī-Abhinuta-vāku* which would have been the chief's title used as the sign-manual.⁴

The date is irregular. If Śaka 893 is a mistake for Śaka 891 (expired), the details regularly correspond to A. D. 969, June 24, Thursday. But both these dates are, so to say, inadmissible in view of the statement of an inscription from Upparapalle⁵ in the Cuddapah District which speaks of the coronation, in Śaka 894, of *Bhuvana-Trinētra Vaidumba Mahārāja* who is apparently identical with this chief.⁶ But we can get over this difficulty by assuming that though he was wielding authority from an earlier date, the formal consecration ceremony of the chief took place later, on account of the disturbed political conditions.

We are not in a position to assign due place to *Bhuvana-Trinētra* in the genealogical account of the Vaidumbas. On account of the paucity of information and the disconnected nature of the sources it is difficult to reconstruct the history of the Vaidumba house, even partially, although a good many inscriptions of the family have been discovered so far. From the different names and titles of the chiefs available to us we are led to believe that there existed more than one branch

¹ My thanks are due to the Government Epigraphist for India for the kind permission to edit the record.

² The original expression is *Kāṭicheruvulu*, a plural form. Perhaps the termination *lu* stands for *lo* of the locative case. If so, we have to assume that the gift consisted of some land in the village.

³ His name proper would be *Ku(ū)chibhata* who was evidently the managing priest of the temple.

⁴ *Abhinuta-vāk* means 'one whose speech is praiseworthy'. This is an early instance of a ruler using the title for the sign-manual. The famous instance of the later period is *śrī-Virūpāksha* of the Vijayanagara kings. But in the latter case it is the tutelary deity and not the title of any ruler or rulers.

⁵ Mad. Ep. Coll., No. 325 of 1905.

⁶ The inscription on the front wall of the Śiva temple at Kalakaḍa, Vayalpad *tāluk*, Chittoor District (No. 441 of 1940-41 of Mad. Ep. Coll.) records certain remissions by the Vaidumba king *Bhuvana-Trinētra Iruṅgeya Mahārāja* on the occasion of his coronation. This epigraph is not dated; but may be roughly ascribed to the 10th century A. D. on palaeographic grounds. Except for the characteristic title and probable contemporaneity, clinching evidence is lacking for the identification of *Bhuvana-Trinētra* of the present document with *Bhuvana-Trinētra* of the Kalakaḍa record. It is, however, not unlikely that they refer to one and the same person.

of this family of chiefs. The Vaidumbas appear to have reached the height of their power in the 9th century A. D. under Gaṇḍa-Trinētra who was ruling over the territory of Rēnāḍu 7000,¹ the home province of the Telugu-Chōḷa chiefs. Bhuvana-Trinētra might be a direct descendant of Gaṇḍa-Trinētra removed by a few generations. Vaidumba Mahārāja mentioned as the subordinate of the Rāshtrakūṭa king Kṛishṇa III in an inscription from Pālagiri² in the Cuddapah District, was probably a predecessor of Bhuvana-Trinētra. By the time of Bhuvana-Trinētra, the Rāshtrakūṭa power had reached its final phase and it is significant to note that neither of the inscriptions of this chief contains any reference to the suzerain. Bhīmarāja and Bāchavva, for whose merit the gift was maintained, might be the parents of this chief.³

Reverting to the **place names** occurring in the epigraph, **Pottepi** is identical with Pottapi in the old Pullampet or the present Rajampet *tāluk* in the Cuddapah District. This town is said to have been founded by Madhurāntaka Pottapi Chōḷa, an early ancestor of the Telugu-Chōḷa family.⁴ **Kaḍapa**, the headquarters of the small tract of Kaḍapa-Twelve which included the gift village, is identical with modern Cuddapah. **Artirēvula** has been identified with Attirāla in the Rajampet *tāluk*. **Manjaram**, which seems to be identical with Mandaram mentioned in the two accompanying records referred to above, may be identified with Mandapalle in the same *tāluk*.

Lastly, we take up the region called **Pāka-nāḍu** which contained the tract of Kaḍapa-Twelve. This seems to be the earliest reference to the territorial unit and it would be useful to recall here in brief its origin and history. In the Prākṛit inscriptions of Nāgārjunikoṇḍa⁵ (circa 3rd century A. D.) is mentioned a people or clan called the Pūkiyas. The domicile of these people appears to have been styled the Pūgi or Pūṅgi Dēśa by the Sanskritists as attested by a late epigraph.⁶ In Sanskrit *pūga* or *pūgi* means arecanut⁷ and its corresponding equivalents, *pōka* and *pākkū* are found in Telugu and Tamil. Consequently, Pūgi Dēśa might have been changed to Pāka-nāḍu in course of time, its other variants being Pāki-nāḷu, Pākkai-nāḍu, etc. This territorial unit preserved its entity till the 16th century A. D., though its extent and content might have varied under different regimes. From the provenance of the inscriptions⁸ containing allusions to this region, it may be gathered that Pāka-nāḍu extended approximately over the major portion of the Nellore District including parts or whole of the Venkatagiri, Rapur, Nellore, Atmakur, Kovur, Kavali and Kanigiri *tālucs*, small areas of the Ongole and Bapatla *tālucs* of the Guntur District and the Cuddapah and Rajampet *tālucs* of the Cuddapah District. Under the Chōḷa regime during 12-13th centuries A. D., the western portion of this tract was designated Mēr-Pākkai-nāḍu forming part of the Jayaṅgoṇḍachōḷamaṇḍalam and Adhirājēndrachōḷamaṇḍalam.⁹ A subdivision of the Mēr-Pākkai-nāḍu was called Pottapi-nāḍu,¹⁰ evidently after the village Pottapi noted above. Under the Vijayanagara administration Pāka-nāḍu was incorporated in the Udayagiri-rājya.¹¹

No. 13—HIREGUTTI PLATES OF BHOJA ASANKITA

(1 Plate)

P. B. DESAI, OOTACAMUND

In the course of my annual tour in the Bombay-Karnāṭaka area during 1949-50, I secured the loan of this highly interesting set of copper plates from Sri Uddaṇḍa Bommayya Gaonkar, a resident of Hire Gutti in the Kumṭa tāluk of the North Kanara District, Bombay State, who owned it as an heirloom. It became possible to obtain its loan from the reluctant owner through the kindness of Sri S. P. Gaonkar of Ankola, M.L.A., who had informed me of its existence about a decade ago. I am editing the inscription on these plates here for the first time with the kind permission of the Government Epigraphist for India.

The set consists of **three plates** strung together on a **copper ring** passing through a hole, $\frac{3}{8}$ " in diameter, at the centre of the margin on the left side. The ends of the ring which measures $2\frac{1}{2}$ " in diameter and whose thickness is about $\frac{1}{8}$ ", are secured at the bottom of a circular seal. The plates are of uniform size; they measure 7" in length, $2\frac{1}{4}$ " in breadth and about $\frac{1}{16}$ " in thickness. Only one side each of the first and the third plates and both sides of the second plate are engraved. There are 16 lines of writing which are distributed equally on the four faces. The seal measuring 1" in diameter, bears in relief, the rough figure of a miniature elephant in motion facing the proper right. The weight of the plates is 27 *tolas* and that of the ring with the seal 8 *tolas*. The plates are in a good state of preservation notwithstanding their age.

The charter is written in the **southern alphabet** of the early age. The average height of single letters is about $\frac{1}{4}$ " and of conjuncts $\frac{1}{2}$ ". The characters are of the normal variety, that were in vogue in the Deccan and western part of South India. For general appearance they may be compared with the script of the Sangoli plates of Harivarman,² Halmiḍi stone inscription,³ Bādāmi Vaishṇava cave inscription⁴ and Goḍachi plates of Katti-arasa.⁵ Two trends, *viz.*, slightly more advanced and somewhat less advanced, are noticeable in the formation of letters like *k*, *j*, *ṇ*, *l* and *ṅ*. The letters *t* and *n* are not generally distinguished. The medial short *i* denoted either by a curve or a circle at the top, is distinguished from long *i* indicated by a curve with a loop on the left above the letter.

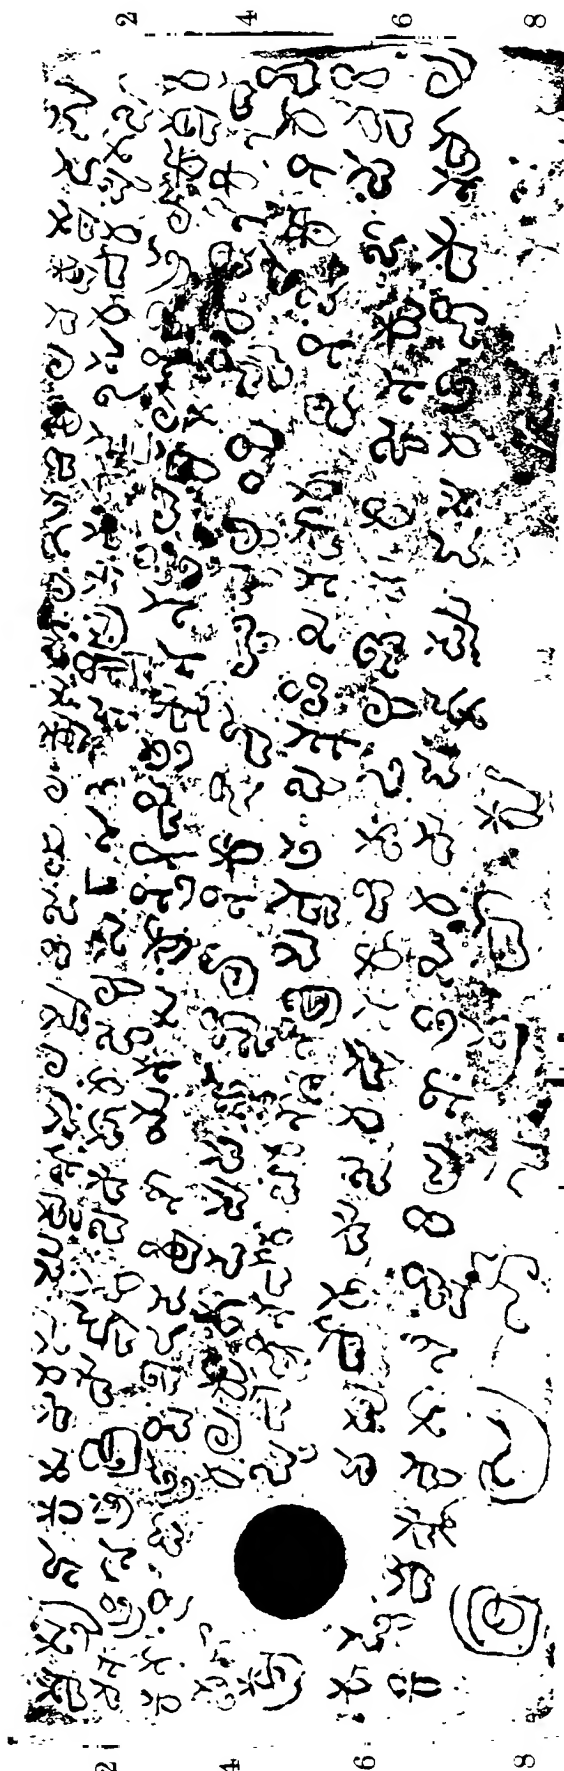

¹ The reading of this expression is doubtful as some of the letters are not legible. The *akshara* *sa* is engraved below the line and this omission is denoted by a cross incised between the *aksharas* *la* and [*nni*].

² Above, Vol. XIV plate between pp. 166 and 167.

³ *My. Arch. Rep.* for 1936; plate XXII, facing p. 72.

⁴ *Ind. Ant.*, Vol. X, plate facing p. 57.

⁵ Above, p. 62.

In regard to **orthography** the consonant after *r* is invariably doubled, the only exception being *rsha* in line 11. This is justified according to the rule of grammar,¹ which is however optional. The reduplicated letter is further subjected to the *sandhi* rule as may be noted in respect of *rtthya* and *rttha* in line 5, wherein the dental unaspirate is substituted for the corresponding aspirate.

The **language** of the epigraph is Sanskrit. The invocation and the imprecation are in verse. The rest of the record is composed in prose. The writing contains a few minor errors which have been corrected in the body of the text and in the footnotes.

The inscription commences with the praise of Lord **Buddha**. He is described as one 'whose feet are licked by the rays of the shining jewels in the coronets of gods and demons' and 'a reservoir of countless virtues'. Significant in this connection is the epithet, 'affectionate without a motive', applied to him. Next is introduced the king **Āsamkita**,² 'the moon in the firmament of the lineage of the **Bhōjas** who were endowed with Fortune'. The **object** of the document is to record gift of the village Sundarikā, situate in the Dipaka *vishaya*, for the enjoyment of the Buddhist *vihāra* belonging to them,³ by the king, at the request of the chief Kottipeggili born in the lineage of the Kaikēyas of Nandipalli. The gift village was entrusted to the Ārya Saṁgha, i.e., assembly of Buddhist monks in charge of the monastery. It was bounded by Kurvvā in the east, the roaring stream⁴ of Marttikaṭṭu in the south, the water-fall on the mountain in the west; its northern boundary extended up to the boulder with the mango tree. The charter ends with an exhortation to protect the charity bestowed upon the Ārya Saṁgha and an imprecation against its violators.

The epigraph bears no date. So the only means left to us for determining its date is **palaeography** whose evidence may be reckoned as fairly approximate. The alphabet of the inscription betrays archaic traits and appears to be older than that of the four epigraphs⁵ mentioned before for general comparison. It bears closer affinity with the script of the copper-plate record of the Kadamba king Mṛigēśavarman, dated in the 4th regnal year,⁶ except for the box-headed character of the latter. Of the four records noted above the Sangoli plates of Harivarman are the earliest with some precision in date. They have been ascribed to the middle of the 6th century A.D.⁷ Hence it would be reasonable if we assign the end of the 5th or the beginning of the 6th century A.D. as the most likely date of our record.

More than one interests centre round this brief document inasmuch as it opens up certain new facts regarding the political and religious history of the south-western region of India in that early age. Firstly, it introduces a new prince of the ruling family of Bhōjas. If we go to the early age of the post-Vedic literature and that of the epics, the Bhōjas figure as a class or clan of rulers⁸

¹ *Ashṭādhyāyī*; *achō rakābhyām dvē* | (VIII-4-46). This *sūtra* explains the circumstances when the reduplication can take place. The exception is indicated by another *sūtra*: *śarō=chi* | (VIII-1-49).

² This name occurs in the combination of two words coalesced by *sandhi*. It is possible to construe the king's name as Śamkita also. But on consideration of sense it would be better to take it as Āsamkita which means 'the fearless one'.

³ The *sva* in *sva-vihāra* can be interpreted as relating either to Āsamkita or to Kottipeggili or to both. I would prefer the last alternative. This would be in keeping with the fact that both the king and his chief had their leanings with the Buddhist faith as indicated by the circumstances. *Sva* may also point to 'their own faith'.

⁴ *Virāva* means 'a roar, thunder'. It is suggested by the natural context that this expression is used here to connote 'a noisy mountain stream'.

⁵ One of these is the Halmiḍi inscription. I had a discussion in regard to the dating of this record with Mr. N. Lakshminarayan Rao, Superintendent for Epigraphy, who holds that it should be placed in the 6th century rather than in the 5th century A. D. *Contra. Mys. Arch. Rep. for 1936*, p. 72.

⁶ *Ind. Ant.*, Vol. VII; plate between pp. 36 and 37.

⁷ Above, Vol. XIV, pp. 165-66.

⁸ K. P. Jayswal: *Hindu Polity* (second edn.), pp. 36 and 79.

claiming some importance. According to the *Āitarēya Brāhmaṇa*, the chiefs of the Sātvata clan were termed *Bhṛ̥jas* and it is stated that the former were regulated by the Bhaujya constitution wherein the authority seems to have been vested in the chosen representatives or leaders of the people.¹ This institution of leaders which was non-hereditary in the first instance appears to have developed as a hereditary class by itself;² for, the Bhōjas are mentioned as a subdivision of the Yādavas in the *Mahābhārata*.³ The Bhōjas, as specified by the *Āitarēya Brāhmaṇa*, were confined to the southern region. It is interesting to note that this general statement in regard to the domicile of the Bhōjas in the south has been confirmed by the specific allusions found in the early epigraphs ranging from the times of Aśoka. In his Rock Edict XIII, the Bhōjas are mentioned along with the Pitinikas and it is surmised that the former hailed from the western part of India.⁴ The Bhōjas again, associated with Rāshṭrikas, are referred to as fighting against the Kalinga king Khāravela in the Hāthigumphā inscription.⁵ According to the *Daśakumāracharita* which seems to reflect certain historical facts, Vidarbha was ruled by a king named Puṇyavarman who belonged to the ancient Bhōja race.⁶

Some of the Bhōja chiefs who had emerged as a ruling class of some importance, seem to have preferred to style themselves Mahābhōjas. The Mahābhōjas figure in a number of Brāhmī inscriptions⁷ of about the first and second century A.D. from the western parts of the Bombay State and the sphere of their activities seems to have been confined to that region. They were connected by matrimonial alliance with the Mahārāṭhis on the one hand and the Chuṭus on the other.⁸ The Mahābhōjas were adherents of the Buddhist faith.⁹

But the existence of the Bhōjas as an independant ruling family or families of note, prior to the advent of the Chālukyas on the political horizon of South India, is being unravelled for the first time by a series of copper-plate records discovered recently. Mr. N. Lakshminarayan Rao has noticed them in detail in his note on the Siroda plates of Dēvarāja,¹⁰ which are the earliest of the series. Next in chronological sequence after the Siroda plates comes the present epigraph. This is followed by three charters, one issued by Dharmamahārāja Kāpālivarman and two others by Pṛithivimallavarman.

Thus it has been seen that as many as five copper-plate inscriptions of the Bhōja family have come to light so far. They range in age from the 4th century to the 7th century A. D. In the absence of more information on the genealogical relationship of these rulers it is not possible to say that they belonged to one and the same lineage. It is likely that they were members of various branches. Dēvarāja of the Siroda plates and Aśaṅkita of the present epigraph probably represent different lines. Kāpālivarman seems to be connected with yet another line. This prince appears to have been a ruler of dignified status and we may note the distinguished title *Dharmamahārāja* borne by him. This title was assumed by more than one prince of the Pallava, Kadamba and the Western Gaṅga families. It is not unlikely that Pṛithivimallavarman of the said plates belonged to the line of Kāpālivarman as suggested by the common name-ending; but we have to observe the absence of the title *Dharmamahārāja* in respect of the former. The provenance of these

charters and other indications obtained from the place-names occurring in them would show that these princes held sway generally over the strip of land on the west coast, roughly comprising the present day territory of Goa and the North Kanara District.

Secondly, our epigraph brings into relief the state of **religion** prevailing at the time. Save the present inscription, all the Bhōja charters noted above register grants to the Brāhmaṇas. True, no definite conclusion can be arrived at merely on the basis of this fact, but there are other grounds which lead to the assumption that these chiefs were adherents of the Brahmanical faith. Only Aśaṅkita and other members of his house probably owed their allegiance to the doctrine of Lord Buddha. Not merely from the fact that he made the generous grant of a village to a Buddhist *vihāra*, but also from the adoption of the elephant, the symbol of Buddha, as their emblem, it would be reasonable to assume that the family of Aśaṅkita was Buddhist by persuasion. This is in keeping with the traditions of the Mahābhōjas whose Buddhist leanings are already known. Nothing was known in regard to the state of Buddhism in the Western Deccan after the 3rd century A.D. But this epigraph throws welcome light to the effect that that faith had not lost its ground completely and that it was held in esteem at least by a section of the society about the 6th century A.D. This is seen from the reference to the Buddhist monastery, the congregation of monks who held its charge and the patronage and support they received from the ruling king and the feudatory chief. Leaving behind the Brāhmī cave inscriptions of Western India, the Buddhist records are few and far between and **the present one appears to be the only Buddhist copper-plate record of the early period so far known.**

Thirdly, the seal of the present plates presents a noteworthy feature. Whereas three of the above documents bear no seals and the figure on that of the Siroda charter is couched in some doubt,¹ the seal of the present epigraph is well-preserved and distinct. As seen before, it contains the representation of an elephant. The Buddha is symbolically depicted as an elephant² and the family of Aśaṅkita appears to have chosen, this figure as the characteristic emblem on their crest to mark their Buddhistic leanings.³

We may incidentally notice here a few facts bearing on the history of Buddhism in this part of the country. A statue of the Buddha in the meditative pose, attributed to the early age of the Christian Era, was found some years ago at Colvale in the Goa territory.⁴ According to an inscription from Nāgārjunikoṇḍa, of about the 3rd century A.D., the region of Banavāsi, approximately representing the North Kanara District, was converted to Buddhism by the Buddhist monks of Ceylon.⁵ This piece of information is confirmed by the evidence of the *Mahāvamsa*.⁶ Kōdabalisiri, a princess of the Ikshvāku house which was a great patron of Buddhism, figures in a Nāgārjunikoṇḍa epigraph as the foundress of a *vihāra*.⁶ She was consort of the *Mahārāja* of Vanavāsa (i.e., Banavāsi) who may be identified as a prince of the Chuṭu family.⁷ The Buddhist influence over the members of the Chuṭu family is indicated by the Banavāsi Prakrit inscription . cording the

¹ The late Rao Bahadur C. R. Krishnamacharlu has stated that the figure on the seal is a swan. Mr. Pisurlekar thought, it was a peacock. Mr. Mirashi suggests it to be a lion. See *A. B. O. R. I.*, Vol. XXV, p. 43, n. 4.

² Compare, e.g., H. Hargreaves : *Buddha Story in Stone*, pp. 7-8 ; *Arch. Surv. of South. Ind.*, Vol. I, p. 35.

³ An early instance of a Buddhist record on copper-plate comes from the Tippera District in East Bengal. It is dated in the year 188 of the Gupta Era, corresponding to A.D. 507, and registers a grant to a Buddhist *vihāra* by the king Vainya Gupta who, however, was not a follower of the Buddhist faith ; *I. H. Q.*, Vol. VI, pp. 45 ff. (I owe this reference to Dr. D. C. Sircar). The Pāla rulers of Bengal were Buddhist by persuasion and they had chosen the Dharma Chakra as their characteristic symbol, which is displayed on their copper-plate documents. If the above surmise be correct, this would be the only instance of a ruling family that had adopted as their emblem the figure of an elephant representing the Buddha.

⁴ *Kadamba Kula*, p. 256.

⁵ Above, Vol. XX, p. 7.

⁶ *Ibid.*, p. 5.

⁷ K. Gopalachari : *Early History of Andhra Country*, pp. 137-38.

gift of a Nāga, and a *vihāra*.¹ Bōdhidharma, founder of the Zen school of Buddhism in China during the early part of the 6th century A.D., hailed, according to one account, from a royal family ruling over the West Coast of South India.² It is suggested that he might be a prince of the early Kadamba family.³ This suggestion seems to be untenable in view of the fact that the early Kadambas are not known to have directly ruled over the West Coast. Nor is the evidence available to show that the Kadambas ever came under the influence of Buddhism. So could it be that Bōdhidharma was connected with the family of Bhōjas some of whom were influenced by the Buddhist doctrine?

Lastly, we are introduced to a new branch of the Kaikēya family. The Kaikēyas originally hailed from the Kēkaya country situated between the rivers Bias and Sutlej in the Punjab.⁴ They are mentioned in the *Rāmāyaṇa*, *Mahābhārata* and the *Purāṇas*.⁵ They seem to have subsequently migrated to the south and consolidated their position by contracting matrimonial alliances with the princes of the Ikshvāku, Early Kadamba and Pallava families.⁶ It appears that there were several branches of the Kaikēyas who had settled in different parts of South India. This may be gathered from the specific reference to the family in the present epigraph as the Kaikēyas of Nandipalli, to distinguish it from others. Allocation of this branch of the Kaikēya family rests on the identification of Nandipalli which appears to have been its headquarters. It may possibly be identified with Nandivalli which was one of the gift villages mentioned in the Vokkalēri plates⁷ of the Western Chālukya king Kīrtivarman II, dated in A. D. 758. It was situated on the southern bank of the river Aṛaḍore or Dharmā in the Pānuṅgal *vishaya* or the territory adjoining modern Hāngal in the Dharwar District. If this identification be correct, it may be assumed that Aśaṅkita's authority extended over a part of the area of the Dharwar District; for, the Kaikēya chief Kottipeggili was his subordinate.

The name Kottipeggili is interesting; for, it is only an epithet and not a proper name. It is constituted of three words, *kottu*=to strike, *peggu* (*peragu*)=back and *il*=not; and may be derived according to the rules of Kannaḍa grammar.⁸ The whole expression would thus mean, 'one who is not a back-stabber'. Similar epithets, e.g. *Kokkili*= 'one who is devoid of crookedness' were in vogue in the early age.⁹ These expressions are purely Kannaḍa.

The following place-names are mentioned in the epigraph; *Dipaka vishaya*, *Sundarikā*, *Kurvā*, *Marttikaṭṭu*. The first is evidently a territorial division and the last three are villages situated in the former. I am unable to identify the latter and in regard to the former I may only suggest two possible alternatives. *Dipaka vishaya*, appears to have derived the name from the *dvīpa* or an island. It may be either the Anjdiv island, five miles south-west of Karwar¹⁰ or the island of Divar on the north of the island of Goa. The latter is mentioned under the name *Dīpavati* in the *Skanda Purāṇa*.¹¹ If these names are to be derived from *dīpa* meaning 'light', they would have derived the appellation on account of the existence of some lighting arrangement like light-house on them.

³ The mark of punctuation in the original is peculiar.

⁴ The letter *yā* looks like *sā*.

⁵ The superscript *v* is indicated by a circle.

⁶ This letter may be read as *nti* also, but the above reading seems to be better; cf. *ttah* in line 6 and *ttim* in line

14. Its interpretation also warrants this reading.

⁷ This letter looks like *bā*.

⁸ Read *sahitaḥ*.

⁹ There is a punctuation mark after this letter, which evidently indicates that the word is not completed.

¹⁰ The metre of this and the next three verses is *Anuṣṭubh*.

¹¹ The superscript *shā* of this letter looks like *vō* as the left hand hook at the top is not joined to the lower oval body of the letter.

¹² There is a break in the engraving of this letter.

¹³ The formation of this letter is peculiar.

¹⁴ The punctuation mark consists of one horizontal stroke.

¹⁵ The construction of this clause is faulty. The defect will be amended if we read *pālayatē narakā*.

¹⁶ The *ē* sign of this letter is peculiar, being a curve with a hook towards the left.

¹⁷ This mark of punctuation consists of a wavy horizontal stroke.

NO. 14—SHELARWADI CAVE INSCRIPTION

(1 Plate)

C. C. DAS GUPTA, CALCUTTA

There is a well-known series of Buddhist caves at **Shelār wāḍi**, a place twenty miles north-west of Poona.¹ There are at present altogether seven caves in this group. On the outer face of the Cave No. 1 there is an early Brāhmī inscription which has been known for a long time.² That inscription informs us that one Siagutanikā, wife of the ploughman and householder Usabhaṇaka with her son, the householder Naṁda, residing at Dhēṇukākaḍa, made the gift of this cave. When I had gone to see these caves in January 1940, I discovered another inscription on the door-lintel of the proper left cell in the back side of the cave No. 2. Except one or two letters, the whole inscription was concealed under a thick coat of mud plaster. The mud plaster having been removed, the present record, a hitherto unknown inscription, was brought to light.

The inscription measures 4' × 1' 1" and consists of five lines of writing. The last line, consisting of only three letters, is just below the end of the fourth line. The **script** is of the variety adopted in the undated inscriptions of Kuḍā, Nos. 1—6, 11, 20,³ and may be ascribed to about the 2nd century A.D. With regard to the formation of individual letters it may be pointed out that *a*, *gh*, *ch*, *t*, *dh*, *m*, *l*, and *h* have two different forms⁴ each as found respectively in the following examples : *ate* (line 1) and *bālikāa* (line 2) ; *Ghapa°* and *Saghā°* (line 2) ; *cha* (lines 3 and 4) ; *bhayata* (line 1) and *°ti[k]āya* (line 2) ; *sidha* (line 1) and *Budha°* (line 2) ; *dhama* (line 3) and *°māpito* (line 5) ; *bālī°* (line 2) and *kulehi* (line 4) ; *Siḥā°* (line 1) and *°vehi* (line 4). Besides, *s* has four different forms,⁴ as in *sidha* (line 1), *Saghā°* (line 2), *saha* (line 3) and *savehi* (lines 3—4). The medial vowels used are *ā*, *i*, *u*, *e* and *o*. Among these, only *i* has two different forms⁴ as found in *°siṇiya* (line 1). The **language** used is Prākṛita.

The **object** of this inscription is to record the gift of a *chaitya* hall by two ladies **Budhā** and **Saghā**. The latter was the daughter of Ghaparā, a female disciple of the elder (*thera*) Bhadanta Siha (Simha). There are certain interesting points in this inscription which deserve notice. Of the four names in this inscription two, *viz.*, *Saghā* and *Budhā* seem to be peculiar, as such names are usually found with some other suffix such as *mītra*, *datta*, etc. This inscription also gives us the evidence for the first time that this particular cave was meant to be the *chaitya* hall of the Buddhist monastery which was situated on this hill. Regarding this cave, Fergusson and Burgess remarked : "The front is entirely gone, and a thick wall has been built, to form a new front, a few feet farther in than the original, with two circular arched doors. The hall has four cells on the right, two in the back, besides a large shrine, and three on the left,—a fourth being entirely ruined. In the shrine recess had stood a dāgoba, the capital attached to the roof as in the Kuḍā

¹ This series of Buddhist caves was first noticed by the late Dr. John Wilson in 1850, *J.B.B.R.A.S.*, Vol. III, part II, page 54, where he observes : "A little below the summit of that hill fronting the south-west, we found an excavation with four small cells, containing a *yōni*, and at present sacred to Shiva, which appeared to us, from a bench going round the excavation in front of them, to have been originally Buddhistical. On examining the hill more particularly, we came upon a considerable *Vihār* below them, running E.N.E. and containing about a dozen of cells. Here we found a Buddhist inscription of five lines, which we copied, and which we still preserve. It is very possible that some *Chaitya* may be in the neighbourhood". It was also noticed by G. H. Johns (*Ind. Ant.*, Vol. V, pp. 252 f.), Fergusson and Burgess (*The Cave Temples of India*, pp. 246 f.), Burgess and Indrajī (*Inscriptions from the Cave Temples of Western India*, pp. 38 f.), Burgess (*Report on the Buddhist Cave Temples and Their Inscriptions*, pp. 23, 92, Pl. XLVIII., No. 19), Lüders (*A list of Brahmi Inscriptions*, No. 1121).

² Lüders, *A List of Brahmi Inscriptions*, No. 1121.

³ Bühler, *Indische Palaeographie*, Tafel III, Col. XV. *Arch. Surv. W. Ind.*, Vol. IV, p. 84, etc.

⁴ [The difference noticed is perhaps not a substantial one.—Ed.]

SHELARWADI CAVE INSCRIPTION

caves,—but this has been hewn away to make room for a small low *chavaraṅga* or Śaiva altar.¹ From this it is apparent that from the architectural point of view also it was originally a *chaitya* hall which was later transformed into a Śaiva shrine and this inscription establishes beyond doubt that it was the *chaitya* hall of this Buddhist establishment.

TRANSLATION

Success. The meritorious gift of a *chaitya* hall is made by Budhā and Saghā (Saṁghā) (*who was*) the daughter⁶ of the nun Ghaparā, a female disciple of the elder (*thera*) Bhadanta Siha for the sake of parents together with all communities of the *bhikshus* and the teachers.

No. 15—MORE LIGHT ON GHUMLI PLATES ; GUPTA SAMVAT 513

B. CH. CHHABRA, OOTACAMUND

Early in 1936, twelve copper plates were unearthed near Ghumli in the Nawanagar State of the United States of Saurāshṭra. They constitute six separate charters of certain Saindhava rulers. The charters have been edited by Dr. A. S. Altekar. They are indicated as A, B, C, D, E and F. In this note, we are concerned with the charter A. It is a grant of the time of Agguka II, dated in the [Gupta] year 513.⁷ The last line of this document contains the following recapitulatory verse :

Śrī-Jayasēnō mahyaṁ grāmam=adāḍ=Ḍhaṅka-tīrtha-nāmānam [| *]
Gulamayikā-grāma-daś-āṇsa(ś-āṇśa)-sahitam=atibhaktir=Udag-ayanē ||

This is followed by the date *Samva 500 10 3*. The information briefly conveyed by the couplet is the main theme of the charter, set out in detail in lines 27-33. It may be observed that, in the verse, the king Jāika is mentioned under the Sanskrit or Sanskritised form of his name, and that Gulamikā is spelt as Gulamayikā for the sake of the metre.

The point at issue, however, is that the verse has been considered by the learned editor to be an interpolation. Moreover, the interpolation is supposed to be the work of the donee himself. That this can hardly be the case is shown below.

¹ Fergusson and Burgess, *The Cave temples of India*, pp. 246-7.

² It seems that one wrong letter was engraved after *y* which was effaced and the letter *t* was then chiselled in the next space.

³ [The reading of this syllable is definitely *rā*.—Ed.]

⁴ It may at first appear that *Saghāya Budhaa cha* may mean "to the Buddha and the *saṁgha*"; but there is one difficulty for which this interpretation cannot be accepted. There is no dative in *Prākṛita* and the sense of dative is conveyed by possessive in this language. The reading should, therefore, have been *saghasa Budhasa cha* if it had meant "to the Buddha and the *saṁgha*".

⁵ The meaning of the word *bhata-vireyehi* is not clear.

⁶ From the context it appears possible that both Saghā and Budhā were the daughters of Ghaparā; but as the form *bālikā* which precedes *Saghāya* is singular, I have taken only Saghā to be the daughter of Ghaparā.

⁷ Above, Vol. XXVI, pp. 197 ff., and plate.

While introducing the verse, the learned editor remarks that it 'summarises the contents of the grant mentioning once more the names of the grantor, the grantee, the village granted and the time of the grant'. Continuing, the learned editor says: "Since the donee speaks of himself in the first person in this verse, it may be well doubted whether it really formed part of the original record. In copper-plate charters, we do not usually come across the phenomenon of the donee himself stating at the end that he had got the grant from such and such a king on such and such an occasion. It would appear that the last verse was probably composed by the donee himself and added in the space available at the bottom of the plate".¹ The learned editor, as a matter of fact, is convinced of this state of affairs, as has been evinced by himself in the course of drawing a contrast between this Charter A and Charter D of the series. There, he points to the fish emblem that occurs at the end of the record instead of on its seal, and comments: "In a way it is no doubt a better method to prevent additional matter being interpolated in the documents in the space lying vacant at the end of the record, as was done by the grantee of Charter A. The seal emblem on the ring does not prevent such a tampering with the original record".²

Now, there are certain considerations that not only do not favour the conclusion arrived at by the learned editor, but positively discredit it. In the first place, the verse in question does not show any hidden motive behind it which would prompt a tampering with the original. Secondly, having no reason to the contrary, we may credit the donee with sense enough to know that any such interference on his part would only go against him, nay, would even annul the grant, legally speaking. These two considerations preclude the possibility of attributing to the grantee any bungling of the suspected sort. It may, however, further be observed that, as shown above, after the so-called interpolated verse comes the date which the learned editor evidently does not take as a part of the interpolation. Since the date occurs nowhere else in the record and he has accepted it as authentic, it may be inferred that he considers the date portion as a part of the original document itself. It follows therefore that the engraver incised the date at the extreme end on the right, leaving on the left a blank just enough to accommodate an *Āryā* to be inserted later on by the donee, so to say. Here again an element of improbability! Supposing that, after finishing the verse in line 44, the engraver had only the date portion left to be engraved, a more natural course for him would have been either to commence the next line by engraving the very date or to engrave it somewhere in the centre, leaving some space unengraved on either side. Even granting that the insertion of the date is also the doing of the donee, the evidence of the handwriting is strongly against the interpolation theory. It may be seen from the illustration that there is absolutely no difference in the duct of writing between the last line of the record and the rest of it, whereas in the event of any addition by the donee some difference in handwriting was bound to show itself. In the Sone East-Bank copper plate of Indradēva and Udayarāja, we have a clear instance of an interpolation by one of the donees, where the difference in handwriting is as obvious as the object of the interpolator is manifest.³

So far as the practice of summarising the contents of a grant at the end is concerned, there is nothing strange about it, though it is not of a frequent occurrence. In a way, it occurs again in charters D, E and F of the series.⁴ The same is found in certain other records as well.⁵ It would no doubt have been very unusual if, in the present instance, it had been done by the donee himself, as the learned editor believes it has been. According to him, the verse mentions *inter alia* the name of the grantee. This is not true. Further on, however, he makes himself clear by

¹ *Ibid.*, p. 198.

² *Ibid.*, p. 212.

³ *Ibid.*, Vol. XXIII, pp. 223, 230 and n. 1, plate facing p. 228.

⁴ *Ibid.*, Vol. XXVI, p. 217, text line 44; p. 222, text lines 35-36; p. 226, text lines 38-39.

⁵ For example, see *ibid.*, Vol. XXII, p. 191.

adding that ' the donee speaks of himself in the first person in this verse '. Obviously he has the word *mahyam* in view. This is thus the nucleus of the interpolation theory. In the light of the foregoing discussion one would, however, ask oneself whether the *mahyam* is really the pronoun, first person, singular, dative, or whether it is something else. Can it not be the accusative singular of the word *mahya* used as an adjective qualifying the word *grāma* ? That in any case assorts well with the context, *mahya* being an equivalent of *namasya*. This last is a well-known term, literally meaning ' to be respected ', but technically denoting ' rent-free '. Synonymous terms like *mānya* are also found used.¹ In the present instance, though *mānya*, *pūjya*, etc., would have fitted in equally well with the metre, the author seems to have hit upon a rather unfamiliar word, not realizing that it might give rise to a grave misapprehension. Or, who knows, his choice has been deliberate.

The word *mahyam* in the present context having thus lent itself to a different and more befitting interpretation, there can hardly be any doubt that the verse in question did form part of the original record and is not an interpolation.

I must add that I had occasion to peruse Dr. Altekar's paper on the six Saindhava grants while it was still under publication. In fact, I then made a few suggestions in connection with that paper, which Dr. Altekar accepted. At that time, however, nothing occurred to me as to the delusive *mahyam*. By the association of ideas, I suddenly remembered of this, later on, while dealing with the Bamhanī plates of the Pāṇḍava king Bharatabala. In this record, I came across the expression *mahaiya-pādaiḥ*,² obviously a mistake for *mahya-pādaiḥ*.

Dr. N. P. Chakravarti, who happened to go through this note of mine and agreed with the interpretation offered here, kindly suggested that the term *mahya* in the present context may, instead of denoting ' rent-free ', simply mean ' big ' or ' great '. The word is admittedly of rare occurrence,³ but its meaning is obvious.

No. 16—SUMANDALA PLATES OF THE TIME OF PRITHIVIVIGRAHA- BHATTARAKA : GUPTA YEAR 250

(1 Plate)

D. C. SIRCAR, OOTACAMUND

Sometime ago a young man named Vāsudēva Nanda found a set of inscribed copper plates from a mound near the village of **Sumaṇḍala** in the Khallikōṭ State now merged in the Ganjam District, Orissa. The village of Sumaṇḍala is not far from Jaugaḍa, noted for a set of old rock inscriptions of the Maurya emperor Aśōka, and from Buguḍa, the find-spot of an important copper-plate inscription of the Śailōdbhava dynasty which had its headquarters at the city of Kōṅgōda on the river Sālimā (modern Sāliyā) running into the Chilka Lake. Mr. Nanda handed over the plates to Pandit Ananta Tripāthī of Berhampore, who is a reputed Sanskrit scholar and is the editor of the Sanskrit journal *Manōramā*. The editing of the plates was entrusted to Mr. S. N. Rājaguru whose paper on the inscription was published in the said *Manōramā*, Vol. I, part i (1949, Aśhāḍha, Śaka 1871), pp. 17-24, together with illustrations of the inscribed sides of the plates.

¹ Above, Vol. XVIII, p. 233.

² *Ibid.*, Vol. XXVII, p. 142 and note 9. It may be observed that the form *mahaiya* can equally be amended into *mahayya*. This last is met with in the *Chhāndōgya Upanishad*, VIII, 8, 4 : *ātm=aiv=ēha mahayyaḥ*, etc.

³ It is, for instance, found used in the sense of ' great ' in the *Yōgakundālī Upanishad*, II, 13 : *labdhvā śāstram=idaṁ mahyam*.

As Mr. Rājaguru failed to notice the most important historical information supplied by the inscription, as yet unknown from any other sources, *viz.*, the spread of imperial Gupta suzerainty over the Kalinga country, I re-edit the record.

The set consists of **three plates** having rounded corners and each measuring 6·2 inches by 2·8 inches. They are strung together on a ring to which a **seal** is attached. The oval brass seal contains on its counter-sunk surface (1·25"×1·5") the emblem of a *tōraṇa* or gateway and the legend *Mahārāja Dharma*. The first and the third plates are written on one side only, the second being written on both the sides. The three plates together with the ring and seal weigh 64 *tolas* while the weight of the ring with the seal is 20 *tolas* only.¹

The **characters** belong to the class commonly characterised as the Gupta script and are assignable to the sixth century A.D. They have points of similarity with, but are earlier than, the alphabet of the Ganjam inscription of the time of Śaśāṅka dated in the Gupta year 300 (619 A.D.).² The letter *s* in the present record has retained its round loop in some cases and even in the forms with the triangular loop it has no inside opening as is the case in the Ganjam inscription. The latter inscription employs the sign for *v* to indicate *b* in all cases; but, in the present record, *b* has been indicated in some cases by its distinct sign and in others by the sign for *v* (cf. *brāhma*^o in lines 12 and 13, but *vappa*^o in line 5 and *vahu*^o in line 17). Of the initial vowels, we have instances of only *ā* (line 19), *u* (line 16) and *ē* (line 10). Final *t* occurs once in line 19. Interpunctuation is indicated by a short horizontal stroke. The horizontal stroke indicating the completion of the record at the end of the charter is, however, considerably longer and is possibly meant to indicate a double stop.

The **language** of the inscription is Sanskrit, although Prakrit influence can be traced in the word *dāṇḍavāsika*³ for Sanskrit *dāṇḍapāsika* in line 7. With the exception of four imprecatory verses about the end of the charter the record is throughout written in prose. As regards **orthography**, the inscription under discussion resembles the Ganjam inscription and the East Indian records of about the sixth century. Attention may be drawn to the occasional reduplication of some consonants in conjunction with a following *y* (cf. *°māty-ōpa*^o in line 7, *°vrit-ādhyayana*^o in line 13, etc.). Reduplication of certain consonants in conjunction with a preceding or following *r* is more regular. Wrong *sandhi* in cases such as *°nyāṅś=cha* (line 8), *°yikāṅś=cha* (line 9), *°ṇāyām=vasu*^o and *°rāyām=vartta*^o (line 2) and *°dattām=vā* (line 21) is noteworthy. The rules of *sandhi*, which is optional in prose, have not been observed in such cases as *°smābhiḥ Māgha*^o and *°yanē ētaḍ*^o in line 10. The *visarga* followed by a sibilant has been modified in some cases (cf. *°rājabbis=Sa*^o in line 17, *°bhis=saha* in line 22) but not in others (cf. *°tanuḥ sa*^o in line 5). Final *m* has been wrongly changed to *anusvāra* at the end of the second or fourth foot of a verse (cf. lines 18, 21).

The **date** of the inscription is indicated in words : *varttamāna-Gupta-rājyē varsha-śata-dvayē pañchāśad-uttarē* in lines 2-3 and *Māgha-kṛishṇasy-aikāḍśyūm=uttar-āyanē* in line 10. The grant was thus made on the occasion of the *uttar-āyana*,⁴ falling on the eleventh *tithi* of the dark fortnight of Māgha in the year 250 apparently of the Gupta era. The date corresponds to the **20th December 569 A.D.**⁵

¹ An examination of the original plates, received in the office of the Government Epigraphist for India from Pandit Tripāthi, showed that Mr. Rājaguru's description of the plates and the seal is misleading.

² *Above.*, Vol. VI, pp. 143-47 and plate.

³ [This form need not be due to any Prakrit influence—Ed.].

⁴ For the importance of the *ayana* as an occasion for offering gifts, see *Garuda Purāna* (I, chapter 51, verse 29) quoted in the *Successors of the Sātavāhanas*, p. 209 : *ayanē vishuvē ch=aiva grahanē chandra-sūryayōḥ, satkrānty-ādīshu kālēshu dattam bhavati ch=ākshayam*.

⁵ I am indebted to Mr. D. N. Mookerjee for the astronomical calculation.

The inscription records the grant of a village called **Ardhākamaṇḍuka** together with another locality called **Chandanavāṭaka**, both situated in the **Parakkhalaṃmārgga** *viśaya*. It was made by **Mahārāja Dharmarāja** who was ruling at **Padmakhōli** as a feudatory of **Prithivivigraha-bhaṭṭāraka** when the latter was governing **Kaliṅgarāshṭra** apparently forming a part of the **Gupta-rājya**. Dharmarāja is described as a descendant (possibly son)¹ of Mahārāja **Ubhaya**,² as born of the queen **Bappadēvi** and as devoted to the deity **Sahasraśmi**, i.e., the Sun-god. The localities mentioned above were made an *agrahāra* or free gift in favour of a number of Brāhmaṇas belonging to various *gōtras* and *charaṇas*, only the chief amongst them being mentioned as the *upādhyāya* (teacher) **Maṭṣvāmin** who was an inhabitant of the **Homvaka** *agrahāra*. The Brāhmaṇas are said to have been men of good conduct and learning. The order of **Mahārāja Dharmarāja** was issued to the persons connected with the administration of the region in his time as well as to those who would be associated with it in future. These include the **Sāmanta-mahārāja** (or **Sāmanta** and **Mahārāja**), **Rājaputra**, **Kumārāmātya**, **Uparika**, **Talāyuktaka**, **Dāṇḍavāśika**, **Sthānāntarika**, **Vyavahārin** and **Vaishayika**. The land was made free from the obligation of paying any tax or revenue and from all obstacles (*sarva-kara-piḍā-varjita*). It was granted together with the *uddēśa* (i.e., space above the *tala* or ground) and *uparikara* (i.e., rent to be realised from temporary tenants). The charter was written by Dāsuka the *ādihikaraṇika*, (i.e., an officer attached to the *adhikaraṇa* or an office of administration). It was sealed (for the purposes of affixing the seal) by a person named **Lakṣaṇasvāmin**.

The most important historical problems raised by the inscription under discussion are three. In the first place, it says that in the Gupta year 250 (A.D. 569) the *rājya* or empire of the Guptas was *varitamāna*, i.e., 'still existing.' Secondly, the *rāshṭra* (territory or province) of Kaliṅga is implied to have formed a part of the Gupta empire. Thirdly, Prithivivigraha-bhaṭṭāraka's rule over the Kaliṅga-rāshṭra apparently as a viceroy of the Guptas in the second half of the sixth century has now to be adjusted with the already known facts of that country's history.

As regards the first problem we know that the Gupta empire broke up about the middle of the sixth century, that is to say, some two decades earlier than the date of the Sumandala inscription, when it is said to have been existing. The latest imperial Gupta record is dated in the Gupta year 224 (543 A.D.).³ There is a Jaina tradition recorded by Jināsena that the Gupta emperors ruled for 231 years.⁴ As the Gupta era started in 320 A.D.,⁵ which seems to be the date of the beginning of the Gupta sovereignty, the end of the empire, according to the tradition noted above, appears to have come about 551 A.D. That the heart of the Gupta empire in Bihar and the U.P. passed soon after that date to the Maukharis is indicated by the Haṭhā inscription,⁶ dated Vikrama Samvat 611 (A.D. 553), of the time of Śīśānavarman, the first imperial ruler of the Maukhari family, as well as by the Dēō-Baraṇārka inscription⁷ referring to the rule of Śārvaavarman and Avantivarman, son and grandson respectively of Śīśānavarman, over the Shahabad District of Bihar.⁸ The present inscription indicating the continuity of the imperial Gupta rule as late as A.D. 569 thus seems to

¹ Cf. *Successors of the Sātavāhanas*, p. 250; *Naishadhīya*, V, 124, where Nala is described as *Virasēna-kula-dīpa* although he was Virasēna's son.

suggest that, even after the disintegration of the empire, there were some members of the family who claimed the status of their imperial predecessors. Whether their position was nominal like that of James III of England or of the Mughal Emperor Shāh 'Alam II and his successors can hardly be determined in the present state of our knowledge. There is, however, no doubt that till A.D. 569 viceroys like *Prithivivigraha-bhṛtṭāraka* of Kālīṅga continued their allegiance to the Gupta emperor. The word *bhṛtṭāraka* attached to *Prithivivigraha*'s name may suggest that he ruled practically as an independent monarch; but he did so without officially throwing off the yoke of the Guptas. It is possible to conjecture that he had blood relationship with the Guptas and was eager to display it to improve his own case against those of other rival rulers of the country.¹

The second problem raised by the record, viz., the expansion of the Gupta rule over Kālīṅga, is equally interesting. Roughly speaking, Kālīṅga was the name of the coast land between the Mahānadi and the Gōdāvari, although it included the valley of the Vaitaraṇī river on the north-east. But this was Kālīṅga in a wider sense, the name being applied in a narrow sense only to the Puri-Ganjam area of modern Orissa. Kālidāsa's *Raghuvamśa*, IV, 38—9, associates the Kālīṅga country especially with the Mahēndra (i.e., the Mahēndragiri peak in the Ganjam District) and locates the Utkala country, comprising the present Balasore District together with parts of the Midnapur and Cuttack Districts, to its north-east.

In the fifth and sixth centuries some rulers, having their headquarters at cities like Sīrīhapura (modern Sīṅgupuram near Chicacole or Śrīkākulam), Vardhamāna (modern Vadama in the Palakonda *tāluka* of the Vizagapatam District), Dēvapura (capital of Dēvarāshṭra in the Yellamañchili *tāluka* of the same District) and Pishṭapura (modern Pithapuram in the East Godavari District) assumed the title "lord of Kālīṅga".² From the last decade of the fifth century kings of the Eastern Gaṅga dynasty were ruling from Kālīṅganagara (modern Mukhalīṅgam in the Ganjam District) and Dantapura (near Chicacole) often with the same title. These Gaṅgas were devoted to the deity Śiva-Gōkaṃṣvara installed in a temple at the top of the Mahēndragiri. In the records of the Eastern Chālukya kings of the Āndhra country, a portion of the Vizagapatam District was sometimes called Madhyama-Kālīṅga or Elamañchi-Kālīṅga. It is interesting to note that the Gupta emperor Samudragupta led an expedition, about the middle of the fourth century, against a number of kings of Dakṣiṇāpatha, some of whom ruled over different parts of the Kālīṅga country. The Allahabad pillar inscription³ of Samudragupta, while giving a list of these kings, mentions kings Svāmīdatta of Kōṭṭūra (possibly Kōthur near the Mahēndragiri), Mahēndragiri of Pishṭapura, Damana of Eraṇḍapalla (probably near Chicacole) and Kuvēra of Dēvarāshṭra. It is said that Samudragupta captured the kings of Dakṣiṇāpatha including the above rulers of the Kālīṅga region, but that he let them off. The implication is that the Gupta emperor reinstated the defeated kings in their respective kingdoms. This may be a mild way of saying that Samudragupta failed to establish his supremacy over the countries of the south. But there are some indications of the spread of Gupta influence over many parts of South India. The Guptas are known to have contracted matrimonial alliances with the Vākātakas of the Berar region and the Kadambas of the Kannaḍa country.⁴ The Gupta era seems to be used in an inscription of Kākuṭsthavarmān of the Kadamba dynasty.⁵ The Arang copper-plate inscription of Bhīmasēna, a ruler of Dakṣiṇa-Kōśala in the present Chhattisgarh region, is also dated in the Gupta era⁶

and coins of king Prasannamātra of Śarabhapura in South Kōsala exhibit influence of Gupta coinage.¹ Recently coins of the South Kōsala king, Mahēndrāditya, who seems to have been named after the Gupta emperor Kumāragupta I Mahēndrāditya, have been discovered.² This may actually indicate that the Gupta suzerainty was accepted by the kings of this family of South Kōsala.³ Of course the discovery of a large hoard of Kumāragupta's coins at Satara may or may not indicate the expansion of Gupta influence over that part of the Deccan, but the other evidences cited above have to be taken into consideration in this connection. As regards the question of Gupta influence in Kalinga in particular, we may refer to the use of the Gupta era in that country. The Ganjam inscription of the time of Śaśāṅka, as we have already seen, is dated in the Gupta year 300 (A.D. 619). The Soro⁴ (Balasore District) and Patiakella⁵ (Cuttack District) inscriptions mentioning a king named Śaṁbhuyāśas who was the ruler of Tōsalī, both North (roughly the Balasore District) and South (Puri-Cuttack region together with the eastern portion of Ganjam at least in the age of the Bhauma-Karas), are dated in the Gupta years 260 (A.D. 579) and 283 (A.D. 602) respectively. Tōsalī (modern Dhauli in the Puri District) was the name of the chief city of northern Kalinga in the days of the Mauryas and it seems that the rulers of the Puri region in northern Kalinga felt the necessity of giving this new name to their kingdom sometime after the Eastern Gaṅgas had established themselves at Kalinganagara in the last decade of the fifth century and were describing themselves as lords of Kalinga. In any case, South Tōsalī was practically the same as the northern part of Kalinga. The use of the Gupta era in the records of Śaṁbhuyāśas, ruler of both north and south Tōsalī, is thus additional evidence in favour of the spread of Gupta influence over the Kalinga country. Till now, however, there was no direct evidence to prove that Kalinga formed an integral part of the Gupta empire. The present inscription proves this fact for the first time. The Guptas may have entered Kalinga either through South Kōsala or through South-West Bengal, more probably through the latter. Samudragupta is known to have extirpated Chandravarman who, according to the Susunia inscription, ruled over South-West Bengal from his capital at Pushkaraṇā (modern Pokharna on the Damodar).⁶ Thus South-West Bengal formed an integral part of the Gupta empire since the middle of the fourth century. The rule of Śaśāṅka, king of the Gauḍas who were political successors of the Guptas in Bengal, in the Kōṅgōḍa country, comprising the eastern part of the Ganjam District, as well as in Utkala, as indicated by the Ganjam and Midnapur⁷ inscriptions seems to be merely an after effect of the Gupta occupation of Kalinga. For the extent of Gupta domination over Kalinga and its duration we have yet to wait for further evidence.

The third problem raised by our inscription relates to chronology, viz., fixing the date of Prithvivigraha's rule over Kalinga in relation to some known facts of Kalinga history. We know that the Eastern Gaṅgas began to rule at least in the Ganjam District with the exclusion of its eastern part from a date falling in the period A.D. 496-98.⁸ Kōṅgōḍa on the Puri-Ganjam border was under the Śailōdbhavas at least from the middle of the sixth century, since Mādhavavarman II Sainyabhita, who was the fourth ruler of this family, is known to have been reigning in A.D. 619

as a feudatory of the Gauda king Śaśāṅka. As we have seen, king Śaṁbhuyaśas was ruling over Uttara- and Dakṣiṇa-Tōsali, i.e., the country extending at least from the borders of the Midnapur District up to those of the Ganjam District, in the period A.D. 579-602. It thus seems that, about A.D. 569, Pṛithivīvigraha was ruling over that part of Kalinga which lay to the north-east of the Eastern Gaṅga kingdom. The Śailōdbhavas appear to have originally owed allegiance to him and, through him, to the Guptas. The dynasty represented by Śaṁbhuyaśas probably overthrew the family to which Pṛithivīvigraha belonged. One of the records of Śaṁbhuyaśas speaks of the suzerainty of the Mānas. It appears that Gupta rule in Orissa was substituted by that of the Mānas shortly after Pṛithivīvigraha. The Mānas in their turn were probably ousted by the Gaudas. Thus the Śailōdbhavas appear to have acknowledged the suzerainty at first of the viceroys of the Guptas, then of the Māna family to which Śaṁbhuyaśas belonged or owed allegiance, and ultimately of the Gaudas. An as-yet-unpublished copper-plate inscription discovered from a locality called Kanās in Orissa is said to speak of a king named Lōkavigraha.¹ It is possible to suggest that Pṛithivīvigraha and Lōkavigraha belonged to the same family.

Little is known about the kings Ubhaya² and Dharmarāja from other sources. It seems that Padmakhōli was not only the name of the capital of *Mahārāja* Dharmarāja but also that of his kingdom which lay around the present Khallikōṭ in the Ganjam District.

Of geographical names mentioned in the Sumaṇḍala inscription, we have already discussed the location of Kalinga-rāṣṭra. The city of **Padmakhōli** has been suggested to be no other than modern Padmakhol near Narayankhol in the now defunct Khallikōṭ State. The *vishaya* or district called **Parakkhalamārga** must also have been situated in the Khallikōṭ region. The localities Ardhākamaṇḍuka, Chandanavāṭaka and Homvak-āgrahāra cannot be satisfactorily identified.

No. 17—TWO PANDYA INSCRIPTIONS FROM SALAIGRAMAM

(1 Plate)

M. VENKATARAMAYYA, OOTACAMUND

Sālaigrāmam is a village in the Paramagudi *tūluk* of the Ramnad District, a region which once formed the core of the kingdom of the Pāṇdyas. The village contains an old temple of Śiva worshipped under the name of Varaguṇīśvara, an appellation evidently associated with the Pāṇdyas among whom there were two kings of the name of Varaguṇa. The goddess bears the name, Kāmākshi-Amman. Mr. K. Ramaswami Aiyangar, the then Revenue Officer of the Ramnad Samsthanam, drew the attention of the Government Epigraphist for India to the historical associations of the temple and to its antiquity borne out by the old inscriptions in the temple and by

¹ Read *sambaddh-Ārddhaka*.

² Before *la*, another *la* was incised ; but it seems to have been rejected by the engraver owing to damage in its lower part.

³ *Likhitā* qualifies a word like *lipi* understood here.

⁴ *Lakṣmaṇa* seems to have been intended. *Tāpitam* qualifies *śāsanam* understood.

⁵ The sign of *ti* is joined cursorily with the long horizontal stroke at the end indicating full-stop. This characteristic is also found in other records. Cf. Soro plate (C), line 16 (above, Vol. XXIII, Plate opp. p. 202) ; Ashrafpur plate (B), lines 17, 23 (*Mem. A.S.B.*, Vol. I, Plate VII) ; etc.

references in ancient Tamil literature to the place. Two verses in the *Peruntogai*¹ refer to a chief, Teṇkoḍumūr Veṇṇāḍaṇ, who is stated to have founded Śālaigrāmam and endowed thirty-two *kulīs* of land in it to god Varaguṇavichechuvavarar, who was responsible for the routing of the hostile kings and making them climb the northern mountain. The local people of the village derive the name Śālaigrāmam from *sālai* or road-stead for the pilgrims proceeding to Sētu and Rāmēśvaram. It may be noted, however, that the inscriptions secured from the place, which are edited here, give its name as Śālaigrāmam.

The inscriptions under publication (A and B)² are engraved on the left and right door jambs of the entrance into the *maṇḍapa* of the temple. Both are engraved in Vaṭṭeḷuttu characters and their language is Tamil. The Grantha alphabet is employed wherever letters or words of the Sanskrit language had to be written, e.g., *brahmadīyam* (A. lines 7-8 ; B. lines 9-10), *Paramasvāmi* (A. lines 10-11 ; B. lines 24-5), *Śālaigrāmam* (A. lines 8-9 ; B. lines 10-11), etc. In the word *Kōṇō-ṇmai-konḍāṇ* (A : lines 20-1), we have a title which bears close similarity to *Kōṇ-ēr-ṇmai-konḍāṇ* and *Kōṇēr-ṇmai-konḍāṇ* found in inscriptions of much later date than the present record and which have been generally understood to mean 'one who had no rival king' (*Kōṇ-ēr-ṇmai-konḍāṇ*) and 'the unequalled among kings' (*kō-nēr-ṇmai-konḍāṇ*).³ But neither of these derivations can suit the form of our inscription. Apparently, its meaning has to be derived as *kōṇ-nōy-ṇmai-konḍāṇ*, i.e., 'one who had no ill health'. This would correspond, as Venkayya thought, to the term *kūṣālī* of Sanskrit inscriptions.⁴ Both the records are engraved with care and the writing may be attributed, on palaeographical grounds, to the 10th century A. D. A few orthographical peculiarities found in the inscriptions may be noticed. Instances of the use of *ṇ* for *n* are found in *iṇṇu* (B. line 14) and *vaḷa-ṇṇu* (A. line 5). The following uncommon usages of certain words due, evidently to colloquial expression, may be noted : *y-ri* for *ēri* (A. lines 19, 28, 35 ; B. 52) ; *vaḷunāṭṭu* (A. lines 22-3) for *vaḷanāṭṭu* ; *iṇaiy-olūṇṇu* (A. lines 30-1) for *iṇaiy=olichchu*.

Record A is dated in the 2+1st year of the reign of the Pāṇḍya king Śaḍaiya-Māraṇ and registers the order issued by Kōṇōṇmai-konḍāṇ to the *sabha* of Śālaigrāmam, a *dēvadāṇa-brahmadēya* village in Mayimākara-vaḷanāḍu alias Tuvvūrkūṇṇam, to use the waters of the *Kuḷuvāṇai-ēri* for irrigating the lands of the god Varaguṇa-īśvarattu-Paramasvāmigaḷ. It is also stated that the permission so granted was in accordance with the *śīrimukam* (Skt. *Śrīmukha*) of Perumāṇaḍigaḷ Śīvalluvadēvar (Śrīvallabhadēva) granting the village as *dēvadāṇa* to the god with facilities for irrigation. *Kōṇōṇmai-konḍāṇ* was evidently the title of king Śaḍaiya-Māraṇ. As far as I know this is the earliest mention of the title in Pāṇḍya records.

Record A is engraved immediately below another short Tamil inscription⁵ in Vaṭṭeḷuttu and Grantha characters which states that the *nilai* (door jamb) was set up by Vāsudēva-Nārāyaṇaṇ of Kōṭṭaiyūr. Since the characters of this record are so similar to inscription A it may be supposed

⁵ No. 35 of the *Annual Report on Indian Epigraphy* for 1946-47. The text of the record runs :—

1 Svastī Śrī[] Śālai-

2 grāmattu Kōṭ-

3 aiyyūr Vāsu-

4 dēva Nārāya-

5 ṇan itṭa-

6 nilai []

that both were written at the same time, if not by the same hand, soon after the setting up of the door jamb.

Record B is dated in the year 15+5 of the reign of Vira-Pāṇḍya, 'who took the head of the Chōḷa'. The date quoted here is the highest known regnal year of this king. I have not been able to make out the full sense of the record owing to the complicated wording of the text, the syntax of which is not clear. Its main purport seems to be to register the grant of 35 *pāṭakams* of land made evidently to god Varaguṇa-īśvara of Sālaigrāmaṃ by the *sabhā* of Sālaigrāmaṃ, a *dēvadāna-brahmadēya* in Tuvvūr-kūṇṇam *alias* Maṇimākara-vaṇaṇāḷu. It also seems to say that Perumāṇaḍigaḷ (*i.e.*, the king) abolished a tax of 9000 *kāśu* which he at first said he would levy on Tirukkuluṇḍaḷūr, but later decided not to do so. A sum of 100 *ilakkāśu* is separately mentioned in the record as an endowment made for the purpose of supplying ornaments (*tiruv=ābharaṇam*) and cake-offerings (*tiruv-appam*) to god Varaguṇa-īśvara. It is not clear who the donor of the 100 *kāśu* was; whether the assignment of 35 *pāṭakams* of land made by the *sabhā* was made in consideration of the 100 *kāśu* only, or in return for the 9000 *kāśu* of tax abolished on Tirukkuluṇḍaḷūr by the king is also not clear. In the latter case it must be understood that this village was within the jurisdiction of the *sabhā* of Sālaigrāmaṃ. The order of the Perumāṇaḍigaḷ is stated to have been issued from Tiruppāluyūr where he was staying (*iruṇḍu*). The inscription thereafter specifies the boundaries of the land granted and records the provision made for its irrigation by the *Kulwāṇṇi-ēri* for the two crops of the year.

The importance of the records under study lies in their close palaeographical resemblance which permits the inference that the kings mentioned therein, *viz.*, Śaḷaiya-Māraṇ and Śīḷaṇ-ralai-kōṇḍa Vira-Pāṇḍya could not have been much removed from each other in point of time. Śaḷaiya-Māraṇ of record A can be identified with Śaḷaiyamāraṇ Rājasimha, the donor of the Bigger Śiṇṇamaṇṇūr plates issued in the 2+11th year of his reign.¹ The identification is sustainable on the ground that the records of this king are invariably issued in the years opposite the second year,² as also on palaeographical considerations. Śaḷaiya-Māraṇ is to be assigned to the 10th century A. D., a period to which the donor of the Bigger Śiṇṇamaṇṇūr plates also belonged. The contemporaneity of this Rājasimha *alias* Śaḷaiyamāraṇ with the Chōḷa king Parāntaka I (A. D. 907-953) is well known. The actual dates of the beginning and the close of his reign are not definitely ascertainable owing to the lack of necessary data, astronomical or other, in his inscriptions. But an attempt can be made to indicate them approximately. In the first instance, the duration of his rule might be fixed by taking into consideration the highest regnal year quoted in his records, which is 2+22.³ Thus he had at least a reign of 24 years. That his rule for this entire period was quite uninterrupted is evidenced by his inscriptions which are dated in almost every year of his reign, from the 2nd to the 2+22nd, and which are found in distant parts of his kingdom, in places as wide apart as Cape Comorin⁴ and Kuḷumiyāmalai (Pudukkottai).⁵ The most outstanding events of his reign were his conflict with Chōḷa Parāntaka I (A. D. 907-953), with whom he fought finally at Veḷḷūr, and his subsequent flight to Ceylon abandoning his kingdom to which he never returned. Since the battle of Veḷḷūr in which the Pāṇḍya king was aided by the Ceylonese troops, finds mention

¹ *S. I. I.*, Vol. III, pp. 450-56.

² *An. Rep. on S. I. Epigraphy*, 1932-3, part II, para. 29; above, Vol. XXIII, p. 283.

³ No. 228 of 1932-3 of the Mad. Ep. Coll. A few records issued in the name of Śaḷaiya-Māraṇ with single regnal years like 46 (No. 440 of 1907 of the Mad. Ep. Coll.) cannot with certainty be ascribed to this ruler. It is likely, as Mr. Sarma has suggested, that this record might have been issued by his grandfather also called Śaḷaiya-māraṇ with the surnames of Śrīvallabha, Śrīmāra and Avanipaṭṭhara (*J. O. R.*, Vol. IX, p. 225). Hence, as a working hypothesis, we may take the year 2+22 of Śaḷaiya-Māraṇ's records as his highest regnal year.

⁴ No. 107 of 1896 of the Mad. Ep. Coll.

⁵ No. 343 of 1904 of the Mad. Ep. Coll.

in two stone records of Parāntaka I dated in his 12th regnal year,¹ i.e. A. D. 919, the engagement must have been fought prior to this date, say about A. D. 918.² From the way in which the incidents of the battle are described in the Chōla records, it would appear that it was a fierce and undecisive fight. Victory is claimed for the Chōla king in the Udayēndiram record of Prithivīpati II, issued a few years later in the reign of Parāntaka I in A. D. 921-2, which evidently narrates the events of the same battle though it omits to mention the places.³ On the other hand, the Bigger Śiṅṅa-maṇūr plates issued by the Pāṇḍya king in his 2+14th regnal year, embody an elaborate eulogy of his victories over his enemies including that over the king of Tañjai, i.e. the Chōla.⁴ It seems likely that the Pāṇḍya king was just giving his version of the same conflict with Parāntaka I, which culminated in the Vellūr battle. If such be the case, the 2+14th year of the Pāṇḍya king's reign might be equated with a date around A. D. 918. The Ceylonese chronicle, *Mahāvamsa*, relates that in the reign of Dappula IV (A. D. 923-934), 'the Pāṇḍu king, through fear of the Chōla (king), left his country, took ship and came to Mahātitttha' and then having made an unsuccessful attempt to rouse the Ceylonese to fight his cause, 'the Pāṇḍu king left his diadem and other valuables behind and betook himself to the Kēraḷas'.⁵ No mention of the Pāṇḍu king's fate is made in the subsequent portion of the chronicle, though a reference therein to an attempt made by the Chōla king to get possession of the Pāṇḍya king's diadem is found among the events of the reign of king Udaya IV (A. D. 945-953).⁶ We may, therefore, conclude that the Pāṇḍya king never returned to rule over his country again. His flight to Ceylon must have taken place soon after his 2+22nd regnal year, the highest date found in his records. The presence of the Chōla king Parāntaka I in A. D. 921-3 at Kuḍumiyāmalai⁷ once forming part of the Pāṇḍya king's territory, must have hastened the flight of the Pāṇḍya. The event may be placed approximately about A. D. 926-7, i.e., his 2+22nd regnal year since, as we saw, his 2+14th year lay somewhere about A. D. 918-9. In the light of all this, we may fix the period of the rule of Śaḍaiyamāraṇ Rājasinḥa as lying between c. 903 and 926-7 A. D.⁸

In the subjoined inscription (A) of his, mention is made of Perumāṇḍigaḷ Śivalluvadēvar (Śrīvallabha), who is stated to have made the original grant of the village of Sāḷaigrāmam to god Varaguṇa-Īsvara. Among the Pāṇḍya kings who preceded Śaḍaiyamāraṇ Rājasinḥa there was only one king of the name of Śrīvallabha, i.e., Śrīmāra, the grandfather of Śaḍaiyamāraṇ Rājasinḥa. It is evidently this king Śrīmāra who is referred to here and if so, the god Varaguṇa-Īsvara must have been named after a Varaguṇa, a predecessor of Śrīmāra Śrīvallabha, who was in all probability Varaguṇa I (c. A. D. 800). Successive kings of the Pāṇḍya dynasty seem to have bestowed their patronage on the temple and worshipped the deity from the time of Varaguṇa I (c. A. D. 800) to that of *Śōḷaṇ-ṛalai-koṇḍa* Vīra-Pāṇḍya of the subjoined ins. B, the period of whose rule we may now proceed to discuss.

Earlier in this article it has been stated that *Śōḷaṇ-ṛalai-koṇḍa* Vīra-Pāṇḍya of inscription B could not have been far removed from Śaḍaiya-Māraṇ in point of time since the palaeography of their records is so much alike. The latter's rule, as we saw, may be placed approximately between c. A. D. 903 and 927. Vīra-Pāṇḍya should, therefore, be relegated to the same period, though not exactly to the same dates, since it is not likely that both the kings ruled simultaneously.

⁷ No. 351 of 1904 of the Mad. Ep. Coll. *Inscriptions in Pudukottah State* (Translated into English), pt. I (1941), Nos. 79 to 80A.

⁸ c. A. D. 900 to 920 or a little later is the date given to this king in *Pandyan Kingdom*, pp. 41 and 82.

It is well known that he was not one of the predecessors of Śaḍaiya-Māraṇ and consequently he must have been one of the latter's successors ; probably he ruled in the second quarter of the 10th century A. D.

In an article contributed to this journal¹ the late Mr. A. S. Ramanatha Ayyar fixed the period of Vira-Pāṇḍya's reign as extending from A. D. 947 to 966 on the basis of a few astronomical details found in one inscription of the king at Ambāsamudram. Of the three alternative dates which this record yielded for the commencement of the king's reign, viz., A.D. 938, 947 and 948, he selected the second, i.e. A. D. 947 as the best suited. The main consideration which weighed in its favour was that by accepting it, it would be possible to satisfactorily fix the initial date of the reign of this Pāṇḍya king's Chōla contemporary and foe, Āditya II Karikāla, at whose hands he died before the latter's second regnal year. Hence, the second year of Āditya II, by being equated with the last known regnal year of Vira-Pāṇḍya, i.e. 15+5 corresponding to A. D. 966, would yield A. D. 965 as the starting date of Āditya II's reign. On this fixation, the five year rule for Āditya II could be placed between A. D. 965 and 969, since from the latter year, Āditya II's successor Uttama-Chōla, counted his regnal years. There are, however, some points to be considered before accepting the above chronological position for the reign periods of Āditya II and *Śōlaṇ-ṛalai-konḍa* Vira-Pāṇḍya. These arise from the Pāṇḍya as well as the Chōla sides. It is not likely that the last years of the rule of Vira-Pāṇḍya lay beyond the middle of the 10th century A. D. which the above chronological adjustment envisages ; for, there is evidence to show that part of the early life of Vira-Pāṇḍya coincided with the latter part of Śaḍaiyamāraṇ Rājasimha's reign. One of the records of the latter dated in the 2+18th regnal year (i.e., c. A. D. 923) mentions a servant of Vira-Pāṇḍya² who could be no other than *Śōlaṇ-ṛalai-konḍa* Vira-Pāṇḍya. On the Chōla side we encounter one difficulty. Besides Āditya II, another prince, Pārthivēndra-Ādittavarman who had a reign of thirteen years, claims to have taken the head of Vira-Pāṇḍya. A strong case for the identity of these two princes has been made out by Prof. Nilakanta Sastri.³ Granting the identity which some scholars hold in doubt,⁴ the 13 years' rule of Āditya II (alias Pārthivēndravarmān ?) when placed immediately before Uttama Chōla's accession in A. D. 969-70, would yield A. D. 956-7 as the date from which Āditya II counted his reign probably on account of his being associated in the administration with his father Sundara-Chōla.⁵ Taking A. D. 956-7 as the initial year of Āditya II his second year would correspond to A. D. 957-8 and this date when equated with the last year of *Śōlaṇ-ṛalai-konḍa* Vira-Pāṇḍya, i.e. 15+5, would yield A. D. 937-8 as the Pāṇḍya king's initial year. This date was also taken into account by Mr. Ramanatha Ayyar while discussing the astronomical details of the Ambāsamudram record, but discarded owing to one consideration. He feared that its acceptance as the initial year of Vira-Pāṇḍya would lead to the inconsistent results that Āditya II killed him in A. D. 957 and that his predecessor Sundara-Chōla defeated him in A. D. 963'.⁶ This, indeed, is a great difficul-

¹ Above, Vol. XXV, p. 37.

² No. 122 of 1905 of Mad. Ep. Coll. Here we may also point out that the chieftain Śōlāntaka Pallavaraiyaṇ alias Māraṇ Ādichchan of Pōliyūr figures in records of the 4+3rd (No. 420 of 1914 of the Mad. Ep. Coll.) and 13+1st year (T. A. S. Vol. III, p. 72) of the reign of Vira-Pāṇḍya and this chief was evidently the grandson of his namesake Teṇṇavaṇ Pallavadaraiyaṇ alias Māraṇ Āchchan of Pōliyūr, mentioned as a subordinate of Māraṇjaḍaiyaṇ alias, Varaguṇa (II) (acc. A. D. 862) in or about A. D. 867 (No. 90 of 1908 of the Mad. Ep. Coll.). Should we put Vira-Pāṇḍya's last date beyond the middle of the 10th century A.D., it would result in the above two chieftains, grandfather and grandson, being removed from each other by about a century, rather a rare instance to happen though not impossible.

³ Colas, Vol. I, pp. 178 ff.

⁴ Above, Vol. XXV, p. 36, n. 9.

⁵ Colas, Vol. I, p. 180.

⁶ Above, Vol. XXV, p. 37.

ty in the way of assigning the dates, viz. A. D. 937-8 to 957-8 to Vira-Pāṇḍya and A. D. 956-7 to 969-70 to Āḍitya II as a possible alternative to those fixed by Mr. Ramanatha Ayyar, although these dates would help in narrowing down the interval between Vira-Pāṇḍya and his predecessor Śaḍaiyamāraṇ Rājasimha (c. 903 to 926-7) to about a decade¹ and would also help to solve the Āḍitya II-Pārthivēndra identification. It should be also admitted that with the revised dates the identity of the Chōla king whose head Vira-Pāṇḍya took would remain unsettled since he cannot be identified with Parāntaka I as proposed by Mr. Ramanatha Ayyar. We may, nevertheless, suggest that the Chōla victim of Vira-Pāṇḍya might have been a less conspicuous prince, perhaps one of the sons of Parāntaka I, Uttamaśīli. Of Uttamaśīli we hear nothing subsequent to A. D. 933 when he makes an endowment to a temple at Kaṇḍiyūr, Tanjore District, in the 26th year of the reign of his father, Parāntaka I.²

The position occupied by *Sōlan-ralai-konḍa* Vira-Pāṇḍya in the Pāṇḍya genealogy still remains undetermined. That he might have been the son of Śaḍaiyamāraṇ Rājasimha himself has been suggested by Mr. Ramanatha Ayyar.³ This may not be unlikely in view of the fact mentioned in the Larger Siṅṇamaṇūr plates that Rājasimha had 'prosperous sons worshipping at his feet'.⁴ Granting that Vira-Pāṇḍya was one of them, it still remains inexplicable why he does not call himself as Śaḍaiyan, being son and successor of Māraṇ Rājasimha. Could it be that these names Śaḍaiyan and Māraṇ were alternately used only by the anointed supreme sovereigns of the Pāṇḍya throne, and that Vira-Pāṇḍya was not perhaps anointed and hence could not lay claim to such a title? We know that the Pāṇḍya diadem and other regalia of supreme rulership necessary for such anointment were left in Ceylon by Rājasimha and were not recovered by the Pāṇḍyas even up to the time of Udaya IV (A. D. 945-93).⁵ The importance of these regalia for the exercise of supreme authority over the Pāṇḍya kingdom seems to have been recognised by the Chōla king Parāntaka I 'who wished to achieve consecration as king in the Pāṇḍya kingdom and sent (messengers) concerning the diadem and other things which the Pāṇḍu (king) had left behind (in Lankā) as the *Mahāvamsa* succinctly relates'.⁶

A word about the term *ōlai* occurring in inscription B (line 59). In ordinary parlance the word is understood to mean 'order or document'. In literary usage⁷ we find it equated to *āvaṇam* in the same sense. *Āvaṇam* is evidently derived from Skt. *śrāvaṇam* 'causing to be heard'. Similarly, *ōlai* would signify an order or document. The *Tamil Lexicon* gives *āpaṇa* as the Sanskrit root of *āvaṇam*, meaning market. It seems that it would be better to derive the word from *śrāvaṇam*. Expressions found in inscriptions such as *vilai-y-āvaṇam-śeydu*⁸ or *vilai-*

¹ It may be noted that Chōla Parāntaka I's records in the Pāṇḍya country fall partly in this interval, e.g., (1) No. 446 of 1917 of the Mad. Ep. Coll. dated 24th year = A. D. 932; (2) No. 63 of 1905 of the same collection (*S. I. I.*, Vol. III, No. 106) dated year 33 = A. D. 940 and (3) No. 448 of 1917 of the same collection dated year [36] = [943] A. D. See *Colas*, Vol. I, p. 422 and n.

² *S. I. I.*, Vol. V, No. 575. This prince was in the Pāṇḍya country in the 24th regnal year of his father, i.e. A. D. 931 (No. 446 of 1917 of the Mad. Ep. Coll.)

³ Above, Vol. XXV, p. 38.

⁴ *S. I. I.*, Vol. III, p. 461, text l. 139.

⁵ *Colas*, Vol. I, p. 148.

⁶ *Ibid.* *Mahāvamsa* (*Culavamsa*), ch. 53, vv. 40 ff. Here it may be pointed out that it was Rājēndra Chōla I who gained possession of the regalia from the Ceylonese king with whom they had remained all the time since they were first deposited with him by the Pāṇḍya king Rājasimha. It was after this event that Rājēndra Chōla I crowned his son as the ruler of the Pāṇḍya country.

⁷ *Periappurānam*, (Kovai Tamil Saṅgam ed.), vv. 190, 193, 207.

⁸ *S. I. I.*, Vol. III, No. 10, text ll. 2, 10 and 11. The translation of the words given here as 'executed the sale deed' would perhaps be better rendered as 'having declared its price'; cf. *vilai-pramāṇam-paṇṇi* occurring in similar context in inscriptions.

*śrāvaṇam śeydu*¹ and *vilai-y-āvaṇak-kālam* or *kāli*,² (i.e. place of declaration of sale price), would support our derivation of *āvaṇam*.

A few words may now be said about the geographical names mentioned in the two inscriptions. **Sālaigrāmam**, same as modern *Sālaigrāmam* in the Paramagudi *tāluk* of Ramnad District, the findspot of the inscriptions is stated in the records as being situated in *Mayimākara-vaṇāḍu* alias *Tuvvūr-kūrām*. **Mayimākara** might either be a title of the Pāṇḍya king Śaḍayamāraṇ of the record (A) or of one of his predecessors. **Tuvvūr-kūrām** in which *Sālaigrāmam* is stated to have been situated may be the region around *Tugavūr* in the Paramagudi *tāluk*. In a number of late copperplate records of the Sētupati chiefs of Ramnad³ the territorial division *Tugavūr-kūrām* finds mention and this name may have been a later form of *Tuvvūr-kūrām* of the Pāṇḍya inscriptions edited here. **Nedūrūr** may be identified with *Nērūr* in the Paramagudi *tāluk*. **Tiruppālaiyūr** where *Vīra-Pāṇḍya* was staying (B. lines 13-14 seems to be identical with *Tiruppālaikuḍi* in the *Tiruvadanai tāluk* of the Ramnad District. I have not been able to locate *Tirikkuluṅgaḷūr* of record B (lines 16-7).

¹ This word evidently refers to the managing body of the temple.

² The letters =appamum[=i]dik- can also be read as =appamu[mā]rik-, but I am not able to understand it. Evidently =appamum[=i]dik- has to be corrected as =appamum[=i]darkkuk-.

³ This line (43) has been inserted later between lines 42 and 44.

⁴ The letters nilattiḷ may also be read as nilattāl.

⁵ The sense conveyed by the lines 56-59 is not clear.

No. 18—NIMBAL INSCRIPTION OF YADAVA BHILLAMA

G. S. GAI, OOTACAMUND

Nimbāl or **Nimbāḷa** (Bujrukh) is a village in the Indi *tāluk* of the Bijapur District of the Bombay Province.¹ It is situated at a distance of about 9 miles south-west of Indi, the headquarters of the *tāluk*. **Nimbāl** is a railway station on the metre gauge section of the M. & S. M. Railway between Gadag and Sholapur. The ancient name of this village is given as **Nimbahura** (from **Nimbapura**) in the present inscription and as **Nimbahalla** in another record at the same place. And the present name **Nimbāl** has to be derived from **Nimbahalla**. The stone inscription published here is engraved on a slab built into the wall (inner side) which is to the proper left of entrance into the central shrine of the Śaṅkaralinga temple in the village. This temple is evidently the same as the **Kōṭi-Śaṅkaradēva** temple mentioned in the inscription.

The inscription was first copied by the late Rao Bahadur (then Mr.) K. N. Dikshit and has been noticed in the *Annual Report of the Archaeological Survey of India*, 1924-25, pp. 119-20.² It was again copied by the office of the South Indian Epigraphy during the year 1937-38 in the course of the epigraphical survey of the Indi *tāluk* and has been listed as B. K. No. 49 of 1937-38 of Appendix E to the *Annual Report on South Indian Epigraphy* for that year.³ It is from the ink-impressions of this collection that the inscription is edited here, for the first time, at the suggestion of the Superintendent for Epigraphy and with the kind permission of the Government Epigraphist for India.

At the top of the slab, on proper right and left sides, are the **figures** of the sun and the crescent moon and below these in the centre, is a standing cow with its calf. And behind the calf, to the proper left, is a dagger with the point turned upwards. Below these figures, at about a distance of 5", the inscription commences. There are twentyfive lines of **writing** and the inscription covers an area 21" high and 19" broad. Each line consists of about 21 *aksharas* and the average size of an *akshara* is 5". The inscription has been fairly well preserved.

The **characters** belong to the Kannaḍa alphabet and are regular for the period to which the record belongs, viz., end of the 12th century A. D. The cursive form of *v* is found in *kiḍuvudu* line 2, *-dēva-* line 6, *vyatipāta* line 7, *sarva-* line 12, *-pūrvakam* line 13 and *Kaṁnavūri-* line 23; and the cursive form of *m* occurs in *-māṇikava* line 16, *mattaru* lines 17-18, 19 and *-namaḥ* line 23. Initial *a* is found in lines 3, 4, 7, 11, 17, 19 and 20. *Visarga* is met with in *-namaḥ* line 23 and *krimiḥ* line 23. The consonant after a *rēpha* is usually lengthened⁴; e.g., *chakravartti* lines 5-6, *sūryya-* line 7, *-dēvargge* line 11, *sarva-* line 12, etc. *Anusvāra* has been used for class nasal in several places; see e.g., *pañcha-* line 2, *ananta* line 4, *aṁga-* line 11, etc. The figures for the numerals 1, 2 and 50 occur in lines 18-23. Marks of punctuation represented by two vertical strokes are found in lines 5, 13, 16, 23 and 25.

Except the imprecatory verse at the end, the inscription is in Kannaḍa language and is written in prose. The following linguistic features may be observed: The change of *p > h* which is met with in the history of the Kannaḍa language as early as the 10th century A. D.⁵ is found in the word *Nimbahura* < *Nimbapura*, lines 1, 10, 15 and 17. The *qualitative phonemic variation*⁶ is met with

¹ The adjoining village is called **Nimbāl** (Khurd).

² See also the same periodical for 1929-30, p. 172.

³ Eight more stone records have been copied at the same place and are listed as B. K. Nos. 50-57 in the same Appendix.

⁴ See above, Vol. XXVII, pp. 146-47.

⁵ See G. S. Gai, *Historical Grammar of Old Kannaḍa*, p. 14.

⁶ *Ibid.*, p. 4.

in the speech-forms -*Samkhara* < *Śamkara* lines 2, 4, 15, 17 ; *Śrīsaila* < *Śrīsaila* line 3 ; -*saṃkhatā* < *saṃkathā* line 9, *sāsana* < *śāsana* line 13, *varśa* < *varsha* line 6 ; other speech-forms such as *brahmēti* < *brahmahatyā* line 2, -*amavāse* < *amāvāsyā* line 7, -*muksha* < *mukhya* line 10, -*seṭṭi* < *śreṣṭhīn* line 15, are also noteworthy. Alveolar *r* is met with in *mūreneya* line 6, *mūvattāru* line 14, etc. There is an epenthetic vowel in *Phalavaṃga* < *Plavaṃga* line 6. The conjunctive suffix -*um* is found in *nālkuṃ* line 3 and -*seṭṭiyum* line 15. The normal word-order in Kannaḍa is *subject-object-verb*.¹ But in the sentence -*pumṇyavaṃ śrī Kōṭi- Saṃkharadēvaru kuḍuvaru*, lines 4-5, there is deviation of this normal form, inasmuch as the word-order is *object-subject-verb*.

The inscription belongs to **Bhillamadēva** and, from the titles *Yādava-Nārāyaṇa* and *Pratāpa-chakravartti* given to him, he is evidently no other than the king Bhillama of the **Yādava dynasty** of Dēvagiri, who is regarded as the real founder and first sovereign king of this family. The inscription does not give any genealogical or historical details about this king.

The **chief interest** of the record, however, lies in the mention of the date which is given in the king's regnal year coupled with the cyclic year, *viz.*, **3rd year, Plavaṃga-saṃvatsara**. When Fleet wrote his *Dynasties of the Kanarese Districts* as early as 1896 he had come across only three certain records of this king.² One of them is dated in Śaka 1113, Virōdhikṛit *saṃvatsara*, and the other two in regnal years, both citing the Saumya *saṃvatsara* as the third year of the king's reign. From this, the first year of the king was fixed as Plavaṃga *saṃvatsara*, Śaka 1110 (current)=A.D. 1187-88.³ But the inscription under publication cites Plavaṃga *saṃvatsara* itself as the third year of the king's reign, thus fixing his first year as Viśvāvasu, Śaka 1107 (expired)=A.D. 1185-86.

Till now, as many as fourteen inscriptions, all on stone, of this king Bhillama have been discovered and, as far as I know, only one inscription has been published.⁴ Nine of these fourteen records are dated in the king's regnal year, coupled with the cyclic year and they may be shown in the tabulated form as follows :

Place of inscription.	Regnal year and cyclic year as given in the inscription.	First year of the king's reign as calculated.	Reference.
1 Nimbāl— Bijapur District (inscription under publication).	3rd year, Plavaṃga (Ś. 1109=A. D. 1187-88).	Viśvāvasu (Ś. 1107=A. D. 1185-86).	<i>An. Rep., S. I. E., 1937-38, B. K. No. 49.</i>
2 Muttigi— same district . . .	8th year, Paridhāvi (Ś. 1114=A. D. 1192-93).	Ditto . . .	<i>Ibid., 1929-30, B. K. No. 108.</i>
3 Bijapur— same district . . .	4th year, Saumya (Ś. 1111=A. D. 1189-90).	Parābhava (Ś. 1108=A. D. 1186-87).	<i>Ibid., 1933-34, B. K. No. 159.</i>
4 Ankalgi— Jath State, Bombay Province.	5th year, Sādhāraṇa (Ś. 1112=A. D. 1190-91).	Ditto . . .	Copied by the office of <i>S. I. E.</i> , during 1940-41.
5 Hallur— Bijapur District . . .	2nd year, Kīlaka (Ś. 1110=A. D. 1188-89).	Plavaṃga (Ś. 1109=A. D. 1187-88).	<i>An. Rep., S. I. E., 1929-30, B. K. No. 18.</i>

¹ *Ibid.*, p. 99.

² *Bomb. Gaz.*, Vol. I, pt. ii, p. 518 and n. 5.

³ *Ibid.*, p. 518.

⁴ Above, Vol. III, pp. 217-20.

Place of inscription.	Regnal year and cyclic year as given in the inscription.	First year of the king's reign as calculated.	Reference.
6 Pirapur— Bijapur District . . .	3rd year, Saumya (Ś. 1111=A. D. 1189-90).	Plavaṅga (Ś. 1109=A. D. 1187-88).	<i>An. Rep., S. I. E.</i> , 1929-30, B. K. No. 55.
7 Muttigi— same district . . .	Ditto . . .	Ditto . . .	<i>Bomb. Gaz.</i> , Vol. I, pt. ii, p. 518.
8 Annigere— Dharwar District . . .	Ditto . . .	Ditto . . .	<i>Ibid.</i> , also <i>An. Rep., S. I. E.</i> , 1928-29, B. K. No. 192.
9 Madbhāvi— Bijapur District . . .	4th year, Sādhārana (Ś. 1112=A. D. 1190-91).	Ditto . . .	<i>An. Rep., S. I. E.</i> , 1935-36, B. K. No. 114.

It may be noted that most of these records come from the Bijapur District. The first two give Viśvāvasu *saṁvatsara* (A.D. 1185-86) as the first year of the king. The next two fix Parābhava *saṁvatsara* (A.D. 1186-87) as the first year, while, according to the remaining five records, Plavaṅga *saṁvatsara* (A.D. 1187-88) would be the first year of the king's reign. And there is an inscription at Mārḍi in the Sholapur District, belonging to the time of Bhillama's grandson Singhaṇa and dated in the Śaka year 1134, Āṅgīrasa *saṁvatsara* (A. D. 1212-13).¹ This epigraph, while referring to the previous gifts to a temple, cites Plavaṅga *saṁvatsara* as the fourth year of Bhillama's reign, fixing Krōdhi *saṁvatsara* (A. D. 1184-85) as his first year. Thus Bhillama's year of accession varies from A. D. 1184-85 to A. D. 1187-88. It is indeed difficult to account for these conflicting dates. Possibly, it may be due to the fact that Bhillama had to encounter opposition from all sides before establishing his sovereignty in the northern portion of the Western Chālukyan kingdom. And he might have finally and publicly proclaimed his accession to the throne in the year 1187-88.

The other details of the date given in the record are **Bhādrapada amāvāsyā**, **solar eclipse**, **vyatīpāta** and **saṁkramaṇa**. Though the week-day is not given, the Christian equivalent would probably be A. D. 1187, September 4, Friday, when there was a solar eclipse. But the Kanyā-saṁkramaṇa had occurred on the previous Friday.²

The **object** of the inscription is to register gifts of toll-income made by Māyidēva and others, and also of money and lands situated in different villages (specified) made by Gaṁgara Kaṁniṣeṭṭi and Bāteya [R]ēviṣeṭṭi headed by the community of *Mūvattāru-bīḍu* (thirty-six villages) for the benefit of the temple of Kōṭi-Śaṅkaradēva at Nimbahura, while the king was ruling from Taḍavalage.

The following **place-names** are mentioned in the record : Vāraṇāsi, Śrisaiḷa, Nimbahura, Attarage, Taḍavalage, Goṇavalage, Haṁjige, Aṁḍiṭige, Guṁdavaṁda, Bairalige, Ajjunavāḷa, Hiri-y-Imḍi, Chikka-Bēvinūr, Battakuṇike and Kaṁnavūri. These places can be identified and most of them have retained their names even to this day, of course with slight modifications in some cases. The first two places are too well known. **Nimbahura**, which is called here *dakṣhiṇa* Vāraṇāsi, and *abhinava*-Śrisaiḷa, is evidently modern Nimbāl, as stated above, where the inscription was found. **Attarage** is the present Atharga (also called Hattarakī), 9 miles south-east of Nimbāl. Taḍvalgā, just 4 miles east-south of Nimbāl and its adjacent village Gunvalgā are

¹ G. H. Khare, *Sources of the Medieval History of the Deccan*, Vol. I, pp. 43-54.

ATTENTION

The obituary notices and the relevant plates appearing in this issue may be removed and inserted in the beginning of Vol. XXVIII at the time of getting the volume bound.

DR. HIRANANDA SASTRI, M.A., M.O.L., D.LITT.,
LATE GOVERNMENT EPIGRAPHIST FOR INDIA, 1925 - 1933.
BORN: DECEMBER 1878. DIED: 4TH AUGUST 1946.

IN MEMORIAM

DR. HIRANANDA SASTRI

Jñānaratna Dr. Hirananda Sastri, the late Government Epigraphist for India, passed away at Gurdaspur in the Panjab, on 4th August 1946. He was an archæologist of considerable experience, having worked in that field in the Panjab, the United Provinces, Kashmir, the Central Provinces, Bihar and South India, and having conducted many excavations. Epigraphy was his main interest during the latter part of his service under the Government of India. He served as Curator of the Museums, too, at Nagpur and Lucknow as also in Kashmir. He was a sound Sanskrit scholar and kept up his interest in this subject till the end. Having worked as Curator of Museums in different parts of India, he had an opportunity to acquaint himself thoroughly with Indian art.

He was born in 1878 in the Panjab. He had a brilliant educational career in the D. A. V. College, Lahore, from where he graduated, winning a gold medal for standing first in the B.A. examination in Sanskrit with English. He continued his studies in the Oriental College, Lahore, from which institution he took the M.A. degree of the Panjab University in 1900, winning gold medals and a purse for standing first in Sanskrit and Oriental Classics with English. He started life as Professor of Sanskrit and Philosophy in his own College (the D. A. V. College) and was the Reader in Sanskrit at the Panjab University, teaching Sanskrit and Comparative Philology to the M.A. classes. He then passed the Honours Examination in Sanskrit and got the degree of Master of Oriental Learning. Later in 1928, when he was the Government Epigraphist for India, his University again honoured him by conferring on him the degree of Doctor of Literature for a thesis on "Bhāsa and the authorship of the thirteen Trivandrum plays" published as Memoir No. 28 of the Memoirs of the Archæological Survey of India. In 1938 the Baroda Government honoured him with the title of Jñānaratna.

He joined the Archæological Survey of India in 1903 as Assistant Archæological Surveyor, Northern Circle. In 1906 he was made Archæological Assistant, Librarian and Curator of the Government Museum at Nagpur. Subsequently, in 1913, he became the Curator of the Provincial Museum at Lucknow. In 1917 he was sent on deputation to the Jammu and Kashmir State as Superintendent of Archæology. There, besides holding the post of the Curator of the State Museum at Srinagar, he was in charge of the State Library. In 1920 he was posted as Assistant Superintendent, Archæological Survey, Eastern Circle, Patna, and became the Officiating Superintendent of that Circle in 1922. In the same year he was transferred to Ootacamund as Superintendent for Epigraphy but went to Kotagiri within about a month as Officiating Superintendent of the Archæological Survey of India, Southern Circle. In 1923 he came back to the Epigraphical Branch as Superintendent, and in 1925, on the retirement of Rao Bahadur H. Krishna Sastri, became the Government Epigraphist for India. Dr. Hirananda Sastri held that post for nearly nine years with distinction and in that capacity edited parts of Volumes XVIII and XXI and the whole of Volumes XIX and XX of the *Epigraphia Indica*. After his retirement in December 1933 from service under the Government of India, he was appointed in the Baroda State as Director of Archæology in November 1934. He held that post till 1942 when he retired from that service also.

His contributions to Indology cover a very wide range. As an officer of the Archæological Department, he issued many annual reports of the various Circles and Museums he happened to be in charge of. He also contributed many informative articles to the Annual Reports of the Archæological Survey of India. The pages of the *Epigraphia Indica* were enriched with 8 contributions from him, the list of which is given below :—

- 1 Machhlisar copper-plate of Harischandradeva of Kanauj ; Vikrama Samvat 1253 (Vol. X).
- 2 Copper-plate inscription of Govindachandradeva ; Samvat 1186 (Vol. XIII).

- 3 Haraha inscription of the reign of Isanavarman ; Vikrama Samvat 611 (Vol. XIV).
- 4 Nalanda copper-plate of Devapaladeva (Vol. XVII).
- 5 Brahmi inscription on a Wooden Pillar from Kirari (Vol. XVIII).
- 6 Barah copper-plate of Bhojadeva ; Vikrama Samvat 893 (Vol. XIX).
- 7 Nalanda stone inscription of the reign of Yasovarmadeva (Vol. XX).
- 8 Clay seals of Nalanda (Vol. XXI).

He also contributed five items to the Memoirs of the Archæological Survey of India, viz. :

- 1 Some recently added sculptures in the Provincial Museum, Lucknow.
- 2 Origin and Cult of Tara.
- 3 Baghela Dyasty of Rewa.
- 4 Bhāsa and the authorship of the thirteen Trivandrum plays.
- 5 Nalanda and its epigraphical material.

Deeply and widely learned in Sanskrit, painstaking and conscientious in research, urbane in manners, in his death Indology has lost an erudite scholar in various fields.

RAO BAHADUR C. R. KRISHNAMACHARLU

Born on the 1st of July 1888, of a Śrīvaiṣṇava family, in the village of Gaṅgavaram in the Nellore Taluk of the Nellore District, Mr. C. R. Krishnamacharlu matriculated in his early teens from the V. R. High School, Nellore, and joined the Christian College at Madras for his collegiate courses. Having finished his F. A. in that College, he took his University degree from the Pachchayappa's College, Madras, and started his career as a teacher in the M. S. Lower Secondary School, Nellore. He later joined the Nellore Collectorate. After a brief term of service there, an opportunity presented itself for him to join the Epigraphical Department. He took his early training in the field of epigraphy and worked in close collaboration with the late Rao Bahadur H. Krishna Sastri. He was promoted to the post of Assistant Superintendent for Epigraphy in 1925, became the Superintendent in 1931 and took charge of the office at Madras in December of the same year. He became the Government Epigraphist for India in 1942, on the transfer of the office of the Superintendent for Epigraphy to Ootacamund and its subsequent amalgamation with the office of the Government Epigraphist for India. He died on the 31st of August, 1947.

Mr. Krishnamacharlu was a sound scholar in Sanskrit and Telugu and an expert epigraphist in South Indian languages. The *Annual Reports on South Indian Epigraphy* that appeared under his name from 1931 onwards bear ample proof of his remarkable capacity to organise the staff in collecting and presenting the inexhaustible epigraphical material of South India for the benefit of the research scholars. The numerous copper-plate charters, including the Pallava grants which form landmarks in the Pallava history, and of which the discovery goes solely to his credit, show the flair he had for collecting such valuable documents. Among his works may be mentioned *The Kannada Inscriptions of Kopbal* and other Memoirs for the Hyderabad Archaeological Series, *The Subject Index to the Annual Report on South Indian Epigraphy*, *A List of Inscriptions* copied by the Office of the Superintendent for Epigraphy, Madras, and some learned articles in the *Epigraphia Indica*. He had a great aptitude for archaeological exploration and had an unerring instinct for locating pre-historic sites. During his last days, after his retirement, he had prepared a list of pre-historic sites in South India. In his death Indian epigraphy has sustained a serious loss indeed.

RAO BAHADUR C. R. KRISHNAMACHARI, B.A.
LATE GOVERNMENT EPIGRAPhist FOR INDIA, 1942-1943.
BORN: 1ST JULY 1888 DIED: 31ST AUGUST 1947
AT GANGAVARAM, AT MADRAS,
NELLORÉ DISTRICT

respectively **Taḍavalage** and **Goṇavalage** of the record. **Hamjige** is represented by modern Hamjigi, 3 miles north-east of Nimbāl. **Gumḍavarinda** is to be identified with Gundvān, 9 miles north-west of Nimbāl and situated on the Bijapur-Jhalki road. **Amḍitige** is the same as Amjuṭgi, 7 miles north-west of Inḍi and about 8 miles north of Nimbāl. **Bairalige** is modern Bhairangi, about 10 miles north of Nimbāl. **Ajjunavāla**¹ and **Battakuṇike** have to be identified with modern Arjanāl and Bhatgunḍi, 5 miles to the north-west and 1 mile west of Bhairangi respectively. **Hiri-y-Inḍi** is still known by the same name and is said to have existed close by the modern Inḍi.² **Chikka-Bēvinūr** has also retained its name to this day and is 7 miles north-east of Nimbāl and 3 miles north-west of Inḍi. And lastly **Kaṁnavūri** is modern Kannūr, 12 miles west-south of Nimbāl. It may be noted that except Kannūr which is in the Bijapur *tāluk* of the same district and Vāraṇāsi and Śrīśaila, the above-mentioned places are included in the modern Inḍi *tāluk*.

No. 19—AJAYAGADH STONE INSCRIPTION OF NANA ; V. S. 1345

(1 Plate)

H. L. SRIVASTAVA, NEW DELHI

This inscription, according to James Prinsep, was presented to the Museum of the Asiatic Society of Bengal by General Stewart. It was inserted in the Catalogue of the *Asiatic Researches*, Vol. XV, as 'a stone slab from Ajayagarh in Bundelkhand with a Sanskrit inscription' or 'a stone bull from Kalinjar, with a Sanskrit inscription'. **Ajayagadh** is a hill-fort. 16 miles in a straight line south-west of Kalinjar, Long. 80° 20' E : Lat. 24° 54' N. It was edited with a specimen facsimile and translated for the first time by J. Prinsep in the *Journal of the Asiatic Society of Bengal*, Vol. VI. (1837) pp. 882-4, and his assistant, Pt. Kamalakanta, insisted on inserting that he was not responsible for the various defects of grammar, prosody and rhetorics occurring in the text as he read as he saw it and copied it so. A careful study of the facsimile shows that the text presented is really defective. The inscription thus requires to be re-edited.

The inscription³ is incised on a slab of stone. It contains 21 lines and covers a space 4½' × 2¾'. The average height of letters is 1", except in the last line where it is a little reduced, i.e. .9". The record is well preserved except in line 20 where the particulars of the date and the *tithi* are lost and in line 21 where more than half is either broken or obliterated. This portion thus cannot be deciphered.

The **characters** are Nāgarī as in the Ajayagadh rock inscription of Bhōjavarman.⁴ The letters are deeply cut and well formed. As regards the formation of individual letters, the following peculiarities may be noted. It is somewhat difficult to distinguish between the signs for *ch* and *v*. Besides the usual form of *k*, there appears another in *ksh* (line 19, *kshānadē*, but not in *kshanaga*, or *Śukrākshi*). The *anusvāra* is represented by a small circle but some cracks here and there above the letters are often mistaken for it. The final *m* is frequently substituted by the *anusvāra*. The sign for *avagraha* has been used only twice in lines 12 and 17. An omission in line 17 is supplied immediately below the line, the height of the letters there being .2" and the omission being indicated by a *kākapāda*.

¹ The correct reading would be *Arjunavāḷali*.

² Read *para-dattām vā*.

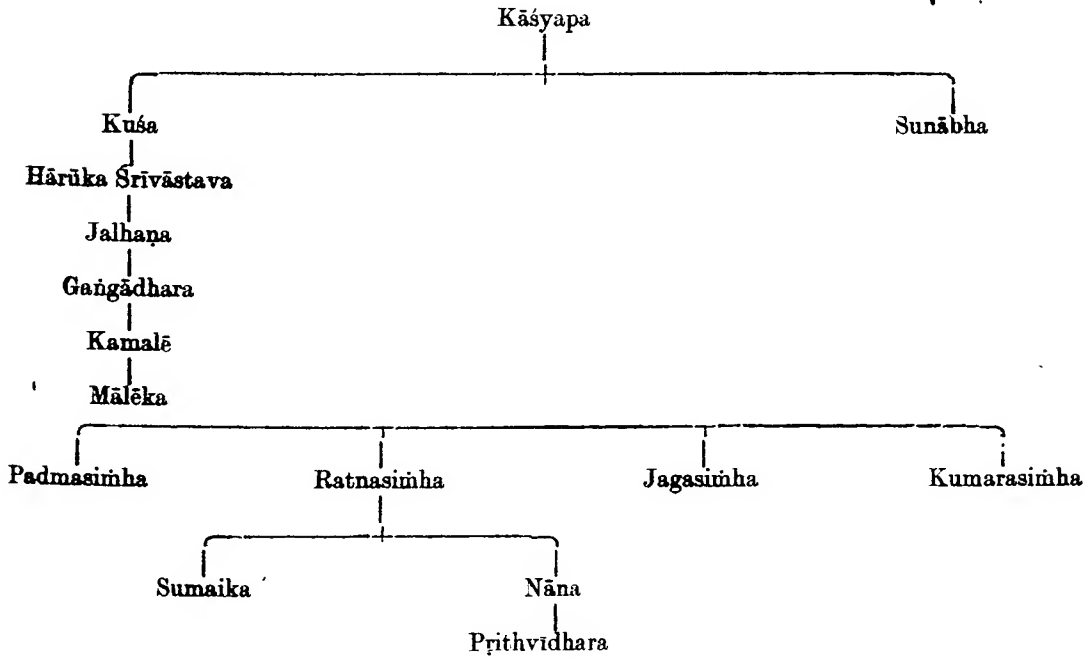

³ It is No. 620 of Dr. D. R. Bhandarkar's *List of Inscriptions of Northern India*.

⁴ Cunningham, *A. S. I. R.*, Vol. XXI, Pl. XV, ed. by Kielhorn, above, Vol. I, pp. 333-8.

The language is Sanskrit. Except the salutation to Vāsudēva in the first line and mention of the date in line 19, and the name of the scribe and his family in lines 20 and 21, where the composer invokes blessings for himself, the whole record is in verse.

As regards orthography, *r* is generally substituted for *b*, cf. *vibhrat*, line 1, *vahu*, line 14; and *ś* for *s* and vice versa, cf. *Vāśu-*, line 1, *vaśati*, line 5, *visāla*, line 4. The consonant following *r* is reduplicated in the majority of cases.

The object of the inscription is to record the establishment of a temple at Jayadurga with the image of Kēśava (verses 33-34). After salutation to Murāri in the first three stanzas, the incarnations of Vishṇu in the forms of Fish, Tortoise, Boar, Nṛsiṃha, Vāmana, Paraśurāma and Rāma are invoked for blessings. Thereafter comes the donor's genealogy which stands as follows :—

Nāna introduces himself as the minister of Bhōjavarman who is known to be the penultimate king of the Chandrātrēya (Chandel) dynasty of Bundelkhand. This Bhōjavarman was the son and successor of Viravarman and Kalyāṇadēvi. He was followed by Hammiravarman.

What is interesting here is that the ancestors of Nāna are said to be the hereditary ministers of the Chandrātrēya kings, i.e., the Chandellas. The genealogy of Nāna as given in the inscription is of little historical interest, except that the Kāyastha Śrīvāstava family to which Nāna belonged is said to have originated at Kauśāmyapura and that Hārūka, a member of this dynasty, is said to have earned the surname Śrīvāstava for the first time. "A Vāstavya-varṇa is mentioned in line 27 of Malhara inscription of the Chēdi year 919=1167 A. D.; a Vāstavya-kula in line 5 of the Sahet-Mahet inscription of the Vikrama year 1276; and also on the two inscriptions from Mahōba (A. S. I. R., XXI, pl. 21 and 23) one of which is dated in the Vikrama year 1240 records that in the illustrious great Vāstavya family there was one Suhila, the son of "Hallapa". The Ajayagadh rock inscription of Bhōjavarman also gives an account of some members of the Vāstavya

clan of the Kāyasthas¹ who held responsible positions under the other Chandella kings.* And a Śrīvāstava Thakkura is mentioned in the Meohad (Vikrama 1245) inscription of Jayachchandra-dēva of Kanauj (*J. R. A. S.*, 1927, p. 676).

The inscription is dated in the year 1345 which is expressed both in figures and words *kṣaṇada*=moon=1, *iśkṣaṇa*=Śiva's eyes=3, *śruti*=Vēdas=4, and *bhūtas*=elements=5, the usual rule of reading the numeral from right to left not being applied here. The month specified is Vaiśākha, but the actual date and week day, if given at all, are lost at the beginning of line 20. The year is to be taken as the Vikrama year in which the other inscriptions of the Chandellas are dated. The word *Samvat* also points to that.

As for the **geographical** names mentioned in the present inscription, Kauśāmyapura seems to be identical with Kauśāmbi or Kosam in the Allahabad District. Jayadurga (line 17) and Jayapura (line 20) are certainly the names of Ajayagaḍh.

The *prastiti* was composed by the poet **Amara** who compares the composition to a *chitravaiṇa* fabric (v. 36). Certainly the poem is of no mean order and, therefore, the poet cannot be charged with exaggeration. It was incised by Paṃsuha, the Kāyastha [Śrī*]vāstavya.

The facsimile of the inscription was very kindly supplied by Dr. N. P. Chakravarti, the then Government Epigraphist for India, in 1934, but owing to other preoccupations it could not be edited earlier.

TRANSLATION

Salutations to the illustrious Vāsudēva.

(Verse 1) May Dēva (Vishnu), the preserver, the enemy of the sons of Diti (*Asuras*), afford you joy, who generally does not feel physical weariness, being in the constant happy embrace of the bold Lakshmi and who signifies amazingly consummate love (*for the consort*) with his restless rolling eyes intoxicated with delight ; and whose śrīvatsa (*breast-jewel*) shines like the Cupid's arrows shot by the expanded bow of its blazing rays.

(Verse 2) May Murāri (*i.e.* the enemy of Mura), of ardent beauty, bless you, who, while being looked upon by his herd of cows, held upon the tip of his hand the mount Gōvardhana like a lump of mustard cake, and whose wonderous lustre was enhanced by the love-stricken wives of the cowherds.

(Verse 3) May Hari who is, as if in pleasant sport, thwarting in jest the diversions of the licentious deer with their consorts by an (*array*) of arrows whose beauty has been blunted by the stiff breasts of the milk-maids, enhance your knowledge.

(Verse 4) May Dēva, the fish-transformed husband of Śrī (Lakshmi), the restorer of the set of the Vēdas buried in the ocean, the refulgent, the destroyer of the burdens of the world, and the slayer of Śaṅkhāsura, destroy your sins.

(Verse 5) May the tortoise, who revelled in abstract in the watery ocean with its shores destroyed by the Sainvarta (one of the seven clouds at the dissolution of the universe), the refuge of the world constant in refulgent beauty, prosper you.

(Verse 6) May Mādhava, (*in the form of a boar*) who, by the mighty thrust of his long cruel tusks delivered the earth in the shape of a muddy lump of clay and who extended the fixed order of religion and duty ; the abode of intelligence and the habitat of the universe, and who is ever-ready to destroy the mental agonies, increase your blessing.

(Verse 7) May Nṛsiṃha, resplendent like the rays of thousand suns resting on the tip of the peaks of the Sumēru, and appearing with drawn nails for the destruction of the demon (*Hiraṇyakaśipu*), destroy your sins.

(Verse 8) May Vāmana (dwarf), of matchless glory, bless you ; who by the pretext of smashing the eye of Śukra denounced the very statesmanship of his enemies ; who expanded himself proportionate to the arrogance and haughtiness of Bali.

(Verse 9) Victorious be that renowned Paraśurāma, of great intelligence, the abode of victory and fame, who placed the earth in the hands of the Brāhmaṇas after acquiring its governance, and who made the wives of the enemies sad.

(Verse 10) May Rāma, too, the slayer of demons, whose deeds of valour gladden the hearts of the magnanimous and serve as the protection of the body, save you from all miseries.

(Verse 11) There lived the venerable sage Kāśyapa, the foremost amongst the expounders of the Vēdas, whom happily the creator created to satisfy the deities according to the injunctions.

¹ This is not clear from the facsimile, but it has been adopted from Prinsep.

(Verse 12) Of that noble spirit were born two reputed sons, Kuśa and Sunābha, as though the two matchless (*luminaries*), the sun and the moon, had descended from heaven to dispel the darkness.

(Verse 13) The residence of Kuśa, who had a handsome appearance due to his virtuous deeds, was at Kauśāmyapura. There dwelt a certain person who became his chief minister.

(Verse 14) That uncertain person, who became well known for the performance of the Kāyastha duties known by the surname of Kāyastha and respected by the learned for his (*versatile*) genius, satisfier of the expectations of the needy, became the ornament of that noble Kāśyapa lineage.

(Verse 15) Being endowed with the grace of flowery speech, charming personality, and love for ever practising the rational course of honest policy, he along with his whole family enjoyed the (*appellation*) Śrīvāstavya.

(Verse 16) That wise being was named Hārūka because he stole the hearts of women by his beauty, those of kings by his statesmanship and of the learned by his wit and deep erudition.

(Verse 17) Superior to all of the writer caste, the receptacle of the *āgamas*, the root of the tree of virtue, the vessel of light, he had a son named Jalhana of infinite valour, (*peerless*) like the preceptor of the gods born on the earth for the benefit of kings.

(Verse 18) Of him was born the honourable Gaṅgādhara, the receptacle of all virtues; conversant with the law of common usage, in whose jewel-like immaculate person the *tamas* (*guṇa*) never found any quarters.

(Verse 19) (*His*) noble-minded (*son*) bore the gentle name of Kamalē who concentrated his heart on the lotus foot of Kamalā's husband, of personal beauty commensurate with his virtues.

(Verse 20) Of him was born Mālēka, resembling Aja, of immaculate person and encircled by a halo of good qualities.

(Verse 21) From him were born these four, the wisest and the best of the sons, namely Padmasiṃha, Ratnasīṃha, Jagasiṃha, and Kumarasiṃha.

(Verse 22) The broad-minded Ratnasīṃha, the best of the learned, begot three sons who were self-restrained and of infinite prowess.

(Verse 23) The first and foremost among all of them was Sumaika the lotus-eyed, of matchless figure, conqueror of passion, skilful, another Gaṇapati, fat and abode of love, intelligence and beauty; he, who had never lowered his head before the haughty and the vainglorious and who had earned respect and honour in the courts of the kings.

(Verse 24) They got the ministership with the kings of the Chandrātrēya line whose fame had reached the ear-cavities of the damsel-like quarters (*i.e.* the ends of the world).

(Verse 25) One of the (*remaining*) two, the teacher of religious laws, learned and fascinating, was known as Nāna, who having resorted to the illustrious king Bhōjavarman wrought about the dawn of the sun of his statesmanship.

(Verse 26) This versatile man justified his name Nāna (*i.e.* various) by winning the favour of women by his sweet speech and of the kings by his polite behaviour, nay every one loved him as his own life.

(Verse 27) He (Nāna), being appointed the receptacle of merit and having carried aloft the standard (*kumbha*) of politics to a high pitch, the king expected the newly anointed royal Lakṣmī to yield rich harvest for a long time to come.

(Verse 28) Whose spreading fame then adorned, like a beautiful ornament of dazzling splendour, the ocean in the shape of the countless conch-shells playing about (*on its billows*).

(Verse 29) His consort who was well adorned like the damsels of the quarters, and who was well versed in the practical lore of the scriptures, and whose ear-ornaments were dressed by the damsel-like Maruts, became a source of pleasure to the sages.

(Verse 30) His son Prithvīdhara shed lustre like the new moon by causing delight to the masses of lily-like righteous persons : he possessed attractive manners and a commendable personality.

(Verse 31) Being desirous of crossing the worldly ocean by the ship of the husband of Lakshmī, he takes to the devotional course for salvation with the most pious intentions.

(Verse 32) Thus seeing the futile agreeableness of worldly pleasure derived from the objective world, and desiring salvation, he maintains his face like the lily after having wrought his fame for the elevation of his soul.

(Verse 33) This highly spirited and versatile Nāna, an adept in all the fine arts, caused this well-made image of Hari to be placed at the victorious and celebrated fort of Jayapura in honour of his ancestors, for love of fame ; he was a judge of merits, an expounder of all polity, grateful, and of splendid understanding.

(Verse 34) This Nāna of respectable intellect established a temple with the image of Kēśava for the salvation of his ancestors.

(Verse 35) So long as the mountains, the earth, the gods, the oceans, the moon, the sun and the heavenly luminaries (*shall endure*), so long shall that man, the seat of virtue and the beloved of the gods, live in the habitation of the Creator.

(Verse 36) The poet Amara, being desirous of satisfying the curiosity of the learned, wove this variegated priceless literary carpet, replete with excellent metaphors expressed in appropriate phrases. He was gentle and stately and had earned the title of ' wise man ' by dint of his eminent qualities.

(Verse 37) This inscription was written on the lucky day of the month of Vaiśākha in the Śaṁvatsara indicated by the moon, Śiva's eyes, the Vēdas and the *bhūtas*.

In figures also Śaṁvat 1345, time Vaiśākha.....

(Verse 39) He had two sons named Nātha otherwise known as Sumaika and Vallabha by Champakā (*his wife*), who loved one another, who spoke sweetly and were well known in the world, and a pattern of morality.

This was written by Paṇḍu (born) in the family of Kāyastha-[*]vāstavya, the son of the illustrious Thakura Ayo, the commandant of the balconied Jayapura fort.....May good luck attend the author.¹

No. 20—HINDOL PLATE OF KULASTAMBHA

(1 Plate)

D. C. SIRCAR, OOTACAMUND, and P. ACHARYA, CUTTACK

The copper plate inscription, which is being published here for the first time,² was lying in the office of the Subdivisional Officer of **Hindol**, the headquarters of a state (now merged)³ of that

¹ See *J. R. A. S.*, 1906, p. 539 et. seq. 'The Sanskrit *pratōlī* and its new Indian derivatives' by J. Ph. Vogel.

² The inscription was noticed by B. Misra in his *Medieval Dynasties of Orissa*, p. 28.

³ Hindol is now a Subdivision of the newly formed Dhenkanal District.

name in Orissa. Little is known about its original findspot and the story of its discovery. The record was exhibited, along with the Utkal University's valuable collection of antiquities, on the occasion of the Cuttack Session of the Indian History Congress in December, 1949. Later it was secured for the Orissa State Museum, Bhubaneswar, where it is at present lying.

The inscription is written on a **single plate** measuring 9·2 inches by 5·1 inches. A circular lump of brass soldered at the centre of its left side contains the seal of the king who issued the charter in question. There is a projecting knob at the back of the lump resembling the hair collected in a knot behind a woman's head. On the counter-sunk surface of the seal, there are the emblems of the sun and crescent moon at the top, the legend *Śrī-Kulastambhādēvasya* in the middle, and the emblem of a standing boar facing proper right at the bottom. The lower part of the subscript *ṃ* in the *akṣara sya* of the legend looks like two parallel straight lines demarcating the legend and the figure of the boar below. The plate is engraved on both the sides. There are altogether 31 lines of writing, the obverse and the reverse containing 15 and 16 lines respectively. The plate is not in a satisfactory state of preservation and shows signs of corrosion and of the peeling off of a layer of metal here and there. This has rendered the reading of a few passages difficult and doubtful. The plate is partly broken at the right side top and bottom corners. It weighs 54 *tolas*.

The **characters** belong to the East Indian variety of the Northern alphabet and the inscription may be assigned on palaeographic grounds to about the eighth or ninth century A. D. In point of palaeography, the charter under discussion closely resembles other inscriptions of the family to which its issuer belonged.¹ The **language** of the inscription is Sanskrit. It is written partly in prose and partly in verse. In this respect as well as in point of orthography, our record has very close resemblance with the other records of the family. The verses are mostly common, although they have slight variations in some cases.

The charter is dated not according to any era, but in the issuer's fourth regnal year, Bhādrasudi 12. This date itself does not help us in determining the age to which the charter has to be referred. But as we shall presently see, one of the records of the grandfather of the issuer of our grant appears to be dated in the year 103 apparently of the era used by the Bhauma-Kara rulers of Orissa. As this era is now usually identified with the Harsha era of A. D. 606, it may be assumed that the date of the said charter corresponds to A. D. 709. If therefore the grandfather flourished about the first quarter of the eighth century A. D., the reign of the grandson, who issued the grant under discussion, may be roughly assigned to the middle or the third quarter of that century. It has, however, to be admitted that the identification of the era used by the Bhauma-Karas with the Harsha era is not accepted by some scholars who are inclined to assign the Bhauma-Karas to a later date.

The inscription begins with the symbol for *siddham* and the word *svasti*. Verse 1 is in adoration to the god Gīṛśa, i.e., Śiva, and is found in several other inscriptions of the family in question. Verse 2 introduces king Raṇastambha of the Śulki family which is said to have been favoured by the goddess Stambhēśvarī. The next verse says how the Śulki king Raṇastambha constructed a number of temples apparently for the god Sadāśiva. Verses 4-5 describe king Jayastambha who was the son and successor of Raṇastambha. The following two verses (verses 6-7) describe the reigning king Kulastambha who was the son and successor of Jayastambha and issued the charter from the city of Kōḍālōka. While kings Raṇastambha and Jayastambha of the Śulki family of Kōḍālōka are known from their own records, king Kulastambha, son of Jayastambha, is known for the first time from the present inscription. He is called a *Mahārāja* and has the feudatory title *samadhigat-āśēsha-mahāśabda*. He is further said to have been a devout worshipper of the god Mahēśvara.

¹ Cf. Bhandarkar, *List*, Nos. 1694-1701.

The inscription records the grant of a locality or probably several localities situated in Sōgga-grāma (?) forming a part of the Gapāraśrīṅga *vishaya* belonging to the Kanarddā *maṇḍala*. The name or names of the locality or localities granted cannot be satisfactorily made out. The royal order regarding the grant was addressed to the *Rājanaka*, *Rājaputra*, *Mahāsāmanta*, *Kunārāmātya*, *Antaraṅga* and others including the *Vishayapatis* and *adhikārin*s together with their *karaṇas* (either meaning scribes or the *adhikaraṇas*, i.e., administrative offices). The grant was made in favour of the *agnihōtrin* Bhaṭṭa Viśvarūpasvāmin who was a Brāhmaṇa of the Kauśika *gōtra* having the Viśvāmitra, Dēvarāta and Audala *pravaras* and was a student of the Mādhyandina branch of the Yajurveda. Lines 17-18 appear to mention several places, viz., Pañchaśasya, Punyavṛiddhi, Sarvadā..., Sāraṭura and Kharanḍava, as boundaries of the gift land. It is interesting that the grant is said to have been made with the king's family-deity, the goddess Stambhēśvari-bhaṭṭārikā, as the *pramāṇa*. The word *pramāṇa* is here apparently used in the sense of *sākshiṇī* (witness) which actually occurs in the same context in some records of the family. The donee of the grant was allowed to enjoy rent from temporary tenants (cf. *s-ōparikara*). The gift land is also described as *s-oddēśa* which means "together with the space above the *tala* or ground." The sentences speaking of the grant are followed by two interesting passages in prose, one of them being benedictory and the other imprecatory. Next come four of the usual imprecatory and benedictory verses. Lines 30-31 mention the writer of the document, *Bhōgin* Kalyāṇa, and the engraver Durlabhasaka whose father's name was Āchārya. The record ends with the date already noticed above.

As indicated above, a number of copper-plate inscriptions of the Śulkī family, also called variously Śulkī, Śaulkī, Śōlkī, etc., have been published. The earliest of the Śulkī records appears to be the Dhenkanal plate¹ of the *samadhigata-pañcha-mahāśabda samasta-Mahāsāmanta-adhipati* Raṇastambha. This record seems to be dated in the year 103, although the first of the two numerical symbols was read by H. P. Sastri as 30 and by D. R. Bhandarkar as 200. Considering the feudatory titles applied to the name of Raṇastambha as well as the fact that the era used is no doubt the same as that used by the Bhauma-Kara kings of Orissa, it seems that Raṇastambha was a semi-independent feudatory of the Bhauma-Kara monarch Śubhākara III. two of whose inscriptions are dated in the same year.²

The Talcher plate³ seems also to belong to the same Śulkī king, although in this record he is called both Raṇastambha and Kulastambha and the seal attached to the charter bears the legend *Śrī-Kulastambhadēva*. The king Raṇastambha *alias* Kulastambha is in this inscription endowed with both feudatory and imperial titles, as he is not only called *samadhigata-pañcha-mahāśabda* and *Rānaka* but also *Mahārājādhirāja* and *paramabhaṭṭāraka*. The mere issue of the Dhenkanal plate of the year 103 without specific mention of his Bhauma-Kara overlord points to Raṇabhaṇja's importance, while the partial assumption of imperial titles in the Talcher plate seems to indicate his success in a struggle with the Bhauma-Karas. The Talcher plate also mentions Raṇastambha-Kulastambha's father Kalahastambha-Vikramāditya who is represented as the son of Kāñchanastambha. Both Kāñchanastambha and his son Kalahastambha *alias* Vikramāditya appear to have been loyal vassals of the Bhauma-Karas. The Jārāgrāma grant⁴ of Raṇastambha also represents him as the son of Kalahastambha and the grandson of Kāñchanastambha, although H. P. Sastri wrongly read *Kulastambha* for *Kalahastambha*. This record does not apply any imperial title to the name of Raṇastambha and seems to be earlier than the Talcher plate.

¹ Bhandarkar, *op. cit.*, No. 1697; *JBORS.*, Vol. II, pp. 397 ff. Cf. B. Misra, *op. cit.*, p. 33.

² See B. Misra, *Orissa under the Bhauma Kings*, pp. 12-22. Cf. *JOR.*, Vol. XVIII, pp. 49-51.

³ Bhandarkar, *op. cit.*, No. 1694: above, Vol. XII, pp. 157 ff.; N. N. Vasu, *Arch. Sur. of Mayurbhanj*, Vol. I, pp. 157 ff., etc. In line 2, read *Śulkī-vamśe* which has been wrongly read as *Śūlkīkīṃsa*.

⁴ Bhandarkar, *op. cit.*, No. 1696; *JBORS.*, Vol. IV, pp. 169 ff.

The Bhīmanagarīgarh plate¹ is usually assigned to king Raṇastambha-Kulastambha. It represents the king as the lord of the whole Gōndrama with Śaṅkhajōṭi forming the borderland of his kingdom. This description is also found in the two Puri plates² published by M. M. Chakravarti. Unfortunately the text of the Puri records is extremely corrupt. The Bhīmanagarīgarh plate represents *Mahārāja* Raṇastambha as the *ātmaja* (line 10) of Vikramāditya. The word *suta* (line 12) again used before the following mention of Kulastambha may suggest that the record in question belongs not to Raṇastambha-Kulastambha but actually to a Kulastambha who was the son of Raṇastambha.

Another son of Raṇastambha *alias* Kulastambha was Jayastambha of the three plates³ discovered at Dhenkanal. In one of these records Jayastambha is called *Mahārājādhirāja* and *samadhigata-pañcha-mahāśabda* which together appear to be a combination of feudatory and imperial titles. In the same record, Jayastambha is also called "lord of the whole Gōndrama" and is represented as the son of Raṇastambha (*i.e.*, Raṇastambha-Kulastambha) and as the grandson of Kulastambha (apparently a mistake for Kalahastambha *alias* Vikramāditya). In the second of the Dhenkanal plates, Jayastambha is called a *Mahārāja* and is represented as the son of Nidayastambha which seems to be another name of Raṇastambha-Kulastambha. The third plate of Jayastambha calls the king both *samadhigata-pañcha-mahāśabda* and *paramabhaṭṭāraka*. It represents king Jayastambha as the son of Alānastambha, the grandson of Kaṇaḍastambha (undoubtedly a mistake for Kalahastambha) *alias* Vikramāditya, and the great-grandson of Kāñchanastambha. Thus Jayastambha's father seems to have enjoyed no less than four names, *viz.*, Raṇastambha, Kulastambha, Nidayastambha and Alānastambha. According to the charter under discussion, Jayastambha was succeeded by his son Kulastambha who ruled at least up to his fourth regnal year. Nothing is known about the Śūlkīs after this ruler. Probably they were extirpated or completely subjugated by the Bhauma-Karas not long after the rule of the issuer of our plate. That the semi-independent rule of the Śūlkīs from Raṇastambha-Kulastambha to his grandson Kulastambha, who issued the present charter, did not last for more than about half a century is indicated by the fact that the same person seems to be the writer of the Dhenkanal plate of Raṇastambha dated year 103 and of the charter of Kulastambha under discussion. The *Bhōgin* Kalyāṇadēva who wrote the said grant of Raṇastambha is very probably the same as the *Bhōgin* Kalyāṇa mentioned in line 31 of our record as its writer.

The Śūlkīs of Orissa are probably mentioned in the Hārāhā inscription of Maukhari Iśānavarman of Bihar and the U. P., dated in Vikrama Samvat 611 (A. D. 554).⁴ If this suggestion is to be accepted, it has to be assumed that the Śūlkīs were ruling in Orissa or its neighbourhood at a much earlier date than that suggested by the inscriptions of the family discussed above. M. M. Chakravarti believed that Śūlkī is but a variant of the family name *Chālukya* and that the Śūlkīs of Orissa represented a branch of the Eastern Chālukya dynasty of the Āndhra country.⁵ But this theory seems to be rightly challenged by others who are inclined to associate the Śūlkīs of Orissa with a people called Śuklī that are still inhabiting parts of the Midnapur District in South-

¹ Bhandarkar, *op. cit.*, No. 1698; *JBORS.*, Vol. II, pp. 401-3. The word *jōṭi* (modern *jōr* in the dialect of S. W. Bengal and *jōṭikā* of the *Gandakhamālā*, p. 15, etc.) means a canal or small stream. Misra identifies Śaṅkhajōṭi with the Sankha river in the Sundargarh region of Orissa.

² *JASB.*, Vol. LXIV, 1895, Part I, pp. 123-27. Only one of these two records is recognised in Bhandarkar's list, No. 1695, the other being inadvertently omitted. The suggestion that the first of these two records mentions one Kachchhadēva is wrong as the reading intended is known from other records to be *kaṭ sa ēva* (or *dēva*). Cf. line 10 of the record under discussion. *Gondrama* is now roughly taken to mean the same as Oriya *Gadajāta* (above, Vol. XXVI, p. 77), although the real meaning of the word is uncertain.

³ Bhandarkar, *op. cit.*, Nos. 1699-1701; *JBORS.*, Vol. II, pp. 406-17.

⁴ H. C. Ray, *Dynastic History of Northern India*, Vol. I, p. 438.

⁵ *Op. cit.*, p. 124.

West Bengal.¹ It is interesting to note that the Śūklīs of Midnapur trace their origin to a place called Kēdālaka which may be the same as Kōdālōka, capital of the Śūlkī kings of Orissa. The records of the Śūlkī kings have been mostly found at Dhenkanal and in its neighbourhood and there is little doubt that the dominions of the Śūlkīs lay in the Dhenkanal-Talcher area of Orissa. That their dominions did not include a wide region is not only suggested by the fact that they were feudatories of the Bhauma-Karas of Jājpur, but also by the existence of several other contemporary ruling families such as the Nandas, Bhañjas, Dhavalas and Tuṅgas. The Tuṅgas ruling from Mahāparvata in the Cuttack District (S. I. sheet map No. 73/H/11) were the southern neighbours of the Śūlkīs. H. P. Sastri² and R. D. Banerji³, however, suggested that the Śūlkīs of Orissa extended their power over South-Western Bengal. In our opinion, this theory is absolutely unwarranted. It is based on the wrong assumption that Jārāgrāma in the Jārā *khaṇḍa*, granted by king Raṇastambha in favour of a Brāhmaṇa named Pāchuka (not *Pauchuka* as read by H. P. Sastri), was no other than the present village of Jārā in the Hooghly District of West Bengal. Sastri says that "the land granted belonged to the village of Jārā in the district of Jārā in the Rādhā *maṇḍala*".⁴ As a matter of fact, however, Rādhā-*maṇḍala* is not mentioned in the record in question in connection with *Jārā-khaṇḍe Jārā-grāmē* in line 15; it occurs in line 18 in the passage *Rādhā-maṇḍalē Tēllamgala⁵-bhaṭṭa-grāma-vinirgata*⁶. This simply says that the donee's family originally belonged to the village of Tēllamgala situated in the Rādhā *maṇḍala* which had thus absolutely nothing to do with the gift village of Jārā. There is no doubt that Jārāgrāma of Raṇastambha's inscription was situated in the Dhenkanal region of Orissa. The donee of Raṇastambha's grant was apparently a Rādhīya Brāhmaṇa settled in Orissa. It is, however, interesting to note that the donee is said to have belonged to the Kāśyapa *gōtra* having the Kāśyapa, Āvachhyāyana (a mistake for *Āvatsāra*) and Naidhruva *pravaras* and to have been a student of the Kāṇva branch of a *charaṇa* of the Yajurveda (*i.e.*, Śukla-Yajurveda). The present day Rādhīya Brāhmaṇas of Bengal almost all claim to belong to the Sāmavēda. This seems to point to the incomplete and unreliable nature of late traditions in regard to the reconstruction of the social history of the early period.⁶

As regards Stambhēśvari, the family deity of the Śūlkīs of Orissa, we have elsewhere⁷ suggested that the representation of the goddess was probably made out on a *stambha* indicating a Śiva-linga. Such a Linga with the representation of the Śakti is no doubt found among the sculptural remains of Eastern India.⁸ It should, however, be pointed out that, whatever may

¹ B. C. Mazumdar, *Orissa in the Making*, pp. 103-06; H. P. Sastri, *JBORS.*, Vol. IV, p. 169. Śūklī weavers are found in Orissa and Singhbhum. Some of them are said to be Jains. In that case, *Śūklī* may indicate *Śūkl-āmbara* having little to do with the Śūlkī kings. The matter, however, requires investigation.

² *JBORS.*, Vol. IV, p. 169.

³ *History of Orissa*, Vol. I, pp. 195-6.

⁴ *Op. cit.*, p. 168.

⁵ Sastri's transcript has *Tillamgala*⁵. There is a case of the *sāpēksha-samāsa*, so common in epigraphic literature, (cf. *Select Inscriptions*, Vol. I, pp. 175-77, 179, 278, 407, etc., and notes) in this passage. Cf. also *Śrāvastīyām Muktvānti-grāma-vinirgatāya* (*IHQ*, Vol. XX, p. 247). *Rādhīyām Vallikandara-vinirgatāya* (above, Vol. XI, p. 94, where *Rādhāpham*⁵ is a wrong reading), etc., in the records of Mahāśivagupta I Janamējaya. See *JOR.*, Vol. XVIII, pp. 45-48.

⁶ Cf. *Select Inscriptions*, Vol. I, pp. 498-500. N. N. Vasu (*Vaṅger Jātīya Itihāsa*, Brāhmaṇa-kāṇḍa, Part I, 2nd ed., p. 303) succeeded in tracing only a few Ṛigvēdiya and Yajurvedīya families among the present day Rādhīya Brāhmaṇas. The number of such families must have been considerable in the early period. Later they mostly merged themselves in the Kauthuma-śākhiya Sāmavēdins.

⁷ *The Śakta Pūthas* (*JRASB.*, Letters, Vol. XIV, 1948), p. 104.

⁸ *History of Bengal*, Dacca University, Vol. I, p. 452, Plate VI, 19; *A. R., A. S. I.*, 1924-25, p. 155, Plate XLC; N. K. Bhattachali, *Iconography of the Buddhist and Brahmanical Sculptures in the Dacca Museum*, pp. 122-24, Plate LXIV.

have been the form of the goddess worshipped by the Śūlkīs, the deity Stambhēśvari is still adored by the people of the different castes of Orissa in some parts of the country under the Prakritic name Khambēśvari and in the shape of a post or pillar.¹ Now therefore the word *stambhēśvari* seems to indicate merely "the goddess of the pillar" without any special association with the Śiva-linga. It is interesting to note in this connection that the Kalahandi plates² of Mahārāja Tushṭikara, who possibly flourished about the fifth or sixth century A. D., mention that ruler as a worshipper of goddess Stambhēśvari. Whether the Śūlkīs claimed descent from Tushṭikara and whether the goddess worshipped by Tushṭikara was the very same as that later adored by the Śūlkīs cannot be determined with any amount of certainty. It is also uncertain whether the pillar known as Stambhēśvari and at present standing at the centre of the Sonepur town had anything to do with king Tushṭikara and the rulers of the Śūlkī family.³ The rulers of the Angul State, confiscated in 1847, had names ending with the word *stambha*. There are also certain *Stambha* families in Orissa even today. Nothing definite, however, is known as to whether these late Stambhas had any relations with the ancient Śūlkīs whose names ended with the word *stambha*.

No satisfactory identification of any of the geographical names mentioned in the inscription has been possible. Kōḍālōka, capital of the Śūlkīs, may, however, be the same as modern Kōālu in the Dhenkanal subdivision of the Dhenkanal District (former Dhenkanal State) of Orissa, about 6 or 7 miles from Talcher, on the left bank of the Brāhmanī river.

No. 21--MACHUPALLE INSCRIPTION OF THE TIME OF SOMIDEVA-MAHARAJA

(1 Plate)

M. VENKATARAMAYYA, OOTACAMUND

Māchupalle is a village in the Siddhavattam *tāluk* of the Cuddapah District, Madras. It is situated on the southern bank of the Pennār, about five miles to the west of Siddhavaṭṭam. The stone bearing the inscription¹ edited here is set up near a well called *Gurici-Reḍḍi-bhāvi* adjacent to a ruined temple of Śiva in the village. The inscription is engraved on two sides of the slab. At the top of the first side are carved the emblems of the sun, moon, a seated bull and a lamp-stand. Owing to the damage sustained by the stone, a few lines at the bottom of its first side are lost. As a result of this, the record cannot be read continuously from the end of the first side to the beginning of the second. The writing on the second side is well preserved, the concluding portion of the record being retained intact.

The **script** of the record is mixed Grantha and **Tamil**. Grantha letters are employed for Sanskrit words and letters. The **language** of the inscription is **Tamil** and it is in prose. A few orthographical errors are found in the record and they occur in places where the Sanskrit words or letters are written. Such examples are : first side, line 5, *paṇṇamācāsyai* for *paṇṇamācāsyai* ; line 10, *bhujabhala* for *bhujabala* ; line 20, *dekshiṇa* for *dakṣiṇa* ; line 25 *dhā rā* for *dhā rā* ; second side, lines 22 and 24, *tūā* for *dhūā*.

The inscription does not formally refer itself to the reign of any ruling king as is usual with inscriptional records but straightaway commences with the mention of a date and proceeds to state some facts of a transaction that took place on that day. The date cited is Śaka 1178, Rākṣasa, Karkata, su. pūṇimā, Tuesday, Tiruvōyam, lunar eclipse. The details correspond to **A. D. 1255, July 20, Tuesday**, a day on which there occurred a lunar eclipse. The inscription states that on the date specified *Gaṇapadeḍāra Maṇḍalika-brahmarākṣasa* Gaṇḍaya-Sāhaṇyār who was ruling from Vallūru in Mutti valanāḍi,

¹ Read *dhābhā* for *gasya*.

³ Read *crānam*.

⁴ No. 33 of 1939-40 of the Mad. Ep. Coll.

(i.e., Muḷki-vaḷanāḍu) obtained from Sōmidēva-Mahārāja who bore the epithets *Mahāmaṇḍalēśvara*, *Trailōkyamalla*, *Bhujabala-ēranārāyaṇa* and *Niśsaṅka pratāpa*, the village of Māṣaruppalli, situated near the southern gateway of Śrīśailam (i.e., Siddhavattam) and that Gaṅgaya Sāhaṇiyār in his turn made over the village as a gift (*prītidānam*) to Kālaḍi Vāsudēva Nāyaka of the Bhārgava *gōtra* who hailed from Malaimaṇḍalam (i.e., Malabar). This Nāyaka, again in his turn, granted a part of the village as *Brahmapurī* to a *Brāhmaṇi*, Perumāl, son of Siddhamaraśar of the Pūtimāsha *gōtra*. Of the remaining lands in the village, he gifted away one share to the temple of Siddhavaṭamudaiya-Nāyaṇār for the expenses of offerings and worship at the time of the morning service (*tiruppaḷḷi-ēḷuchchi*) of the deity. The rest of the lands was endowed to a *Malaiyāṇi-maṭha* in the village for offering of alms to the *ēkaḍaṇḍi-saṅgāsins* and for feeding *Malaiyāṇa-Brāhmaṇas* living in the *maṭha* and engaged in religious penance. The inscription ends with the usual imprecation against the destroyers of the charity and contains a final benediction that the religious faith, *Māhēśvaram* might grow and spread.

It will be seen that the inscription is of interest in several respects. In the first place it is to be noted that the language and script of the record is Tamil and this is important in view of the fact that the region where it is found and the chiefs mentioned therein are associated with the Telugu country. Attention will be drawn to the significance of this in the sequel. Historically, the record is of interest in the mention made in it of *Mahāmaṇḍalēśvara* Sōmidēva-Mahārāja who, to judge from the string of *birudas* attached to his name, seems to be a local chief of some importance ruling over the region around Siddhavattam. As to his identity it may be observed that the *birudas* held by him are identical with those adopted by a line of chiefs who were further distinguished by the additional epithets of *Kalukaḍa-puravarādhīśvara* (i.e., the lord of the best of cities, Kalukaḍa) and *Siddhavaṭadēvara-dēya-śrī-pādārādhaka*. Some members of this family are known from inscriptions in and around Siddhavattam itself. One of them was Rāyadēva-Mahārāja who bore the epithets, *Mahāmaṇḍalēśvara*, *Kaṅkaḍapuravarādhīśvara*, *Trailōkyamalla*, *Bhujabala-ēranārāyaṇa*, *Pāṇḍyagajakēśari*, *Aṇḍambarābharata*, *Niśsaṅka pratāpa* and *Siddhavaṭadēvara-dēya-śrī-pādārādhaka*. One of his inscriptions found at Rāyachōṭi,¹ Cuddapah District, is dated Śaka 1155, Nandana, Āshāḍha śu. 11 (i.e., A. D. 1232, June 30, Wednesday) and states that one Paḍavala Banumayaṇ consecrated the image of Janādana-Perumāl at Āṇḍapūr in Kil-Mārāyapāḍi and that the chief Rāyadēva-Mahārāja granted to the deity the village of Rāyanārāyaṇaputtēri as *tiruvīḍaiyāṭṭam*. The script and language of this record is Tamil like the present Machupalle inscription. The second record of this chief is found at Jōṭi near Siddhavattam² and it is dated Śaka 1169, Plavaṅga, Jyēṣṭha śu. 13, Vaḍḍavāra (i.e., A. D. 1247, May 18, Saturday). Although the record starts with the *prasasti* of Rāyadēva-Mahārāja whose *birudas*, as found in the Rāyachōṭi inscription, are also detailed here, the date quoted is referred to the reign of Rakkasa-Gaṅgarasa. The inscription says that one Chenti Rāmināyaka, the servant (*nija-bhṛitya*) of Rāyadēva-Mahārāja made a number of benefactions on the date specified during the reign of his overlord Rakkasa-Gaṅgarasa. The wording of the record leaves it doubtful as to whether Rakkasa-Gaṅgarasa is to be taken as identical with Rāyadēva-Mahārāja which seems very likely since the donor Rāmināyaka describes them both as his overlords. If, however, he is considered a different person nothing is known regarding the family to which he belonged.³ Attention may here be drawn to the mention of Rakkasa-Gaṅga in a contemporary Telugu literary work, the *Nirvachanōttara-Rāmāyaṇamu* of Tikkana Sōmayājin from which we learn that Rakkasa-Gaṅga was defeated in

¹ No. 446 of 1911 of the Mad. Ep. Coll.

² No. 563 of 1915 of the Mad. Ep. Coll.

³ A fragmentary record mentioning a certain Rakkasa-Gaṅga 'as ruling the earth' is found at Sivāḍi, Punganur taluk, Chittoor Dt. (No. 235 of 1931-2 of the Mad. Ep. Coll.) For want of sufficient data it is not possible to connect him with Rakkasa Gaṅga of Siddhavattam.

battle by the Telugu-Chōḍa chief of Nellūru, Manumasiddhi II who is stated to have sent his Kāyastha general Gaṅḡaya-Sāhaṇi to collect tribute from him. More about this incident will be said in the sequel. At Tāḍpatri in the Anantapur District is a long inscription¹ of another chief of the family, *viz.*, Udayāditya who lived many years earlier than Rāyadēva-Mahārāja. This, record which is dated Śaka 1120, Kālayukti, Māgha ba. 15, Thursday, solar eclipse (*i.e.*, A. D. 1199 January 28, Thursday, solar eclipse), gives the genealogy of Udayāditya as follows: in the lunar race there was Attirāja whose son was Āhavamalla, whose son was Gaṅḡa and Gaṅḡa's son was Sōmidēva who was the father of Udayāditya, the donor of the inscription. Udayāditya is given a string of *birudas*, commencing with the words, *Anēka-samara-saṅghaṭṭaṇ-ōpalabdhā-vijayalakṣmī-samālinguta-viśāla-vakṣasthala*, etc., and including among other epithets those like *Siddhacāṭadēva-devya-srī-pāṇa-padmarāṭhaka*, *Kalukāḍapuravarādhiścara*, *Bhuvanatripētra*, *Kṣatriyapavitra* and *Pratāpekumāra*. He is further stated to be ruling from his *rājadhāni* Tāḍpālapura, *i.e.*, Tāḍpatri. Āhavamalla mentioned as the great-grand-father of Udayāditya in the Tāḍpatri inscription seems identical with his namesake, two of whose records are found in the Rajampet taluk of the Cuddapah District. One of them from Nandalūr,² which is in Tamil, records a benefaction by him and refers to one Bhāskara-Bhaṭṭōpādhyāya. The other inscription from Taṅgaṭūru,³ which is in Kannaḍa, is dated Śaka 1073, Prajōtpatti, Māgha-śu. 15, Thursday (*i.e.*, A. D. 1152, January 24, Thursday) and refers itself to the reign of the Western Chālukya king Taila, *i.e.*, Tailapa III. It records the consecration of the temple of Mūlasthāna-Pāpavināśadēva by Āhavamalla in honour of his *guru Pāśupata* Tapōdhana Jīyar. A still earlier member of the family was Malla-Mahārāja who is described as ruling Āyaje 300 as a subordinate of Tribhuvanamalla (Vikramāditya VI) in an inscription at Alampūr, Raichur District, dated Chālukya-Vikrama year 26, Kālayukti.⁴ This chief, like Udayāditya of the Tāḍpatri record, has a *prasasti* commencing with the words, *Anēka-samara-saṅghaṭṭaṇ-ōpalabdhā*, etc., and bears almost all his *birudas*. If he is identified with Āhavamalla of the Tāḍpatri record, which is not unlikely, he must be supposed to have had a long rule of over fifty years from Chālukya-Vikrama year 26, *i.e.*, A. D. 1101-2 to 1152 A. D. Two more chiefs of this stock are brought to light by an inscription at Chīntalaputtūru, near Pushpagiri, Cuddapah District.⁵ They are Murāri-Kēśavadēva-Mahārāja and Sōmidēva-Mahārāja. Their *prasasti* includes all the epithets held by Sōmidēva-Mahārāja of the present Māchupalle inscription and in addition that of 'lord of Kalukāḍapura'. The record states that these two chiefs made a joint donation of Vedulacheruvu to god Indrēśvara of Pushpagiri on the occasion of their visit to the holy place in Vibhava, Āśhāḍha śu. 10, Monday. The corresponding Śaka date is not specified in the record. Since the year Vibhava corresponded to A. D. 1268 it is not unlikely that the record was set up in that year, although the other details noted in the record do not tally with any date in the month of Āśhāḍha of this year.⁶ If the date cited is A. D. 1268, this inscription being only 13 years later than the Māchupalle record of A. D. 1255, it is not improbable that Sōmidēva-Mahārāja of the Māchupalle inscription and his namesake of the Pushpagiri record are identical. It would follow from this identification that Sōmidēva-Mahārāja of our record was also a scion of the family of chiefs who were distinguished by the appellation, 'Lords of Kalukāḍapura'. The omission of this particular title in the Māchupalle inscription does indeed weaken

¹ S. I. I., Vol. IV, No. 798.

² No. 577 of 1907 of the Mad. Ep. Coll.

³ *Topographical List of Inscriptions on the Madras Presidency*, Vol. I, Cd. 580—*Local Records*, Vol. IX, p. 260.

⁴ *Telingana Inscriptions*, pp. 126-7. Ins. No. 26. The cyclic year quoted does not tally with the Ch. Vik. year 26, the latter would correspond to A. D. 1101-2. The Kālayukti year would correspond to A.D. 1078 and 1138 both of which do not seem to be the intended year.

⁵ No. 319 of 1905 of the Mad. Ep. Coll.

⁶ The details, however, correspond to A. D. 1148, June 28 but this date would be too early for Kēśavadēva and Sōmidēva since these two princes were contemporaries of Ambadēva of A. D. 1272-1302.

the argument in favour of his identification as a scion of that family which seems, however, otherwise well established considering not only the occurrence of the other *biṇḍas* which are common to most records of these chiefs but also the provenance of the present record of Sōmidēva near Siddhavaṭṭam, the god of which place was the family deity of some of the members of the family. Further, the language and script of the Māchupalle inscription is Tamil, a feature characterising some other inscriptions of the family, *etc.*, the Rāyachōṭi inscription of Rāvadēva-Mahārāja and the Nandalūr record of Āhavanalla. Thus the locality of his rule, his name and some of the titles held by him which are common to other members of the family of the Kalukaḍapura chiefs and finally his proximity in point of date to Sōmidēva Mahārāja of that family figuring in the Pushpagiri inscription, would all render it tenable that our Sōmidēva Mahārāja of the Māchupalle inscription was a scion of the Kalukaḍapura rulers and identical with Sōmidēva of the Pushpagiri record.

From the foregoing analysis of the epigraphs of the lords of Kalukaḍapura, it would appear that the earliest member of the stock so far known was Attirāja of the lunar race. He might have flourished about A.D. 1100 since he was the fourth ascendant from Udayāditya of A.D. 1199 figuring in the Tāḍipatri inscription cited above. The history of the family before Attirāja is not definitely ascertainable but some clues in this regard are however available from their *prasaśi* and titles. For instance, the *prasaśi* commencing with the words, *Anēka-samana*, *etc.*, which the chiefs of Kalukaḍapura adopted was also the characteristic preamble of the Vaidumba family, who ruled over parts of Cuddapah and the adjacent territory from the 9th to the 11th century A. D. Then again the title *Bhuvanatriṇētra* held by the chiefs of Kalukaḍapura was a well-known Vaidumba name and title. Further, it is not unlikely that the epithet *Audumbabābharaga* of the Kalukaḍa chiefs is a corruption of *Vaidumbabābharaga* which was assumed by the Vaidumba chief Bhūma-Mahārāja of the Pālagiri record,¹ dated Śaka 978 (*i.e.*, A.D. 1058). This chief further claims a lunar origin like Attirāja, the earliest known ancestor of the Kalukaḍapura chiefs, as noticed above. Another significant datum which may be taken to establish that the lords of Kalukaḍapura were either lineally descended from the Vaidumba rulers of Rēnāḍu or were their political successors who appropriated their titles, dominions, *etc.*, is traceable in the very title of 'Lord of Kalukaḍapura' itself. For, Kalukaḍapura is identical with the modern Kalkaḍa in the Vayalpad taluk of the Chittoor District and at this very place were found two inscriptions of the Vaidumbas referable to the 9-10th century A. D. indicating that the region of Kalkaḍa was their principality. One of them belongs to Gaṇḍatriṇētra Vaidumba-Mahārāja² and the other was issued by Bhuvanatriṇētra Iruṅgeya-Mahārāja on the occasion of his coronation.³ The latest date for the Vaidumba chiefs so far known is Śaka 978 (*i.e.*, A. D. 1056) which is furnished by the Pālagiri record of Kaligatriṇētra Bhūma-Mahārāja, son of Maḍḍuka-Mahārāja cited above. It has to be noted, however, that between this date (A. D. 1056) of the last known member of the earlier Vaidumba family and that of Attirāja (c. 1100) the earliest known progenitor of the later stock there is a gap of about 50 years during which the history of these rulers is unknown. Nevertheless, it is certain that the Vaidumbas must have continued to flourish in parts of Rēnāḍu side by side with the Telugu Chōḍas with whom it is well-known that they often came into conflict. It would appear that like the Telugu Chōḍas they came under the suzerainty of the Western Chāḷukyas of Kalyāṇa. This event might have taken place in the time of Chāḷukya king Trailōkyamalla Āhavanalla Sōmēśvara I since we find some of the titles like *Trailōkyamalla* and *Āhavanalla* being adopted by the Kalukaḍapura chiefs thus indicating their subordination to that Chāḷukya emperor.

¹ No. 323 of 1935-36 of the Mad. Ep. Coll. See *Ar. Rep. S. I. E.*, 1935-36, pp. 66-7.

² No. 445 of 1940-41 of the Mad. Ep. Coll.

³ No. 443 of 1940-41 of the Mad. Ep. Coll.

Now, to return to the Māchupalle inscription. Another point of interest attaching to it is that Gaṅgaya-Sāhaṇi, the Kāyastha chief ruling from Vallūru, figures in it as an associate of Sōmidēva-Mahārāja in the gift made, evidently in the capacity of a friend or a joint subordinate under a common suzerain. It was perhaps in the latter capacity that he figures in this inscription. For, Gaṅgaya-Sāhaṇi was a feudatory of the Kākatiyas and he is mentioned as such in several inscriptions of Kākatiya Gaṇapati issued in the same year in which the inscription from Māchupalle was issued (A. D. 1255).¹ He was, besides, employed as a general of the Telugu Chōḍa chief Maṇṇasiddhi II of Nellūru (A. D. 1239-1268) who was the friend and ally of Gaṇapati.² Literary evidence testifies to the fact that Gaṅgaya-Sāhaṇi was deputed by the Telugu Chōḍa ruler to collect tribute from Rakkasa Gaṅga who is stated to have been defeated by Maṇṇasiddhi, but whose territories were given back to him in exemplification of the Chōḍa ruler's character as an *āṣṭaratsala*.³

It has been surmised above that Rakkasa-Gaṅga was the same chief that was also known as Rāyadēva-Mahārāja, the Kalukaḍapura prince who was ruling over the region of Siddhavaṭṭam and its adjacent territory. Gaṅgaya-Sāhaṇi, having been thus deputed, seems to have gone to Siddhavaṭṭam and on the occasion of his visit to the holy place might have made the grant registered in the Māchupalle record under study. Since the verse in the *Nīrvachanōllara-Rāmāyaṇama* cited above, explicitly states that the dominions conquered from Rakkasa-Gaṅga were duly restored to him, Gaṅgaya-Sāhaṇi being sent only to collect tribute, it is self-explanatory that in the Māchupalle record Sōmidēva, the successor of Rakkasa-Gaṅga, should be described as the original donor from whom Gaṅgaya-Sāhaṇi obtained the gift village, for it was Sōmidēva-Mahārāja that was the actual ruler of the area in which the gift-village was situated. In this connection it is significant that except a few early inscriptions of the family, all the other records of the Kalukaḍapura chiefs which quote their *prasasti* are found issued without reference to any overlord. Even the Pushpagiri record of Sōmidēva-Mahārāja of A. D. 1268 is found issued with the full preamble of the family and without any reference to an overlord. The Pushpagiri record further makes it apparent that the two chiefs reigning therein, Murāri-Kēśavadēva-Mahārāja and Sōmidēva-Mahārāja were left to enjoy their possessions in freedom till A. D. 1268 at least. Not long after this date, these princes seem to have offended the Kāyastha chiefs of Vallūru for it is learnt from the records of Aṇbadēva, the Kāyastha chief who assumed rulership sometime about A. D. 1272 and flourished till A. D. 1302, that he defeated Kēśavadēva and Sōmidēva along with Allu-Gaṅga. There can be no doubt that the first two princes were the chiefs of Kalukaḍa whose Pushpagiri inscription has been cited above. This defeat must have taken place sometime before A. D. 1290 as the earliest of Aṇbadēva's inscriptions mentioning this exploit is dated in this year.⁴ We hear no more about the lords of Kalukaḍapura subsequent to this date.

It is not known what brought Vāsudēva Nāyaka of Malumaṇḍalam to Siddhavaṭṭam where he figures as the donor in the present record. His visit may have been just an act of pilgrimage to the holy place Siddhavaṭṭam on the occasion of which he made the pious gift recorded in the inscription. That the object of the gift made by him was in the first instance obtained from Sōmidēva-Mahārāja and in the second from Gaṅgaya Sāhaṇi, must be understood to bear some particular significance, the exact nature of which it is not possible to say. It is not unlikely that he was either some subordinate commander under Gaṅgaya Sāhaṇi, the generalissimo of the Telugu Chōḍas and the Kākatiyas or was just a learned man interested in Śaivism and its spread. This Nāyaka is otherwise unknown to us except from this inscription.

¹ No. 21 of 1930 of the Mad. Ep. Coll. : S. I. I., Vol. X, No. 346.

² Above, Vol. XXVII, p. 191.

³ *Nīrvachanōllara-Rāmāyaṇama*, Canto I, v. 41.

⁴ Above, Vol. XXV, p. 274; S. I. I., Vol. X, No. 405.

Kālaḍi in Malaimanḍalam with which the name of Vāsudēva Nāyaka is associated may be identified with Kālaḍi now in the Travancore-Cochin Union, which was the birth-place of Śaṅkarācārya, the *advaita* philosopher.¹ We cannot be sure if Vāsudēva Nāyaka's association with this place in Malabar which was either his ancestral seat or actual place of residence accounts for the present benefaction made by him to the *ekadaṇḍi-sanyāsins* and some *Brāhmaṇas* who also hailed from Malabar and who were practising religious austerities in the *Malaiyāṇi-maṭha* attached to the temple of Siddhavaṭamuḍaiya-Nāyanār. It is no wonder that there should have existed a religious institution for the practice of *Pāśupata* tenets at Siddhavaṭtam, for, the place, as stated in the record itself, was sanctified as the southern gateway of Śrīśailam,² the great centre of *Pāśupata* Śaivism. Further the ruler Sōmidēva-Mahārāja belonged to a family who were devotees of god Siddhavaṭanātha.³ The benediction at the end of the present record to the effect that *Māhēśvaram* should develop and spread has a special bearing in this context since *Māhēśvaram* signifies some exclusive tenets of the Śaiva faith and practice⁴ allied to or identical with the *Pāśupata* doctrines. Gaṅgaya Sāhaṇi's strong Śaivite persuasion is not only evidenced by this record but also by several more of his at Tripurāntakam, the eastern gateway of Śrīśailam. One of them⁵ dated on the very same date as the Machupalle inscription has a benedictory verse at the end commencing with the words, *Śivam=astu sarva-jagatiḥ(tām) parakūta-nīratā bhavantu bhūta-gaṇāḥ*, etc.

The *ekadaṇḍi-sanyāsins* referred to in the record under study and for whose maintenance Vāsudēva Nāyaka made provision, were evidently a class of mendicant monks residing in the *Malaiyāṇi-maṭha* at the village. They were following the Śaiva tenets as indicated by the benediction at the end of the record, the significance of which has been pointed out above. Reference to *ekadaṇḍins* and to similar orders of monkhood like the *tridaṇḍins* and *ekākīs* are found in inscriptions all over South India. It is noticed that these classes lived in the precincts of both Śiva and Viṣṇu temples.⁶

¹ *An. Rep. on S. I. E.*, 1940-1943, part II, p. 256.

² Tripurāntakam (Markapur taluk, Guntur District). Kālēśvaram (Nizam's Dominions) and Alampuram were similarly sanctified as the eastern, the northern and the western gateways of Śrīśailam.

³ It may be recalled that another Kalukadapura chief, Āhavamalla, consecrated the temple of Mūlasthāna-Pāpavināśadēva in honour of his *Pāśupata guru*, Tapōdhana Jiyar at Tangatūru noticed above.

⁴ R. G. Bhandarkar: *Vaiṣṇavism, Śaivism and minor religious systems* (1913), pp. 119 ff.

⁵ *S. I. I.*, Vol. X, No. 346.

⁶ In the temple of Bhaktavatsala-Perumāl at Shermādēvi, Tirunelveli District, there flourished an institution called the *Vēda-Vyāsa-maṭha* in which lived the holy order of *ekadanda-bhāṭaras* who recited and expounded the *Sāstras* (No. 544 of 1911 of the Mad. Ep. Coll.). An inscription in the Vēdanātāyaṇa-Perumāl temple at Murappunādu alias Pōsala-Vira-Sōmidēva-chaturvēdimangalam in the same district records a donation made by the assembly of the village to the deity Narasiṅha Paramasvāmin worshipped in the *maṭha* of *ekadanda-paramahansa* (No. 435 of 1906 of the Mad. Ep. Coll.). In the *Mudivaṭṭangam-Perumāl-maṭha* attached to the temple of Appan (god Nārāyaṇa) at Shermādēvi, Tirunelveli District, a number of *tridaṇḍi-sanyāsins* and *parakūta-Sūtaishnavas* are stated to have lived (Nos. 667 and 675 of 1916 of the Mad. Ep. Coll.). The same order of *sanyāsins* and some *ekākī-Srīvaishnavas* were maintained in the *Tirunāludaiyān-maṭha* attached to the famous Viṣṇu temple at Alagarkoil near Madura (No. 277 of 1930 of the Mad. Ep. Coll.). In the precincts of the Kōḍāśvara temple at Belagāmi, Mysore State, there flourished the *Kōḍiyā-maṭha* which afforded shelter to various orders of ascetics like *kṣhapavaka*, *ekadandī*, *tridandī*, *hansa*, *paramahansa* and other mendicants arriving from different countries (*Ep. Carn.*, Vol. VII, Shikarpur 102). Madhavarasa, a general of Chālukya Sōmēśvara is stated to have erected an *anushthāna-bhavana* (home of religious practice) at Nāgavāṇi (Nagai, Nizam's Dominions) for the *ekadandī*, *tridandī*, *śūṭaka*, *hansa*, *paramahansa*, and other spiritual aspirants (*Mys. Arch. Rep.*, 1915, p. 47; *Hyd. Arch. Ser.* No. 8, pp. 24, 30, 35).

In the *Annual Report on Epigraphy* for 1912, para. 38, it has been suggested that *ekadandīs* as distinguished from *tridandīs* were evidently followers of a school of Vaiṣṇava *sannyāsins* who carried in their hands a single bamboo rod as an emblem of the order to which they belonged. The *tridandīs*, on the other hand, carried three such rods tied together into one and belonged to the *Advaita* school of Śaṅkara. The difference, however, seems to be based on the conception and practice of *sannyāsa* and on the level of asceticism attained by each order along the path of renunciation of the self and the realisation of *ātman*. Some Sanskrit texts which mention these orders seem to emphasise only this aspect. For example we have in the *Manusmṛiti* the verses:

Vāg-daṇḍō-ṭha manō-daṇḍaḥ kāya-daṇḍas-tathāiva cha |

Yasy-aītē nihitā buddhau tridaṇḍ-iti sa uchyatē |

Tridaṇḍam-ētan-ukshipya sarva-bhūteṣu mānavah |

Kūma-krōdhān su-samyamya tataḥ siddhim nigacchhati | (Canto XII, vv 10 and 11).

The *Nārada-parivrajaka-upaniṣad* (*Pañchamāpadiśāh*, v. 2 *Uśāyashītāra-śatīpāra-śodh*, Nanyasagar ed. 1932, p. 263) says that a man who has *jñāna* as his staff is said to be *ekadandī* (*jñāna dandō dhrīṭō nān ekadandī sa uchyatē*). Monier Williams defines *ekadandī* as the name of a class of monks and of a *Vēdānta* school. He refers to a work called *ekadandi-sanyāsa-vidhi* which I am unable to trace. Apte says that *ekadandīs* are divided into four orders, viz., *kūṭichaka*, *bahūdaka*, *hansa* and *paramahansa*, the one following being of higher status (*uttamā*) than the preceding one. Both the *Nārada-parivrajaka-upaniṣad* (p. 272) and the *Sanyāsōpaniṣad* (*Adhyāya* 2, p. 413) while speaking of *sanyāsa* say that they are of six orders, viz., *kūṭichaka*, *bahūdaka*, *hansa*, *paramahansa*, *triyūtita* and *acchātā*, the one following being a higher class of *sanyāsa*-hood than the preceding one. The characteristics, i.e., dress, mode of conduct and living, etc., of each order are then detailed.

I am not in a position to affirm whether a *tridaṇḍī* or an *ekadaṇḍī* was of a superior order of *saṃgāsas*. That actually a bamboo rod was carried, whether of one stick or of three tied together, is more than clear from the statements in the *Saṃgāsa-apariśad*¹ to the effect that a bamboo rod (*trimaṇḍam daṇḍam*), free from notches and insects, straight and strong and obtained from a holy place should be carried and that none should go even a small distance without a *daṇḍa*.

Māsaṛuppaḷli, the gift-village, is represented by the present village of Māchupalle, Siddhavattam *tāluk*, Cuddapah District, situated five miles west of Siddhavattam, the findspot of the inscription here published. From the etymology of the name we learn that it has much philosophical meaning as it is composed of the words *māśa* + *upa* + *paḷli*, that is to say, a village (*paḷli*) where *dōsha* or sin (*māśa*) is removed (*upa*). True to its import the place had a religious establishment for the practice of austerities by which sins could be washed away. It is not certain whether by the suffix *paḷli* we have to understand that the place was or had formerly been a Jaina or Buddhist centre for the term *paḷli* is usually associated with Jaina or Buddhist settlements.

Muttavaṇḍu, in which Vallūru is stated to have been situated, is apparently the engraver's mistake for Muḷki-vaṇḍu corresponding roughly to a portion of the Cuddapah District. Vallūru which retains its name to the present day is situated in Kamalapuram taluk of this District.

No. 22—DIVE AGAR MARATHI COPPER CHARTER ; SAKA 982.

(1 Plate)

MORESHWAR G. DIKSHIT, POONA

This single sheet of a copper plate was obtained by me in the village **Divē Agar**, in the Janjira area of the Bombay State, through the courtesy of Shri. S. N. Joshi-Patwardhan, a resident of the village, in May 1949. It is reported to have been found by a farmer while digging for earth in his *wāḍi*. The plate measures about 6½ inches broad and 3¼ inches high, and has a small hole in the middle of the margin on its proper left, through which a copper ring is passed. The ring is quite plain and does not bear traces of a seal. It is possible that a blank sheet of copper, now missing, was strung on this ring which held them both together, though the inscription on the extant plate is complete in itself.

The inscription consists of 9 lines of writing in characters of the Nāgari **alphabet**, current in the 11th century. Influence of the southern alphabet may be traced in the forms of a few letters, e.g., *n* in l. 3. We may also note the southern forms of the numerals 9 and 7 in lines 1 and 6.

The **language** of the inscription is early Marāṭhi. As regards orthography there are several points which attract our attention. Though *sa* and *śa* are generally very well distinguished throughout the record, the occasional use of *sa* for *śa* is to be noted as in मर्वरी in line 1 and सामने in line 3. The *prishṭha-mātrā* is used to denote medial *ai* in several places ; but not so in medial *ē*, except in line 9 where it is used thrice. The abbreviations are indicated by a small circle and a

visarga in line 6 where मु० गाः stands for सुवर्ण गद्याणकाः; and it is interesting to see that the word preceding the *visarga* is lengthened as गा. In line 6 सुर्वः appears to be the abbreviated form of सुवर्ण. The doubling of consonants is seen in the words सर्व्वरी (line 1), मार्गमिर (line 2), and सुवर्णः (lines 5 and 9).

From the linguistic point of view the following peculiarities may be noticed. There is a distinct tendency towards *nasalisation* in certain words as in स्थितिपुरिचीं in line 2, सासनं in line 3, ठवियलीं in line 5 and ठवियलं in line 6. The *anusvāra* is used to denote the plural in the case of सामनं in line 3; but in the words प्रमुखं स्थानं it indicates the subject in the instrumental case. The use of redundant *visarga* is noted twice, पासेः in line 5 and दावोदरः in line 6. Certain nouns have *u* endings as in संवतु in line 1, योगक्षेमु in line 7 and देवतु in line 9. These and other peculiarities characterise this early record in the Marāṭhi language.

The date of the inscription is given as Śaka Samvat 982, Śārvarī, Paurṇamāsī of Mārgaśīrsha, Friday. This date¹ regularly corresponds to Friday, 10th November, A. D. 1060.

A short one-line inscription² carved at the base of the colossal statue of Gōmaṭēśvara at Śra-vaṇa Belgola, in the Mysore State, is supposed to be the earliest record in the Marāṭhi language discovered so far. Though not precisely dated, this inscription is attributed to about A. D. 983 from the mention of Chāvundarāya, a minister of the Gaṅga king Rāchamalla, found in this inscription. Comparatively very few records in Marāṭhi have been handed down to us till about the Śilāhāra-Yādava period, whose language is a mixture of Sanskrit and early Marāṭhi. After about A. D. 1200 inscriptions in Marāṭhi become a regular feature in Mahārāshṭra, but great difficulty is experienced in deciphering them because of the bad preservation of the stone on which they are generally found incised. Only a few amongst these have been critically edited,³ though their readings are not free from doubt. For want of accurate data the development of the Marāṭhi language through its successive stages therefore still remains a desideratum and our knowledge of early Marāṭhi records before the 12th century does not extend beyond about six or seven inscriptions published so far. In view of this the present charter in Marāṭhi which is fairly lengthy and sufficiently well preserved will be found to be much useful.

The inscription records a private deed. It states that on the aforementioned day, two *śāsanas* (charters) regarding (the village) Sthitipurī were kept with one Māvala-bhaṭṭa by the village assembly (*sthāna*)⁴ headed by Vāsudēva-bhaṭṭa, Vāyē Shadaṅgavi, Risiyappa Ghaisāza and Sīdhū Shadaṅgavi. Further, one hundred and twenty seven *suvarṇas* (=Gadyāṇaka coins) were kept with Dāvōdara; (which was the expense) for the maintenance (*(yōga-kshēmu)* of the assembly. This (deed) was known to Risiya-pai, Paurṇva-dēva Shadaṅgavi, Tikai Shadaṅgavi, Jivāṇai, Nāgaruḍra-bhaṭṭa, Madhuvai Shadaṅgavi and Madhuvaya Dēvalu, of Dīvē. The inscription ends with a sentence stating that whatever *suvarṇa* (i.e., the amount in gold) was specified, it was along with a *kāṇṭha*. The exact meaning of the last word cannot be construed satisfactorily.

Though the inscription does not furnish any information of historical interest, it throws valuable light on the administration of the local village assemblies; and how certain important transactions were recorded in the period. It will be seen from it that two important charters

¹ Pillai, *Indian Ephemeris*, Vol. III, p. 123.

² *Ep. Carn.*, Vol. II, No. 179; above, Vol. VII, p. 109.

³ The Marāṭhi text of these inscriptions consists of a few words or sentences in that language; the major portion is mainly Sanskrit.

⁴ [See below, p. 123, n. 5.—Ed.]

belonging to a village were kept with a private person with the consent of the assembly and that the sum for the maintenance of the assembly was handed over to another person apparently in trust, the names of several witnesses to this deed also being cited.¹ The Brāhmaṇas mentioned in the inscription seem to be very learned persons as several of them have the appellation *Shaṭaṅgavi*, a corrupt form of Sanskrit *Ṣaṭaṅgavid*, meaning well versed in the six *Āṅgas* of the *Vēda*. The Marāṭhi forms of these names are also interesting. Thus the name Divō-larī would correspond to Sanskrit Dāmōdara ; Rīsiyappa to Rīshiappa ; Sīdhū to Siddha ; Pavhavadēva with Padma-dēva. The record mentions two surnames, Ghaisāsa and Dēvalu, which again are interesting. Early use of the word Ghaisāsa in the form Gahiyasāhasa is met with in the Rvhanpur Plates² of Rāshtrakūṭa Gōvinda, dated Śaka 730, where the *gōtra* of the Brāhmaṇa is stated to be Bhārad-vāja. In the Sañjan copper plates³ of Rāshtrakūṭa Amōghavarsha, Śaka 793, the variant Gahiya-sahāsa (or-sāhāsa) is found and the Brāhmaṇas belong to the Vaḷḍamukha and Vatsī *gōtras*. The word occurs in several inscriptions subsequent to this period, *e.g.*, in the Chikka-Bāgewāḍi Plates⁴ of Yādava Kṛishṇa, dated Śaka 1171, there are several Brāhmaṇas with the appellation Ghaisāsa whose *gōtras* are variously described as Ātrēya, Kāśyapa, Kaunḍinya, Kauśika, Gōtama, Jāmadagnya-Vatsa, Bhāradvāja, Mūka, Rathitara, Vaiśiṣṭha, Viśvāmitra, Śāṇḍilya, Śaunaka and Śrīvatsa. From these various *gōtras* there is reason to believe that the term Ghaisāsa denotes only a position or rank and is not restricted to any particular section of Brāhmaṇas. In the present day however the surname is found among the Dēśastha, Chitpāvana and Karhādā Brāhmaṇas of Mahārāshṭra. Regarding the appellation Dēvalu, it corresponds to the modern surname Dēvala, found among the Chitpāvana Brāhmaṇas. It is perhaps a corrupt form of the Sanskrit word Dēvalaka meaning the worshipper in a shrine or a temple.

The word *sthāna* in the sense of a village assembly is met with in several inscriptions⁵ and does not need any comment.

There are only two **geographical places** mentioned in the record, *viz.*, Sthitipuri (line 2) and Divē (line 7). Of these the first cannot be identified precisely for want of specific details, but it may probably refer to a small village called Sthita, about three miles to the north of Divē Āgar, where the plates were found. Divē is obviously modern Divē Āgar, whose name has been Sanskritised into Dipaka-grāma in a 13th century record⁶ found in the same village.

I am thankful to Shri P. B. Desai, M.A., of the Government Epigraphist's Office, Ootacamund, for his kind help rendered in recasting this article and making it suitable for publication in this journal.

¹ [See below, n. 5.—Ed.]

² Above, Vol. VI, p. 245.

³ Above, Vol. XVIII, p. 256.

⁴ *Ind. Ant.*, Vol. VII, pp. 305-06. The Bendigeri plates of the same ruler, Śaka 1171, also contain the names of several Brāhmaṇas with the appellation Ghaisāsa ; *Ind. Ant.*, Vol. XIV, pp. 70-72. Ghaisa, Ghalisa and Ghalisāsa are other variants of the expression occurring in these inscriptions.

⁵ [Mr. P. B. Desai, M.A., of my office observes as follows : The term *sthāna* is never met with in the inscriptions in the sense of a village assembly. *Sthāna*, in general, connotes a post or an office and its earliest use may be traced in the *Arthaśāstra* of Kauṭilya. In such designations as the *Sthānika*, *Sthānapati*, *Sthānāchārya*, etc., commonly occurring in inscriptions, *sthāna* means, 'holy place, religious establishment', etc. Secondly *sthāna* also seems to have acquired the sense of 'trusteeship'. In the present inscription (lines 4 and 7) it appears to have been used to denote 'trustees'. For a detailed discussion on the topic see, B. A. Salletore, 'The Sthānikas and their Historical Importance' ; *Journal of Bomb. University*, Vol. VII, Part I, pp. 1-65.—Ed.]

 ममेतः ॥

¹ From the original plate.

² Expressed by a symbol.

³ Read शार्व्वरी.

⁴ Read शामने.

⁵ If भट्टवाये is read together, it would stand for Sanskrit भट्टपाद in which case वामुदेव भट्टवाय would be the name of one person, and not two, as indicated in the introduction.

⁶ A short vertical stroke is visible below प which may stand for प्प.

⁷ The " ending is common for proper names in Mahārāṣṭra even now, e.g., राम is often changed to रामु.

⁸ The *varṇa* is unnecessary.

⁹ Read दामोदरापामि.

¹⁰ Abbreviation of सुवर्णगद्याणकाः. It would have been difficult to recognise this if the same numerical figure were not expressed in words in the previous line.

¹¹ For स्थानाचा.

¹² This may be ऋपियप्प or ऋपि पै. Pai is a well known surname among the Śārasvata Brāhmaṇas. For other instances of the use of this appellation, see Bhandup plates of Śilāhāra Chhittarāja, above, Vol. XII, p. 263, Berlin Museum plates of Chhittarāja, Z. D. M. G., 90, p. 265 and other Śilāhāra inscriptions.

¹³ Sanskrit पद्मदेव ; पद्मदेव—पउमदेव—पौवदेव—पौवदेव.

¹⁴ I am unable to explain the word कांठेअः. Its connection with सुवर्ण is certain. Taking the *mātrā* of कां as the *prishṭha-mātrā* for the following *akṣara* ठे and restoring the word as कंठैअः, it is possible to suggest that the gold coins were perhaps strung in a necklace or कंठा. But it is clear from the context that the coins were intended for use and not for ornamental purpose. Another suggestion would be that कांठ was a kind of vessel in which the coins were kept. I am however not certain about either of these interpretations.

No. 23—PESHAWAR POTSHERDS WITH KHAROSHTHI WRITINGS

(1 Plate)

B. CH. CHHABRA, OOTACAMUND

In September 1945, Mr. Md. Waliullah Khan, at that time one of the Sub-Overseers attached to the then office of the Superintendent, Archaeological Survey of India, Frontier Circle, Lahore,¹ under the direction of this latter officer, sent me twentyfour potsherds from Peshawar. They bear the Register Numbers 1249/1 to 1249/17, 1249/19 to 1249/24, and 1249/26. Their exact findspot is not known, but most probably they were found in the vicinity of Peshawar itself.

These potsherds are of various dimensions. No. I is the smallest of the lot, its extreme length being $1\frac{5}{8}$ ", extreme breadth $1\frac{1}{8}$ ", and thickness $\frac{1}{8}$ ". No. XXIII is the biggest, its extreme length being $7\frac{1}{2}$ ", extreme breadth 4", and thickness varying from $\frac{1}{2}$ " to $\frac{3}{16}$ ". They vary in texture also. Besides, no two pieces can be dovetailed. Judging from their curvatures, all except two are fragments of biggish pots or pitchers. The two exceptions are Nos. XVIII and XXIV. Both of them exhibit a superior finish. The former is evidently a fragment of a thin platter, painted red both inside and outside. The latter is likewise a piece of a deep cup or beaker.

No. XXIV is exceptional in another respect, too. The writing on it, consisting of five clear letters, is 'incised', whereas on all the other pieces it is 'painted'. The 'incision' was done obviously with a stylus or some other sharp instrument while the object was still wet after it had been turned out from the potter's wheel, whereas the 'painting' was done on the baked and finished products.

As is to be expected, the inscription on No. XXIV is very distinct, while the painted writings have very much faded. The faint traces of the latter could be deciphered with great difficulty. In order to make out the contour of individual letters, I had to moisten repeatedly the 'painted' surface of each piece with a wet sponge. The same method was followed by the draftsman, Mr. S. N. A. Subrahmanya Mudaliar, the Photographer of my office, who is responsible for the drawings reproduced here. It may be seen from the accompanying photographic reproductions of some of the pieces that the traces of the painted writings are, except in a few cases, mostly indiscernible.

Their fragmentary nature does not allow us to draw any far-reaching conclusions. It is, however, clear from some of them, especially from Nos. IX, X, XII, XX, and XXIII, that the pots containing these inscriptions belonged to a Buddhist establishment. The name *Budhamitra*, occurring on No. XXIV, is also quite consistent with that. The name actually must be *Buddhamitra*, the form *budha* being due to Prakrit influence.

Below I offer my readings of these fragmentary inscriptions and comments on them.

I

This sherd contains faint traces of two almost complete letters that can be read as :

sa dha

There is just a very small remnant of another letter after the second letter, but it is too small to be recognized as a part of a particular letter. The first letter seems to have a slanting stroke over its right side, but it is comparatively thin and may not be a part of the writing.

The reading *sa dha* recalls to mind the name of an individual *Sadhala*, that occurs in one of the minor Kharoshthi inscriptions from Taxila (see *C. I. I.*, II, 100, Inscribed gold ring, pl. XX-1).

¹ Mr. Md. Waliullah Khan is now the Superintendent, Archaeological Survey, Western Pakistan Circle, Lahore.

II

This piece has three letters the first of which is slightly destroyed at the top. They read :

a da na

The form of *na* shows a later development. It may be referred to the Kushāṇa period, *i.e.*, about 2nd century A. D.

No sense can be made of the extant portion of the record. The last two letters, however, suggest that they are the first two letters of the word *danamukhe* 'gift' which so frequently occur in donative Kharōshthī inscriptions. One of the three earthen jars with similar painted inscriptions discovered at Pālātū Dheri mound, now in the Peshawar Museum, has this expression (see *C. I. I.*, II, 121, Pl. XXIII-1*a*). On the analogy of this we may surmise that the present sherd is a piece of a pot which was a religious gift by an individual whose name is lost.

III

But for a small irregular spot of black paint about the centre showing that this piece also had some writing on it, it has now no writing left on it. The whole writing seems to have been washed clean.

IV

This piece contains remnants of three letters. The upper portion of the first letter is gone, but what remains of it suggests that it might have been a *sa* with its loop filled up. The second letter is mostly blurred. It may be a *da* or a *dha*, but in either case the form would be unusual. The third letter is almost entirely gone.

V

This potsherd has the upper portion of one letter, which is to be read as :

khe

It is very faint, but can be read when moisture is applied to the piece. There is a small trace of another letter below the left limb of *khe*, but it cannot be recognized. The reading *khe* is suggestive of *danamukhe* 'gift'. And possibly the pot was a gift by an individual. This may be compared with No. 2 above.

VI

This piece contains very small upper portion of six letters, none of which can be read with any certainty. The loop of the second suggests it to be an *a*. The last one is most probably an *a*, too. Almost completely gone.

VII

This potsherd has five letters. Bottoms of the first three have been destroyed. The fourth is complete and the fifth is only partly preserved. They read :

a ra ga ta[cha]

The third letter shows a stroke on the top to its right, but a careful examination showed that it is not joined with the letter *ga* and is not meant to be a part of this syllable. Again, applying moisture shows the inscription more distinctly.

No interpretation of the extant portion of the record can be suggested at this stage. Compare, however, No. XII below.

PESHAWAR POTSHERDS WITH KHAROSHTHI WRITINGS.

XIII

XXIV

XI and XII

(From Photographs)

VIII

This piece contains only two letters, both clear enough. They read :

pha u

The letter *pha* is distinct, only its arm on the left is a little longer than usual. The two letters may be a name of a person, derived from *Phalgu* (\rightarrow *Phagu* \rightarrow *Phaü*).

IX

This sherd has three letters. They read :

sa ghe cha

The second letter looks more like *ge*, but it is taken for granted that it had a hook attached to its right to the lower end of the vertical which is now mostly effaced.

The preserved portion is almost identical with the beginning of another potsherd inscription (No. 444 of the Peshawar Museum, *C. I. I.*, II, 63, Pl. XII-3 ; cf. also *ibid.* 121, Pl. XXIII-1a) which is likewise fragmentary but which has at least seven letters preserved, reading :

saṃghe chatudīse Ka

In the light of this, the present inscription may also be translated as :

‘in the Saṃgha (of the four quarters)’.

X

This piece contains six complete letters and a very small remnant, in the beginning, of another.¹ They are very faint, but can be read by applying moisture to the surface. The last two are decidedly *gra ha*. The preceding one looks like *ro* but it is possibly *ri*, the upper end of the medial *i* stroke having been effaced. And what precedes it is *pa*. Thus this is a complete word *parigraha*. The first two letters are *ṇa na*, evidently the plural genitive of a word ending in *ṇa*, such as *gaṇa*. The reading is thus :

... *ṇa na parig(r)aha* ‘is the acceptance of...’.

This may be compared with the final expression of the Wardak vase inscription of the year 51 (*C.I.I.*, II, 170, Pl. XXXIII) : *Mahasaṃghigāṇa parigraha*..

The present inscription may also be taken to end with the word *parigraha* itself, though what preceded cannot be restored now.

XI

This potsherd has six signs. The first is only partially preserved. It cannot be read with certainty, but judging from the extant remnant, it might have been *kha*. The second letter is comparatively very small and faint. It looks like a *dha*. The third is decidedly a *saṃ*, though a portion of the subscript *m* is gone. The fourth syllable, though perfect, is rather unusual. Its upper part is that of *g* and the subscript is either a *y* or a *m*, or possibly the whole combination is meant to denote some other sound. The fifth letter is *mi*, with the stroke of the medial *i* abnormally long and its lower end bending towards the left—rather uncommon features. The last letter is obviously a *cha*, though its lower half is gone. The whole may thus read :

[*kha* ?] *dha*(?) *saṃ gya* (or *gam*) *mi cha*

It is not possible to make out any sense of this, though presumably we have a reference here to a *saṃgha* ‘Buddhist congregation’. Or is it perhaps a personal name *Saṃghamicha* (Saṃghamitra) ?

¹ Owing to the faint nature of the writing, the draftsman has missed several strokes with the result that his drawing has not come out perfect.

XII

This fragment contains eight signs, the last two of which are only partly preserved and the first has its lower portion broken off. They read :

n[e] arogadaksh[i][nae]

Since the extant portion contains a well known formula, that frequently occurs in certain dedicatory Kharōshṭhī inscriptions, the missing portions of the letters can easily be supplied. Thus the first letter must have been a *no*, showing a word in the genitive singular. The sign of the medial *i* in *kshi* has evidently been rubbed off and what follows must be read as *nae* to complete the expression. It means 'for the bestowal of health upon'. Compare *C.I.I.*, II, 77, text lines 3 and 5.

XIII

This potsherd has five complete letters and the vertical stroke of another at the end, which is not recognizable. They read :

di pa ma na a [ra ?]

It is not possible to explain this inscription at present.

XIV

This piece has two complete letters, and traces of two letters one in the beginning and one at the end. They can be read :

[da] kshi na [e]

Most probably here again we had the same formula as occurs in No. XII above, namely *aroga dukshinae*.

XV

This piece contains faint traces of three letters the first and the last of which are partly destroyed. They seem to read :

[da] sa [āra]

No sense can be made out.

XVI

The inscription on this piece is also too fragmentary to yield any sense. It has traces of five letters, only the middle three have greater portions preserved and can be read as :

....*na a sa*....

XVII

The inscription of this potsherd is completely gone ; only a part of the stroke of some letters is now visible to show that the piece contained some writing.

XVIII

This sherd has very faint traces of some letters, two of which can be read as :

sa la

These are preceded by remnants of another letter now no longer legible. What follows these two letters is almost completely obliterated.

XIX

This has three letters, the first of which is mostly destroyed but may have been an *a*. The inscription reads :

[a]ma di

The arms of *ma* are abnormally long.

XX

This piece has the beginning of an epigraph—the blank space on the right shows that no writing has been lost in the beginning. The extant portion has four almost complete letters and remnants of a fifth. They read :

Samghe sado...

The *e*-stroke in *ghe* is ornamentally treated. The next letter is partly effaced, but it is most probably a *sa*. The first word means ' in the *saṃgha* or congregation ', while it is difficult to say what follows it.

XXI

This fragment has remnants of about six letters only three of which (first, second and fifth) can be read with some confidence.

shye cha....śe....

No sense can be made out.

XXII

The inscription on this piece is almost completely obliterated. Two of the letters towards the end can be read as :

na sa

This piece has a sign consisting of three triangles embossed near the neck of the pot, which may be an Armenian character.

XXIII

This piece has also the so-called Armenian character near the neck of the pot.

The Kharōshthī painted inscription is mostly damaged, but it ends in :

danamu[khe]

Only the upper part of the last syllable is preserved. While the form of *mu* is peculiar, it is met with in certain known Kharōshthī inscriptions. The word *danamukhe* means ' the gift '.

XXIV

While the inscriptions on the other fragments are all painted, the one on this piece is engraved. It has the concluding part of an inscription ; or perhaps the extant part is the complete inscription itself. The space left blank after the last letter shows that in any case nothing has been lost at the end. It clearly reads :

Budhamitrasa

It can be translated as ' [This cup is] of Budhamitra '.

No. 24—SANGSI MEMORIAL INSCRIPTION

(1 Plate)

P. B. DESAI, OOTACAMUND

Sāngsi is a village about five miles from Gagan Bāvdā in the Kolhapur District of the Bombay State. It is not known when, but it must be several decades ago, at least, that a slab of stone

bearing sculptures in relief and an inscription, was unearthed in a field near the village. As the sculptures depict the funeral scene of a woman, it was readily believed that it constituted a *satī* memorial. Later on, the slab appears to have been removed to the spot where it now stands, about two miles east from Gagan Bāvdā and 35 miles west from Kolhāpur, and a crude temple constructed over it. A tradition grew around in course of time attributing it to the memory of a woman who committed *satī* long ago.

At the instance of Mr. N. G. Pandit Rao, the then Public Relations Officer of the Kolhapur State, Dr. H. D. Sankalia and Dr. M. G. Dikshit, both of the Deccan College Research Institute, Poona, visited the site in 1946 and copied the inscription. These two scholars, who will hereafter be referred to as SD for the sake of brevity, have published a note on the preliminary findings of their discovery in the *Modern Review*, Calcutta, March 1947 (pp. 213-15), and a fuller study of the inscription, as also of the sculptures, in the *Bulletin of the Deccan College Research Institute*, December 1948.¹ Subsequently Mr. N. Lakshminarayan Rao, Officiating Government Epigraphist for India, visited Sāngsi in December 1949, and took a photograph of the tablet and estampages of the inscription.²

On account of the erroneous notion created by the local tradition apparently supported by the sculptural representation and owing to imperfections in the decipherment of the epigraph, SD were led to believe that the stele commemorated the performance of the rite of *satī* by a lady after the demise of her husband, and consequently their observations are vitiated by this prepossession. But the facts, as we shall presently see, are different.³ In view of these considerations and the importance of the inscription for securing glimpses of the political and social conditions of the locality in ancient times, it was thought necessary to edit it in the pages of this journal. So I am editing it here with the kind permission of Dr. B. Ch. Chhabra, Government Epigraphist for India, who generously furnished me with the necessary facilities.⁴

The slab measures approximately 6 feet in height and 4 feet in breadth. It is broader and angular at the base and somewhat curved towards the top. As a result of the serious damage, the sculptures and the inscription have been obliterated in several parts. In the lower portion and about the middle of the stone is the portrait of a lady, in relief, lying down at full length on a funeral pyre surrounded by flames and some attendants. Immediately above this group and across the slab runs the inscription. Higher up in the top portion are a few more carvings.

The inscription consists of two lines. The **characters** belong to the southern class of alphabet and evince 'box-head' features, the 'boxes' being solid. Close resemblance may be traced between them and those of the Tālagunda pillar inscription⁵ of Kākusthavarmān of the early Kadamba family. Two letters, however, have certain peculiarities deserving notice here. The *t* of the Tālagunda inscription is made up by a curve joined to the vertical stroke and the two arms of the curve can be distinguished, the left one being more pronounced. But in the present record the upright stroke stretches right up to the bottom and the angular curve stands affixed all towards the left. Similar is the case with *n*. Whereas the *n* of the former epigraph is constituted of a looped curve emerging from the bottom of a straight line, that of the latter has its curve with more developed loop attached exclusively to the lower left side of the vertical stroke. The final *t* occur-

¹Pages 161-166, with a good photograph of the entire stele and separate facsimile of the inscription.

²The inscription is numbered 269 of the A.R.E. for the year 1949-50.

³The record expressly states that the memorial was erected by a king in honour of his deceased wife. This correct position was noticed for the first time by Dr. B. Ch. Chhabra and Mr. N. Lakshminarayan Rao; *Archaeology in India* (1950), p. 191. Mr. S. K. Dikshit has also pointed it out independently; *Ann. Bh. Or. Res. Inst.*, Vol. XXIX, pp. 291-92. After this article was prepared it was found that the late Dr. Fleet had noticed this inscription before; *Bom. Gaz.*, Vol. I. part ii, p. 286, n. 1.

⁴I am also indebted to Mr. N. Lakshminarayan Rao for his kind suggestions in the study.

⁵Above, Vol. VIII, pp. 24 ff. and Plate.

ring once in line 1 is represented by the lower part of the letter without the top knot, engraved in miniature size in the lower space.

In regard to **orthography** the following peculiarities, though not unusual in the present record, may be noted. The consonant following *r* is doubled, *e.g.*, in °*tēr=yyā* and *bhāryyā*, line 1. In -*ārṭṭham*, line 2, the reduplicated aspirate has been changed to its corresponding surd, as required by the grammatical rules. The *anusvāra*, even at the end of a word, has occasionally been involved into *sandhi* and changed to the class nasal of the following letter of the next word : *e.g.*, in *punyā-nām=pari-*, *ajaran=tasy-* and *svayan=nṛi-*, line 2. The entity of *anusvāra* has been retained in the following instances ; *divaṁ prityā* and -*sthāpitam chaitya-*, line 2.

The **language** is Sanskrit and the whole record comprises one single verse in the *Śārdūlavikrīḍita* metre. The first two *pādas* of the verse are accommodated in the first line and the next two in the second. Some space indicating the end of a *pāda* is left after the first and the third *pādas* which end in the middle of the line. The **poetry** is of the ornate classical order with a melodious ring about it.

The inscription commences with an auspicious spiral-like symbol which seems to stand for *Om*. Next comes, what I am inclined to assume it to be, the name proper of the king : because the latter part of the expression is clearly *lāñchhana* which means 'a name' also. This name is constituted of four *aksharas* beginning with *Pu*. As suggested in a foot-note later, the name can be restored as Pushpāyudha. But since it is not advisable to venture a surmise, I would prefer to refer to the king hereafter by the initial letter *Pu*... only. Next we are introduced to the king's wife by name Hālidēvi.¹ The second *pāda* whose latter part is lost, seems to state that the lady had captured the heart of her husband by her virtuous conduct. The third *pāda* refers to her death when she was still young. Here the poet, indulging in a fancy, describes that she went to heaven to guard, as it were, the treasure of her accumulated merits.² The last *pāda* informs that the memorial tablet of stone was set up with due ceremony³ by the king himself out of affection for her.

The epigraph is not dated and so in order to ascertain its probable date we have to fall back on the evidence of palaeography which is our only guide in the present instance. As observed above, the characters of this record show a remarkable similarity with those of the Tālagunda pillar inscription. From the reference to Śāntivarman, son of Kākusthavarman in the latter record, it has to be assumed that it was drafted and engraved during the former's reign. Now Śāntivarman's reign has been assigned to the middle of the 5th century A. D.⁴ Hence we might place our epigraph about A.D. 500.

Thus it becomes clear that the inscription under study constitutes an epitaph perpetuating the name of a distinguished lady who pre-deceased her royal husband and the installation of the memorial in her honour by the latter ; and no grounds whatsoever exist for the assumption that the stele comprises a *satī* memorial. This fact, though true, is rather unique. We are familiar in the areas of the Deccan and Karnāṭak with such sculptured memorials as speak of heroes who laid their lives for a sacred cause and of men and women who courted death after the demise of

¹ This name is peculiar and rarely met with. It reminds us of another similar name Hāla, of a Sātavāhana king. I am not sure if this can be connected with Sanskrit *hala* meaning 'a plough'.

² In order to guard the treasure it is necessary that one should be strong and young in spirits. It is therefore in the fitness of things that the lady repaired to heaven in her youth.

³ The expression *saṁ-sthāpitam* in the text literally means 'was installed in the proper manner'. This phrase is significant and I am inclined to believe that the memorial tablet must have been originally installed and preserved in a well-constructed shrine by the king himself. The shrine might have fallen to ruin in course of time, thus exposing the stele which came to be buried under the earth wherefrom it was rescued.

⁴ George M. Moraes, *Kadamba Kula*, p. 72 ; N. Lakshminarayan Rao and R. S. Panchamukhi, *Karnāṭakada Arasumanetanagalu*, p. 15 ; *A New History of Indian People*, p. 238, etc.

their masters and lords or under a religious vow. These generally date from the period of the 7-8th century onwards. But here is a singular instance, perhaps the first and the only one of its kind, known so far, that stands out as a welcome departure from the usual convention. Further, its early age lends importance to its unique nature.

After reviewing the contents of the epigraph, we may revert for a while to the **sculptures** on stone which are inseparably associated with it. The art of moulding images in plastic material was known to the civilization of the Indus Valley¹ and the history of Indian sculpture may be traced from that early age. The early creations seem to have been religious in origin and design and they generally formed part of a monument in stone or were scooped out in rocks of hills. Portrait sculpture as a secular art does not seem to have been cultivated independently by Indian artists and the few available instances of portraits² depicting royal devotees or distinguished personalities, associated with religious constructions, may be taken to prove the truth of the above statement. Under these circumstances, the present piece of sculpture on a detached slab deserves a noteworthy place in the account of Indian sculpture, particularly that of the Deccan region.

The **funeral scene** is well laid amidst consuming fire and a few devout followers of the lady. In their refined execution, clarity of expression, wealth of details and general impressiveness, the figures of the lady and attendants compare favourably with the early sculptures of Bharhut and Amarāvati on one side and later ones of Ajantā and Bādāmi on the other.³ The realistic nature of the scene may be judged from the fact that out of three followers, one is seen seated firmly facing the ordeal of fire and another is shown fleeing away unable to stand its blaze. The figures above the inscription, which are largely obliterated, represented, in all probability, the heavenly scene, as is usually noticed on the memorial slabs of *satīs* and heroes of later period.

No details regarding the place or family of king Pu... are mentioned in the epigraph. But it would be, perhaps, too much to expect them in an epitaph of the kind. During the period represented by the inscription, the rulers of the early Kadamba house were still powerful and their sway extended as far as the area of the Belgaum District⁴ in the north. We are not sure if the Kolhapur region also was included in their territory. At this time the area of the Sātārā District and the tract further north were under the administration of the Rāshtrakūṭa princes of Mānapura.⁵ There is no indication to assume whether king Pu... was a subordinate ruler under either of these. Or as is more plausible, he was maintaining a semi-independent status, his chiefdom being situated in a corner on the border of and in between the two above-named kingdoms. The headquarters of this chiefdom lay, most probably, not far away from the provenance of the memorial tablet.

TRANSLATION

Hail ! This funereal memorial in stone has been installed by the king himself—the king bearing the illustrious appellation⁸ Pu..., out of affection for his (*beloved*) queen Hālidēvi who (*having won the heart of*) her lord by her noble character, repaired to heaven before the advent of old age, to guard (*assiduously, as it were,*) the (*accumulated treasure of her*) religious merits.

No. 25—AN INSCRIBED POT AND OTHER BUDDHIST REMAINS IN SALIHUNDAM

(4 Plates and 1 text figure)

T. N. RAMACHANDRAN, CALCUTTA

The latest accessions to our knowledge of the schools of Buddhist art, architecture and iconography in general and of South Indian epigraphy in particular have been contributed by the discovery in Āndhra-dēśa, of a number of Buddhist sculptures, *stūpas* or *mahāchaityas*, *chaityas* or prayer-cells or halls and *vihāras* or monasteries, dug up at Nāgārjunakoṇḍa in the Guntur District, Kāpavaram and Ādurru in the East Godavari District, and Sālihūṇḍām,⁹ Śaṅkarām and Rāmātirtham in the Vizagapatam District.¹⁰ On the hill at **Sālihūṇḍām**, overlooking the river Vamśadhārā and the Bay of Bengal, 3 miles further down, was discovered a curious but very interesting monastic orientation (plates I and II) with a high apsidal *chaitya* on the summit of the hill crowning the hill, as it were (plate I-c), a circular or wheel-like *mahāchaitya* behind it with bricks laid flat on its entire surface instead of the usual, spokes and hub arrangement that one meets with in the Āndhra *stūpas* (plates I-a, b, plate III-a), and with the regular monastery and smaller *chaityas*, two of them *Buddha-chaityas* and votive *stūpas* scattered on the sides and slopes of the hill (plate II). As at Maināmatī (Madanāvati) and Lālmāi in East Bengal, where the author of this article had to save a large and rich site¹¹ from Military depredation and spoliation, the discoveries here are the results of a hurried survey and excavation by the author necessitated by

¹ This *akshara* is lost ; but it must be without doubt *nā*.

² The *akshara* *ja* is not properly engraved.

³ There are dots, one above the letter *ga* and another towards left above *yī*. If these are construed as misplaced *anusvāras* of *syā* and *yā*, the reading would be *tasyām gatāyām*. This can be taken as a clause in *satī saplami* and will yield quite a good sense. But it is better to take these dots as only flaws in the stone, for the *anusvāras* proper are bigger and circular ; cf., °m=*idam* and *svayam* in the same line.

⁴ The letter *di* is damaged and not sufficiently clear. But it can be restored with confidence.

⁵ The letter *nā* is lost ; but it can be confidently restored.

⁶ The *anusvāra* of *saṃ* appears to have been wrongly placed above the next *akshara* *sthā*.

⁷ The second *akshara* of this word is partly preserved and the last one is restored suitably.

⁸ It is not unlikely that the name of the king was simply Kāmadēva and the composer elaborately paraphrased it as Pushpāyudha to make it more poetic and for the convenience of metre.

⁹ A brief reference to the finds at Sālihūṇḍām was made by the writer in his Presidential address to the Archaeology Section of the 13th Session of the All-India Oriental Conference, October 1946, p. 14 and in his address at the Silver Jubilee Session of the Andhra Historical Research Society, Rajahmundry, April 1948, p. 31. [Mr. A. H. Longhurst has described the Buddhist ruins of Sālihūṇḍām in the *Annual Report of the Archaeological Department, Southern Circle, Madras*, for the year 1919-20, pp. 34-38. The site has already yielded some inscriptions of about the 7th or 8th century A.C. (Nos. 338-342 of the Madras Epigraphical collection of 1919). The caskets, etc., described in the present article are, however, subsequent discoveries.—Ed.]

¹⁰ Sālihūṇḍām is now included in the Śrīkākuḷam (Chicacole) Taluk of the district of the same name.

¹¹ *B. C. Law Volume*, part II, Poona, 1946, pp. 213-231.

large-scale spoliation of the hill for bricks, building material and road material in which, strange to say, the P. W. D. took a leading part. The survey was commenced in 1943-44 and continued in 1946-47 and it may not be out of place here if such of the structures as were saved and antiquities as were salvaged are very briefly described in this article. It is of great interest that crystal reliquaries shaped like *stūpas*, with gold relics in them in the shape of flowers (*svarṇapushpas*), were found in the *mahāchaitya* behind the apsidal *chaitya* on the crown of the Sālihuṇḍām hill (plate III-b, c).

The chaitya : (plate I-c)—Though the *chaitya* on the top of the hill is actually in ruins, one can judge from its remains that it stood to a considerable height, and being juxtaposed on the topmost and narrowest point of the hill should have been clearly visible from the sea-port of Kāliṅgapatṇam which is only three miles away from the hill (plate II-a, c). Evidently, Buddhist pilgrims and merchants came here to offer their tributes from the sea-side along the Vamśadhārā river. The *chaitya*, which is apsidal, still bears its old lime plaster (plate I-c) which glistens in the sun as though it was just finished off. Right in the centre was a votive *stūpa* of lime-stone, the basement of which alone now remains, the rest having been pilfered, as I was told, by treasure-hunters and house-builders.

The mahāchaitya : (plate I-a, b, d ; III-a)—Behind the apsidal *chaitya* lay the *stūpa* or the *mahāchaitya*, of complete brick-work, in the form of a wheel and with bricks laid flat on its surface as one can judge from the existing height of its ruins (plate I-b ; III-a). A few pieces of a curvilinear moulding are all that remain to-day of a lower plinth that faced the *mahāchaitya* at its lowest part or base. Such pieces compare well in their architectural function with what, in the Amarāvati inscriptions, are called 'abatamālā', a name applied to the lowermost and slightly projecting mouldings of the rail of the Amarāvati *stūpa*. This *stūpa* appears to have been the most important one on the Sālihuṇḍām hill, or shall we say in this part of the Kāliṅga, for, it not only departs from the general hub-and-spokes arrangement of the brick frame-work of the Āndhra *stūpa*, though retaining its wheel-like outer shape, but also yielded 3 stone caskets and 3 crystal reliquaries. The 3 crystal reliquaries are shaped like *stūpas* and each was found in a stone *karaṇḍa* or casket (plate I-d, III-a). In the arrangement of the stone *karaṇḍas*, which in shape recall the three stone caskets found in the Bhaṭṭiprōlu *stūpa*, in Repalli Taluk of the Guntur District, there is a remarkable deviation from the Āndhra *stūpa*. While at Bhaṭṭiprōlu their juxtaposition was vertical and the three were found right in the centre at convenient inter-space, here at Sālihuṇḍām they were arranged at equal distance from each other, in a horizontal row along the diameter of the *mahāchaitya* which, as we have already remarked was shaped like a wheel (plate III-a). The stone caskets were in two parts each, a receptacle and the lid (plate I-d). Two of them are rectangular in shape while the third is circular and bigger and was found right in the centre of the *mahāchaitya* (plate III-a). Its receptacle-part was shaped like the drum of a *stūpa*, while its lid resembled the *aṇḍa* (dome) and *harmikā* (pavilion) parts of the *stūpa*. The central casket or *karaṇḍa* seems to suggest by its form that it was meant to resemble the *mahāchaitya* itself.

The contents of the caskets are of untold importance to the Buddhist world. While they are crystal reliquaries like those of the Bhaṭṭiprōlu *stūpa*—three in number, one in each stone casket—they recall by their shape three different forms of the *stūpa* that were known to the ancient architects of India. And for this reason they are described here briefly. The first crystal reliquary, which was found in one of the rectangular *karaṇḍas* (plate III-b, c) recalls the simple type of the *stūpa*. It is spiroidal (not a hemispherical dome though that was what was meant) and consists of two parts, a big and all-assuming part and a small circular part or base which slips underneath the former so completely as to create the impression that the two are of one indivisible unit. But when these two parts thus united, are scanned from above, they reveal a slot of space in the body of the crystal in which rests a gold flower (*svarṇa-pushpa*) glittering like burnished gold, which

AN INSCRIBED POT AND OTHER BUDDHIST REMAINS IN SALIHUNDAM (I)

c. SAHIBNADAM - A SMALL STUPA ON THE EASTERN PLATEAU OF THE HILL

d. SAHIBNADAM - BACK BUDHA CHUTTA SHOWING SUTTO BUDHA

b. SAHIBNADAM - BACK BUDHA CHUTTA

is due to the small slot being rendered free from atmospheric action as in a hermetically sealed chamber (plate III-c).

The second crystal reliquary found in the second rectangular casket (plate I-d) consists of two parts, a broad and circular receptacle with its ridge raised in the centre so as to form a cavity, within which were found five complete gold flowers and a sixth flower in three bits, and a lid in the shape of a dome with a square pavilion (*harmikā*) and the shaft of the *chhatra* superimposed (plate III-c).

The third crystal reliquary is the most interesting as it is a perfect representation in miniature of the extant form of *stūpa* construction such as Amarāvati, Gōli and Nāgārjunakoṇḍa have revealed to us. It consists of 4 parts—a broad and circular base (*vēdikā*) or receptacle with a cavity of high ridge within which were found two gold flowers in five pieces, a dome (*aṇḍa*), a cubical pavilion (*harmikā*) with four circular holes for each side resembling a rail with cross-bars, upright pillars and coping complete, and a cylindrical part surmounting the *harmikā* which resembles the shaft of an umbrella. Though similar gold flowers found elsewhere are described as “star-shaped”, it will be correct to describe them as “flower-shaped” as they are indeed *svaṇṇa-pushpas*. To most Indians the ritual in daily *ārādhanā* (*pūjāvidhi*) relating to *svaṇṇa-pushpa-samarpaṇa* is well-known. In the absence of gold, the *yaṇamāna* offers to the priest equivalent or token money.

Buddha-chaityas : (plate II-b and d)—Two *Buddha-chaityas*, apsidal, were found on the slope of the hill as we walk up to the hill-top where the *mahāchaitya* and the high *chaitya* (with bright plaster) are located. One of them, now in utter ruins (plate II-d), preserves a seated figure of the Buddha. What remains shows only the lower part of the Buddha's *torso* below the chest, his waist, thighs and folded or crossed legs. The figure shows brick frame-work with a good and thick stucco finish. Stucco, though common in Taxila, occurs very rarely in South India. Stucco-occurrence at Sālihūṇḍam again marks the place as of singular importance.

The second one (plate II-b) preserves at its apsidal end a huge pedestal of entire brick-work on which a seated Buddha figure (also of brick and perhaps also of stucco-finish) was once installed. We can make out now only the folded legs of the Buddha figure. The pedestal presents five sunk panels, in two of which lion-heads (also of brick-work) can be made out, suggesting that the pedestal was a *siṃhāsana* and the Master who sat on it was no other than Śākyasiṃha. Similar arrangement is also found at Nālandā and Taxila. This *Buddha-chaitya* is very important, for in it and in front of the pedestal, almost touching it, were dug out a few specimens of pottery of brightly polished red ware of which the three figured in this article (plate IV-b) are very interesting. One is the finial of the *chaitya* that adorned its roof and should have got itself lodged where we found it when the roof and superstructure fell. The other two are drinking vessels for monastic use (*kuṇḍikās*). One is in a good state of preservation with its glazed surface and neck complete : the other is similar to the one just described except that its neck is broken off and missing. This latter is of utmost importance inasmuch as it has an **inscription** engraved on its body near the base of the neck (plate IV-a). The incision of the inscription is very light and its execution has been so neat and artistic that the circular or concentric form of the pot is maintained : the mouth, the inscription and the outer edge of the pot are all in circles. The **language** of the inscription is Prākṛit and the **script** Brāhmī of the second century A. C., if not of an earlier period. The *lipi* is similar to that of the Mathurā inscription of the Kushāṇa emperor Huvishka of date 106 A.C., to the *Śaka-śāsana-lipi* and the *Sātavāhana-śāsana-lipi*, all of the early part of the second century A.C. Below I give my reading and interpretation of the inscription.

TEXT

Haṃkuda(or de)yika-rāṣṭavālaka-vochhiyāna[m]-Kattahārāma

TRANSLATION

(This pot belongs to) the Kaṭṭahārāma (or Kaṭṭahāra ārāma) of (=endowed by) the sons (offspring) of the Rāshṭrapālaka (by name) Haṁkudeyika.

Note

It may be inferred that the *Kaṭṭahāra ārāma* was the donation of the sons of the Rāshṭrapālaka of the place or village Haṁkudeyi or Haṁkudayi, who hailed from the village that bore such a name. Haṁkudeyika or Haṁkudayika may even stand for Saṁkudeyika, as *ha* and *sa* interchange. The name Haṁkudayi, Haṁkudeyi or Saṁkudayi, sounds like Kaludayi, a Buddhist name, and for that reason may be taken to be the name of the Rāshṭrapālaka referred to in the inscription. *Kaṭṭaha* reminds us of *Kaṭāha* in Palembang and the overseas colonisation from the Kalinga country and the Tamil name Kaḍāram near Nāgapattinam (cf. Kaḍāram-Konḍān) and the Tamil Kālagam (Kālagattākkamuṁ). The term also reminds us of the *Kaṭṭahārasutta*¹ of the Buddha which was associated with Kōsala. If the term *Kaṭṭahārāma* is taken as a contraction for *Kaṭṭahāra* + *ārāma*, then we get *Kaṭṭahārārāma* which by the law of *sakridavasthāna* or haplogy becomes *Kaṭṭahārāma* just as we have it in the inscription (cf. *Krishṇa* + *nagar*=*Krishnagar*). It is refreshing indeed to note that a Buddhist Monastery (*ārāma*) is named after the *Kaṭṭahārasutta* which the Buddha, from out of his kindness, propounded to a group of *Kaṭṭahārakas* or faggot-carriers who lived in Kōsala. It is said that the Buddha travelled to Kōsala to give the *Kaṭṭahārakas* of Kōsala a sermon, which from thence onwards came to be called *Kaṭṭahārasutta*. Kōsala is but the country adjoining the Kalinga, and the river Vamśadhārā, on which the *Kaṭṭahāra ārāma* was situated, flows through Kōsala before it comes into the Kalinga (see Text Fig. 1 below).

Fig. 1.

The name of the monastery to which the drinking vessel belonged is given as *Kaṭṭahārāma*. In all probability the *chaitya* in which the pot was found was included in the *Kaṭṭahārāma*.

¹ [See also the *Kaṭṭahāri-jātaka*, No. 7 of the *Jātaka*, ed. by V. Fausbol, Vol. I, pp. 133-6, translation by Robert Chalmers, ed. by E. B. Cowell. Vol. I, pp. 27-29.—Ed.]

monastery wherein were also located the other *chaityas* on the slope of the Sālihuṇḍām hill, and the *mahāchaitya* and the apsidal *chaitya* on top of the hill. The Chinese Pilgrim Yuan Chwang who came to India in the first half of the 7th century A. D. and passed through Kalinga, has the following interesting observations to make :—

“The country produced dark wild elephants prized by the neighbouring countries. The climate was hot. The people were rude and headstrong in disposition, observant of good faith and fairness, fast and clear in speech ; in their talk and manners they differed somewhat from “Mid India”. There were few Buddhists, the majority of the people being of other religions. There were above ten Buddhist monasteries, and 500 Brethren “Students of the Mahāyānist Sthavira School system”. There were more than 100 Deva-temples, and the professed adherents of the various sects were very numerous, the majority being Nirgranthas. * * * *

Near the south wall of the city (i.e., the capital apparently) was an Asoka tope beside which were a sitting-place and exercise-ground of the Four Past Buddhas. On a ridge of a mountain in the north of the country was a stone tope, above 100 feet high, where a Pratyeka Buddha had passed away at the beginning of the present *kulpa* when men's lives extended over countless years.”¹

Fergusson was right in placing the capital city of Kalinga near modern Kalingapatam on the sea-shore or that it was not very far from Kalingapatam. This identification has been accepted by R. D. Banerji² and other recent writers. For us this is very interesting as Sālihuṇḍām on the Vamśadhārā river, is only 3 miles away from the sea-port of Kalingapatam (Fig. 1). The Buddhist monastery called in the inscription “Kaṭṭahārāma” is on a hill, while the apsidal *chaitya* which still maintains its lime-plaster (as old as the 2nd century A. C.) and the *mahāchaitya* behind it which yielded 3 crystal reliquaries, are both located on the topmost part of the hill, “above 100 feet high” as Yuan Chwang describes, and are easily visible from the sea-shore. The river Vamśadhārā lashes its water against the side of the Sālihuṇḍām hill. On the northern slope of the hill, just 100 yards below the *mahāchaitya*, were also exposed (plate II-a) another apsidal *chaitya* with a votive *stūpa* in the centre, and a *stūpa* of the usual kind (wheel-hub-and-spokes arrangement). Despoiled as they were for bricks from a long time nothing of importance was recovered from them during my recent survey (1944-47).

No. 26—THREE INSCRIPTIONS FROM VALGUDAR

(1 Plate)

DINES CHANDRA SIRCAR. OOTACAMUND

An epigraphic survey of a large number of villages in Bihar was conducted by Sir Alexander Cunningham about three quarters of a century ago and its results are recorded in his celebrated *Archaeological Survey Reports*. Many of the inscriptions noticed by Cunningham were found on

¹ On Yuan Chwang's *Travels in India*, ed. T. Watters, Vol. II, p. 198.

² R. D. Banerji, *History of Orissa*, Vol. I, page 245—“Kalinga-nagara” has been identified by some with Mukhalingam and Nagara-Kaṭukam and by others with Kalingapatnam.

B. V. Krishna Rao, *Early Dynasties of Andhradeśa*, pp. 612-3.

“There is controversy and difference of opinion about the identification of Kalinganagara. Dr. Fleet identifies Kalinganagara with Kalingapatnam, and this view is shared by Mr. Bhattacharya. Prof. G. V. Ramamurti, on the contrary, identifies Kalinganagara with Mukhalingam cum Nagarakataka, two adjacent ancient villages lying on the northern bank of the Vamśadhārā. And with this identification I entirely agree. Some of the inscriptions of the temple of Madhukēśvara at Mukhalingam speak of the shrine as situated in Kalinga-nagara itself. The city would seem to have been founded in the early part of the sixth century and perhaps by Hastivarman.”

images, some of which unfortunately cannot be traced now. This is because, as is well known, a large number of images have since been occasionally removed from the villages by interested parties. But most of the old villages in some Districts of Bihar, such as Monghyr, Patna and Gaya, still abound in broken images usually of the Pāla age, both inscribed and uninscribed. Some at least are coming out every year at the stroke of the cultivator's ploughshare and the workman's spade to increase the number of accumulated images, although the process of the removal of better preserved images is also still going on. In January 1950, I conducted a search for old inscriptions amongst the images accumulated in certain villages about the western fringe of the Monghyr District and this led to the discovery of some very interesting records. The images are mostly mutilated and many of them bear no inscriptions at all. The writing on the largest number of the inscribed images again either gives only the Buddhist formula *yē dharmā hōtu-prabhavā*², etc., or especially when the image is not a Buddhistic one, merely says that a particular image was the gift (*dēva-dharma* or *dēya-dharma*¹) of a certain private individual, sometimes styled *dāna-pati*³. Only in a few cases they prove important owing to the mention of the regnal year of the king, during whose rule an image was installed, or rarely to some other interesting information such as about the locality where the image was installed or where the man responsible for the installation lived. In connection with this survey, I visited the localities called Rājāunā, Chaukī, Valgūdar, Raghugarh, Pātner, Samsārpōkhri, Kāwāyā, Gōdī, Rāmpur, Amarpur and Urēn. The villages lie in the vicinity of the Luckee-arai, Kiul and Kajra railway stations on the East Indian Railway. Of all the inscriptions examined by me in the above localities, the three discovered at **Valgūdar** were found to be the most interesting, as they not only helped me in locating the ancient city of Kṛmilā, headquarters of a *rishaya* of that name within the Pāla empire, but also as one of the three records offered an exceptionally important date in the chronology of the Pālas of Bengal and Bihar.

On the 9th of January 1950, I visited Valgūdar (lat. 25° 10' 30" N. ; long. 86° 5' E.) which is a small village lying by the side of the railway line between the Luckeesarai and Mankatha railway stations. I was fortunate enough to find there no less than three small inscriptions. The earliest of them was found on a pedestal (image now lost) which is lying in the compound of the house of Babu Kesav Sinha and is being used now by the people as a platform for washing their feet. It contains two lines covering a space 17·5" in length and 2·4" in height. The *aksharas* are about 5" in height, although the conjuncts with vowel marks are sometimes double that height. The second inscription was found on a mutilated image lying in the verandah of the Katchery of Babu Dilip Narayan Sinha, who, I was told, is a zamindar staying at Bhagalpur. I was further told that the image had been discovered sometime previously while digging the earth for the foundation of a house. It is an image of a seated goddess with a child on her lap. It may be mentioned here that such images of the Dēvī with child were noticed by me in many places in South Bihar. She must have enjoyed great popularity amongst the people of the region in the early medieval period. There is a similar image of the goddess at the neighbouring village of Rājāunā which, as the inscription on it shows, was styled Puṇḍṛīśvarī and was installed during the reign of Nayapāla (circa 1038-55 A. C.). A mutilated image of the same deity is now preserved in the Asutosh Museum of the University of Calcutta. The inscription on it shows that it was installed during the reign of Rāmapāla. This image also seems to have been originally found somewhere in South Bihar, although goddesses of similar types were fairly popular in Bengal as well. The Dēvī's

¹ Cf. Pali *dēyya-dhamma*, a gift, an offering.

² In old Bengali, this word is used in the sense of a person who had promised to dedicate an object on the fulfilment of a particular desire and later kept the vow. See J. M. Das, *Bāngālī Bhāṣhār Abhidhāna*, s. v. In the votive inscriptions of the type referred to above, the word *dāna-pati* seems to be used in this technical sense. *Dēvalharma* thus seems to refer to an image installed according to a previous promise called *mānasika*.

vāhana is usually found to be the lion. A similar image now lodged in the compound of a temple on the bank of the tank called Samāṅrṣpōkhri at Luckee-arai has a snake canopy above the deity's head. The deity seems to have been the primitive Mother-goddess worshipped under different local names in various parts of East India, though she may have been associated with the Buddhist deity Hārītī as well as the Brahmanical goddess Pārvatī with Skanda on her lap. An image of a four-armed goddess, holding in the upper hands a fish and a pot and by the lower ones a child, was found in the village of Paikpara in the Dacca District (East Bengal) and is now preserved in the Dacca Museum. N. K. Bhattasali¹ identifies the deity tentatively with the Buddhist goddess Hārītī, although it is pointed out that Hārītī's representations have usually two arms only. This image has, however, neither the usual lion pedestal nor the occasional snake canopy. Images of the Dēvī, with two or four arms and a snake canopy but with or without a child on her lap, found in Bengal, have been identified with the Snake goddess called Manasā.² The name of Manasā (supposed to be derived from that of the South Indian Mañchamma) is, however, not found in the literature of a date earlier than the latter part of the medieval period, and an image of the same deity, with the snake canopy but without the child, found at Marail in the Dinajpur District, is known from the inscription (in characters of the tenth or eleventh century) it bears to have been called *Bhatṭiṇī Maṭṭuvā*.³ Images of Manasā are usually without the child: but out of the four late *dhyānas* of this goddess, quoted by Bhattasali,⁴ at least the one quoted from Kāsīrāma Vāchaspati's commentary on Raghunandana's *Tīthypāṭīśatī* represents the goddess as *Āstika-mātā* and *śiśu-sutā*, the latter pointing to her representation with a child on her lap. It seems that the same primitive mother-goddess with a child on her lap, sometimes represented with a lion pedestal and sometimes with a snake canopy, was worshipped under different names in different parts of East India, the snake-canopied form being later endowed with the name Manasā in Bengal. The Jain Ambikā seems to be an adaptation of the same deity.⁵ The inscription on the Valgūdar image of the Dēvī with a child on her lap is written in two lines, covering a space about 4·2" in length and 1" in height. The *aksharas* are about 4" in height. The third inscription discovered by me at Valgūdar was found on the pedestal (image now lost) lying near a well in the locality called Saṅgat owing to its being the area under a Sikh religious establishment in the village. It is written in three lines covering an area about 7·4" in length and 1·2" in height. The letters are small in size and measure about 3" in height.

The **characters** employed in all the three inscriptions are the same as found in the records of the Pālas of Bengal and Bihar, although the first and second epigraphs are considerably earlier than the third one. While Nos. 1 and 2 have to be ascribed on palaeographical grounds to the eighth or ninth century, No. 3 should be assigned to the twelfth century. All the three inscriptions are written in **Sanskrit** prose, though there are some mistakes and signs of Prakrit influence. As regards orthography, they closely resemble the epigraphic records of the Pālas and hardly anything in them calls for special mention. Inscriptions Nos. 1 and 2 are not dated; but the former

¹ *Iconography of Buddhist and Brahmanical Sculptures in the Dacca Museum*, pp. 63 ff; Plate XXV.

² *History of Bengal*, Dacca University, Vol. I, pp. 40-61; Plate LXVI, No. 159.

³ *Ibid.*, p. 460. The occurrence of *Manasā-dēvī* as an illustration of the *sūtra*, *manasō nāmni*, for the *a-luk sanāsa*, in the old commentary of Dharmadāsa on the *Chāndra-Vyākaraṇa* (see S. Sen, *Bāṅgālī Sāhityer Itihāsa*, Vol. I, second edition, p. 109; cf. *History of Bengal*, *op. cit.*, p. 297 and notes) is unjustifiable and is probably a late interpolation. Manasā is mentioned in such medieval works as the *Brahmavaivarta Purāṇa* (14th-15th century; *JRASB*, Letters, Vol. XIV, p. 6, note 3) and the lexicons of Jātādhara and Kēsava. For the snake-goddess Mane Mañchi or Mane Mañchamma (cf. Teingu *mañchipāmu*, 'a cobra') of Mysore, see H. Whitehead, *The Village Gods of South India*, pp. 82-83. The Sēnas of Karpāta may have introduced this name of the goddess in Bengal. The name *Pundrīśvarī* reminds us of the Pundras, an ancient non-Aryan people of Eastern India.

⁴ *Op. cit.*, pp. 218, 219, 223, 227.

⁵ *History of Bengal*, p. 465; Plate LXIV, No. 153.

refers to the reign of the Pāla king Dharmapāla whose rule is now assigned to *circa* 769-815 A.C.¹ or 770-810 A. C.² As suggested above, inscription No. 2 has to be ascribed on palaeographic grounds to the days of Dharmapāla or to those of his immediate successors. Inscription No. 3 is dated in the Śāka year 1083 (1161 A. C.) as well as in the 18th regnal year of Madanapāla whose reign is assigned now to *circa* 1130-50 A. C.³ or 1140-55 A. C.⁴, although, as will be shown below, all previous suggestions about the date of this king are now proved to be wrong by the discovery of the present inscription.

Inscription No. 1, as it reads, seems to imply that a god named Madhuśrēṇika was installed at the *adhishṭhāna* or city of Kṛimilā during the reign of king Dharmapāla by the lady Ajhuka who was the wedded wife of a person named Sālō. If, however, the *visarga* in *madhuśrēṇikah* is ignored, that expression may be taken as an adjective of the personal name Sālō, although in either case its real import remains doubtful. In case the second alternative is preferred, it has to be assumed that, as in numerous other cases, the name of the deity installed by Sālō's wife is not mentioned in the record. That is, however, not an important matter. Nor has the reference to Dharmapāla's reign any special value to the students of history as the inclusion of the region, where the inscription has been found, in the dominions of the Pāla king is definitely known from other records. The chief interest of the inscription lies in the mention of the city of **Kṛimilā** where the image is said to have been installed. It is very interesting to note that the same city is also mentioned, under the spellings *Kṛimilā* and *Krimilā*,⁵ in inscriptions Nos. 2 and 3 to be discussed below. It is further mentioned in an inscription on a Dvādaśāditya slab which was installed in the 5th regnal year of Śūrapāla (possibly the first ruler of this name who flourished about the middle of the ninth century) and is now lying at Rājāunā, a village abutting on Valgūdar⁶. It is very probable that the slab had been originally discovered at Valgūdar but was later carried to Rājāunā. It is thus clear that the small village of Valgūdar in the western fringe of the Monghyr District of Bihar stands on the site of the city of Kṛimilā famous in the days of the Pālas. There is again no doubt that this city was the head quarters of the *vishaya* or district of the same name that formed a part of the Pāla dominions. The Monghyr copper-plate of Dēvapāla, who was the son and successor of Dharmapāla and reigned in *circa* 815-54 A. C. or 810-50 A. C. according to recent writers on the Pālas,⁷ was issued by the Pāla king from Muḍgagiri (modern Monghyr) and records the grant of a village situated in the Krimilā *vishaya* forming a part of the Śrīnagara *bhukti*. The *bhukti* or province called Śrīnagara (literally 'the illustrious city') was no doubt named after Pāṭali-putra which was apparently the administrative headquarters of the province in question. That Pāṭali-putra, of which the modern representative is Pāṭnā (from Sanskrit *pattana* meaning a town, i.e., the town *par excellence*) was regarded as the city *par excellence* is known from the *Jaya-maṅgalā* commentary on Vātsyāyana's *Kāmasūtra*,⁸ explaining words like *nāgarakāḥ*, *nāgarikāḥ* and *nāgarikyāḥ* (i.e., men and women of the *nagara*) as *pāṭali-putrakāḥ*, *pāṭali-putrikāḥ* and *pāṭali-putrikyāḥ* (i.e., men and women of Pāṭali-putra). The Śrīnagara *bhukti* was often called *Nagara-bhukti*⁹ and possibly also *Magadha-bhukti*.¹⁰ The exact location of the Krimilā

² *History of Bengal*, Dacca University, Vol. I, p. 177.

³ Ray, *op. cit.*, p. 385.

⁴ *History of Bengal*, *loc. cit.*

⁵ The name is derived from a Sanskrit word which is spelt both as *krimi* and *krimī*.

⁶ The Rājāunā Puṇḍrīśvara image inscription of the time of Nayapāla, referred to above, also mentions Krimilā as the place of installation and appears to have been originally found at Valgūdar.

⁷ Cf. Ray, *loc. cit.*; *History of Bengal*, *loc. cit.*

⁸ VI, 5, 30; 9, 24.

⁹ Cf. Sastri, *Nalanda and its Epigraphic Materials* (Memoirs of the A. S. I., No. 66), pp. 33, 52, 53, 84.

¹⁰ Cf. *ibid.*, pp. 33, 51, 52.

vishaya in the above *bhukti* was hitherto impossible ; but now it can safely be said that it was the area round the present village of Valgūdar in the western part of the Monghyr District. It is possible further to suggest that the Krimilā *vishaya* was bounded in the east by a *vishaya* with its headquarters at Mudgagiri (*i.e.*, Monghyr) and in the west by another with its headquarters at Nagara or Pāṭaliputra (near Pāṭnā).¹

The second of the three inscriptions records that the image of the Dēvī, on which it is incised, was the *dēva-dharma* of a person whose name appears to be Nṛikatta. The first line of the record shows that the image was installed at the *adhishthāna* (city) of Krimilā. Three letters appearing to read *gausavā* (or *gausēvā*?) follow the reference to the city, although it is difficult to say whether some other *aksharas* after these three had been originally engraved but were later broken away. As it stands, the inscription may suggest that the name of the Dēvī was Gausavā or Gausēvā. Of course, no goddess of such a name is known to us ; but, as has been suggested above, this popular deity was apparently worshipped in different localities under various local names. It may, however, also be suggested that these three letters form the first part of the name read at the beginning of the next line or that they, together with some following *aksharas* now lost, formed an adjective qualifying the person named Nṛikatta.

Inscription No. 3 says that, on the eleventh day of the month of Jyāishṭha in the 18th regnal year of king Madanapāla, corresponding to Śaka 1083, an image of the god Nārāyaṇa was installed at Krimilā by two *Paramavaishṇava* brothers who appear to have been named Abhi and Inda (Indra?). They were the brothers of *Bhaṭṭa-śrī-Sukī(kṛi)trima* and sons of *Bhaṭṭa-Paṇḍita-śrī-Vyāya* (*Vyāsa*?). Now the chief interest of this inscription lies in its **dating** both in the Śaka era and in the regnal reckoning of the Pāla king. It is well known that, of the numerous epigraphic records of the time of the Pāla emperors, only two were so long known to have been dated according to any era, while all others are only dated in the regnal years of particular kings. Thus there is absolutely no unanimity among scholars in regard to the dates of accession of the kings in question. The first of the two Pāla records dated according to any era is the Sārnāth inscription² of the time of Mahīpāla I dated in Vikrama Samvat 1083 (1026 A. C.) ; but the record is not simultaneously dated in the king's regnal reckoning and does not therefore offer any help in determining the initial year of the reign of Mahīpāla I. The second of the two records, referred to above, is the Gayā inscription³ of Gōvindapāla, whose relationship with the known monarchs of the Pāla family could not be determined. This epigraph is dated in the Vikrama year 1232 (1175 A. C.), styled Vikārin according to the Northern Cycle of Jupiter, as well as in the 14th year of the *gati-rājya* of Gōvindapāla. The reference is, however, not to the *pravardhamāna-vijaya-rājya* (*i.e.*, the increasingly victorious reign) of the king as is expected in such cases, but to his *gati-rājya*, *i.e.*, his sovereignty that was on the date in question a thing of the past. Although it appears quite clear from the date of this inscription that Gōvindapāla ascended the throne in Vikrama Samvat

¹ The Krimilā *vishaya* is also mentioned in the legend on several Nālandā seals. See *ibid.*, pp. 34, 54. The village of Kavāla, known from the seals to have belonged to the said *vishaya*, may possibly be identical, as suggested to me by Mr. A. Ghosh, with the present Kawāli, 14 miles south-west of Valgūdar. The spurious Nālandā plate of Samudragupta (cf. *Select Inscriptions*, Vol. I, pp. 262-64) records the grant of two villages one of which was situated in the Krimilā *vishaya*. Even if this spurious record, forged a few centuries after the middle of the fourth century when Samudragupta ruled, may not prove the existence of the *vishaya* in the Gupta age, it no doubt shows that the *vishaya* and therefore the city which gave the *vishaya* its name existed before the rise of the Pālas. The Naulagarh image inscription (*Ganesh Dutta College Bulletin*, No. 1, by R.K. Chowdhary, pp. 1-16) of the 24th regnal year of Vīrabhāpāla II or III mentions a vintner of Krimilā.

² Bhandarkar, List, No. 114.

³ Bhandarkar, *op. cit.*, No. 370. The date is given as *Samvat 1232 Vikāri-samvatsarē śrī-Gōvindapālādēva-gati-rājyē chaturdāśa-samvatsarē*. The date corresponds to the 22nd September, 1175 A.C.

1219 (1162-63 A. C.)¹ but that he lost his sovereignty before the 14th year counted from that date, most writers on Pāla history believe that the reckoning started from the time when he lost his throne. Thus the actual reign period of Gōvīndapāla is usually placed before a date in Vikrama Samvat 1219 (1162-63 A. C.)². There are no less than seven Buddhist manuscripts copied at Gayā and Nālandā referring to king Gōvīndapāla in the colophon.³ Only one of these refers to the 4th year of his *vijaya-rājya* indicating no doubt that Gōvīndapāla reigned at least up to the fourth year after his coronation, i.e., from Vikrama Samvat 1219 (1162-63 A.C.) to 1222 (1165-66 A.C.). In four cases, the colophons associate the dates (years 24, 37, 38 and 39) simply with Gōvīndapāla without referring either to his *vijaya-rājya* or to his *gata-rājya*; but, in two other cases, the colophons remarkably agree with the phraseology of the Gayā inscription in referring respectively to the 18th *atīta* year of Gōvīndapāla and to the 38th year of his *vinashṭa-rājya* (i.e., destroyed sovereignty). It is therefore clear that Gōvīndapāla lost his sovereignty between the fourth (V. S. 1222=1165-66 A.C.) and the fourteenth year (V.S. 1232=1174-75 A.C.) after his coronation, although some people of South Bihar, especially the Buddhists, continued to refer to the rule of this Buddhist king in dating their records in preference to the non-Buddhist rule that possibly followed Gōvīndapāla's overthrow from that region. The above dates of Gōvīndapāla's accession and of the loss of his sovereignty are corroborated by the inscription under discussion.

We have seen that the Valgūdar inscription of Madanapāla, who is the last known member of the Pāla royal house, is dated in Śaka 1083 which was the 18th regnal year of the said Pāla king. The actual date quoted is the eleventh day of Jyāishṭha, corresponding to the 4th May 1161 A. C. This shows beyond doubt that Madanapāla began to rule in Śaka 1066=Vikrama Samvat 1201=1144-45 A. C. and continued to reign at least up to Śaka 1083=Vikrama Samvat 1218=1161-62 A.C. The first regnal year of Gōvīndapāla, as we have already seen, correspond- to Vikrama Samvat 1219=Śaka 1084=1162-63 A.C. This shows that there was hardly any interval between the end of Madanapāla's reign and the accession of Gōvīndapāla. It thus appears almost certain that Gōvīndapāla was the immediate successor, if not actually the son, of Madanapāla. The date of the Jaynagar image inscription of the time of Madanapāla was originally read as the regnal year 19 which is, however, a wrong reading for 14. Thus the duration of Madanapāla's reign, previously known to have been only about 14 years, is now definitely established to have been at least about 18 years.

The Pāla emperors are known to have ruled over Bengal and Bihar, although about the time of Madanapāla and Gōvīndapāla practically the whole of Bengal appears to have been lost to the Sēnas who hailed from Karṇāṭa or the Kannaḍa area of South India. The reign of Vijaya-sēna, the first imperial ruler of the Sēna dynasty, is now assigned to the period *circa* 1095-1158 or *circa* 1125-58 A. C. while his son and successor Vallālasēna is supposed to have reigned in *circa* 1153-79 A. C.⁴ Like the Sēnas of Bengal, another Karṇāṭa dynasty was established in North Bihar by Nānyadēva in 1097 A. C. The independent rule of this family is known to have continued

¹ The regnal years appear to have been counted as corresponding to the calendar years so that the last regnal year of one and the first of his successor usually corresponded to the same calendar year. Cf. the same procedure followed in counting the *Anka* years of the later rulers of Orissa (*J.A.S.B.*, 1903, p. 109).

² See *History of Bengal*, *op. cit.*, p. 171, note.

³ R. D. Banerji, *Pālas of Bengal* (Memoirs of the A. S. B., Vol. V), pp. 110-12. The dates are given as (1) *Śrīmad-Gōvīndapālasya vijaya-rājya-samvatsarē* 4; (2) *Śrīmad-Gōvīndapālādēvasy-ātīta-samvatsa*° 18 *Kārttika-dīnē* 15; (3) *Śrī-Gōvīndapālīya-Samvat* 24 *Chaitra-sudi* 8; (4) *Gōvīndapālādēvānām Sam* 37 *Śrāvana-dīnē* 11; (5) *Śrīmad-Gōvīndapālādēvānām vinashṭa-rājyē ashtatvīṃśat-samvatsarē=bhūlikhyamānē Jyāishṭha-kṛishṇa-ushṇyām tithau* | *patra Sam* 38 *Jyāishṭha-dīnē* 8; (6) "the 38th year of Gōvīndapāla", (7) *Śrīmad-Gōvīndapālādēvānām Sam* 39 *Bhādra-dīnē* 14. The fifth quotation points to the month being regarded as lunar and *pūrṇimantā*.

⁵ *Ibid.* p. 231.

for a long time.¹ It therefore seems that Gōvindapāla succeeded Madanapāla only over some districts of South Bihar, though even there the later Pālas were struggling for their existence with the Gāhaḍavālas of the U. P. The Maner plates² of 1124 A. C. show that the Gāhaḍavālas had already advanced as far as the Patna District where the Gāhaḍavāla king Gōvindachandra (circa 1114-55 A. C.) granted in that year a piece of land not far from Patna. The Lar plates³ of 1146 A. C. show that the same Gāhaḍavāla king was during that year staying at Mudgagiri or Monghyr. These records suggest that the later Pālas, who were Buddhists, were ousted from the Patna and Monghyr Districts by the Brahmanical Gāhaḍavālas. But the Valgūdar inscription of 1161 A. C., referring to the Kṛimilā *vishaya*, situated between Patna and Monghyr, as a part of Madanapāla's dominions, no doubt points to the success of this king against the Gāhaḍavāla rulers⁴. Whether, however, Madanapāla's successor Gōvindapāla was ruling only over the Gayā District and the adjoining area or whether his dominions also included the whole of the Patna and Monghyr Districts cannot be determined in the present state of our knowledge. The Bōdhgayā inscription⁵ of Gāhaḍavāla Jayachandra (circa 1170-93 A. C.), however, shows that it was the Gāhaḍavālas who overthrew the Pālas even from the Gayā District. The date of the Bōdhgayā inscription falls between Vikrama Samvat 1240 (1183-84 A. C.) and 1249 (1192-93 A. C.), but probably towards the earlier part of this period. The Śihvar plates⁶ bearing an earlier date (1175 A. C.) appear to refer to a grant of land made by king Jayachandra in the Patna District.

As already noticed above, the Pālas dated their charters according to their regnal reckoning. This is also the case with the private records of their time. The use of the Vikrama Samvat in the Gayā inscription of Gōvindapāla, which is not an official record of the king, may be explained by the fact that this era, which was quite popular in the U. P.,⁷ may have infiltrated itself in South Bihar especially when the Gāhaḍavālas succeeded Gōvindapāla. The Gāhaḍavāla inscriptions, discovered in Bihar, are dated in the Vikrama Samvat and the Gayā inscription referring to Gōvindapāla's lost sovereignty belongs apparently to this period of Gāhaḍavāla occupation of South Bihar. Of course, the Buddhists of Banaras may also have been partially responsible for carrying the use of the Vikrama era to the Buddhist sites of Bihar. But even if thus the use of the era of Vikrama in Gōvindapāla's Gayā inscription can be rather easily explained, it seems difficult to explain the dating of the Valgūdar inscription of Madanapāla in the Śaka era. This era was adopted by the imperial Gaṅgas of Orissa about the end of the tenth century probably from their southern neighbours, the Eastern Chālukyas of the Āndhra country. With the expansion of the Gaṅga power about the beginning of the twelfth century towards the north-east up to the Bhāgīrathī or the present Hooghly river, the use of the Śaka era must have been known in the south-western fringe of Bengal. But the popularity of this era in Bengal seems to have been actually due to the establishment of the power of the Sēnas who hailed from a country where the era was popular. The fact that the Sēnas followed their predecessors, the Pālas, in dating their

¹ See *I. H. Q.*, Vol. VII, pp. 519 ff.

² *J.A.S.B.*, Vol. XVIII, p. 81.

³ Above, Vol. VII, p. 98.

⁴ There is another image inscription, dated in the 3rd year of Madanapāla's reign, corresponding to 1146-47 A. C., which was found at Bihar in the Patna District. The Jaynagar image inscription, referred to above, is dated in his 14th regnal year, corresponding to 1157-58 A.C. The village of Jaynagar is known to be near Luckeesarai (in the Monghyr District), but is placed in the Gayā District, (see Cunningham, *A.S.R.*, Vol. III, p. 25) apparently through mistake.

⁵ Bhandarkar, List, No. 401.

⁶ *Ind. Ant.*, Vol. XVIII, p. 129; Ray, *op. cit.*, pp. 537-38.

⁷ The popularity of the Vikrama Samvat in the U. P. was due especially to the Gurjara-Pratihāra emperors, although it was used in an earlier age by the Maukharis and the Malayakūtas (Bhandarkar, List, Nos. 10, 34). The dating of the Sarnāth inscription of the time of Mahipāla I was due to this local influence.

charters according to regnal reckoning in preference to the Śaka era, exhibits the influence of local practice. The same conservatism in regard to the method of dating is also noticed in similar other cases. Records referring to the rule of the Gurjara-Pratihāra king Mahēndrapāla found in Bihar and North Bengal, temporarily occupied by the king after having defeated the Pāla king Nārāyaṇapāla (c. 854-908 A.C.), are dated according to his regnal reckoning and not according to the Vikrama era as is the case with the official Gurjara-Pratihāra charters as well as other records of their time found in other parts of their empire. In spite of the fact, however, that the Sēnas did not use the Śaka era in their official records, its growing popularity in Bengal during the Sēna age is proved by the use of this era in epigraphic and literary records of the period such as Vandyaghaṭiṇa Sarvānanda's work, *Tikāsarvasva* (composed in Śaka 1081=1159-60 A.C.),¹ the *Adbhutasāgara* (commenced in Śaka 1089=1167 A.C. or Śaka 1090=1168 A.C.) and *Dānasāgara* (composed in Śaka 1091=1169 A.C.), both ascribed to king Vallālasēna,² the Sundarban plate of Dōmmanapāla (Śaka 1118=1196 A.C.),³ the *Saduktikarṇāmṛita* (composed in Śaka 1127=1205-06 A.C.) by Śrīdharadāsa,⁴ the Tipperah plate⁵ (Śaka 1141=1219 A.C.) of Harikāladēva Raṇavaṅka-malla and the Chittagong plate⁶ (Śaka 1165=1243 A.C.) of Dāmōdara. Its introduction in Sylhet and Assam during the same age is indicated by such records as Vallabhadēva's inscription⁷ of Śaka 1107 (1185 A.C.) and the Kanaibarshi rock inscription⁸ of Śaka 1127 (1206 A.C.). The introduction of the era in North Bihar⁹ may have been due to the establishment of the rule of the Karmāṭa dynasty in that country referred to above. Yet these facts do not quite clearly explain the use of the Śaka era in the Valgūdar inscription of the time of Madanapāla discovered in a village in the western part of the Monghyr District, not only because the cause of its infiltration in that area is unknown, but also because here we have one of the earliest amongst the epigraphic and literary documents dated in the Śaka era so far found in East India.¹⁰ It has possibly to be suggested that the Brāhmaṇa brothers who were responsible for the inscription in question were not original inhabitants of the city of Kṛimilā, but had hailed from a territory where the use of the Śaka era had become or was becoming popular.¹¹

The only place name mentioned in the three inscriptions is that of the city of Kṛimilā, the identification of which has already been discussed above.

No. 27—DAIKONI PLATES OF PRITHVIDEVA II : YEAR 890

(1 Plate)

M. VENKATARAMAYYA, OOTACAMUND

This is a set of two thick oblong copper plates¹ discovered at the village of **Daikonī**, near Akaltārā, District Bilaspur, Central Provinces (Madhya Pradesh). The copper plates were in the possession of the *Mālguzār* of Daikonī and the information about the existence of the charter was conveyed to the Government Epigraphist in 1944 by Pt. L. P. Pandeya. With the help of the Deputy Commissioner, Bilaspur District, the originals were secured by Dr. B. Ch. Chhabra, the Government Epigraphist for India, with whose kind permission I edit the record here.

The plates have slightly raised rims to protect the writing. Each of them measures about 11·8 inches in length and 7 inches in height. They are strung together by a circular ring passing through a hole about ·6 inch in diameter, which is bored in the middle of the length-side of the plates at the top. The ring is about 1·5 inches in diameter. To this is soldered a circular seal of about 2·5 inches in diameter. The **seal** contains at the top the emblem of the *Gajalakṣmī* which covers about half its space. Below this is engraved the legend, *1 Rāja-śīmat-Prithvidē-2 vaḥ* engraved in two lines and in the Nāgarī script of about the 12th century A. C. Both the plates are engraved on the inner side only, the first plate containing 13 lines and the second 14 lines of writing. The set weighs 257 *tolas*, the ring alone weighing 33 *tolas*.

The **characters** of the inscription are Nāgarī and are well engraved. There have been practically no mistakes in engraving and no erasures. The **language** of the record is Sanskrit. Except for the opening words which contain the salutation to Brahman and the last words recording the date, the whole inscription is in verse. There are in all eighteen verses, including the imprecatory verses, and they are all numbered. The *daṇḍas* are marked for the halves as well as at the ends of the verses. As regards **orthography**, the writing shows the same peculiarities that are found in almost all the records of the period, i.e., 12th century A. C. They are the following ; (i) use of *v* for *b* except in two cases : *babhūvur*, line 8 and *babhūva*, line 14 ; (ii) use of dental *s* for the palatal *ś* (iii) the duplication of the consonant after *r*. The *avagraha* sign is employed wherever necessary. The form of *b* may be noted as it has little difference from *p* except that its box is absolutely square and hence angular at the left bottom instead of being rounded off as for *p*.

The **object** of the charter is to record a gift made by king **Prithvidēva II**, a Kalachuri king of Ratanpur, whose genealogy is traced from the sun, from whom was first born king Manu, the *ādirāja*. From Manu was descended Kārttavīrya, in whose family were born a number of kings called the Haihayas. Among them was Kōkkala, who obtained fame as a noble and philanthropic king. He had eighteen sons of whom the eldest became the lord of Tripurī. He made his brothers lords of *maṇḍalas*.² In the progeny of one of these younger brothers was born Kaliṅgarāja. His son was Kamalarāja to whom was born Ratnarāja (I). From Ratnarāja (I) was born through Nōnallā³ a son called Prithvidēva (I). Prithvidēva (I)'s son by Rājalladēvī was Jājalladēva. His son was Ratnadēva (II) who secured the wealth (i.e., was the lord) of the entire Kōsala country. Prithvidēva II, the donor of the present charter, was his son. He is stated to have granted the

¹ C. P. No. 2 of A. R. S. I. E., for 1944-45.

² The text of the record at this place reads *pārsvē(śvē) cha maṇḍala-patīn=sa chakāra va(ba)ndhūn*. In the Ratanpur inscription of Jājalladēva I (above, Vol. I, p. 34, text line 6) the corresponding passage reads *śeṣhāmś-cha maṇḍala-patīn=sa chakāra va(ba)ndhūn*.

³ In the Anodā plates of Prithvidēva I (above, Vol. XIX, p. 79, text line 16) her name is given as Nōnnalā.

village of **Vuḍukunī** in Madhya-dēśa with all its incomes to one Vishṇu, a Brahman of the Vatsa *gōtra* and of the *pañcha-pravara*. The donee is described as the foremost of the *trivēdin* scholars, as possessing a fine character developed out of his knowledge of all *śāstras* and *āgamas* and as comparable to Vishṇu. He was the dutiful son of Śivadāsa who was likewise an obedient son of Śrōttama. The occasion for the gift made by the king is stated to be a lunar eclipse which occurred on Kārttika 15. The **date** of the charter is given as *Samvat* 890, *Mārgga va di* 11, *Ravau*. As in the case of the other records of the family, and especially of those of Prithvidēva II, in some of which the year is stated to be the Kalachuri *samvat*,¹ the year quoted in the present inscription must also be referred to the Kalachuri-Chēdi era. In the Amodā plates of Prithvidēva I,² and the Kharod inscription of Ratnadēva III,³ the year is specifically stated as the *Chēdiśasya samvat*. Thus, referring the year quoted in the Daikonī plates to this era which began in 247-8 A. C., it is found that the date and its details given correspond to **1138 A. C., October 30, Sunday, f.d.t. 45**, in accordance with the *pūrṇimānta* calculation of the lunar months. The lunar eclipse on Kārttika 15 referred to in the inscription must have been the one which occurred just eleven days earlier, on October 19 of the same year which was the day of Kārttika 15. Prof. Mirashi has shown that the Kalachuri year began on the 1st *tithi* of the bright fortnight of the *pūrṇimānta* Kārttika⁴ and it is found that the date of our record follows the same calculation.⁵ It will also be clear that it was the expired Kalachuri year 890 that is quoted in our inscription since the details of the *tithi* and week-day given in it do not correspond to any date in the Mārgaśīras month of 1137 A. C. but only of 1138 A. C. Further, the lunar eclipse mentioned in the record as the occasion for the gift occurred not in 1137 A. C. but only in 1138 A. C. on Wednesday, October 19, which was the day of *Kārttika-pūrṇimā*.

Most of the verses describing the genealogy of Prithvidēva II in the present charter are identical with those found in other charters of the family, *viz.*, the four sets of the Amodā plates of which one belongs to Prithvidēva I,⁶ two to Prithvidēva II,⁷ his grandson, and the fourth to Jājalladēva II,⁸ the son of Prithvidēva II. Verses 1 to 11 of the present plates which take the genealogy up to Ratnadēva II are again identical with the first eleven verses of the Sarkhō plates of the same king, Ratnadēva II. It would therefore appear that the text of this genealogy was at first composed in the time of Prithvidēva I, the grandfather of Ratnadēva II and was employed by his successors without much alteration except what was added with reference to the successive donor-kings. The later members of the family, *viz.*, Jājalladēva II⁹ and Pratāpamalla¹⁰, have, in their records, also utilised this text, but only partly, amending it considerably in some places.

There is practically nothing new of historical importance in the present charter, since it contains only a conventional description of the princes of the family whose genealogy is well known and even

¹ Rājim stone inscription of Jagapāla, K. 896 (*Ind. Ant.*, Vol. XVII, p. 139); Ratanpur inscription of Prithvidēva II (K. 910), (Bhandarkar's List, No. 1239).

³ Above, Vol. XXI, pp. 158 ff. and plate.

⁴ Above, Vol. XXVII, p. 278.

⁵ The date quoted in the Amodā plates of Prithvidēva I, *viz.*, Chēdi year 831, Phālguna va di 7, Sunday, corresponding, as it does, to 1079 A. C., January 27, Sunday, follows the same *pūrṇimānta* calculation and the year quoted is the expired one.

⁶ Above, Vol. XIX, pp. 75 ff. and plate.

⁷ *Ind. Hist. Quarterly*, Vol. I, pp. 405 ff. and plate.

⁸ Above, Vol. XIX, pp. 209 ff. and plate.

⁹ Amodā Plates, above Vol. XIX, p. 209.

¹⁰ Pēṇḍrābandh plates, above, Vol. XXIII p. 1.

in regard to the donor himself, Prithvidēva II, nothing is recorded as to his conquests or other achievements. The only fact of importance pertaining to the record is that it contains the **earliest date** for this king, viz., K. 890. His other records, both on stone and on copper so far discovered range in date from K. 893 to K. 915. Hence it is learnt from the present inscription that he ruled from K. 890, i.e., 1138 A. C. That he ruled at least up to K. 915 or 1163 A. C. is known from his record at Ratanpur bearing that date.¹ The earliest date known for his son and successor Jājalladēva II is K. 919 or 1167-8 A. C. supplied by his Mallār stone inscription.² Hence the period of rule of Prithvidēva II can be placed between 1138 A. C. to 1165 A. C. or roughly from c. 1135 to 1165 A. C.

It may be observed that of the inscriptions of the Kalachuri princes of the Ratanpur line, the largest number, nearing about a dozen, belong to the reign of Prithvidēva II, the donor of the present charter. It is curious that no record of his early ancestors up to the time of Prithvidēva I have so far been discovered. The Amodā plates³ of this king dated Chēdi year 831 is the earliest record of the family. Of his son and successor Jājalladēva I we have only one inscription so far discovered, viz., the Ratanpur stone inscription dated year 866.⁴ His son Ratnadēva II, the father of Prithvidēva II of our inscription, has left two records, viz., the Seorinarayan plates⁵ and the Sarkhō plates⁶ bearing dates 878 and 880 respectively. Besides these kings who were predecessors of Prithvidēva II, other princes of the line who came after him have also left a few records. Of Jājalladēva II, the son and successor of Prithvidēva II, two inscriptions have been secured, viz., the Mallār stone inscription⁷ dated year 919 and the Amodā plates issued in the same year.⁸ The next prince of the family for whose reign an inscription is available is Ratnadēva III, son of Jagaddēva, the elder brother of Jājalladēva II. His Kharod inscription dated Chēdi *saṃvat* 933 has been edited in this journal.⁹ The son and successor of Ratnadēva III was Pratāpamalla, the last known prince of the Ratanpur branch of the Kalachuris, whose Pēṇḍrābandh plates were issued in the year 965.¹⁰

Reviewing the dynasty as a whole, it will be seen from the records of the family so far available and from the dates quoted in them, which, as has been pointed out above, have all to be referred to the Kalachuri-Chēdi era, that every one of these kings must have had sufficiently long reigns averaging from twenty to twenty-five years. This fact would be apparent from the interval that can be noticed between the dates of the records of the successive kings. Thus between the dated records of Prithvidēva I and his successor Jājalladēva I there is an interval of about 35 years which must have been partly covered by their respective reigns. Similar intervals are found between the other members of the family. On a broad calculation, the duration of the rule of each king can be indicated. I give below a tentative scheme of the chronology of such of the rulers of this line of the Ratanpur Kalachuris for whom a continuous genealogy is available.

¹ Above, Vol. XXVI, p. 255.

² Above, Vol. I, p. 39.

³ Above, Vol. XIX, p. 75.

⁴ Above, Vol. I, p. 32.

⁵ *Ind. Hist. Quart.*, Vol. IV, p. 31.

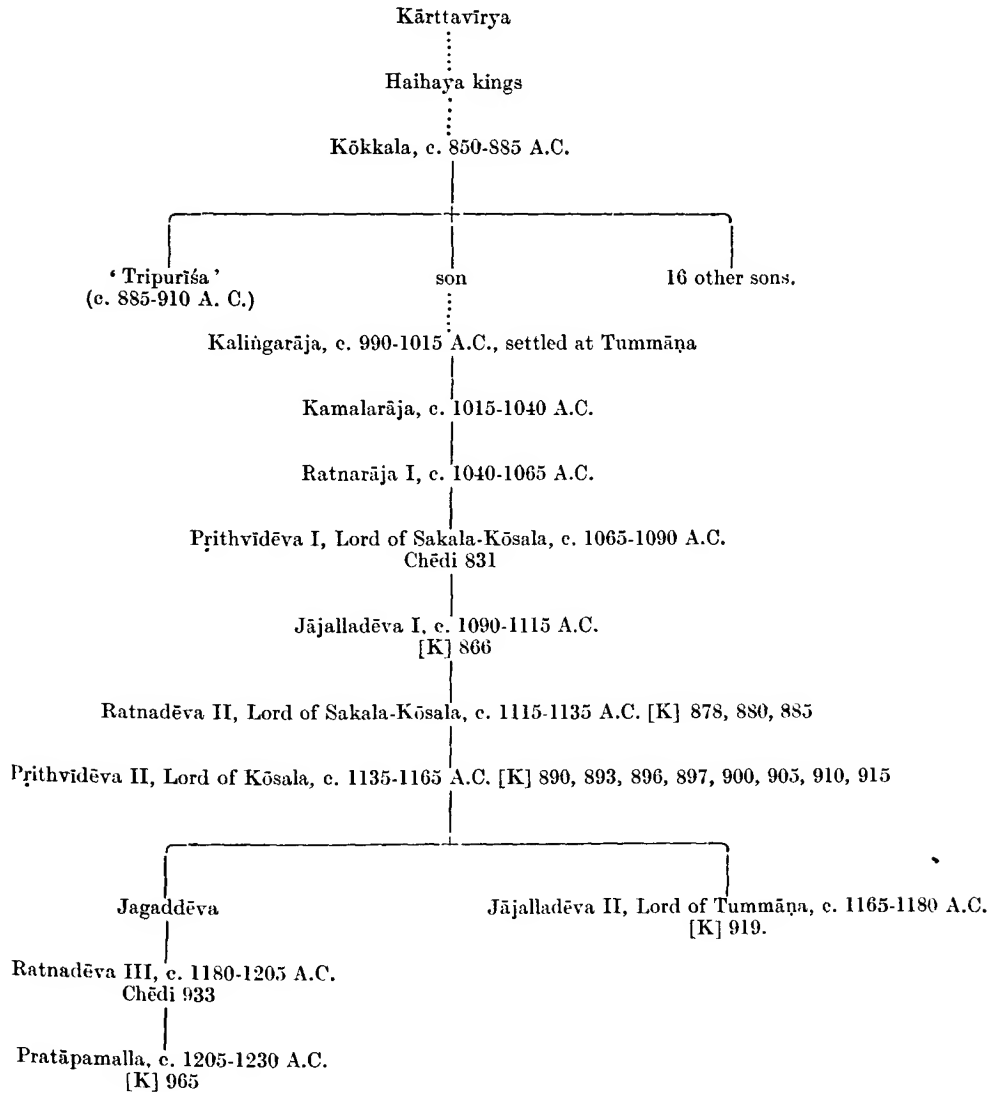

⁶ Above, Vol. XXII, p. 159. The Paragaon plates of Ratnadēva II, dated K. 885, recently discovered constitute the third known record of this king. Along with this charter was found another grant of Prithvidēva II dated K. 897.

⁷ Above, Vol. I, p. 39.

⁸ Above, Vol. XIX, pp. 209 ff. and plates. Prof. Mirashi is probably correct in reading the date of this record as 919 and not as 912 as was read by Hiralal (above, Vol. XXVI, p. 257 and u. 1).

⁹ Above, Vol. XXI, pp. 159 ff. and plate.

¹⁰ Above, Vol. XXIII, pp. 1 ff. and plate.

It is rather difficult to fix the dates for the predecessors of Kaliṅgarāja, *viz.*, the prince called lord of Tripurī and his father Kōkkala. For, none of the records of this line gives any clue as to the probable duration of the interval between Kaliṅgarāja and his predecessor, the lord of Tripurī.¹ Divergent views have been expressed regarding the probable identity of Kōkkala, whether he is to be identified with the first or the second king of that name in the main Kalachuri line of Tripurī.² It seems quite certain that he cannot be Kōkkala II, since this king who was the father of Gāṅgēyadēva Vikramāditya (c. 1030-1040 A. C.)³ lived much later than the probable date that can be assigned to Kōkkala, the ancestor of Kaliṅgarāja (c. 990-1015 A. C.) of the Ratanpur

¹ Alone of all the inscriptions of the dynasty, the Kharod inscription of Ratnadēva III : Chēdi 933, states that Kaliṅganṛipati was one of the 18 sons [born of Kōkkala?]. This is evidently a fabrication (above, Vol. XXI, p. 161 and text lines 4-5).

² Above, Vol. XXI, p. 161 ; Vol. XXII, p. 160 and n. 2.

³ Above, Vol. XXIV, p. 104.

Haihayas. Evidently he must be identical with Kōkkala I, who according to the chronology of the Haihaya kings of the main Tripurī line lived about 850-885 A. C.¹

Since Kōkkala, the predecessor of Kaliṅgarāja of the Ratanpur line, is described in the Amodā plates of Prithvīdēva I as having taken the treasures of those born of the Turushka families, it has been held that the reference may not be to Kōkkala I of the Tripurī family who belonged to a period anterior to any Muhammadan invasion of North India.² Granting that the exploit is true to facts, there is nothing improbable or anachronistic in assuming that it was Kōkkala I of the 9th century A. C. that should be credited with it. For, although the regular Muhammadan invasions came much later, yet even in the period of the Bādāmi (Chālukyas) there have been invasions of Gujarāt by the Muslims proceeding from the direction of Sind. It is known that Pulakēśi-Avanijanāśraya of Gujarāt encountered an invasion of the Tājikas whom he repulsed sometime about 735 A. C. during the reign of Vikramāditya II.³ The Tājikas were none other than the Arab Muhammadans of Sind, and Muhammadan historians like Al Biladuri refer to the expeditions which the Arabs of Sind directed against the kingdoms of Barus (Broach), Uzain (Ujjain), Māliba (Mālwā) and Jurz (Gujarāt).⁴ It is well known that the Rāshtrakūṭa empire was referred to by the Muslim chroniclers as the 'kingdom of the Balhara' and that it included among its subjects a fair number of Muslims.⁵ Hence it is not unlikely, as shown above, that Kōkkala, the father of the prince called lord of Tripurī, of the Ratanpur line, was Kōkkala I who lived about 850-885 A. C. We can now have an idea of the interval between the lord of Tripurī and Kaliṅgarāja. It appears that it is covered by three generations of kings and hence of a total duration of about 75 years. This gap in the genealogy is not entirely unaccountable; it was precisely during this interval (c. 910-990 A. C.) that the ancestors of Kaliṅgarāja lost the country of Tummāna. It was Kaliṅgarāja who seems to have re-established his sway over it. The statement in the Ratanpur inscription of Jājalladēva I (1114 A. C.) that Kaliṅgarāja selected Tummāna as his capital, since the place had previously been selected for the purpose by his ancestors⁶ supports this surmise.

Prithvīdēva II is not described in the present charter with any high sounding titles or achievements to his credit. The record dated, as it is, in K. 890 which is the earliest date known for him so far, seems to have been issued early in his reign before he had made any conquests of his own. That he was a powerful king and that in his reign some conquests were made is learnt from the Rājim stone inscription of Jagapāla of K. 896⁷ in which Jagapāla is stated to have conquered the forts of Saraparāgadhā (Sāraṅgarh) and Mavākāsihavā and the country of Bhramaravadra during the reign of Prithvīdēva II. Again the Ratanpur stone inscription dated K. 915,⁸ the latest inscription of his reign, describes him as the lord of Kōsala and states that his feudatory, Brahmadēva of the Tulahāri *maṇḍala*, obtained a victory over Jaṭēśvara, who is evidently identical with the homonymous son of Anantavarman-Chōḍagaṅga. The same victory over Jaṭēśvara is attributed to Prithvīdēva himself in the Kharod inscription of Ratnadēva III of Chēdi year 933.⁹ Another subordinate of his, Vallabharāja, overran Laḍāha and reduced the Gauḍa king as stated in a stone inscription from Akaltārā¹⁰ not far from Daikonī, the findspot of the present charter. Yet

¹ Above, Vol. XXIII, p. 258 and n. 6. H. C. Ray (*Dynastic History of North India*, Vol. II, p. 754) adduces reasons for giving Kōkkala I the dates 875-925 A.C.

another general of his, Purushottama is credited with a number of exploits like the conquest of the Khimmiṇḍi *maṇḍala*, the Tābāri *maṇḍala*, Daṇḍapura, Khijjiṅga, the killing of Haravōhu and the threatening of the ruler of Daṇḍabhukti.¹ Since Vallabharāja and Purushōttama were also the generals of Prithvīdēva's father Ratnadēva II, it is doubtful if the conquests attributed to them were all effected during the reign of Prithvīdēva II or earlier. Among the conquests that can definitely be assigned to his reign, the most important are his capture of the Bhramaravadra *dēśa* and the defeat inflicted on Jaṭēśvara, the Eastern Gaṅga prince.

The identification of many of the territories and princes conquered by Prithvīdēva II and his father Ratnadēva II and those by his grandfather Jājalladēva I has been satisfactorily made with a few exceptions to which I may draw attention here. To begin with, the Bhramaravadra *dēśa* may not be Bāmra, east of Sāraṅgarh, as Kielhorn thought, but is evidently the Bhramarakōṭya *maṇḍala*, the name by which Chakrakōṭya or the modern Bastar State was known.² During the period in which Prithvīdēva II ruled in Kōśala, Bastar was under the rule of the Nāgavaṃśī kings, of whom Kanharadēva, son of Sōmēśvara³ was perhaps his contemporary. Khijjiṅga, reduced by Purushōttama, is the modern Khiching in the Mayūrbhanj State, now merged in Orissa.⁴ It is referred to as Khijjiṅga-kōṭṭa in the inscriptions of the Ādi Bhaṅja kings of the 9-10th century A. C. It is not known who the ruler of Khijjiṅga was when Purushōttama conquered it. Of the adversaries of Jājalladēva I, Sōmēśvara whose army was captured, and Bhujabala of Suvarṇapura who was defeated, have not satisfactorily been identified. It has been suggested by Hiralal that Sōmēśvara was the homonymous ruler of the Chakrakōṭya *maṇḍala* or Bastar.⁵ Recently Mr. G. Ramadas has adduced reasons for identifying him with Sōmēśvara II, a Chōḷa prince who was ruling at Suvarṇapura, i.e., Sonepur on the Mahānadī in Orissa.⁶ I am more inclined to agree with Mr. Ramadas in this identification, though the arguments adduced by Hiralal in support of the former identification are none the less strong. Sōmēśvara of Bastar, who claims to have conquered a number of countries, including Ratnapura, the very capital of Jājalladēva I, and also to have taken 6 lakhs and 96 villages of the Kōśala country, was indeed too powerful a king to have been captured by the Ratanpur ruler. Secondly, the Kharod inscription of Ratnadēva III states that Jājalladēva I defeated Bhujabala of Suvarṇapura.⁷ The mention of Suvarṇapura as the capital of Bhujabala renders it very likely that this chief must have been one of the contemporary Chōḷa rulers of the lineage of Chandrāditya who were ruling at Suvarṇapura in this period.⁸ Evidently Sōmēśvara mentioned in the Ratanpur inscription of Jājalladēva I is identical with Bhujabala of Suvarṇapura mentioned in the Kharod record, since neither of the two inscriptions mentions any other prince by name as Jājalladēva's adversary.⁹ One more argument in support of Mr. Ramadas's identification, which, however, cannot be pressed far, is that Ratnadēva II, the son and successor of Jājalladēva I, assumes the title of *Mahārāṇaka*,¹⁰ which he did perhaps in imitation of Sōmēśvara II of Suvarṇapura, who donned the title of *Rāṇaka*.¹¹ Further, the princes of both the families are found to assume the high sounding epithet of *Sakala-Kōśal-ādhiśvara*, thus indicating that there existed rivalry between them for the lordship of Kōśala.

¹ Above, Vol. XXVII, p. 279. Dr. D. C. Sircar would read Haravōhu as Haravōnga.

² Above, Vol. IX, p. 179. *Ācāryapuspāñjali* (D. R. Bhandarkar Presentation Volume 1940), p. 272.

³ Above, Vol. IX, p. 312.

⁴ Above, Vol. XXV, p. 153.

⁵ Above, Vol. X, p. 26.

⁶ *Journal of the Kalinga Hist. Res. Society*, Vol. I, No. 3, p. 233.

⁷ Above, Vol. XXI, p. 163, text l. 6.

⁸ See the article on *Mahādā plates of Sōmēśvaradēvavarman* (III) further on in this Volume.

⁹ Dr. D. C. Sircar adducing the same argument identifies Sōmēśvara with Kumāra Sōmēśvara of the Kelgā plates. (*I. H. Q.* Vol. XXII, p. 304 : above, Vol. XII, pp. 239 ff.)

¹⁰ Seorinarayan plates : *Ind. Hist. Quart.* Vol. IV, p. 32.

¹¹ Patna Museum plates : above, Vol. XIX, p. 99, text l. 13.

Gōkarṇa who was the other chief, besides Chōḍagaṅga, stated to have been defeated by Ratnadēva II has not satisfactorily been identified either. Prof. Mirashi considered it likely that Gōkarṇa was another name of Jaṭeśvara, the son of Chōḍagaṅga.¹ I may, in this connection, draw attention to a Gōkarṇa, a Telugu Chōḍa prince of Vardhamānapurā (Hyderabad), of whose reign there is a record at Ēlēśvaram in the Nizam's dominions, dated Chālukya-Vikramā year 33 (wrong), Plava, *i.e.*, 1126-7 A. C.² A few other members of his family are also known from inscriptions to have been ruling parts of Hyderabad territory.³ Gōkarṇa of the Ēlēśvaram record cited above is evidently the same as the homonymous person mentioned in the Anmakonḍa inscription of Kākatiya Rudra (1162 A. C.)⁴ and of whom it is stated in that record that he was murdered by his own brother Bhīma. Since his date, *i.e.*, 1127 A. C. would make him a contemporary of Ratnadēva II, the father of Prithvīdēva II of our record, it is not unlikely that he was the Gōkarṇa whom Ratnadēva II is stated to have defeated. Whether Gōkarṇa was defeated along with Chōḍa-Gaṅga in the same campaign or in a different encounter cannot be stated definitely.

As for the **geographical names** occurring in these plates, **Vuḍukunī** in the **Madhyadēśa** has to be looked for in the vicinity of the Lāphā Zamindāri of the Bilaspur District. For, the Madhya dēśa is apparently identical with the Madhya maṇḍala, mentioned in both the sets of the Amodā plates of Prithvīdēva II as the division in which were situated Āvalā and Buḍubuḍu, two villages which are at present represented by Aurā Bhātā and Burbur, both in the Lāphā Zamindāri.⁵ The Madhya maṇḍala or Madhya dēśa is here indicative, not of the Madhya dēśa of classical references⁶ which is now modern United Provinces (Uttar Pradesh), but of the central portion of the dominion of the Ratanpur chiefs. Hence Vuḍukunī is to be located in the vicinity of Ratanpur itself. I would identify it with **Daikon**.⁷ itself, the findspot of these plates, which is a few miles south-east of Ratanpur, near Akaltārā.

No. 28.—TWO INSCRIPTIONS OF KAMPAṆA FROM MADAM

(1 Plate)

V. VENKATASUBBA AIYAR, MADRAS

The two subjoined inscriptions A¹ and B² are engraved, one on either side of the entrance to the Southern *gōpura* in the second *prākāra* of the Taṭākapuriśvara temple at Maḍam in the Wandiwash taluk of the North Arcot District in the Madras State. Both the records are in a good state of preservation and are engraved in Tamil. One is in **prose** and the other in **verse**, but both refer to the same event.

Record A in prose, is dated in Śaka **1285**, **Śōbbakṛit** (A. D. **1362-63**) in the reign of the Vijayanagara ruler **Kampaṇa Uḍaiyar**. It states that Gaṇḍaragūḷi Mārāya-Nāyaka, son of Sōmaya-Daṇṇāyaka, captured Veṇṇumaṅkoṇḍa Śambuvarāya and Rājagambhīraṇmalai and that he celebrated the victory by constructing the *gōpura* called 'Gaṇḍaragūḷi-Mārāyanāyakkāṇ-tirukkōpuram' in the second *prākāra* of the temple of Tiruvagniśvaramuḍaiya-Mahādēva³ at Kuḷattūr. The figure of a fine **bull** facing the proper left, with a sword and crescent above and a lamp-stand in front, is carved at the left hand corner of the record. Record B without date, narrates in verse the same facts given in A with some poetical embellishments. The figure of a caparisoned **bull** with a dagger in front, pointing downwards, is engraved to the right of this record. The importance of these epigraphs lies in the historical information that they contain, viz., that Gaṇḍaragūḷi Mārāya-Nāyaka overcame the resistance put up by the Śambuvarāyas against the expansion of the Vijayanagara sovereignty by capturing Veṇṇumaṅkoṇḍa Śambuvarāya and his stronghold, the fortress of Rājagambhīraṇmalai.

Before proceeding to discuss the contents of these inscriptions it will be of interest to study how the political situation in the Tamil country was favourable for the rise to power of the Śambuvarāya family to which this Veṇṇumaṅkoṇḍa Śambuvarāya, the contemporary of Kampaṇa II belonged.

¹ No. 267 of 1919 of the Madras Epigraphical Collection.

² No. 268 of 1919 of the Madras Epigraphical Collection.

³ The god is now known as Taṭākapuriśvara. [In the two inscriptions edited below the god is called Kuḷattūr-Āḷuḍaiyār and Kuḷandai-vaḷampadiśvara, both equivalent to Taṭākapuriśvara. Kuḷandai may be taken to be the poetic form for Kuḷattūr; cf. Kaḷandai for Kaḷakkudi. (Above, Vol. XXIII, p. 283, n. 5).—Ed.]

During the last quarter of the 12th century A. D. the Chōla country stood restored to its original greatness in the time of Kulōttuṅga-Chōla III (A. D. 1173-1216), who proclaimed his conquests by assuming the titles 'Conqueror of Madura, Īlam (Ceylon), Karuvūr, Koṅgu *alias* Viraśōla-maṇḍalam,¹ Kāñchī and Vāñji.² Such wide conquests indicate the enemies that the Chōla sovereign had to encounter in order to rebuild the empire which at this period was nearly co-extensive with the present Tamil districts, including portions of the Cuddapah and Nellore Districts of the Madras State. This vast territory, for purposes of administration, was divided into a number of chiefships, each owing allegiance to the central power. Towards the close of Kulōttuṅga-Chōla's reign, we find that his kingdom, especially the northern portion, was ruled pre-eminently through the following chiefs :—

- 1 the Telugu Chōḍas of the Nellore District,
- 2 the Yādavas with their capital at Kājahasti in the Chittoor District,
- 3 the Śambuvarāyas in the North Arcot District,
- 4 the Malaiyamāṇ chiefs of Kīlīyūr in the region around Tirukkōyilūr in the South Arcot District,
- 5 the Kāḍavas who were coming into power in portions of the North and South Arcot Districts,
- 6 the Bāṇas who had settled on the banks of the southern Peṇṇār and carved out a new province called Vāṇagoppādi,
- 7 the Adigaimāns of Tagaḍūr, *i.e.*, Dharmapuri in the Salem District, and
- 8 the Gaṅgas of Kōlār in the Mysore State with their jurisdiction extending to the present North Arcot District.

To keep these disintegrating forces under control was a great task, but the chiefs, when opportunities offered themselves, seem to have consolidated their position, independent of the central power, by entering into pacts or alliances with one another. In the time of Kulōttuṅga-Chōla himself we find several such pacts³ entered into by some of them. Since we are chiefly concerned with the Śambuvarāyas, we shall see what part they played in strengthening their position in the country when events were slowly drifting towards the collapse of the central power culminating in the imprisonment of the Chōla monarch Rājarāja III (A. D. 1216-1248) by one of his own subordinates, the Kāḍava chief Kōpperuñjīṅgadēva I.

The Śambuvarāya⁴ chiefs whose records are found in portions of the Chingleput, North and South Arcot Districts are said to have belonged to the Śēṅgēṇi⁵ family which was also otherwise known as Śambhukula.⁶ The earliest member hails from Muñṇūruppaḷli in Ōymā-nāḍu.⁷ These chiefs figure as vassals in Chōla records from the time of Vikrama-Chōla (A. D. 1118) onwards, while some later members, to judge from their surnames, such as Kulaśēkhara Śambuvarāya and Sundara-Pāṇḍya Śambuvarāya, should have changed their allegiance to the Pāṇḍyas, evidently due to political exigencies. Most of these chiefs have surnames like *Nālāyiravaṇ*,

¹ No. 227 of 1917.

² *Pudukkōttai Inscriptions*, No. 164.

³ Nos. 516 of 1902, 107 and 115 of 1900 ; 223 of 1904 ; 483 of 1908 ; 435 of 1913 ; 254 of 1919 ; 56 of 1922 ; 73 of 1945-46.

⁴ The Śambuvarāyas belong to the Vaṇṇiya sect which is found in portions of Tanjore and South Arcot Districts. Some members of this sect at Conjeeveram even now have the title Vira Śambhu (*Varuṇatarppaṇam* by Munisami Nayakar, pp. 225 and 235).

⁵ Śēṅgēṇi seems to be a village from the title Śēṅgēṇimaṅgala-miṭṭān (who rescued Śēṅgēṇimaṅgalam) assumed by a Śambuvarāya chief (No. 189 of 1918).

⁶ A village called Śambukulaperumāl-agaram was evidently founded by a member of the Śambuvarāya family (*S. I. I.*, Vol I, pp. 102 and 105). In Sanskrit the form Champa is found for Śambhu.

⁷ No. 422 of 1922.

Ammaiyappaṇ, *Attimallaṇ*,¹ or *Attiyāṇḍāṇ*. The epithet 'Nālāyiravaṇ' i. e., '(the Commander) of the Four thousand' seems to indicate the original connection these chiefs had with a body of soldiers consisting of 4,000 members. One such was known as 'Miṇavaṇai-veṇ-kaṇḍāṇ Vikramaśōḷandāya-Vēlaikkārar', which name suggests his active part in a conflict with the Pāṇḍyas.² The Śambuvarāyas worked their way up by service to their overlords in the latter's military campaigns. Their exploits are revealed by the several titles assumed by them such as *Pāṇḍi-nāḷu-koṇḍa* (who took the Pāṇḍya country), *Taṇiṇṇrāṇ* (who conquered single), *Śeṇṇadiśai-veṇrāṇ* (who conquered in every direction he went), *Śeyyārriḷ-veṇrāṇ* (who conquered at Śeyyāru), *Palavāyuda-vallavaṇ*³ (adept in wielding various weapons), *Taṇ-vaśi kāṭṭuvāṇ* (who shows his sword)⁴ and *Veṇṇumaṇkoṇḍa* (who took the earth by conquest).⁵ They also endeared themselves to the people by charitable acts like founding villages, constructing tanks and building temples.⁶ It is worthy of note that some of these chiefs called themselves **Pallavas**. They also shared the titles of Kāḍava Kōpperuṇjīṅga such as Ālappirandāṇ,⁷ Āḷagiya-śīyaṇ⁸ and Āḷagiya Pallavaṇ,⁹ or Pallavāṇḍāṇ. These common titles suggest an affinity between the Śambuvarāyas and Kōpperuṇjīṅgadēva, but whether the relationship was only political and not matrimonial¹⁰ has yet to be established. From the figure of a bull engraved by the side of each of the two inscriptions under review, it is evident that the Śambuvarāyas adopted the bull as their insignia. As noted before, these chiefs allied themselves with other chieftains like the Bāṇas, the Adigaimāns and the Kāḍavas, and even against some rival members of their own family for securing territorial rights and for offensive and defensive action. They gradually assumed such importance that Ediriliśōḷa-Śambuvarāya, a member of this family, was so perturbed by the presence of a foreign army in the land that he sought supernatural intercession to avert the disaster threatened by the Singhalese invasion in the time of Rājādhirāja II.¹¹ Later members of this family seem to have thrown in their weight against the Muhammadan expansion in the south,¹² which was perhaps the occasion¹³ for their assuming independence with the titles *Sakalālōkachakravarti* and *Veṇṇumaṇkoṇḍāṇ*, and later we find them issuing records in their own

¹ It is not clear whether the title *Attimallaṇ* is to be traced to the village Attiyūr, i. e., Little Conjeeveram (S. I. I. Vol. IV, No. 849) or Atti in the North Arcot district. This title was also borne by the Malaiyamān chiefs of Kiliyūr (S. I. I., Vol. VII, No. 1022; Nos. 411 of 1909, 311 and 322 of 1921).

² *Minavaṇai-veṇ-kaṇḍāṇ* means 'he who saw the back of the Miṇavaṇ i. e., Pāṇḍya' (No. 389 of 1922). Rājārāja-Śambuvarāya's grand-father claims to have conquered the Pāṇḍya country (No. 222 of 1904).

³ Nos. 181 and 184 of 1939-40.

⁴ S. I. I., Vol. I, pp. 87-88.

⁵ A record of Rājanārāyaṇa (No. 59 of 1933-34—A. D. 1340) mentions a chief named 'Sōnāḍu-koṇḍa Śambuvarāya. It has been suggested in the *An. Rep. on Epy.* for 1934, p. 37 that this title was probably assumed by some earlier chieftain in commemoration of his having won independence from the Chōlas.

⁶ No. 422 of 1922.

⁷ No. 353 of 1923.

⁸ Nos. 106 of 1912 and 487 of 1921.

⁹ Nos. 52 of 1919 and 428 of 1922; S. I. I., Vol. III, p. 123.

¹⁰ No. 435 of 1913 styles Kāḍava as 'brother-in-law', without specifying the person to whom he was so related. An inscription from Vaḷuvūr (No. 58 of 1908) mentions Virarākkāḍa who styles himself a Pallava, though he uses the Śeṅgēni and Śambuvarāya titles. The Śambuvarāya chief Āḷagiya Śīyaṇ Śambuvarāya makes a gift to an image set up in the temple at Tiruveṇṇainallūr in the name of the mother of Āḷagiya Pallavaṇ Kōpperuṇjīṅgadēva I (S. I. I., Vol. XII, No. 170).

¹¹ No. 20 of 1899.

¹² *An. Rep. on Epy.* for 1904, para. 27.

¹³ No. 434 of 1903 from Tiruvāmāttur in the South Arcot District dated in the 14th year of Veṇṇumaṇkoṇḍa Śambuvarāya, corresponding to A. D. 1335-36 refers to an invasion of the *Turukkar*, i. e., Muhammadans which took place in previous days and to the ruin in the country, brought about by the invasion. The relevant portion of the inscription reads: 'muṇṇāḷ Turukkar vandu tiruvāśalgaḷum niraīyal kulaindu dēśamum aḷindu kiḍakkaiyir, etc.

names, quoting their own regnal years. Prominent among them were Veṅṟumaṅkoṇḍa-Śambuvārāya and his son Rājanārāyaṇa Śambuvārāya. These were apparently the latest members of this family with any real independent power.

For purposes of reference and study the names of the several members of this family so far known are given in an appendix at the end of this article, though no regular sequence or actual relationship among the different members can at present be established.

Veṅṟumaṅkoṇḍa Śambuvārāya and his son Rājanārāyaṇa Śambuvārāya are known to have ruled from A. D. 1322¹ to 1339² and from A. D. 1337³ to 1362-63⁴ respectively. The records of the former who is also called Ēkāmbaranātha, are found in the Chingleput, North and South Arcot Districts. The latest regnal year known for him is 18.⁵ He died by the 3rd year of his son Rājanārāyaṇa Śambuvārāya, corresponding to A. D. 1340.⁶ The present inscription is dated in Śaka 1285, Śōbhakṛit (A. D. 1363-64). Since Veṅṟumaṅkoṇḍa Śambuvārāya was long since dead, the victory claimed over Veṅṟumaṅkoṇḍa⁷ in our inscription must evidently refer to a victory over his son Rājanārāyaṇa, whose rule, as noted above, extended to A. D. 1362-63. According to the Sanskrit poem *Madhurāvijayam* or *Kamparāya-charitram* composed by Gaṅgādēvī, the queen of Kampaṇa, it is stated that after besieging and reducing the citadel of Rājagambhīra, Śambuvārāya was captured and killed. This fact receives corroboration in the main from other literary works, such as the Telugu poem *Jaimini-Bhāratam* of Pillalamarṛi Pinavīrabhadra and the Sanskrit poems, *Sāḷuvābhyudayam* of Rājanātha-Diṇḍima and *Rāmābhyudayam* of Sāḷuva Narasimha.⁸

It must be noted that Gaṅgādēvī⁹ does not allude to the restoration of Śambuvārāya, but *Jaimini-Bhāratam* refers to his establishment in the kingdom by Sāḷuva Maṅgu, the general of Kampaṇa.¹⁰ Since after his overthrow in 1362-63 A.D.¹¹ Śambuvārāya's inscriptions are not found,

¹ No. 29 of 1933-34 giving Śaka 1260 with 17th regnal year. His accession is placed between May 11, A. D. 1322 and May 10, A. D. 1323 (above, Vol. XI, p. 251).

² No. 48 of 1921 dated in the 18th regnal year (No. 45 of 1900 and 49 of 1921).

³ No. 30 of 1890 and No. 42 of 1900 giving Śaka 1268, Vyaya with 9th regnal year. His accession is placed between July 31, A. D. 1337 and March 24, A. D. 1338.

⁴ No. 162 of 1940 giving [2] 6th year with Śaka 1284, Śubhakṛit.

⁵ His inscriptions with regnal years begin only from his 14th (A. D. 1335-36) and run up to 18th year (A. D. 1339-40). In the earlier part of his reign, he seems to have had very little power, consequent on the Muhammadan occupation of the country.

⁶ His ashes were thrown into the Ganges and arrangements were made for the funeral rites to be performed at Gayā (Nos. 32, 33 of 1933-34).

⁷ A *maṇḍapa* in the Śiva temple at Vaḷaiyāttūr (North Arcot Dist.) is known as Veṅṟumaṅkoṇḍāṇ-maṇḍapa, evidently after the name of this chief (*An. Rep. on Epy.* for 1933-34, p. 36).

⁸ *An. Rep. on Epy.* for 1928, page 33; *Sources of Vij. History*, p. 50.

⁹ According to the *Madhurāvijayam*, 'Kampaṇa set out from Vijayanagara with an army through Muḷbāgal and reached Viriñchipuram on the Pālār, which he made the basis of his operations. He entered the Śambuvārāya country, defeated its king in a battle and having proceeded to his capital, captured it. He then pursued Śambuvārāya to the fort of Rājagambhīra where he had taken refuge. He invested the fort, put the Śambuvārāya to death in a duel and captured it. On the death of their king, the subjects of Śambuvārāya submitted to Kampaṇa who having made Kāñchi his capital, according to the behest of his father, began to rule from the erstwhile Śambuvārāya country' (*Jl. of the Madras University*, Vol. XI, No. 1, p. 61f).

¹⁰ The *Jaimini-Bhāratam* states that Sāḷuva Maṅgu defeated the Sultān of the South and thereafter gave his territory to Śambuvārāya, establishing him on the throne (*Sources of Vij. His.* p. 29). But *Rāmābhyudayam* mentions that Sāḷuva Maṅgu, after defeating Champarāya, proceeded against the Southern Sultān who had his headquarters at Madura. There, a hard battle was fought in which the Sultān lost his life (*ibid.*, p. 32). But *Madhurāvijayam* is clear on the point. Gaṅgādēvī here states that Kumāra Kampaṇa first overthrew the authority of Śambuvārāya and occupied his territory before he proceeded against the Sultān of Madura.

¹¹ In the very year Śōbhakṛit, the date of our record, the written order of Rājanārāyaṇa Śambuvārāya in connection with worship in the temple at Taiyūr (Chingleput Dist.) was issued by Sōmaya-Daṇṇāyaka, the *mahā-pradhāni* of Kampaṇa, evidently for being carried out, thus indicating the end of the rule of Rājanārāyaṇa Śambuvārāya (A. R. No. 226 of 1916).

the restoration of this chief, if it really took place, must refer to a prior event. The *Sāluva Mahyudaya* explicitly states that Sāluva Maṅgu first subjugated the Śambuvarāya and then restored him to his kingdom. The inscriptions of Rājanārāyaṇa Śambuvarāya dated from his 14th to 26th regnal years (A. D. 1351 to 1362) are found all over the Chingleput and the North and South Arcot Districts along with a few of those of Bukka, Kampana and Śāyaṇa-Uḍaiyar, in this region. At Āvūr in the North Arcot District, there are inscriptions of Kampana with dates corresponding to A. D. 1352 and 1358 and of Rājanārāyaṇa Śambuvarāya dated in his 23rd regnal year (A. D. 1360), showing Kampana's authority, perhaps in a nebulous state in the region even during the regime of Rājanārāyaṇa Śambuvarāya.¹ The existence of these inscriptions presupposes good relationship between Śambuvarāya and the Vijayanagara rulers, for which Sāluva Maṅgu must have been responsible, considering the title 'Śambuvarāya-sthāpanāchārya' assumed by him. Whether Rājanārāyaṇa was a subordinate of Kampana is not clear; but inscriptional evidence points to his rule as an independent chief either with or without the cognizance of Kampana.

The capture of Madura from the Muhammadans and the establishment of a viceroyalty there under Kampana, son of Bukka, may be said to mark the foundation of the Vijayanagara rule in the Tamil country. The first opposition to the expansion of this rule probably came from the

¹ In the Tamil country Kampana's inscriptions are found in the following places prior to Ś. 1285, the date of our record, in some of which, Rājanārāyaṇa Śambuvarāya's inscriptions are also found:

Place.	Kampana's date.	Reference.	R. Śambuvarāya's regnal year.	Reference.
1 Āvūr	Ś. 1274, Nandana = A. D. 1352.	No. 297 of 1919 .	23rd =A. D. 1360 . 24th =A. D. 1361 .	Nos. 306 and 307 of 1919.
2 Ditto	Viḷambi =A. D. 1358-59.	Nos. 304 and 305 of 1919.
3 Arakaṇḍanallūr	Vikārin =A. D. 1359-60.	No. 193 of 1935 .	19th =A. D. 1356 .	No. 131 of 1935.
4 Achecharapākkam	Ś. 1283, Pḷava =A. D. 1361.	No. 250 of 1901 .	18th =A. D. 1355 .	No. 260 of 1901.

It is noteworthy that in portions of the present South Arcot District, immediately after the disappearance of Śambuvarāya, no chief is recognised, as some of the records do not mention the king. No king is mentioned in the following records:

Village.	Date.	Reference.
a Elavānāśūr	Śaka 1284, Śubhakṛit	No. 480 of 1938.
b Tirunaṇḱonrai	Śaka 1283, Do.	Nos. 303 and 304 of 1939-40.
c Varaḷjaram	Śaka 1287	No. 181 of 1940-41.
d Nallūr	Śaka 1287	No. 163 of 1940-41.

Śambuvarāyas who were in power in the Tondaimaṇḍalam region comprising the present Chingleput, and North and South Arcot Districts. Our present inscriptions state how this was overcome by capturing the Śambuvarāya *alive*. After the subjugation of this chief Kampaṇa felt himself so secure in the Tamil country that in an inscription dated in Śaka 1287 from Tiruppukkuḷi in the Chingleput District, he is stated to be ruling from his 'permanent throne' after taking possession of Rājagambhīra-rājya.¹ His inscriptions in the Tamil country are generally found from Śaka 1280² to Śaka 1296.³ Kampaṇa is chiefly remembered in history for his services in checking the expansion of the Muhammadan rule in the south and for liquidating its power in the Tamil country.⁴ An inscription from Tirkkaḷākkūḍi⁵ in the Ramnad District thus narrates his exploits: 'the times were *Tulukkaṇ* (Muhammadan) times. Kampaṇa-Uḍaiyar destroyed the *Tulukkaṇ*, established orderly government throughout the country and appointed many chiefs (*nāyakkamār*) for inspection and supervision in order that worship in all temples might be conducted regularly as of old.' In this move to eliminate the threat to Hindu religion, Kampaṇa must have received full local support which indirectly paved the way for the expansion of the Vijayanagara rule in the Tamil land without any serious opposition except that offered by the Śambuvarāya chief. The causes for the invasion⁶ and defeat of this chief are nowhere stated. Probably he wanted to free himself from the Vijayanagara power. The Śambuvarāyas ceased to count as a power after their subjugation by Kampaṇa and even individual members of this family are not heard of thereafter as holding any important position in the state under the Vijayanagara rulers.

Of the persons mentioned in the present records, Sōmaya-Daṇṇāyaka was the chief minister (*Mahā-pradhāni*) of Kampaṇa. He figures as *pradhāni* from about Śaka 1274⁷ and continued to serve under Harihara⁸ and Viruppaṇa.⁹ He was so devoted to Kampaṇa that he is said to have made provisions for worship in the temple at Śērkaḍu in the North Arcot District, for the continuity of the rule of this prince.¹⁰ Judging from the title *Saṅgīta-sāhityārṇava* and *Gāna-parama-māhē-*

¹ S. I. I., Vol. VI, No. 454.

² No. 304 of 1919, dated in Viḷambi (= Śaka 1280). There are, however, a few records dated Śaka 1274, Nandana at Āvūr (No. 297 of 1919) and at Ulapādu (No. 172 of 1933-34).

³ Kampaṇa seems to have died in Śaka 1296, since a record of this year makes provision for the recitation of the Vēda daily in the temple at Tiruvaṇṇāmalai as *Śrāddhāṅgam* for the merit of (the deceased) Kampaṇa (No. 573 of 1902; vide also No. 572 of 1902). Strangely enough there are two records of Kampaṇa, dated beyond Śaka 1296: one from Brahmadēśam, dated in Raudri corresponding to Śaka 1302 (No. 207 of 1921), and the other from Āragalūr, dated in Śaka 1297 (No. 431 of 1913).

⁴ An inscription from Śrīraṅgam (No. 55 of 1892) states that the images of god Raṅganātha and of his two consorts Śrīdēvi and Bhūdēvi were recovered from the *Tulushkas* (Muhammadans) during the reign of Kampaṇa and restored to the temple at Śrīraṅgam by Goppanārya, an officer of the king in Śaka 1293. The temple of Pōśa-liśura-oḍaiyanār at Kaṇṇanūr (Trichinopoly District) which had been converted into a mosque by the *Tulukkar* was reconsecrated by Kampaṇa in the course of his victorious campaign (No. 162 of 1936-37). The period of anarchy under Muhammadan rule in South India is stated as 40 years in a stone record from Iṇṇambūr in the Tanjore district (No. 322 of 1927). Whatever might have been the exact period of this rule, people were anxious to get rid of it, because it was characterised by cruelty, loot and massacre. The devastation and ruin caused in the country by the Muhammadan invasion is also referred to in inscriptions from Tiruvāmāttūr (South Arcot Dist.) No. 434 of 1903, Tirukkaḷār (Tanjore Dist.) No. 642 of 1902, Tirupputtūr (Madura Dist.) Nos. 119 and 120 of 1908 and Tiruvorriyūr (Chingleput Dist.) No. 203 of 1912.

⁵ No. 64 of 1916.

⁶ In the expedition against Śambuvarāya, minister Gōpanārya and Sāluva-Maṅgu, the ancestor of Sāluva Narasiṁha took part (*Sources of Vij. History*, p. 29). It has been noticed above that Sāluva-Maṅgu assumed the title 'Śambuvarāya-sthāpanāchārya' and an inscription from Villianūr gives him also the title 'Gandara-guḷi' (No. 191 of 1936-37). The title 'Śambuvarāya-sthāpanāchārya' was assumed by later members of the Sāluva family, namely Sāluva Tirumalaidēva-Mahārāja in Śaka 1370, Prajāpati (wrong) (No. 448 of 1922) and Sāluva Saṅgamadēva-Mahārāja in Śaka 1403 and 1408 (Nos. 593 and 594 of 1902), even though the Śambuvarāyas had ceased to exist as a ruling power by this time.

⁷ No. 221 of 1931-32.

⁸ No. 297 of 1919.

¹⁰ No. 203 of 1921.

⁹ No. 51 of 1913 dated in Śaka 1306.

śvara given to him,¹ he seems to have been proficient in music. His name was perpetuated by the institution of a service named after him in the temple of Aḷagiya-Nāyaṇār at Tiruvāmattūr in the South Arcot District,² and by the village Śāttampāḍi in the same district being known after him as Sōmappa-Daṇṇāyaka-chaturvēdimāṅgalam.³

His son Gaṇḍaragūḷi Māraya-Nāyaka, according to our inscription, was directly responsible for the defeat and capture of Veṅṇumaṇkoṇḍa Śamburvarāya, for which he received Aṇṇamaṅgalap-paṇṇu as *kāṇṇi* from the king. He is given the title 'Aliyā-araṇ-aḷitta' *i.e.*, destroyer of indestructible fortress,⁴ evidently for taking the impregnable fortress of Rājagambhīraṇmalai. He made gifts in the name of his father at Śāttampāḍi⁵ and Peruvaḷūr,⁶ both in the South Arcot District. He also figures as donor in an inscription from Sattravēḍu in the Chittoor District.⁷ The title 'Gaṇḍaragūḷi' assumed by him was also borne by a Śamburvarāya chief.⁸ There seems to have been a *maṭha* in existence at Maḍam itself named after Gaṇḍaragūḷi Māraya-Nāyakkar.⁹ His brother was Dharaṇi-Appar figuring in a record from Peruvaḷūr.¹⁰

The territorial division Aṇṇamaṅgalap-paṇṇu was situated in the district of Palkuṇṇa-kōṭṭam,¹¹ in the sub-division Śīṅgapura-vaḷanāḍu included in Jayaṅkoṇḍaśōḷa-maṇḍalam.¹² It included the modern villages of Dēvaṇūr¹³ and Gaṅgāpuram¹⁴ in the Ginji taluk of the South Arcot District and may be taken as roughly comprising a portion of this taluk.

Rājagambhīraṇmalai has been identified with Paḍaiviḍu in the North Arcot District.¹⁵ Atti¹⁶ in the Cheyyar taluk and Dēvikāpuram¹⁷ in the Arni division were situated close to it and Vaḍa-Mahādēvamaṅgalam¹⁸ in the Polur taluk was situated within its jurisdiction.

The *gōpura* in the second *prākāra* of the Taṭākapurīśvara temple at Maḍam is said in our inscriptions to have been built by Gaṇḍaragūḷi Māraya-Nāyaka in Śaka 1285, Śōbhakṛit; but in an inscription¹⁹ dated in the next year Krōdhi, corresponding to Śaka 1286, the walls of this *prākāra* are stated to have been raised by Tirunallikilāṇ Nallakambaṇ Teṇṇavarāyaṇ of Iḷaṅgāḍu. A record without date in the same *gōpura* mentions that this structure and the doorway were the gifts of Tūṇāṇḍār Āṇṇūḷār.²⁰ Probably this refers to the renovation or the completion of the *gōpura* referred to in our inscriptions.

² The letters *t-tō*, originally engraved, have been corrected on the stone into *yē*; *yēnnūt-taiṇju* is not the correct form; it must be *yēnbattaiṇju*.

³ Against ll. 1 to 5 is engraved a fine bull in relief, facing the proper left, with a sword and crescent above and a lamp-stand in front of the animal.

⁴ No. 268 of 1919.

⁵ The word *maṇi* is engraved below the line.

⁶ The letter *va* is engraved below the line.

⁷ To the proper right of this record is engraved the figure of a caparisoned bull with a dagger in front, pointing downward.

TRANSLATION

(Ll.1 to 5). While the goddess of prosperity who is resplendent on the lotus flower was adorning gracefully (*his*) chest wreathed with fragrant garlands, while (*he*) was conquering in all directions in which (*he*) proceeded, while the goddess of victory was seated on (*his*) shoulders, while (*his*) enemies worshipped at (*his*) feet, while Bukkaṇa who is praised by all the world (*girt round by*) the cloud-capped Vālagiri and Kampaṇa who bestows gifts like a rain cloud, showered their praises, while the feudal chiefs extolled (*him*), while great poets sang about (*his*) prowess, while all who saw were pleased, while *Kali* came to an end on the earth,

(Ll.5 to 6) (*he*) destroyed many fortresses of Champaṇ, and captured Champaṇ himself and mounted on a fierce steed, conquered many other petty chieftains,

(L.6) And, while Sōmaya-Daṇṇāyaka, who is equalled only by himself, was pleased in mind,

(Ll.7 to 8) (*he*), Mārappaṇ, who protected the earth (*and who was called*) Mūvarāyara-gaṇḍaṇ, who does not swerve from the path of justice (*and*) Gaṇḍaragūḷi whose broad palm wields a streaked javelin and whose feet have sounding (*anklets*), (*and*) who through the grace (*of the king*) had received as *kāṇi* Aṇṇamaṅgalap-paṇṇu surrounded by walls of red jewels,

(Ll.8 to 10) having worshipped at the beautiful flower-like feet of god Īśa at the fertile Kuḷandai, who is adored by the tall Viṣṇu, god Brahmā and the lord of the celestials (Indra), built this *gōpura*.

Those that adore (*it*) will become immortals.

APPENDIX

ŚAMBUVARĀYA CHIEFS KNOWN SO FAR

For the sake of brevity the following abbreviations are used in the list given below.—**S.**—for Sambuvarāyaṇ, **N.**—for Nālayiravaṇ, **Am.**—for Ammaiyaṇ, **Śeṅg.**—for Śeṅgeṇi and **Atti.**—for Attimallaṇ.

In the last column, references are to numbers and years of the *Madras Epigraphical Report*; thus 422/1922 refers to inscription No. 422 given in the *Madras Epigraphical Report* for the year 1922.

For possible identification and study, different names adopted by chiefs are grouped together and shown below in sub-numbers *a, b, c*, etc. under each main number.

No.	Name of Chief.	Overlord.	Regnal Year.	Equivalent A. D. date.	Place.	Reference and Remarks.
1	Am. S.	Vikrama-Chōla .	5	1123	Tiruvallam .	232/1921.
a	Śeṅg. S. N. Am. <i>alias</i> Rājendra-Śōla-S. of Muñṇūruppalli in Oymā-nāḍu.	Ditto	11	1129	Vāyalūr . . .	422/1922. Begins with the introduction 'pū-mādu puṇara'. The chief constructed tanks, built temples and protected people from occasional dangers and thus won popular support.
b	Śeṅg. N. Am.	Ditto	15	1132-33	Madhurāntakam .	400/1922. Begins with the introduction 'Pū-mādu puṇara'.
c	Śeṅg. N. Am. <i>alias</i> Rājendraśōla-S.	Ditto	16	1133	Śiyamaṅgalam .	63/1900.
	Ditto	Kulōttunga-Chōla II .	5	1138	Maḍam	234/1919.
	Ditto	Ditto	8	1141	Devanūr	298/1929.
	Ditto	Ditto	14	1146	Ditto	302/1929.
d	Śeṅg. Am. Atti. <i>alias</i> Rājendraśōla-S.	Rājarāja II . . .	4	1150	Maḍam	238/1919. Title N. omitted and Atti. used.
e	Śeṅg. Atti. <i>alias</i> Rājendraśōla-S.	Rājādhirāja II . .	11	1174	Ditto	252/1919 and 100/1939-40. (<i>Vide</i> 3c below.)
2	Ediriśōla-S.	Kulōttunga-Chōla II .	6	1139	Tirukkalukkuṇṇam .	162/1932-33.
3	Am. Śyaṇ. Pallavāṇḍaṇ <i>alias</i> Rājanārāyaṇa-S.	Rājarāja II . . .	10	1156	Muṇṇūr	52/1919.
	Ditto	Ditto	15	1161	Ānandamaṅgalam .	428/1922. Begins with the introductory 'Pūmaruviya'.

APPENDIX—*contd.*

No.	Name of Chief.	Overlord.	Regnal Year.	Equivalent A. D. date.	Place.	Reference and Remarks.
a	Rājānārāyaṇa-S. of the Śeṅg- gēni family.	Rājārāja II . . .	18	1164	Acheharapākkam .	244/1901.
b	Śeṅg. Am. Śiyan Pallavāṇḍān <i>alias</i> Rājānārāyaṇa-S.	Rājādhirāja II . . .	11	1174	Munṇūr . . .	71/1919.
c	Śeṅg. Miṇḍaṇ Śiyan Pallavāṇ- ḍān <i>alias</i> S.	Ditto . . .	11	1174	Maḍam . . .	252/1919. Chief joins Śeṅg. Atti. <i>alias</i> Rājendraśōla-S. and Ōḍuvān <i>alias</i> Rāja- gambhira-S. against Attiyāṇḍān <i>alias</i> Vikramasōla-S. Vide 100/1939-40 and No. 5a below.
4	Śeṅg. Miṇḍaṇ Śiyan Atti. S. .	Kulōttunga-Chōla II (?).	8	1141	Tiruvallam . . .	S. I. I., Vol. III, p. 121. His connection with 3c is not clear.
a	Miṇḍaṇ Śiyan Am. <i>alias</i> Edirilīśōla-S.	Rājārāja II . . .	15	1161	Vāyalur . . .	421/1922.
b	Śeṅg. Am. S.	Rājādhirāja II . . .	4	1166	Tiruppulivaṇam .	393/1923. Identification not clear.
c	Edirilīśōla-S.	Ditto . . .	5	1168	Ārpākkam . . .	20/1899.
d	Śeṅg. Miṇḍaṇ Śiyan Am. <i>alias</i> S.	Ditto . . .	8	1171	Araganḍanallūr .	179/1935.
e	Śeṅg. Miṇḍaṇ Atti. S. . . .	Kulōttunga III . . .	8	1186	Tiruvallam . . .	301/1897 : S. I. I., Vol. III, No. 60.
5	Attiyāṇḍān, son of Śeṅg. Virāṇ- ḍān.	Rājādhirāja II . . .	4	1167	Tiruvottiyūr . . .	76/1900 : S. I. I., Vol., VII, No. 84.
a	Attiyāṇḍān <i>alias</i> Vikramasōla- S.	Ditto . . .	11	1174	Maḍam . . .	Compact formed <i>against</i> the chief by (1) Śeṅg. Miṇḍaṇ Śiyan Pallavāṇḍān <i>alias</i> S. (2) Śeṅg. Atti. <i>alias</i> Rājendraśōla-S. and (3) Ōḍuvān <i>alias</i> Rājagambhira-S. (<i>vide</i> 3 c above).

6	Am. Pāṇḍināḍu-konḍaṇ <i>alias</i> Kaṇḍar Sūriyaṇ-S.	Ditto . . .	7	1170	Tiruvakkarai . . .	195/1904.
a	Śoṅg. Am. Pāṇḍi <i>alias</i> Rājārāja-S.	Rājakesari Rājādhirāja II.	13	1176	Mēśēvūr . . .	222/1904. Mentions S.'s grandfather Am. Kulamāṇikkam who claims to have 'conquered the Pāṇḍya Country'.
b	Śoṅg. Atti. Am. . . .	Virarājendra-śōladēva	2	1179	Tiruvottiyūr . . .	80/1900 : S. I. I., Vol. VII, No. 88. Identification not clear.
c	Am. Gaṇḍar Sūriyaṇ-S. 'who took the Pāṇḍya Country'.	Kulōttuṅga-Chōḷa III	2	1179	Tiruvakkarai . . .	190/1904.
d	Am. Pāṇḍi <i>alias</i> Rājārāja-S. . .	Parakēśari Kulōttuṅga-Chōḷa.	16	1194	Ditto . . .	194/1904.
e	Am. Pāṇḍināḍu-konḍaṇ <i>alias</i> Rājārāja-S.	Ditto . . .	4	1182	Brahmadēsam . . .	167/1918.
f	Am. Pāṇḍināḍu-konḍaṇ Kaṇḍar Sūriyaṇ <i>alias</i> Rājārāja-S.	Virarājendra-Chōḷa . . .	4	1182	Ditto . . .	176/1918. Asterism <i>Aviṣṭam</i> given for the chief.
g	Śoṅg. Am. Pāṇḍināḍu-konḍaṇ Gaṇḍaragūḷi <i>alias</i> Rājārāja-S.	Kulōttuṅga-Chōḷa III	6	1184	Enṇāyiram . . .	345/1917.
h	Śoṅg. Am. Rājārāja-S. 'who took the Pāṇḍya Country'.	Ditto . . .	12	1190	Acheharavākkam . . .	239/1901, S. I. I., Vol. VII, No. 453.
i	Rājārāja-S. <i>alias</i> Gaṇḍar Sūriyaṇ.	Ditto . . .	13	1191	Mēśēvūr . . .	223/1904. Two chiefs pledged themselves to be loyal to this chief.
j	Am. Gaṇḍar-Sūriyaṇ <i>alias</i> S. . .	Ditto . . .	14	1192	Perumāṇḍūr . . .	219/1902 : S. I. I., Vol. VII, No. 846.
k	Pāṇḍināḍu-konḍaṇ <i>alias</i> S. . .	Ditto . . .	18	1196	Brahmadēsam . . .	183/1918 : chief constructed the <i>gōpura</i> .
l	Śoṅg. Am. Rājārāja-S. . .	Rājārāja III . . .	27	1205	Tiruvannāmalai . . .	516/1902 : S. I. I., Vol. VIII, No. 106. Chief enters into a pact with Śoṅg. Atti. Virarājendra <i>alias</i> Eṭṭirilśōla-S. and Atti. Pallavāṇḍaṇ <i>alias</i> Kulōttuṅga-śōla-S. and seven others against three chiefs (See No. 8c below).
m			13	1229	Munṇūr . . .	57/1919 : This record extends the life of the chief to over 50 years, if he is taken as identical with No. 6. The omission of the title 'Pāṇḍināḍu-konḍaṇ' must be noted.

APPENDIX—contd.

No.	Name of Chief.	Overlord.	Regnal Year.	Equivalent A. D. date.	Place.	Reference and Remarks.
7	Śeṅg. Am. <i>alias</i> Kaṇṇaiyaperumāl <i>alias</i> Vikramaśōla-S.	Kulōttuṅga-Chōla III	10	1188	Ammunḍi near Virū-chipuram.	<i>S. I. I.</i> , Vol. I, p. 136.
a	Ditto	Ditto	10	1188	Śōlapuram	343/1912, <i>vide</i> also <i>S. I. I.</i> , Vol. III, p. 208.
	Ditto	Ditto	11	1189	Tiruvallam	<i>S. I. I.</i> , Vol. III, No. 61.
	Ditto	Ditto	13	1191	Tiruvapṇāmalai	553/1902.
	Ditto	Ditto	13	1191	Tiruveṇṇainallūr	422/1921.
	Ditto	Ditto	13	1191	Kāñchipuram	620/1919.
b	Śeṅg. Am. Viramiṇḍan <i>alias</i> Atti. Vikramaśōla-S.	Ditto	12	1190	Kāvērippakkam	405/1905. Chief probably same as Viramiṇḍan against whom a pact was formed, by Śeṅgēni Miṇḍan Śiyaṇ in 3-c above; 252/1919.
c	Śeṅg. Am. Atti. <i>alias</i> Vikramaśōla-S.	Ditto	20	1198	Chengam	115/1900 : <i>S. I. I.</i> , Vol. VII, No. 127. Chief enters into a compact with Karikāśōla Aḍaiyūr Nāḍālvāṇ mentioned below for concerted action, either friendly or otherwise, towards Piranda-Perumāl <i>alias</i> Rājārāja Adigaimāṇ.
	Ditto	[No king]	Ditto	107/1900 : <i>S. I. I.</i> , Vol. VII, No. 119. Compact between (1) Vikramaśōla-S. (2) Karikāśōla-Aḍaiyūr Nāḍālvāṇ and (3) Viḍuḡalegiya-Perumāl <i>alias</i> Rājārāja Adigaimāṇ against (1) Yāda-varāyar (2) Śiya Gaṅgar and (3) sons of Kulōttuṅgaśōla-S. One condition of the compact was all to recognize the territorial boundary of each as it stood in the time of Rājārjadēva.
8	Śeṅg. Virāśōlan Atti. <i>alias</i> Kulōttuṅgaśōla-S.	Kulōttuṅga-Chōla III.	11	1189	Maḍam	254/1919. Compact with Kūḍal Araśā-nārāyanan Aḷappirandān <i>alias</i> Kāḍavarāya against Aḷappir : āṇ Eḍiri-ḷiśōla-S.

a	Attī Kāṭṭuṅgaśōla S. . .	Ditto . . .	I[5]	1193	Acheharapākkum .	240/1901 ; S. I. I., Vol. VII, No. 454.
b	Piḷḷavār Kulōttuṅgaśōla-S.	Ditto . . .	20	1198	Śiyamaṅgalam .	61/1900 ; S. I. I., Vol. VII, No. 65.
	Ditto . . .	Ditto . . .	24	1202	Ditto . . .	62/1900 ; S. I. I., Vol. VII, No. 66.
c	Attī. Pallavāṇḍāṇ alias Kulōttuṅgaśōla-S.	Kulōttuṅga-Chōla . .	27	1205	Tiruvannāmalai .	516/1902 ; S. I. I., Vol. VIII, No. 106. Compact with (1) Pāṇḍinādu-Koṇḍāṇ alias S. (2) Śeng. Atti. Virāṇḍāṇ alias Ediriliśōla-S. and 7 others against (1) Maḡadai-Nāḡalvāṇ alias Vāṇakōvaraiyaṇ (2) Kulōttuṅgaśōla-Vāṇakōvaraiyaṇ and (3) Rājārājā-Kāḡavaraiyaṇ (see No. 6k above). The chief is probably related to No. 3 above, judging from the title 'Pallavāṇḍāṇ'.
9	Śengēṇimaṅgalamittāṇ Am. Mīttāṇ Appaṇ alias Chōlendraśinga-S.	Ditto . . .	16	1194	Brahmadēśam . .	189/1918.
19	Śeng. Virāḡkkaḡa-S. (Calls himself a Pallava).	Kulōttuṅga-Chōla III	17	1195	Valuvūr . . .	58/98. See No. 18 below.
11	Śolappiḷḷai alias Alagiyaśōla-S. son of Ammaiyaṇṇa.	Ditto . . .	27	1205	Little Kāñchi . .	36/1893 ; S. I. I., Vol. IV, No. 849.
a	Śeng. Atti. Virāṇḍāṇ alias Ediriliśōla-S.	Ditto . . .	27	1205	Tiruvannāmalai .	516/1902 ; S. I. I., Vol. VIII, No. 106. Enters compact. See Nos. 6k and 8c above.
b	Śeng. Am. Alagiyaśōlaṇ alias Ediriliśōla-S.	Ditto . . .	33	1211	Tiruvottiyūr . .	94/1900 ; S. I. I., Vol. VII, No. 103. Mentions his grand-father.
	Ditto . . .	Ditto . . .	35	1213	Āraḡalūr . .	435/1913. Compact between (1) Poṇṇarappaṇa Vāṇakōvaraiyaṇ (2) Kulōttuṅgaśōla Vāṇakōvaraiyaṇ and brother-in-law Kāḡavaraiyaṇ. The latter three chiefs pledged themselves not to be enemies of Sambuvarāya and give no shelter to offenders against him and he in turn vows to do the same. This complements compact in No. 516/1902. See Nos. 6k and 8c above.
c	Śeng. Atti. S alias Ediriliśōla-S.	Rājārāja III . .	16	1232	Tiruvottiyūr . .	89/1900.

APPENDIX—*contd.*

No.	Name of Chief.	Overlord.	Regnal Year.	Equi- valent A. D. date.	Place.	Reference and Remarks.
d	Śeng. Virāṣani Am. Tapinirru- venṇāṇ Tanyasikāttuvān Ala- giyaśōṭaṇ <i>alias</i> Ediriliśōṭa-S.	Rājarāja III . . .	22 and Ś. 1160	1238	Virūchipuram . . .	S. I. I., Vol. I, No. 59.
e	Virāṣani Am. Alagiyaśōṭaṇ <i>alias</i> Ediriliśōṭa-S.	Ditto . . .	24 and Ś. 1161	1239	Ditto . . .	<i>Ibid.</i> , No. 61.
12	Śeng. Am. Vanniyaṇṇaṇ-S. .	Tribhuvanavirādēva .	38	1215	Ilambayaṇkōttūr	234/1910; S. I. I., Vol. IV, No. 849. Refers to a former gift by the chief. Title Vanniyaṇṇaṇ, i.e., chief of Vanniyaṇ, was assumed by Periya-Uḍaiyaṇ Sarru- kkuḍādāṇ (171/1935).
13	Alagiyaśāṇ-S. . . .	Ditto . . .	35	1213	Tiruvēṇṇainallūr	S. I. I., Vol. XII, No. 170. This record was recopied in the 11th year of Kōpperuñ- jiṅgādēva.
a	Śeng. Alagiyaśāṇ, son of S. Pallavāṇḍār.	Rājarāja III . . .	13	1228	Tiruvottiyūr . . .	106/1912; Probably son of No. 3 above.
b	Alagiyaśāṇa <i>alias</i> Alagiyaśōṭa-S. son of Pallavāṇḍār Edirili- śōṭa-S. one of the Śengēṇi chiefs.	Ditto . . .	15	1231	Madhurāntakam	393/1922.
14	Tribhuvanavira-S. . . .	Rājarāja III . . .	14	1230	Ditto . . .	406/1922.
15	Śeng. Virapperumāl <i>alias</i> Kulōttungaśōṭa-S.	Ditto . . .	17	1233	Vaḷuvūr . . .	57/1908; cf. No. 8 above.
16	Vraśōṭaṇ Atti. S. <i>alias</i> Ediri- liśōṭa-S.	Ditto . . .	1[9]	1235	Tiruvēṇṇaimalai	551/1902; S. I. I., Vol. VIII, No. 142.

a	S. Viraśōlan	Vijaya-Gaṇḍagōpāla	16	1266	Tirupukkuli	190/1916.
17	Attī. Sambukula-Perumāḷ <i>alias</i> Rājagambhīra-S.	Rājārāja III	20	1236	Tirumalai	<i>S. I. I.</i> , Vol. I, pp. 105, 108. Founded Śambukula-chaturvēdimangalam.
18	Virapperumāḷ Ediriśōla Ālappirandanāyan <i>alias</i> Rājārāja-S., grandson of Sengēni Virāgarān Am.	Rājārāja	29	1245	Little Kūñehī	566/1919. Probably grandson of No. 10 above.
a	Piḷaiyār Rājārāja-S.	Vijaya-Gaṇḍagōpāla	8	1258	Attī	302/1912.
b	Ālappirandān <i>alias</i> Rājārāja-S.	Ditto	18	1268	Ditto	303/1912.
c	Ālappirandān <i>alias</i> -S.	[No king]	Perunagar	353/1923. Chief revives festival instituted by Vijaya-Gaṇḍagōpāla.
19	Seng. Attī. Am.	Vira-Rājendra-Chōla	2	1247	Tiruvottiyūr	80/1900; <i>S. I. I.</i> , Vol. VII, No. 88.
20	Āḷēgiya Pallavan Ediriśōla-S.	Vijaya-Gaṇḍagōpāla	3	1253	Tiruvallam	<i>S. I. I.</i> , Vol. III, p. 123.
21	Śambukulōttunga-S. Vira-Champān.	Śaḍagōpavarman <i>alias</i> Tribh. Vikrama-Pāṇḍya.	8	1257	Tirupukkuli	52/1906; 183/1916. Instituted 'Vira Champān-Śandi'. S.'s star 'Āyilyam'.
22	Sundara-Pāṇḍya-S.	Jat. Sundara-Pāṇḍya	17	1268(?)	Kalavai	232/1901. Inscription begins with 'Sa-masta-jagadādihāra.'
23	Kulōttungaśōla-S. <i>alias</i> Āḷēgiyaśōlan.	Tribh. Vijaya-Gaṇḍagōpāla.	19	1269	Īambayan-kōttūr	236/1910.
24	Śōḷappiḷai <i>alias</i> Ś. of Vēttai-kkudi in Malādu, a district of Mugaḍaimaṇḍalam.	Jatāvarman-Vira-Pāṇḍya.	21	1274	Kuḷaiyūr	104/1918. Probably the Pāṇḍya king is the one who ruled from A. D. 1253 to 1278; <i>Vide</i> No. 11 above.
25	Kulaśēkhara-S.	10 11 13 + 1st 15	Paḷḷikoṇḍa Ditto Ditto Ditto	458/1925. 459a/1925; 462/1925. 456/1925. 459/1925.
		Vira-Pāṇḍya	22 + 1st	..	Tiruvottiyūr	92/1900.
		22 + 1st	..	Paḷḷikoṇḍa	460/1925.
		25 (with astro-nomical details).	1302	Veḷai	77/1908. Gives the 25th regnal year of Kulaśēkhara-S. Registers gift for a festival called 'Seyyarril-veṇṇāṇ-śandi'.

APPENDIX—concl.

No.	Name of Chief.	Overlaid.	Regnal Year.	Equivalent A. D. date.	Place.	Reference and Remarks.
a	Ekāmbaranāthan Kulasekhara-S.	Vīra-Pāṇḍya . . . Māra-varman Pāṇḍya	25 21st year and Śaka 1239 (with astronomical details).	.. 1318	Uttiramēṇūr . . Vīrūchipuram .	199/1923. 177/1940. Māra-varman is a mistake for Jaṭavarman.
26	Vīra Champaṇ alias S. . .	Māra-Tribh. Sundara-Pāṇḍya . . .	12 Śaka 1236	1315 1314	Tiruvottiyūr . . Tiruvallam and Conjeevaram.	97/1900. The Pāṇḍya king was evidently Jat. Sundara-Pāṇḍya II. <i>Ep. Ind.</i> , Vol. III, p. 70 f. His connection with the Sambuvarāyas is not clear.
a	Vīra Champa, son of Vīra Chōla					
27	Venumanakōṇḍa-S. called Ekāmbaranāthan (<i>Ep. Rep.</i> for 1933-34, p. 36).	[Quotes his own years]	Latest year 18	1322 to 1339	Kāñchī and other places.	Initial date fixed by 29/1933-34. Last year 18 (46/1900 and 48/1921).
28	Mallināthan Rājanārāyaṇa-S.	Ditto . . .	9, 16, 18 and 19 years known.	..	Gudimallūr, Pīlāipālaiyam, Kūvam, Tiruttālūr and Koṇṇigalūr.	390/1905 of Kampapa from Kāvēripakkam refers to Mallinātha. 424/1905 ; 86/1921 ; 434/1925 and 139/1924. Elder brother of No. 29 below. <i>Ep. Rep.</i> for 1934, p. 36, Patron of the Tamil poets, Irattaiyar.
29	Rājanārāyaṇa-S. . .	[Own years]	Latest 24 and possibly 26 (162/1940)	1337 to 1362-63		Initial year fixed by 30/1890 and 42/1900. Younger brother of No. 28 above. Ref. to Muhammadan invasions in his records (203/1912). Called also Ponin-Tambirai (33/1933-34).
30	Poṇṇāyaṇ Uḍaragunarāmaṇ-S.	Ditto . . .	5	..	Tiruttālūr	434 1925. This is a record of Rājanārāyaṇa Mallināthan-S. wherein the 5th year of the chief is quoted.

No. 29—A NOTE ON THE PONNUTURU PLATES OF GANGA SAMANTAVARMAN

V. V. MIRASHI, NAGPUR

In the *Epigraphia Indica*, Vol. XXVI, pp. 236 f. I have examined in detail several early Gāṅga dates and showed that the Gāṅga era commenced on *amānta* Chaitra śu. di. 1 in the expired Śaka year 420 (the 14th March A. D. 498).¹ Since my article was sent for publication, Mr. Somasekhara Sarma also has examined that question. According to him the era commenced in the Śaka year 426-27 or A. D. 504-05 some time between June and January. He did not fix the exact starting point of the era, but tried to prove that the months of the Gāṅga year were *pūrṇimānta*.² Recently Mr. Sarma has published the Ponnūtūru plates of the Gāṅga king Sāmantavarman, dated Gn. 64. As these plates contain some data for calculation, one would have expected Mr. Sarma to calculate their date in the light of the epoch fixed by him, and to give its equivalent in the Śaka or the Christian era. He has not, however, done so. I therefore propose to examine this date to see how far it agrees with the epoch of the era fixed by me.

The Ponnūtūru plates³ record a grant by the Gāṅga king Sāmantavarman in the year 64, on the occasion of the Uttarāyaṇa or Makara-saṅkrānti. The date on which the plates were actually issued is given at the end as the thirteenth *tithi* of the bright fortnight of Pushya. According to the epoch fixed by me, the expired Gāṅga year should correspond to Ś. 484 (A. D. 562-63). Now, the Makara-saṅkrānti in Ś. 484 occurred 1 h. 15 m. after mean sunrise on the 20th December A. D. 562. The *tithi*, Pushya śu. di. 13, in the same year ended 10 h. 20 m. after mean sunrise on the 24th December A. D. 562. The plates were thus issued 4 days after the grant was made. This appears quite likely. The date of the Ponnūtūru plates thus corroborates the epoch of the Gāṅga era fixed by me.

On the other hand, this date disproves the other epochs proposed for the era, viz. A. D. 494 by Mr. Subba Rao, A. D. 496 by the late Mr. J. C. Ghosh, A. D. 497 by Mr. B. V. Krishna Rao and A. D. 504-05 by Mr. Somasekhara Sarma. I state below in a tabular form the date of the Uttarāyaṇa and that corresponding to Pushya śu. di. 13 in the Gāṅga year 64.⁴

In all these cases the Uttarāyaṇa or Makara-saṅkrānti occurred some days *after* Pushya śukla trayōdaśī and so the grant made on the occasion of the saṅkrānti could not have been recorded on that *tithi* in any of these years.

In his article on the Gāṅga era as well as in that on the Ponnūtūru plates Mr. Sarma has drawn attention to certain dates of the era which, according to him, are recorded in *pūrṇimānta* months. On the other hand I have shown in my article on the epoch of the era that the following three dates are recorded in *amānta* months—

Gāṅga Year 64

Proposed Epoch of the Era	Date of Uttarāyaṇa	Date corresponding to Pushya śu. di. 13.
A. D. 494	20th December A. D. 558	9th December A. D. 558
A. D. 496	19th December A. D. 560	16th December A. D. 560
A. D. 497	19th December A. D. 561	5th December A. D. 561
A. D. 504	19th December A. D. 568	18th December A. D. 568

¹ Subsequently I showed that the date of the Tekkali plates of Anantavarman (above, Vol. XXVI, pp. 174 f.) also corroborates that epoch. See above, Vol. XXVII, p. 192.

² *Ind. Cult.*, Vol. IX, pp. 141 f.

³ Above, Vol. XXVII, pp. 216 f.

⁴ I have calculated these dates according to the Ārya Siddhānta with the help of the tables in S. K. Pillay's *Indian Ephemeris*.

(1) Santa-Bommāli plates of Nandavarman, son of Anantavarman I¹—Gn. 221, Āshāḍha dina pañchamī, with a solar eclipse in an unspecified month. There was a solar eclipse in *amānta* Jyēsthā in Ś. 641 (corresponding to the expired Gn. year 221). The wording of the date shows that the month Āshāḍha was *amānta*.

(2) Indian Museum plates of Dēvēndravarmā²—Gn. 303, with a solar eclipse in Māgha. There was a solar eclipse in *amānta* Māgha in Ś. 728 (corresponding to the expired Gn. 303).

(3) Poṇḍūru plates of Vajrahasta, son of Kāmārṇava³—Gn. 500, Āshāḍha-māsa dina 5, Āḍityavāra. This date regularly corresponds to Śaka 919, Sunday, the 13th June A. D. 997 which was Āshāḍha śu. di. 5. The wording of this date shows that the month Āshāḍha had commenced only four days before, with the bright fortnight, *i.e.*, it was *amānta*.

These three dates clearly indicate that the months of the Gāṅga year were *amānta*. On the other hand, Mr. Sarma has drawn attention to some other dates which in his opinion are recorded in *pūrṇimānta*⁴ months. It is, therefore, necessary to discuss this question at some length to determine whether the months of the Gāṅga year were *generally amānta* or *pūrṇimānta*.

The only dates of the Gāṅga year which we need consider in this connection are those which mention a *tithi* in the dark fortnight of a month in connection with a solar eclipse, the autumnal or the vernal equinox or a week-day. Some other dates, whether of the bright or the dark fortnight, in which the *tithi* first mentioned in words is again expressed in the number of days at the end may also throw light on this question. On the other hand, if the *tithi* is not connected with a solar eclipse, an equinox or a week-day, but is mentioned at the end as denoting the date of the issue of the plates, it will be of no avail; for, plates were often issued several days, if not months, after the grants recorded in them were made.⁵ With these preliminary observations, we shall proceed to consider the relevant dates of the Gāṅga era—

Mr. Somasekhara Sarma has drawn attention to the following dates which according to him are in *pūrṇimānta* months—

(1) Ponnuṭūru plates of Sāmantavarman⁶—Gn. 64. In this record the *tithi* when the plates were issued is given first in words as *Pushya-śukla-paksha-trayōdaśī-dinam* in l. 26 and again in figures in line 29 as *Pushya-dina* 28. This shows that the month Pushya was *pūrṇimānta*.

(2) Uralam plates of Hastivarman⁷—Gn. 87. In this record the *tithi* when the grant was made is given in words in l. 13 as *Kārttika-kriṣṇa-āṣṭamī* and the same date is expressed in figures in l. 23 as *Kārttika-dina* 8. This indicates that the month of Kārttika commenced with a dark fortnight.

These two dates are undoubtedly in *pūrṇimānta* months as stated by Mr. Sarma; but the same cannot be said of the other two dates cited by him.

(3) Tekkali plates of Dēvēndravarmā⁸—Gn. 192. These plates record a grant made on the occasion of a lunar eclipse. The date when the plates were issued is given at the end as *Māgha-*

¹ J. A. H. R. S., Vol. II, pp. 185 ff.

² Above, Vol. XXIII, pp. 73 f. and Vol. XXVI, p. 329.

³ J. A. H. R. S., Vol. XI, pp. 12 and 147.

⁴ Above, Vol. XXVII, p. 217 f.

⁵ See, *e.g.*, the dates of the Chicacole plates of Indravarmā (*Ind. Ant.*, Vol. XIII, pp. 119 f.), the Purle plates of Indravarmā (above, Vol. XIV, pp. 361 f.) and Chicacole plates of Dēvēndravarmā (*ibid.* Vol. III., pp. 130 f.)

⁶ Above, Vol. XXVII, pp. 216 f.

⁷ *Ibid.*, Vol. XVII, pp. 332 f.

⁸ *Ind. Hist. Quart.*, Vol. XI, pp. 301 t.

māsa-divasē triṅśatimē, i.e., the 30th day of Māgha. Mr. Sarma supposes that the eclipse occurred on the day mentioned at the end, but of this there is no indication in the plates. As Mr. Sarma has himself observed, 'the charters in some cases at least were issued long after the actual date of the grant. This shows that the donee was in possession of the land or *agrahāra* given to him from the date of the actual grant and the royal charter recording the gift was given him some time later—after a lapse of some months (or even years)'.¹ The same seems to have happened in the case of the Tekkali plates of Dēvēndravarman. According to the epoch of A. D. 498, about the general correctness of which there should now be no doubt, the Gn. year 192 should correspond to A. D. 690. In that year there were two lunar eclipses—one in Jyēsthā and the other in Mārgaśīrsha, but none in Māgha. The expression *Māgha-triṅśatimē*² need not therefore signify Māgha *pūrṇimā*; it may as well denote Māgha *amāvāsya*. This date does not therefore indicate that the month of Māgha mentioned in the Tekkali plates was *pūrṇimānta*.

(4) Siddhāntam plates of Dēvēndravarman³—Gn. 195. These plates record in line 14 a grant made on the occasion of the Dakṣiṇāyana or Karkaṭaka-saṅkrānti. No *tithi* is mentioned in connection with it; but at the end in l. 29 is mentioned *Śrāvaṇa-kṛishṇa-dina-pañchamē* as the date on which the charter was made over to the donee. There is no indication in the record that this was also the date of the Dakṣiṇāyana. There is thus no basis for Mr. Sarma's statement that 'the Dakṣiṇāyana referred to in the text of the grant must have occurred on the 5th day of the dark fortnight of the *pūrṇimānta* Śrāvaṇa in 195 G. E.'. As in the case of the Ponnutūru plates of Sāmantavarman dated Gn. 61 and the Achyutapuram plates⁴ of Indravarman II, dated Gn. 87, the Siddhāntam plates of Dēvēndravarman dated Gn. 195 may have been issued some days after the grant was made. According to my epoch of the Gāṅga era, the Dakṣiṇāyana in the expired Gn. Year 195 occurred 3 h. 20 m. on the 22nd June A. D. 693 and the *amānta* Śrāvaṇa kṛishṇa 5 ended on the 28th July A. D. 693. This date does not therefore go against the epoch fixed above; nor does it indicate that the month Śrāvaṇa mentioned in it was *pūrṇimānta*.

There are thus only two dates of the Gāṅga era which are recorded in the *pūrṇimānta* months. As against this, in three dates cited before, the *amānta* reckoning is unmistakably noticed. This mixture of *amānta* and *pūrṇimānta* months in the dates of the Gāṅga era is not surprising; for the same thing is noticed in the case of other eras also. Kielhorn has, for instance, observed after examining several dates of the Vikrama era that the southern (*Kārttikādi*) year of that era was joined with the *pūrṇimānta* as often as with the *amānta* scheme. The dates of the Śaka era are generally in *amānta* months, but Kielhorn noticed that in the case of one date, (*viz.*, the Hyderabad plates of Pulakēśin II), the *pūrṇimānta* scheme had been used.⁵ I have shown elsewhere that the months of the Kalachuri year were generally *amānta* in Mahārāshṭra and Gujarāt and *pūrṇimānta* in Central India and Chhattisgarh, but in exceptional cases the other scheme also is seen to have been used.⁶ The same seems to have occurred in the case of the Gāṅga era also.

It will be noticed that the *pūrṇimānta* scheme has been used in two of the earliest grants of the Gāṅga era, while the *amānta* scheme has been adopted in some later ones. The reason for this is

¹ *Ind. Cult.*, Vol. IX, p. 148, n. 1.

² Above, Vol. XIII, pp. 213 f.

³ *Ind. Cult.*, Vol. IX, p. 147. If the Dakṣiṇāyana occurred on the *pūrṇimānta* Śrāvaṇa va. di. 5 in A. D. 699, it was a mere coincidence. The *pūrṇimānta* scheme is wholly inapplicable in the case of the dates cited above, on p. 172.

⁴ These plates were granted on the Udagayana, but were issued on Chaitra *amāvāsya*. The Udagayana or Uttarāyana could not have occurred in Chaitra.

⁵ *Ind. Ant.*, Vol. XXV, p. 272.

⁶ *A. B. O. R. I* Vol. XXVII, pp. 22 f.

not hard to find. According to some scholars the Gāṅgas of Kaliṅga hailed from Karṇāṭaka where the Śaka era was in vogue. As Kielhorn has shown, the months of the Śaka era were generally *amānta* and very rarely *pūrṇimānta*. Besides, the prevailing custom in Karṇāṭaka in the early centuries of the Christian era seems to have been to use the *amānta* scheme. Very few early inscriptions from Karṇāṭaka contain any data necessary for the verification of the dates mentioned in them, but there is one record which affords a clue. The Saṅgōḷi plates¹ of Harivarman record a grant made on the occasion of the Vishuva on the new-moon day of Āśvina. The mention of Vishuva or Tulā-saṅkrānti in the dark fortnight of Āśvina shows that the month was *amānta*. Harivarman flourished in A. D. 526 or 545. So the Saṅgōḷi plates belong to about the same period as the commencement of the Gāṅga era and may be taken to indicate the custom of reckoning of lunar months prevailing in Karṇāṭaka. If the Gāṅgas originally hailed from Karṇāṭaka, they may have commenced their era on *amānta* Chaitra śu. di. 1. The custom prevailing in Kaliṅga may have been to use the *pūrṇimānta* scheme as it certainly was in the neighbouring country of Dakṣiṇa Kōsala.² The Gāṅgas following this custom seem to have dated some of their early records according to the *pūrṇimānta* scheme. Later on, however, they adopted the *amānta* scheme with which they were familiar in their home province.³ Hence we find that in all later records of the Gāṅga era, the months are reckoned according to the *amānta* scheme.

No. 30—INTWA CLAY SEALING

(1 Plate)

B. CH. CHHABRA, OOTACAMUND

The ancient site of **Intwā** is situated on a hill, in the midst of a thick jungle, about three miles from the famous rock at Jūnāgaḍh in Saurāshṭra, that contains inscriptions of Aśoka, Rudradāman and Skandagupta. The name *Intwā* owes its origin to the fact that the site has since long been yielding bricks (*ints*) in abundance.

During the winter of 1949, the Government of Saurāshṭra had a small-scale excavation conducted here under the direction and supervision of Mr. G. V. Acharya, once the Curator of the Archaeological Section of the Prince of Wales Museum of Western India, Bombay. He has laid bare remains of a couple of Buddhist monasteries. One finds that their pavements, walls, drains and platforms were all made of bricks of extra large size. In plan, they closely resemble those exposed at Taxila. Further diggings at Intwā must yield many more antiquities.

Mr. Acharya has collected an assortment of relics from this site in the shape of tiles, terracotta, pottery, beads and the like, but no inscription. The only inscribed object found there is a baked clay sealing. It is now housed in the local museum at Jūnāgaḍh along with the other Intwā antiquities.

In November 1950, I happened to visit Jūnāgaḍh in the course of my official tour that side. I then had an opportunity of examining the sealing in question. Similar clay sealings have been

¹ Above, Vol. XIV, pp. 163 f.

² See, e.g., the date of the Lōdhiā plates of Mahā-Sivagupta Bālārjuna, *Journal of the Kaliṅga Historical Research Society*, Vol. II, p. 121. The *tiṭhi Kārttika-purnamāsī* is again expressed as *Kārttika dīna 30*, which shows that the month was *pūrṇimānta*. Above, Vol. XXVII, p. 325, text line 32.

³ In the same way the Early Chālukyas of Bādāmi continued to use the so-called Kalachuri-Chēdi era, which was previously current in Mahārāshṭra, for some years after they conquered the country from the Kalachuris, but later on they gradually introduced there the Śaka era with which they had been familiar in their home province; *A. B. O. R. I.*, Vol. XXVII p. 13.

INTWA CLAY SEALING

•

.

found in their hundreds at various ancient sites in the Uttar Pradesh such as Rājghaṭ near Banāras.

The Inṭwā sealing is almost round in shape and about an inch in diameter. In the centre it has what is commonly called the *chaitya* symbol. Along the margin it has a legend in Brāhmī characters, running the entire course. It begins at 3 O' clock. The raised letters are a little worn out. Mr. Acharya had succeeded in reading a part of the legend; but it still remained a riddle. Luckily it yielded to my examination and revealed its full text to me, which is :

Mahārāja-Rudrasēna-vihārē bhikṣu-saṅghasya

It means that the seal 'belongs to the congregation of friars at the Mahārāja Rudrasēna Monastery.'

This short record on the sealing is of great historical importance. The Mahārāja Rudrasēna spoken of herein is obviously one of those Kshatrapas who were descendants of Chasṭana and who ruled in Saurāshṭra and in the neighbouring regions from the 2nd to the 4th century A. C. There were four rulers of the name of Rudrasēna in this dynasty, and it is not possible at this stage to say definitely as to which one is meant here, though the palæography of the legend would make him Rudrasēna I, who was a son of Rudrasinha I and whose reign-period is known to be 199-222 A. C.¹

The present sealing is the only record so far discovered that shows that this Rudrasēna built a monastery for Buddhist monks at Jūnāgaḍh—a natural inference from the name it bore : *Mahārāja-Rudrasēna-Vihāra*. Further light is expected to be thrown on his activities as a patron of Buddhism when more relics will come to light from the Inṭwā site.

Recently Prof. Dr. J. Ph. Vogel has published an interesting paper on the Seals of Buddhist Monasteries in Ancient India, in which he has discussed similar *bhikṣu-saṅgha* seals from Kasiā, Sārnāth, etc.² To that list we may now add the Inṭwā sealing. And this one would be the earliest of the lot.³

NO. 31—ANDHAVARAM PLATES OF ANANTASAKTIVARMAN

(1 Plate)

R. Subrahmanyam, Visakhapattanam

On receipt of a report from the village officers of **Andhavaram**, that an urn, containing four sets of copper plates with inscriptions, was accidentally exposed by some cowherds of that village while playing, I visited the village on 27th February 1951. Messrs. Ramachandramurty and Rajarao, the village officers, took me to the findspot, and were kind enough to permit me to carry the plates to Viśākhapatnam, for study and publication. Andhavaram is a small village in the Narasannapeta taluk of the Srikakulam District, Madras State. It is situated on the left bank of the Vamśadhārā river. It is about twelve miles from Chicacole Road Railway Station. There are two

¹ See E. J. Rapson's *Catalogue of the Coins of the Andhra Dynasty, the Western Kshatrapas, etc., in Catalogue of the Indian Coins in the British Museum*, London, 1908, p. 96.

² *Journal of the Ceylon Branch of the Royal Asiatic Society*, Centenary Volume (1945-1945), New Series Vol. I, pp. 27-32.

³ [As this paper was going through the press, information was received of the discovery of two more similar clay sealings of Buddhist monasteries, one from Kosam, ancient Kauśimbī, and the other from Kumrābhār, ancient Pāṭaliputra. The former belongs to the congregation of friars at the Ghōshita *drāma*, while the latter pertains to the congregation of friars at Ārōgya *vihāra*.—Ed.]

mounds in the south east part of the village, on one of which there is a big banyan tree. The urn containing the plates was discovered just at the foot of this tree. The plates were suspended by means of an iron rod inserted across the deliberately broken rim of the urn and are in a good state of preservation.¹ The urn itself is of red earthenware and has a wide circular mouth. It had a hemispherical lid. The copper plates were preserved inside the urn in paddy-husk. This method of preserving copper-plate grants is known from some other cases as well.² There were, in all, four sets of copper plates. Each set consists of three plates held together by means of a thick ring, the two ends of which are securely soldered under a seal bearing the *lāñchhana* of the respective royal donor.

The earliest of the four records is edited here. Each of its three plates measure $6\frac{7}{16}" \times 2\frac{3}{16}" \times \frac{1}{16}"$. Its copper ring is circular, 4" in diameter, and seal elliptical ($3\frac{1}{2}" \times 2\frac{1}{2}"$). The legend on it is badly worn out, though four lines of writing are traceable. The writing is enclosed within straight lines of which there are four running across the breadth of the oval surface. Above the legend, at the top, are figured a dot and a crescent which stand respectively for a star (or sun) and the moon.

The plates do not have raised rims, but still the writing on them is in a fair state of preservation. The first side of the first plate alone is left blank. The ring had to be cut by me for taking impressions. The plates together with the ring weigh 102 *tolas*, the ring alone weighing 67 *tolas*.

The **script** of the inscription is Brāhmī of the southern type and bears close resemblance to the archaic characters adopted in the grants³ of the kings of Kalinga of the 5th and 6th centuries. Attention may be drawn to the peculiar type of the serif of the letters which is indicated by a dot or dots as the case may be. In this feature it closely resembles the script of the Rāgōlu plates of Śaktivarman.⁴ The **language** is Sanskrit and except for the two benedictory verses quoted from Manu and Vyāsa, at the end (lines 11-17), the inscription is in prose. The final *m* is smaller in size and is often engraved below the line; e.g., *karṭavyam* in line 12; consonants are doubled in conjunction with a superscript *r* as in *varma* in line 5, etc. Except for one or two mistakes of the engraver, the inscription reads all right. The numerical symbols for 10, 5 and 4 are given in the date portion of the grant. The name of the lunar month and the day are also given. Of the two place-names given in the inscription—Vijayapura and Āndōreppa,⁵ the latter appears to be the ancient name of Andhavaram, the findspot of the inscription. I am not able to identify the other place, Vijayapura.

The inscription belongs to the king **Mahārāja Ananta-Śaktivarman** of the **Māthara** family (line 5) and is issued from **Vijayapura**, where the king was camping with his army (*hasty-aśva-skandhāvīrāt*). It records the donation made by the king of the village of Āndōreppa converted into an *agrahāra*, free of all taxes, to the very *brāhmaṇa* families belonging to various *gōtras* and *charaṇas* to whom, earlier, the village had been granted by **Āryyaka-Śaktibhaṭṭarāka-pāda** who had conquered the celestial beings by the incessant practice of *Dharma* as ordained.

¹ A photograph of the urn with the four sets of plates suspended from the rod in their original position was published in some of the English dailies, announcing the discovery. See, for instance, the *Mail* and the *Hindu* (both of Madras), respectively, of the 11th and the 14th April 1951.

² For instance, see above, Vol. XXVII, p. 268 and n. 2.

³ Rāgōlu plates of Śaktivarman, above, Vol. XII, pages 1 ff. and plate; Brihatprōsthā grant of Umavarman, above, Vol. XII, pp. 4 ff. and plate; *J. A. H. R. S.*, Vol. VI, p. 53; Sakunaka grant of Ananta-Śaktivarman, C. P. No. 24 of 1934-35. Dr. B. Ch. Chhabra, Government Epigraphist for India, was kind enough to send me a set of estampages of this last mentioned inscription, the facsimiles of which have not yet been published, for purposes of comparison, for which I am highly obliged to him.

⁴ Above, XII, p. 2.

⁵ Cf. Kīṇḍēppa of the Śrīngavarapukōṭa plates of Anantavarman (above, Vol. XXIII, p. 57).

The king is described as a devout worshipper of the lotus-fee of the god Nārāyaṇa whose chest was embraced by Kamalanilayā (*i.e.*, Lakshmī), as an ornament to Māthara-kula, and as the inheritor of the body, kingdom prosperity and prowess through the devotion to the feet of the venerable Lord, the father (*Bappa-bhaṭṭāraka-pāda-prasād-āvaptā-sarīra-rājya-vibhava-pratāpaḥ*). The executor or *Ājñāpti* of the grant was one Mahādaṇḍanāyaka (Commander-in-chief) and the record was written by Māṭivara who was both *Daṇḍanāyaka* and *Dēśākṣhapatalādhikṛita* (Record-keeper of the *dēśa* or District ?).

Ananta-Śaktivarman is already known to us by a record¹ issued by him from his capital *Siṃhapura* which registers the grant of the village Sakuṇaka in the Varāhavartanī *viśaya* to the *brāhmaṇa* brothers Nāgaśarman and Duggaśarman in the 28th year of his reign, but no complete account of the Māthara family and the part played by them in the history of Kālīṅga is available. During the confusion that followed the invasion of Samudragupta, many new dynasties rose into prominence in Kālīṅga and of those the Māthara family appears to have acquired paramount sway over the whole of Kālīṅga. Śaktivarman, the founder of the dynasty, seems to have annexed the kingdom of Piṣṭapura, supplanting Mahendra² or one of his successors.

The Rāgōlu³ charter describes Śaktivarman as an ornament of Māgadha(Māthara ?)-kula and Lord of Kālīṅga. He had also the matronymic name Vāsishṭhīputra, perhaps copied from the Śātavāhanas or Ikṣvākus. But no definite information is available about the successors of Śaktivarman. But it can be presumed from the Sakuṇaka grant of Ananta-Śaktivarman that the Māthara family lost its hold in the Gōdāvarī region where Piṣṭapura (*i.e.*, Piṭhāpuram) was situated and its sway was confined to North Kālīṅga with Siṃhapura as its capital. About 7 records (excluding the plates under review) pertaining to the successors of Śaktivarman of Rāgōlu plates have so far been discovered. They are : Sakuṇaka grant⁴ of Mahārāja of Ananta-Śaktivarman, the Tiritthāna⁵ grant (Bobbili plates) and the Kōmarti⁶ plates of Chaṇḍavarman, the Dhavalapēṭa plates,⁷ the Brihatprōshthā⁸ and the Astihavēra⁹ grants of Mahārāja Umavarman and the Koroshanḍā¹⁰ plates of Mahārāja Viśākhavarman. In view of the close resemblances of styles adopted in the *prasasti* portion of these grants and the invariable appearance of the title *pitribhaktāḥ* or 'devout worshipper of the father' in some form or other in all these grants, in spite of no specific reference being made to Māthara-kula in a few among them, it has been surmised that all the kings figuring in these charters belonged to one and the same family,¹¹ though it is difficult to establish a definite chronological relationship.

By inference it has been established that Śaktivarman of the Rāgōlu plates was the ancestor of Ananta-Śaktivarman and on grounds of palaeography a time-lapse of a hundred years has been allowed between the records of these two kings. The Government Epigraphist for India, tentatively suggested in his report for the year 1934-35 that Ananta-Śaktivarman was the grandson of

¹ C. P. No. 24 of 1934-35; also see *Annual Report on South-Indian Epigraphy*, 1934-35, p. 53. This record is under publication in this journal.

² Mahendra is mentioned as the ruler of Piṣṭapura in the Allahabad pillar inscription of Samudragupta—Jayaswal : *History of India* (1933), pages 134 ff.; Fleet : *Gupta Inscriptions* (C. I. I. Vol. III) No. 1, lines 19-20. The Rāgōlu plates of Śaktivarman of Māgadha(Māthara)-kula was issued from Piṣṭapura, the capital of Mahendra mentioned in the Allahabad inscription.

¹⁰ Above, Vol. XXI, page 23 f. and plates; J. B. O. R. S., Vol. XIV, pages 282 ff. and plate.

¹¹ A. R. S. I. E., 1934-35, page 53. *Early Dynasties of Andhra Desa*, pages 387 ff.

Śaktivarman with the possibility of Anantavarman intervening between them who might have been the father of our present Śaktivarman. The latter's name is perhaps indicated by the double form Ananta-Śaktivarman to distinguish him from the earlier Śaktivarman. If this suggestion be accepted, then we may place Mahārāja Ananta-Śaktivarman, the donor of the present charter, in the first half of the 5th century A. D.

Since the grant was issued from a military camp at Vijayapura and not from Simhapura¹ which is mentioned as the capital in the records dated later one is tempted to presume that Ananta-Śaktivarman was just then engaged in some battle. No information is available as to the king with whom he was fighting. Presumably he was compelled in his 14th year to leave Pishtapura, his ancestral capital, by the rising power of the Śālaṅkāyana rulers of Vēṅgī to find a capital in the northern regions of Kālīṅga, i.e., Vijaya-Simhapura or Simhapura, from where members of his dynasty ruled subsequently till they were overthrown by the Vāsishṭhas.

¹ C. P. No. 4 1934-35 : Simhapura has been identified by Dr. Hultzsch (above, Vol. IV, page 143) with the modern Sūrigupuram or Singapuram in the Narasannapeta taluk of the present Srikakulam District.

² From original plates.

³ May be corrected as *parama-daivata*[h*] in which case this epithet becomes applicable to the royal donor.

⁴ [The writer may have purposely used the *a*-ending form and not *n*-ending, thus *°varmmaḥ* and not *°varmmā*, in which case no correction is necessary, the hiatus in *°varmma Āndō* being perfectly regular according to the *sandhi* rules. That the *a*-ending form is not incorrect, but ought to be taken as a less common form, may be inferred from its use in certain other early inscriptions. Compare, for example, *Śarvvavarmmēṇa* in the Nirmaṇḍ plate of Samudrasena (CII, Vol. III, p. 289, text line 9) ; *putrō-Śavarmmō vikhyātaḥ* (the *yupā* inscription A of king Mūlavarman, Borneo, *Bijdragen tot de Taal-Land-en Volkenkunde van Nederlandsch-India*, Vol. 74, 1918, ē. 213) ; and *Vishnuvarmmasya* of the Perak seal (*J. A. S. B., Letters*, Vol. I, 1935, p. 28). If the above surmise is correct, the writer of the present charter has done well in employing the less common form, for, in doing so, he has saved the ambiguity which would otherwise have resulted as to the proper name of the village, beginning an ā. The coalescence would have passed unnoticed, or, if detected, one would have been left wondering whether the name of the village began with an *a* or with an *ā*.—Ed.]

⁵ The *ā* seems to have been written on an erasure. Its form is slightly different from the *ā* in line 9, which perfectly formed.

No. 32—TWO INSCRIPTIONS FROM JAJPUR

(1 Plate)

DINES CHANDRA SIRCAR, OOTACAMUND

Jajpur is an old town on the Vaitaraṇī river which seems to have provided in early times the line of demarcation between Utkala and Kalinga. According to the *Raghuvamśa*,³ Utkala lay between Kalinga (district round Mount Mahendra, i.e. the Mahēndragiri peak in the Ganjam District) and the Kapiśā river (the modern Kānsāi running through the Midnapur District), while the *Mahābhārata*⁴ seems to mention the Vaitaraṇī as the north-eastern boundary of the Kalinga country. Of course, in later times, under the Bhauma-Karas and the Sōmavamśis, often represented as lords of Utkala, this country seems to have included the Puri District and sometimes even the eastern fringe of the Ganjam District.⁵ The *Bauddhāyana Dharmasūtra*⁶ seems to suggest that the Kalinga region in the present Orissan coastland was regarded by the Aryans of the later Vedic age as an impure (i.e., predominantly non-Aryan) country, although it was sometimes visited by the Aryans. A later popular saying⁷ allowed the Aryans to frequent this coast country only on pilgrimage. The *Mahābhārata*⁸ regards the valley of the Vaitaraṇī as a holy land fit for pilgrimage and specifically mentions Viraja, which, along with the variants *Virajā* and *Virajas*, is no other than the

¹ Read °m[*] iti ||.

² There is a floral design between the two sets of triple *daṇḍas* and a wavy line at the end.

³ Cf. Canto IV, verse 38 : *Sa tīrtvā Kapiśāṁ sainyair = baddha-dvirāta-sētabhiḥ | Utkal-ādarśita-pathaḥ Kaling-ābhīmukhaṁ yayau ||*

⁴ Cf. III, 114, 3 : *ētē Kalingāḥ Kauntēya yatra Vaitaraṇī nālī.*

⁵ For the Bhauma-Karas, see *J. K. H. R. S.*, Vol. II, pp. 103-05. Their kingdom was known both as Utkala and Tōsali (or Tōsalā). Tōsali was divided into two administrative divisions, viz., Northern and Southern. The Dakṣiṇa-Tōsali division included Kōngōḍa on the Puri-Ganjam border. The Sōmavamśis, who were in occupation of the Puri region, were apparently mentioned in the records of the imperial Gaṅgas, who at first ruled from Kalinga-nagara (Mukhalingam in the Srikakulam District) and claimed to be Kalingas originally. as lords of Utkala.

⁶ Cf. I, 1, 13-16 : *Avantayō=nga-Magadhāḥ Surāṣṭrā Dakṣiṇāpathāḥ | Upāvrīt-Sindhu-Sauvīrā ētē saṅkirṇa-yōnayah || Aratīṇ Kāruskarān Puṇḍrān Sauvīrān Vangān Kalingān Prānūnān = iti cha gatvā punastōmēna yajēta sarvapriṣṭhayaḥ tā | ath=āpy=udāharanti | padbhyām sa kurutē pāpam yah Kalingān prapadyatē | rishayō nishkrīṭīm tasya prāhur=vaśānaram haviḥ ||*

⁷ Cf. Bagchi, *Pre-Aryan and Pre-Dravidian in India*, p. 74 : *Aṅga-Vanga-Kalingēshu Saurāṣṭrē Magadhēshu cha | tīrtha-yātrām vinā gachchhan punah-samskāram=arhati ||*

⁸ Cf. note 4 above ; also *ibid.*, III, 83, 6 : *tatō Vaitaraṇīm gachchhēt sarva-pāpa-pramōchanām | Virujam tīrtham=āsādyā virajātē yathā śaśī ||*

present Jajpur, as an important place of pilgrimage. Jajpur was thus one of the earliest *tirthas* in the east coast country.

The present name of the town of Jajpur seems to be a corruption of *Yayātipura*. It appears that the Sōmavamśis (from the tenth to the thirteenth century) who had their headquarters at Yayātinagara in Northern Orissa, built by and named after Mahāśivagupta I Yayāti, made Yayātipura or Jajpur their secondary capital after extending their power in Southern Orissa. The fact that Jajpur was probably also called Yayātinagara is suggested by the early Muslim chroniclers as they mentioned the Orissa kingdom of the Gaṅgas, who supplanted the Sōmavamśis from Southern Orissa and may have had their secondary headquarters at Jajpur, as Jājnagar.¹ During the medieval period Jajpur became a great centre of Tantrik worship and of the Mother-goddess cult.² Whether this was primarily due to the patronage of the Sōmavamśi kings, who were Śaivas, cannot be determined. But Jajpur enjoyed a glorious position, even before the age of the Sōmavamśis, during the days of the Bhauma-Karas (from the seventh to the ninth century), who had their capital at or near the site of Jajpur. Most of the charters of the Bhauma-Kara kings were issued from the city of Guhadēvapāṭaka or Guhēśvarapāṭaka; but in an endorsement to a charter³ of the Gaṅga king Jayavarman of Śvētaka, Unmaṭṭakēśarin (*śimha*) *alias* Śivakara I, who was the founder of the greatness of the family and possibly ruled about the middle of the seventh century, is said to have had his residence at Virajas, *i.e.*, Jajpur, and it appears that Guhadēvapāṭaka or Guhēśvarapāṭaka was the name applied by the Bhauma-Karas either to Virajas (Jajpur) itself or to a new city built by them in its vicinity.⁴ It is not known whether the name Guhadēvapāṭaka or Guhēśvarapāṭaka was derived from a deity or a king or from a deity named after a king. There is no evidence regarding the existence of a king having a name or surname like Guha in the family. The dynasty is called Bhauma⁵ in earlier records but Kara⁶ in later documents. The latter name was actually the stereotyped ending of the names of the kings of the family, although, strictly speaking, it was *kara* in most cases (cf. the names Lakshmī-kara, Kshēma-kara, Śiva-kara and Śānti-kara) but *ākara* in one at least (cf. the name Śubh-ākara). The earlier kings of the family were Buddhists while the later rulers were followers either of Śaivism or of Vaiṣṇavism.

Although Jajpur was certainly the residence of one of the early Bhauma-Kara kings and it is probable that all the rulers of this family had their headquarters at this place or its neighbourhood, it is rather curious that so long no inscription of the Bhauma-Kara dynasty came from the town. In January 1950, I visited Jajpur especially with the idea of seeing whether any record of the Bhauma-Karas could be traced. I am very glad to note that my effort did not prove entirely fruitless as I discovered an interesting lithic record (A) of the time of an early Bhauma-Kara ruler and another (B) that may be tentatively assigned to the early days of the family's rule. These two inscriptions are edited here.

A. Harṁsēśvara Temple Inscription of the time of the Bhauma-Kara Dynasty.

On the 3rd of January 1950, while I was staying at the Inspection Bungalow at Jajpur, I received information about the existence of a stone inscription in the ruins of the Harṁsēśvara temple from

¹ See *J. H. Q.*, Vol. XXII, p. 307.

² Vide *The Śākta Piṭhas* (*J. R. A. S. B.*, Vol. XIV), pp. 33, 45; cf. also references under Yājapura, Yāgapura, Virajā, Nābhigayā, etc., in Appendix V, pp. 80-100. Jajpur is written in Oriya as Yājapura and pronounced as Jājapura or Jājpur.

³ *J. H. Q.*, Vol. XII, pp. 492-93.

⁴ Cf. *J. K. H. R. S.*, Vol. II, p. 103; B. Misra, *Orissa under the Bhauma Kings* p. 87.

⁵ Misra, *op. cit.*, pp. 4, 8, 14, etc.

⁶ *Ibid.*, p. 25, 34, etc. The recently discovered Terunḍiā plate of Śubhākara II (son of Sivakara II from Mohinidevi), dated year 100, mentions the family both as Bhauma and Kara. This is the earliest mention of the family as Kara.

an old Oriya gentleman named Chandrasekhar Das who is a poet and an inhabitant of Śivadāsa-pura forming a part of the Jajpur town. Mr. Das kindly led me to the site which was found to be not far from the Virajā and Trilōchana temples at Jajpur. Of the Haṁsēśvara temple only the plinth and the floor and the lower part of the side and back walls could be seen. There was no trace of the front wall, the upper parts of the other walls and the roof. A rectangular piece of black stone, bearing an inscription, was found embedded in the inner side of the existing lower part of the back wall. It appeared to me that the stone actually belonged to an earlier temple whose materials were utilised in the construction of the Haṁsēśvara temple possibly on the same site after the former had become dilapidated owing to the ravages of time. The ruins of the Haṁsēśvara temple lie on the bank of an old tank now almost dried up. Mr. Das informed me that the whole area had been formerly covered with a dense jungle which was cleared some 20 years ago.

The inscribed stone is rectangular in shape. There is a margin of several inches to the left of the writing; but the right side of the stone is broken and there is no margin to the right of the inscription. The lower end of the stone seems also to be broken off; but it is difficult to say anything definitely on this point. The inscription is thus fragmentary with portions lost at the end of all the extant lines, and possibly some lines of writing now missing totally. The inscribed face of the stone, as it now stands, contains altogether eleven lines, each measuring 11·5". An examination of the verses inscribed on the stone shows that an equal number of *aksharas* have been broken away from the end of all these lines. Thus the inscribed stone seems to have been originally at least double its present length. Single letters are about ·5" in height.

The **characters** employed in the inscription belong to the East Indian type of the Northern Alphabet and may be ascribed on palaeographical grounds to the seventh or eighth century A.D. Some of their characteristics are the same as those of the early records of the Bhauma-Kara dynasty of Orissa. Of initial vowels, the inscription employs *a* (line 10), *ā* (line 2), *i* (lines 3, 5, 6), *ī* (line 6) and *u* (line 1). Medial *u* has two different forms. In many cases it resembles its late Dēvanāgarī form (cf. °*r*=*avatu* in line 1, °*m*=*bhuvi* in line 5, °*dbhutam* in line 8, etc.); but in a few cases (cf. *kul-ādbhut*=*ē* in line 2) it looks almost like medial *ū* (cf. °*vy*=*abhūd*=*a* in line 4 and °*d*=*bhūshitam* in line 7). The form of medial *au* in °*d*=*Bhauma* in line 2 is interesting to note as it has an ornamental *śirō-mātrā* besides the two *prishṭha-mātrās*. Of final consonants we have only *m* (cf. lines 7, 8). The lower part of subscript *y* is ornamental and considerably long and it covers the space below several preceding *aksharas*. In the passage *śrīman-Mādhavadēvy*=*a* in line 4, the subscript *y* in *vyā* covers the space below the five preceding *aksharas*. The **language** of the inscription is Sanskrit. It is composed entirely in verse. Interesting from the **orthographical** point of view is the wrong spelling in *vidhvaṁsanaḥ* for *vidhvāṁsanaḥ* in line 2. Final *m* has usually been changed to the nasal of the class of the following consonants (cf. °*tulaṇ*=*Kai* in line 7, *nivāsan*=*tēna* and *dēvyāṇ*=*gatā* in line 10). Consonants like *m* and *ṇ* have been reduplicated in conjunction with *r* preceding them.

The existing portion of the fragmentary inscription contains **no date**. But as will be shown below, it refers to king Śubhākara I of the Bhauma-Kara dynasty, who may be assigned roughly to the third quarter of the seventh century.¹ The date quoted in the Neulpur plate² issued by this king cannot be definitely deciphered; but the Dhauli cave inscription of his second son Śāntikara I is clearly dated in the year 93 of an unspecified era.³ The era used by the Bhauma-Karas is now usually identified with the Harsha era of 606 A. D. and consequently the date of the Dhauli cave inscription would correspond to 699 A. D. As Śubhākara I was succeeded first by his elder son

¹ J. K. H. R. S., Vol. II, p. 103.

² Above, Vol. XV, pp. 1-8, and plate; Misra, *op. cit.*, pp. 1-7.

³ Above, Vol. XIX, pp. 263-64; Misra, *op. cit.*, p. 11.

Śivakara II¹ and then by his younger son Śāntikara I, he seems to have flourished considerably before the end of the seventh century. It, however, seems that our record was incised when Śubhākara I may not have been on the throne. The inscription under discussion may thus roughly be assigned to **the third or fourth quarter of the seventh century.**

The inscription begins with the usual symbol for *siddham* or *siddhir=astu*. Line 1 of the epigraph seems to have contained a complete verse in the *Āryā* metre. This is suggested by the fact that line 2 begins with a different verse in the *Śārdūlavikrīḍita* metre. Of the verse in line 1, only the first foot and nine syllables as well as traces of four more *aksharas* of the second foot are found. That the right part of this line, that has been broken away and lost, contained a little above twenty *aksharas* appears to be suggested quite clearly by lines 9-11 of the inscription. Line 9 begins with a verse in the *Indravajrā* or *Upajāti* metre which ends with the word *haṭṭaḥ* followed by two *daṇḍas* at the commencement of the next line. Then follows a verse in the *Mālinī* metre ending with the word *gasya* followed by two *daṇḍas* and the expression *tēn=aitat°* forming the beginning of another verse in a metre other than the *Mālinī*. This analysis shows that no less than twenty-one syllables are lost at the end of line 9 and twenty-three at the end of the following line.

The extant portion of verse 1 containing the words *°alir=avatu*, "let the bee protect [us]", is apparently in adoration of some deity. The reference to the god as a bee reminds us of the mention of Viṣṇu as "the mighty bee on the lotus which is the face of Jāmbavatī" in the Tusham rock inscription.² But the god adored in the first verse of our epigraph is probably Śiva as the construction of a temple of that god is the main subject recorded in the inscription.

Verse 2 says that there was a mighty king in the **Bhauma** family whose name was [Śu*]-**bhākara**. The past tense in the verb *āsīt* may suggest that the inscription was engraved after the death of the king. As we know, there were no less than four kings of this name in the Bhauma-Kara dynasty of Orissa, although the reference to the family as Bhauma in the present record and not as Kara no doubt points to an earlier ruler of the family. The identity of Śubhākara mentioned here is, however, made clear by the following verse (verse 3) which speaks of queen **Mādhavadēvī** apparently as the wife of the king referred to in the previous verse. As known from the Chaurasi plate³ of Śivakara II, son of Śubhākara I, queen Mādhavadēvī, whose name is often wrongly supposed to be *Mādhavīdēvī*, was the wife of king Śubhākara I and the mother of Śivakara II. The second half of verse 3 says how a temple of the god Bhava (*i.e.*, Śiva), entitled Mādhavēśvara, was built. There is no doubt that the temple was built and the deity was installed on behalf of the queen Mādhavadēvī and that the god (probably in the form of a *liṅga*) was styled *Mādhavēśvara* after her name in accordance with an old practice followed in different parts of India.⁴ Verse 4 seems to compare the temple with Śiva's residence on Mount Kailāsa and also to record the appointment of a Śaiva *āchārya* for conducting the worship of the deity installed. Verse 5 refers to a *vāpī* or tank that must have been excavated near the temple in question. The old tank, on the bank of which the ruins of the Harṇēśvara temple at Jajpur stand, is possibly no other than the *vāpī* mentioned in this verse. The next verse (verse 6) speaks of a *haṭṭaḥ*, 'a market or a fair,' that seems to have been established or organised in a locality in the vicinity of the temple and the tank. Possibly the income of the *haṭṭa* was assigned to the temple. Verse 7 refers to a person who did

¹ The date of the Chaurasi plate of this king (*J. B. O. R. S.*, Vol. XIV, pp. 292 ff. and Vol. XV, pp. 572-573 and plates) is doubtful.

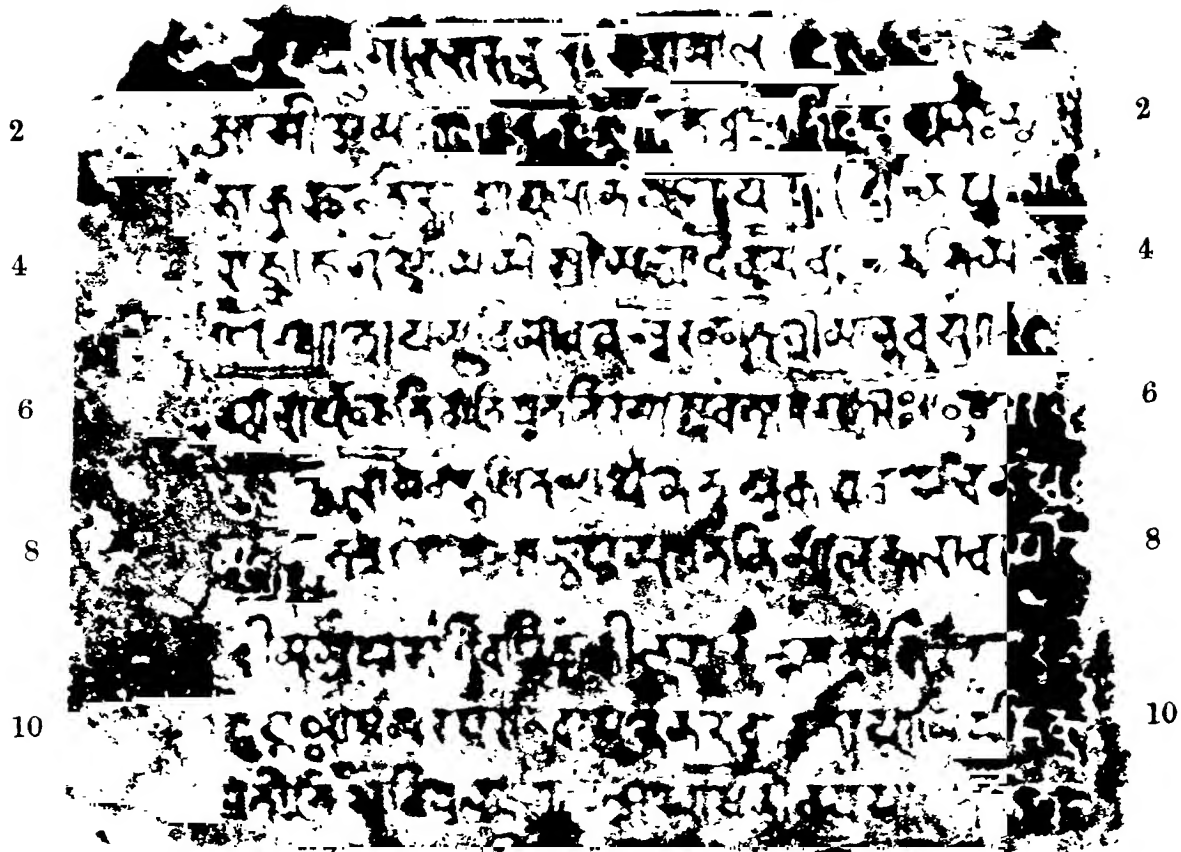

² *Corp. Ins. Ind.*, Vol. III, p. 270. [There is no reference to any bee in the present inscription. See note 3 on p. 183 below Ed.]

³ *J. B. O. R. S.*, Vol. XIV, pp. 292-306; Misra, *op. cit.*, p. 8.

⁴ Cf. the cases of Prithivīśvara named after Prithivīśhēṇa (*Select Inscriptions*, p. 293), Mihirēśvara evidently named after Mihiralakṣmī (*Corp. Ins. Ind.*, Vol. III, pp. 288-89), and numerous other later instances recorded in inscriptions. Fleet's interpretation of the name Mihirēśvara as a "form of the god Śiva combined with the Sun" is no doubt wrong.

TWO INSCRIPTIONS FROM JAJPUR

A. Hamsesvara Temple Inscription of the time of the Bhauma - Kara Dynasty

Scale: Two-fifths

B. Chamunda Image Inscription of Vatsadevi

Scale: One-fifth

something in relation to the above establishments after the queen, no doubt Mādhava-lēvi, had gone to the city of the gods, that is to say, after the queen's death. The next verse, only the first two words of which are extant, apparently also speaks of the same person and of some of his activities.

The importance of the inscription lies in the fact that it is the only Bhauma-Kara record that comes from Jaipur proper which, as we have seen, was probably the capital of the rulers of the Bhauma-Kara family. Another fact not known from any other source is that Mādhava-lēvi, queen of Śubhākara I, was a devotee of the god Śiva, although her husband is known, from his own Neulpur plate as well as the records of his successors, to have been a Buddhist. That the husband and wife often belonged to different religious persuasions in ancient India is indicated not only by this instance, but also by several other similar cases known from the history of other ruling families.

The inscription does not mention any geographical names with the exception of Mount Kailāsa and the mythical Udayagiri (or the Sun-rise Mountain) and Amarapura (*i.e.*, Indra's capital in heaven).

² Expressed by a symbol.

³ The *aksharas malī* are quite clear. [The correct reading appears to be *chintāmanir=avatu*.—Ed.]

⁴ Traces of four *aksharas* can be seen after *avatu*.

⁵ The metre of the verse appears to be *Āryā*.

⁶ Metre of this verse and of the next three verses: *Śārdūlavikrīḍita*.

⁷ Either *ōjjvalēna* or *ōjjvalō=yam* is intended.

⁸ Metre: *Indravajrā* or *Upajāti*.

⁹ Metre: *Mālinī*.

¹⁰ The rest of the inscription is lost.

B. Chāmuṇḍā Image Inscription of Vatsadēvī

Jajpur, a famous centre of Tantrik worship and the Mother-goddess cult, abounds in the images of the Mātrikās. There is a small temple where the Mātrikās are in actual worship. A number of huge Mātrikā images are preserved in shades within the compound of the S. D. O.'s Bungalow. Of the Mātrikās, Chāmuṇḍā appears to have been in special favour at Jajpur and her images are very often met with scattered here and there. One such image of the goddess Chāmuṇḍā was found by me on the main road in the neighbourhood of the Trilōchana temple. The image is not under regular worship, although its mutilated face, dabbed with vermilion, shows that it commands at least some respect from the womenfolk of the locality. Most of the images examined by me at Jajpur were found to be uninscribed; but the image of Chāmuṇḍā noticed above has one line of writing on its base. The inscription covers a space of $1\frac{3}{4}$ feet in length. A single letter is about 1.5" in height; but a conjunct and a consonant with vowel marks are in some cases about 4" high.

The **characters** belong to the Northern class of alphabet of about the seventh century A. D. The ornamental vowel mark in *rā* reminds us of epigraphs like the Banskhera plate of Harshavaradhana dated [Harsha] Samvat 22 (=628 A. D.)¹ and the Udaypur inscription of Aparājita dated V. S. 718 (=661 A. D.).² Medial *i* is still short; but medial *ī* is long enough to reach the bottom line of the letters. Subscript *y* has its lower part lengthened towards the left; but it is shorter than in the case of the record of the Bhauma-Kara dynasty edited above (A). Although some of the palaeographical features of that inscription are present in the epigraph under discussion, this record seems to belong to an earlier date. The forms of *s* and *d* are slightly earlier. The **language** of the inscription is Sanskrit, although there is Prakrit influence in the form °*dēvyāyāḥ* for *dēvyāḥ*. As regards **orthography** the reduplication of *t* in conjunction with the preceding *r* may be noticed.

The inscription simply refers to the *kīrtti* of queen Vatsadēvī. The *kīrtti* (literally meaning 'fame') referred to is undoubtedly the image of the goddess Chāmuṇḍā on which the epigraph is incised. Bhagawanlal Indraji and K. T. Telang pointed out that in certain connections the word *kīrttana* means a temple.³ R. G. Bhandarkar supported the suggestion by quoting passages from the *Agni Purāṇa*, Bāṇa's *Kādambarī* and Sōmēśvara's *Kīrtti-kaumudī*.⁴ J. F. Fleet referred to the Mandar rock inscriptions of the time of Ādityasēna mentioning one's *pushkariṇī-kīrtti* which he rendered as the "famous work of a tank" and pointed out that the same meaning may be applied in many other cases to the word *kīrtti*.⁵ But he further suggested on the authority of R. G. Bhandarkar that "*kīrtti* and *kīrtana* are hardly to be actually translated by the word 'temple' or by any other specific term, but denote generally 'any work of public utility, calculated to render famous the name of the constructor of it. . . . And the particular work referred to may be a temple, as in the instances quoted above⁶ or a tank as in the present inscriptions⁷ or anything else of a suitable nature". The inscription under discussion referring to an image of a goddess as the *kīrtti* of a queen perfectly bears out the above suggestion of Bhandarkar and Fleet.⁸

Queen **Vatsadēvī** of ancient Orissa, who installed the image of Chāmuṇḍā in question apparently in a temple at Jajpur, is not known from any other source. She was probably the wife of one of

the early Bhauma-Kara kings. The earliest member of the family is mentioned in some records as Kshēmaṅkara and in others as Lakshmikara and often the latter is regarded as the father of the former.¹ I have elsewhere suggested that the two names may actually indicate the same person.² The son and successor of the *Param-ōpāsaka Mahārāja* Kshēmaṅkara was the *Paramatāhagata Mahārāja* Śivakara I Unmaṭṭasimha (also called Bharasaha) who married Jayāvalidēvi, daughter of a ruler of Rādhā in the valley of the river Ajay in South-west Bengal, according to the *rākshasa* form of wedding.

The issue of this union was the *Paramasaugata Mahārāja*³ Śubhākara I who is the king mentioned in the record edited above and whose queen was Mādhavadēvi. It is tempting to suggest that Vatsadēvi of our inscription was one of the wives of one of the two predecessors of Śubhākara I.

TRANSLATION

Let there be success ! (*This image of the goddess Chāmuṇḍā is*) the fame (*i. e.*, the fame-producing work) of the queen Vatsadēvi.

No. 33—KENDUPATNA PLATES OF NARASIMHA II ; SETS II AND III.

(2 Plates)

DINES CHANDRA SIRCAR, OOTACAMUND.

When the Kēndrāpaḍā canal in the Cuttack District, Orissa, was being excavated more than sixty years ago, a stone box measuring 3'×3'×2' was found about 20' below the surface of the earth in the village of Kēndupāṭnā in the Kēndrāpaḍā subdivision. The box contained three copper-plate grants issued by the imperial Eastern Gaṅga monarch Narasimha II (*circa* A.D. 1278-1305) in favour of one of his officials. Each of the grants is said to have consisted of seven plates. The box together with the copper plates was preserved in the local temple of Lakshmīnārāyaṇa. Sometime about the year 1892, the late Mr. N. N. Vasu secured the inscriptions for examination. Vasu edited the first of the three sets of the Kēndupāṭnā records in the *Journal of the Asiatic Society of Bengal*, Vol. LXV, Part I, 1896, pp. 229-71 with plates. The third set of these inscriptions was transcribed by the same scholar in the Bengali encyclopaedia entitled *Viśvakōsha*, Vol. V, 1893, s.v. *gāṅgēya* (appendix between pp. 320 and 321), where the second set of the plates was barely noticed. Unfortunately Vasu's transcripts and interpretations of the inscriptions are far from satisfactory. Even his description of the three sets of plates is not free from errors. The *Viśvakōsha* containing his transcript of one of the grants is, moreover, not easily available to scholars,

¹ Misra, *op. cit.*, p. 71.

² J. K. H. R. S., Vol. II, p. 103.

³ He is called simply *Mahārāja* in his own Neulpur plate ; but in the records of his successors he is endowed with the imperial title *Paramabhaṭṭāraka-Mahārājādhirāja-Paramēśvara*. Śubhākara I was the first imperial ruler of the family while his father and grandfather possibly owed allegiance to Harshavardhana who is known to have led an expedition in Orissa about A. D. 643 ; cf. J. K. H. R. S., Vol. II, p. 103-04.

⁴ From impressions.

⁵ Expressed by a symbol.

* Read **dēvyāḥ*.

while one of the three inscriptions has never been published. For these reasons, a re-edition of these records was desirable. As all the three sets of the plates are now the property of the Orissa Museum at Bhubaneswar, I approached Mr. P. Acharya, Superintendent of Research and Museums, Government of Orissa, and Mr. K. C. Panigrahi, Curator, Orissa Museum, for a loan of the plates. They were kind enough to send me for examination the first set of the Kēndupāṭṇā plates in July 1950. My paper on that inscription was soon completed and I contributed it to the *Journal of the Royal Asiatic Society of Bengal*,¹ Calcutta. In August 1950, I received the second and third sets of the plates. These are edited here. My thanks are due to Messrs. Acharya and Panigrahi for the kindness they have shown to me.

It is now well known that the 105 verses, containing some stray names between verses 6 and 7, form the introductory part of the charters of Narasimha II and are the same in the different charters of the king. As the later imperial Gaṅga monarchs used to copy the genealogy of the family from the introductory portion of the grants of their predecessors, the above verses, sometimes with slight modifications, are also found in some other Gaṅga charters.² Since the historical value of these verses has been dealt with by us in detail in connection with the Nagari, Asankhali and Alalpur plates, there is hardly any necessity of discussing the introductory part of the two inscriptions now under review. I am therefore editing here only the charters of Narasimha II forming the concluding portions of the inscriptions engraved on the second and third sets of the Kēndupāṭṇā plates. As a matter of fact, the grants of the king have really nothing to do with the introductory part which deals with the genealogy of the imperial Gaṅgas down to the reigning monarch as well as the achievements of some of the kings.

A.—Set II ; Śaka 1217 ; Aṅka year 22.

The record is incised on seven plates of which the first and seventh plates are inscribed only on the inner sides. The plates are about 13 inches long and about 9½ inches high. They are not numbered as in the case of the first and third sets, although the first plate seems to bear traces of the figure 1 without any preceding letter. The plates have raised rims. The hole for the ring to pass through has a diameter of 1". The diameter of the ring is 4½" while its thickness is a little above ½". The space between the left border of the plates and the ring-hole measures 1". The seal soldered to the ring is the same as that attached to other charters of king Narasimha II and closely resembles the seal of other imperial Gaṅga grants. It is of the shape of an expanded lotus about 5" in diameter, its border containing the petals slightly bent upwards. The principal emblem on the seal is a bull,³ about 4½" in length and 3" in height, in an inclined posture. The size of the seal and of the bull emblem is bigger than that of the seal and the emblem of the first set of the Kēndupāṭṇā plates. There are also the emblems of the *triśūla*, *ḍamaru*, crescent and solar orb ; but the *aṅkuśa* found on the seal of the Nagari plates is absent. The writing on the plates is neat and clear ; but its preservation is not quite satisfactory. Some of the plates are damaged here and there, especially about the borders, owing to corrosion. There are altogether 117 lines of writing on the plates. The inner side of the first plate and the reverse of the second have 19 lines each, while the reverse of the sixth plate and the inner side of the seventh have respectively 18 lines and 1 line. The rest of the

¹ See now *op. cit.*, Letters, Vol. XVII, 1951, pp. 33-39.

² See the Nagari plates of Anāṅgabhīma III (*circa* A.D. 1211-38) to be published in this journal ; the Puri plates of Bhānu II (*circa* A.D. 1305-27), son of Narasimha II, which have been discussed by me in the *JRASB*, L, Vol. XVII, pp. 19-26 ; the Puri plates of Narasimha IV, *JASB*, Vol. LXIV, Part I, 1895, pp. 133 ff. ; the Asankhali and Alalpur plates of Narasimha II to be published in this journal.

³ The Gaṅgas were originally Śaivas but became Vaiṣṇavas from the time of Anantavarman Chōḍagaṅga. The Śaivite emblem on their seal, however, was not modified.

inscribed sides of the plates have each 20 lines of writing. The weight of the plates is 955 *tolas*, while the seal and the ring weigh 253 *tolas*.

The inscription very closely resembles the other records of Narasimha II in respect of **palaeography, language and orthography** and nothing calls for special mention, especially because they have been discussed in details in connection with the Asankhali and Alalpur plates of the same king to be published in this journal.

The **date** of the grant is given in words in line 177 as the expired Śaka year 1217 corresponding to the 22nd *Aṅka* year (i.e., 18th actual regnal year omitting, according to rule, the first, sixth, sixteenth and twentieth years of the *Aṅka* reckoning) of Narasimha II. The precise date of the document as given in line 178 is Saturday the 14th *tithi* of the dark half of the month of Mēsha (solar Vaiśākha) corresponding, if the Śaka year is regarded as current, to Saturday, the 10th April, A.D. 1294. This date, however, seems to be actually earlier than the 18th regnal year of Narasimha II. It is said that the king made a number of grants in his 19th *Aṅka* (i.e., 16th regnal year), one of which was being recorded on the plates under discussion. The above date of the document is, however, based on the supposition that the word *abhilikhyamānē*, found in other similar records (cf. the first set of the Kēndupāṭnā plates, line 176) of the king in association with the Śaka year, has been omitted in the present inscription as in the third set of the plates to be discussed below. But the language of the record as it stands may indicate that the grant had been made when the king was in the *pāṇīya-chchhūyā-maṇḍapa* (possibly a shaded hall cooled by water) at the *kaṭaka* (residence, city or secondary capital) called Rāmuṇā (the same as Rēmuṇā of several other records of the king) on Saturday, the 14th *tithi* of the dark half of the month of Mēsha in the king's 19th *Aṅka* or 16th regnal year, although the charter was issued a few years later in the king's 22nd *Aṅka* corresponding to the expired Śaka year 1217. If such was the case, the date of the grant may correspond to Saturday, the 14th April, A.D. 1291, although this date also actually appears to be earlier than the 16th regnal year of the king. It may be pointed out that the date of the first set of the Kēndupāṭnā plates is Monday, the 6th of the month of Sīṁha (i.e., solar Bhādrapada) in Śaka 1217 and in the 21st *Aṅka* (17th regnal year) of Narasimha II. This date is irregular for Śaka 1217 and, for Śaka 1218, corresponds to Monday the 6th August, A.D. 1296. None of these dates tallies with the generally accepted date of the king's accession in A.D. 1278.

King *Vīra-śrī*-Narasimhadēva (i.e., Narasimha II), who was endowed with such *birudas* as *chaturdaśa-bhuvan-ādhipati*, is said to have made the grant of 100 *vāṭikās* of land in favour of Bhīmadēvaśarman who is also the donee of the other two sets of the Kēndupāṭnā plates. Bhīmadēvaśarman, who was a Brāhmaṇa of the Kāśyapa *gōtra* having the Kāśyapa, Āvatsāra and Naidhruva *pravaras*, is described as the king's *Kumāra-mahāpātra* in the first set of the plates, while, in the present record as well as in the third set, he is called *Bṛihat-kumāra-mahāpātra*. *Mahāpātra* was no doubt a minister and *Kumāra-mahāpātra*, like *Kumār-āmātya* of the older records, a minister of the rank of a *Kumāra*, i.e., a prince of the royal blood. The word *bṛihat* suggests that Bhīmadēvaśarman was a *Kumāra-mahāpātra* of the foremost rank. The *mudala*, which in Telugu means 'an order' and in this context signifies the king's order regarding the execution of the grant, passed through the *Purō-parīkshaka Pātra* Trilōchana Jēnā.¹ The word *jēnā* originally meant 'a prince' and later came to be the cognomen of many noble families of the Orissa region. *Parīkshaka*, the same as Oriya *pariksha* or *parichhā*, was used to indicate a governor, a superintendent, an inspector, etc. Thus the word *purō* prefixed to *parīkshaka* may be Sanskrit *puru* and indicate a *Parīkshaka* attached to the capital or secondary capital of the Gaṅga monarch, which may, in the present case, have been the *kaṭaka* of Rēmuṇā.²

¹ In the records of Narasimha IV and in the *Mādala Pāñjī*, the word *mudala* seems to mean 'an arrangement made or to be made according to an order'.

² If *purō* stands for Sanskrit *purus*, it may indicate a higher officer in the class in question. The word is found as *pōrō* in the grants of Narasimha IV and as *pōra* in the *Mādala Pāñjī*.

The land measuring 100 *vāṭikās* granted to Bhīmadēvaśarman consisted of several plots. The village called Vōhālagrāma situated in the Pūrva-khaṇḍa or eastern subdivision of the Sōṅgaḍā *vishaya* (district) formed the first of the plots. The *nala*, which in Oriyā means the measurement of area, was done by *Purō-nāyaka* Śivadāsa *Sēnāpati*. The word *nāyaka* (meaning a superintendent, possibly a superintendent of survey in the present context) in the designation *Purō-nāyaka* (possibly *pura-nāyaka*), indicated a high officer like the *Parīkshaka*. The designation *Sēnāpati* (leader of army) suggests that Śivadāsa held both an executive and a military post possibly at the same time. Vōhālagrāma is said to have been bounded in the east by the junction of two of the boundary lines of Bhaṁṇaṇāgrāma and in the west by the contiguous part of the boundary line of Jōmarāmagrāma. The southern boundary of the village was the contiguous part of the boundary line of Sunāil6-grāma, while its northern limit was the path (*daṇḍā*) in front of the *sālmālī* tree at Aṇḍiyōalāgrāma. Within these boundaries, the land measured 60 *vāṭikās* 7 *mānas* and 20 *guṇṭhas*; out of this, an area measuring 26 *vāṭikās* 2 *mānas* and 15 *guṇṭhas* was covered by cattle tracks, pasture lands, *maṇḍapas* (public buildings), canals, jungles, palmyra groves and *niśadhi* land under the enjoyment of gods and Brāhmaṇas and was subtracted leaving the net remainder (*niravakara*) of 34 *vāṭikās* 5 *mānas* and 5 *guṇṭhas*. The expression *niśadhi-bhūmi*, used in this connection, no doubt means the same thing as the *niśadhikṛita* land referred to in line 190 of the first set of the Kēndupātnā plates. The word *niśadhi* may be a corruption of Sanskrit *nishēdha*. Thus *niśadhi-bhūmi* may indicate 'forbidden land'. In Kannaḍa inscriptions, the word *nisidhi* is used to indicate a Jaina burial ground. Whether *niśadhi* is related to *nisidhi* cannot be determined. A *māna*, which consists of 25 *guṇṭhas* and 20 of which make a *vāṭikā*, is now regarded as equal to one acre of land in Orissa.

The second plot of the gift land comprised the village of Gadhaīgrāma situated in the Kusa-maṇḍala *vishaya*. It was bounded in the west by an *aśvattha* tree near the tank at the junction of two boundary lines of the Maṅgalapura *śāsana* (gift village) and in the east by the contiguous part of the boundary line of Dēvapura. Its southern limit touched the junction of two boundary lines of Maṅgalapura and its northern limit comprised parts of the canal at Sāṅgapaḍāgrāma. The area within these boundaries measured 40 *vāṭikās* 17 *mānas* and 1 *guṇṭha*. Out of this, an area of 11 *vāṭikās* and 3 *guṇṭhas*, covered by cattle tracks, pasture lands and tanks under the enjoyment of gods and Brāhmaṇas from earlier times, was subtracted leaving the net remainder of 29 *vāṭikās* 16 *mānas* and 23 *guṇṭhas*.

The third plot of land comprised the village of Khaḍīṅgāgrāma situated in the same Kusa-maṇḍala *vishaya*. This village was bounded in the east by two boundary lines of Naērōāgrāma and in the west by those of Gadhaīgrāma. Its southern limit touched two boundary lines of Maṅgalapura and its northern limit those of another village the name of which is doubtful. The land within these boundaries measured 10 *vāṭikās* 17 *mānas* and 8 *guṇṭhas*. Out of this, an area, which measured 1 *vāṭikā* 16 *mānas* and 23 *guṇṭhas* and was covered by cattle tracks under the enjoyment of gods and Brāhmaṇas from early times, was subtracted leaving the net remainder of 9 *vāṭikā* and 10 *guṇṭhas*.

The name of the village forming the fourth plot of the gift land was possibly Bhāṁḍapaḍā. Its southern boundary touched parts of two boundary lines of Khaḍīṅgāgrāma and its northern boundary ran from parts of the canal up to the village road of Gadhaīgrāma. In the east, the village was bounded by parts of two boundary lines of Maṅgalapura and in the west by those of Gadhaīgrāma. The area within these boundaries measured 31 *vāṭikās* 15 *mānas* and 6 *guṇṭhas*. Out of this land, an area measuring 4 *vāṭikās* 17 *mānas* and 19 *guṇṭhas* was covered by cattle tracks, pasture lands and tanks under the enjoyment of gods and Brāhmaṇas from earlier times and was subtracted, leaving the net remainder of 26 *vāṭikās* 17 *mānas* and 12 *guṇṭhas*.

The areas of the four plots of the gift land, viz., 34 *vāṭikās* 5 *mānas* and 5 *guṇṭhas*, 29 *vāṭikās* 16 *mānas* and 23 *guṇṭhas*, 9 *vāṭikās* and 10 *guṇṭhas*, and 26 *vāṭikās* 17 *mānas* and 12 *guṇṭhas*, together

made a total of 100 *vāṭikās* of land which was granted to the donee Bhīmadēvaśarman as a permanent rent-free holding together with the right to enjoy it along with land and water as well as fish and tortoise. The *śāsanādhikārin*¹ (writer and keeper of documents) Allālanātha *Sēnāpati*, who is also known from other records of Narasimha II, received two *vāṭikās* of mixed homestead and water-covered land apparently as his fees or perquisite. The engraver of the document, the copper-smith Pannāḍi, who was also the writer of the first set of the Kendupāṭnā plates, similarly received one *vāṭikā* of mixed homestead and water-covered land. It is specifically said that the copper-smith received his plot of land from the donee, the *Bṛihat-Kumāra-mahāpātra* Bhīmadēvaśarman. The absence of the specification of the boundaries, etc., of any extra plot of land suggests that the *śāsanādhikārin* also received his plot from the donee. This seems to have been the established custom as indicated by the expression *śāsan-ādhikāri-vyavasthitā* in line 197 of the first set of the plates.

The following seven rent-paying subjects were allotted to the *śāsana*, which is not endowed with a special name as in other charters :

(1) Kālidāsa who was the son of Aṇantiā, a *śaṅkhakāra* (maker of conch-shell bangles) of the Gōlāṇḍā *haṭṭa* (market) ; (2) Kēsō *śrēshṭhin* who was an inhabitant of Kōmaṭichchhaṅgula and belonged to the Jayanagara *haṭṭa* ; (3) Alālū² who was the grandson of the goldsmith Vāmadēva of the Kivalēlō *haṭṭa* ; (4) Vanamālin who was the grandson of Virjū, an oilman of Ārulapura³ ; (5) Aṇantāi who was the grandson of Raṇḍi, a milkman of Vaṭṭakēśvara *haṭṭa* ; (6) Indū who was the grandson of Sīrū, a potter of the Painnapaḍā *haṭṭa* ; and (7) Vanamālin who was the grandson of the oilman Rāju of Jhahhallapura. It has to be pointed out that the words *gōpa* and *gōpara* are prefixed to the names of *tailika*-Virjū and *tēli(li)*-Rāju. The same word seems to have been used as *gōpāpa* in the passage *Vōirōā-gōpāpa-tailika-Jāguli-śrēshṭhikasaya* in the Asankhali plates and in line 197 of the third set of the Kēndupāṭnā plates. Whether this refers to a particular community among the oilmen cannot be decided.

Besides Rēmuna, a well-known locality near Balasore, the charter mentions a number of districts, villages and market places. The districts mentioned are the Sōṅgaḍā and Kusamaṇḍala *vishayas*. The villages lying in the Sōṅgaḍā district were Vōhāla, Bhaṇṇaṇā, Jōmarāma, Sunāilō and Aṇḍiyōalā and those in the Kusamaṇḍala *vishaya* were Gadhaī, Maṅgalapura (styled *śāsana*), Dēvapura, Sāṅgapaḍā, Khaḍṅgā, Naērōā and Bhāmdapaḍā, all situated in the vicinity of one another. The list of rent-paying subjects discloses the names of the following localities : Gōlāṇḍā *haṭṭa*, Kōmaṭichchhaṅgula, Jayanagara *haṭṭa*, Kivalēlō *haṭṭa*, Ārulapura, Vaṭṭakēśvara *haṭṭa*, Painnapaḍā *haṭṭa* and Jhahhallapura. I have not been able to identify them satisfactorily. The name Sunāilō, also known from other records of king Narasimha II, was apparently borne by different villages.

Seventh Plate ; First Side

217

B.—Set III ; Śaka 1218.

The charter is written on six plates, although there is a seventh plate without writing either on the obverse or on the reverse, apparently meant for the protection of the inscription on the second side of the sixth plate. The plates, each measuring about 13"×9", are very similar to those of the other records of Narasimha II including the second set of the Kēndupāṭnā plates described above. The preservation of the writing is not very satisfactory. As in the case of the other set, some letters have suffered from the effects of corrosion on many of the plates. Of the six inscribed

¹ The *daṇḍa* is superfluous and is used to cover some space at the end of the line.

² Read *vāṭikā-chatusṭaya*.

³ *Savdhi* has not been observed here.

⁴ There is the usual flower design between the double *daṇḍas*.

⁵ The intended reading may be *gōpāpa* or *gōpa*. The second *ra* of *purara* may either be regarded as redundant or as the Oriya suffix indicating the sixth case-ending.

⁶ There is a flower design between the double *daṇḍas*. These are followed by the usual imprecatory and benedictory verses.

plates, the first has writing on the inner side, while the others are inscribed on both the sides. Five plates are consecutively numbered on the left margin of the reverse and the numerals are preceded by the *akshara bhī* or *bhi* (wrongly written *kī* in one case) which appears to be a contraction of the donee's name Bhīmadēvaśarman. It may be recalled that on the first set of the Kēndupāṭnā plates the numerical figures are similarly preceded by the *aksharas kuma* or *kū* which we have taken to be an abbreviation of the donee's designation *Kumāramahāpātra* as given in that record. There are altogether 208 lines of writing. The second sides of the fifth and sixth plates have respectively 19 and 9 lines, all the other inscribed sides having 20 lines each. The seven plates together weigh 952 *tolas*, the weight of the uninscribed seventh plate being 127½ *tolas*. The seal which must have resembled the one described above and the ring on which the plates were originally strung appear to be lost.

The palaeography, language and orthography of the inscription are similar to those of the king's other records and do not call for any special remarks.

The introductory part of the record ends in line 176 and is followed by the word *svasti* and the date which actually begin the charter. The date recorded in lines 176-77 is Thursday, the fifth *tithi* of the bright half of the month of Mēsha (solar Vaiśākha) in the expired Śaka year 1218. The year of the *Aika* reckoning is not mentioned. The date is irregular ; but if the Śaka year is taken to be current, the date corresponds to Thursday, the 21st April, A.D. 1295.

The king is said to have had previously made, for the increase of his longevity, health, wealth and sovereignty, a number of grants of land, one of which was recorded on the plates under discussion. This particular grant of 50 *vāṭikās* of land was made in favour of the same *Brihat-Kumāra-mahāpātra* Bhīmadēvaśarman who was a Brāhmaṇa of the Kāśyapa *gōtra* having the Kāśyapa, Āvatsāra and Naidhruva *pravaras* and was a student of the Kāṇva branch of the Yajurveda. The *mudala* or order of the execution of this grant was issued by king *Vīra-śrī* Narasimhadēva (*i.e.*, Narasimha II) on the date discussed above, when he was staying at the *kaṭaka* (city, camp or residence) of Chaubattā, to the *Purō-parīkshaka* Alāla, who was also a *Brihat-Sandhivigrahi-Mahāpātra*, in the presence of Kumāra who seems to have been the adopted son (*dulāla*) of the *Halin* and *Kōshādhyaksha* Yāgānanda styled *Khaḍgagrāhi-Mahāpātra*. The expression *maṇahā-samay-ānantarē* used in connection with the issue of the king's order is difficult to explain.¹ The executor of the grant, Alāla, was not only a *Purō-parīkshaka* (possibly *Pura-parīkshaka*) but also a *Brihat-Sandhivigrahi-mahāpātra*, *i.e.*, a minister of the superior rank for war and peace. *Mahāpātra* Yāgānanda, called *Khaḍga-grāhin* (possibly the same as Oriyā *Khaḍḍāita*), has also the official designation *Halin* (officer in charge of the royal lands) and *Kōshādhyaksha* (treasurer). He seems to be no other than the *Ghaṭaraṭiya-Khaḍgagrāhi-Mahāpātra* Yāgānanda mentioned in the Alalpur plates of Narasimha II as the owner of a *śāsana* or gift village possibly called Ghaṭavaṭa.

The 50 *vāṭikās* of land granted by Narasimha II to Bhīmadēvaśarman covered two plots. The first of them comprised the village of Simhaḍāmaṇḍoi situated in the Rēmuṇā *vishaya*. The measurement of the area was done by Mahēśvara-nāyaka (*nāyaka* here indicating the caste or family name of Mahēśvara or his official position as a surveyor) who was the representative of the *Purō-nāyaka* Śivadāsa also known from the second set of the Kēndupāṭnā plates edited above. The village was bounded in the west by parts of the boundary line of Tantiōdāgrāma (also called Tantiudā°) and in the east by the western boundary line of a village, the name of which ended with the letter *ṛṇa*. Its southern boundary was a sandy waste land and its northern limit was the bridge on the river Suvarṇarēkhā. Within these boundaries, the land measured 48 *vāṭikās* 12 *mānas* and

¹ *Maṇahā* (for *maṇahī* ?) may be Oriyā *maṇāhi* meaning the act of taking food by a king. The word *māṇāhi* occurs in the *Mādalaḥ Pāñji*, ed. A. B. Mahanti, p. 30.
MGIPC—S1—14 DGA—10-2-53—450.

10 *gunṭhas*. Out of this, an area which measured 3 *vāṭikās* and 10 *mānas* and was covered by cattle tracks and tanks enjoyed by gods and Brāhmaṇas from earlier times was subtracted leaving the net remainder of 45 *vāṭikās* 2 *mānas* and 10 *gunṭhas*.

The second plot of the gift land comprised the village called Chchhōdrā (possibly otherwise called Chchhōḍā) situated in the same district of Rēmuṇā. The measurement of the area was done by Ravī-nāyaka who was another representative of the *Purō-nāyaka* Śivadāsa. The village was bounded in the north by the bridge to the field in the south of Tantiōḍāgrāma and in the south by another bridge to the north of the cornfield (*kēlāra*) on the Rupāidhāri *ṭikkara* (possibly Oriya *ṭikarā*, "a mound of sand") to the north of the Suvarṇanadī and to the south of Chchhōḍāgrāma. The eastern boundary of the village was the Sijguā *ṭikkara* on the border of the field to the west of Tantiōḍā and its western limit was the Bhairā *ṭikari-bandha* (possibly sand embankment) in the field to the east of Chchhōḍā. Within these boundaries, the area measured 4 *vāṭikās* 17 *mānas* and 15 *gunṭhas*. Out of this land, 10 *mānas*, covered by cattle tracks and village roads and enjoyed by gods and Brāhmaṇas, was subtracted leaving the net remainder of 4 *vāṭikās* 7 *mānas* and 15 *gunṭhas*. The two plots of land, the first measuring 45 *vāṭikās* 2 *mānas* and 10 *gunṭhas* and the second 4 *vāṭikās* 7 *mānas* and 15 *gunṭhas*, are said to make a total of 50 *vāṭikās*, although actually the total comes up to only 49½ *vāṭikās*.

The gift land was given the name of Bhīmanārāyaṇapura¹ and was made a permanent rent-free holding to be enjoyed along with land and water as well as fish and tortoise. The *Śāsanādḥikārin*, Allālanātha *Sēnāpati*, who was a Brāhmaṇa of the Pūtimāsha *gōtra* and a student of the Śākala branch of the Rīgvēda, is said to have received two *bhāgas* (possibly meaning *vāṭikās*), while the copper-smith Punnāḍīraṇā who engraved the plates received similarly one *bhāga*. These receipts of the *śāsanādḥikārin* and the *tāmra-lēkhaka* are described as *dvija-vyavasthita* possibly referring to a custom sanctioned by the Brāhmaṇas. These three *bhāgas* or *vāṭikās* were probably taken out of the land granted to the donee. Pannāḍīraṇā may actually indicate Raṇā, son of Pannāḍi.

Four rent-paying subjects were allotted to the *śāsana*. They were (1) Kumbhāra-sādhu who was the grandson of the goldsmith Nārāyaṇasādhu of the Jayapura *haṭṭa*; (2) Gōpiā who was a milkman of the Siḍraṅga *haṭṭa*; (3) Kālō-śrēṣṭhin who was the grandson of Dradāśrēṣṭhin, a *gōpāpa* oilman of the Vaḍatāla *daṇḍā*; and (4) Dēvāśrēṣṭhin who was the grandson of the potter Jayadēva-śrēṣṭhin of the Saṭhagrāma *navā-haṭṭa* (new market).

Of the geographical names mentioned in the record, the *kaṭaka* of Chauhaṭṭā cannot be satisfactorily identified. The Rēmuṇā *vishaya* must of course have been the district round modern Rēmuṇā near Balasore. The Suvarṇarēkhā is the celebrated river of that name running through the Balasore District of Orissa and Suvarṇanadī is either the same as the Suvarṇarēkhā or one of its branches or tributaries. The villages of Simhaḍāmaṇḍoi, Tantiōḍā, Chchhōḍā, etc., all mentioned in connection with the gift land and situated in the Rēmuṇā *vishaya*, must have been near the banks of the Suvarṇarēkhā. In the list of the rent-paying subjects, mention has been made of the Jayapura *haṭṭa*, the Siḍraṅga *haṭṭa*, the Vaḍatāla *daṇḍā* and the Saṭhagrāma *navā-haṭṭa*. None of these can be satisfactorily identified, although Jayapura is also mentioned in some other records of Narasimha II.

No. 34—TWO SENDRAKA GRANTS

(2 Plates)

G. H. KHARE, POONA

A. Nāgaḍ Plates of Sēndraka Nikumbhāllaśakti : Śaka year 577

These plates were originally owned by Mr. Giramājī Dagaḍu Pāṭil of Nāgaḍ, taluqa Kannāḍa, District Aurangabad (Hyderabad State). Mr. G. R. Pāḍalkar of Chalisgaon (East Khandesh) acquired them on loan for the Rājwāḍe Saṁśōdhana Maṇḍala, Dhulia (West Khandesh), the Secretary of which Institution very generously allowed me to edit them in the Society's Journal in Marāṭhī.⁶ I re-edit them here in English.⁷

The set in question consists of **two plates**, each measuring 8½" by 3¼", strung together on a circular ring two inches in diameter. The two ends of the ring are soldered into an oblong seal with diameters of 1¼" and 2". The first plate is written on one side only, while the second contains writing on both sides. Though the rims of the plates are raised to protect the writing, it is not well preserved. It has been obliterated all along and a large number of letters has been practically erased. Owing to rust, the first plate has got a hole in it, while a corner of the second plate has completely disappeared. Still, with the help of the texts of the Bagumra⁸ and Kaḷwaṇ (Mundakhēḍe)⁹ plates, I have been able to decipher the grant fairly well.

The **characters** of the grant are the proto-type of old Kannāḍa and closely resemble those of the Bagumra plates and also the Kāsārē plates published below (B).

¹ The *danda* is superfluous. *Sandhi* has not been observed here.

² Better read °vyavasthitō bhāga ēkaḥ.

³ This is followed by parts of the verse *mad-dāna-phala-siddhy-arthaṁ*, etc.

⁴ This face is not numbered as the reverse sides of the first five plates.

⁵ Continuation of the usual imprecatory and benedictory verses found in the records of Narasiṁha II.

⁶ Vol. VIII, No. 3.

⁷ A note on this grant in English has been published by me in *New Indian Antiquary*, Vol. I, No. 12.

⁸ *Ind. Ant.*, Vol. XVIII, pp. 265 *et seq.*

⁹ *Prabhāta* (Marāṭhī Journal), Vol. II, No. 12; *Annual Report of the Bhārata Itihāsa Saṁśōdhaka Maṇḍala* for Śaka 1834, pp. 60 *et seq.*

About **orthography**, the following peculiarities deserve notice. *ṛi* is generally substituted by *ri* with only two exceptions, viz., °*srishṭō* (l. 18) and *paṭal-āvṛita* (l. 21). A consonant preceded by *rēpha* is doubled, except in *krimir=bhūtva* (l. 24) and *nirbhukta* (l. 25). If the doubled consonant happens to be the second or the fourth letter of a class, then the initial consonant is changed respectively into the first or the third consonant of the same class; for instance °*ōtsarppaṇ-ārtham* (l. 18), *dharm-ārtha-* (l. 35) and *dirggha* (l. 27). In *anulīyātāḥ* (ll. 5, 7) similarly *dh* has been doubled. In *vaṇṣaiḥ* (l. 19) the *anusvāra* has been replaced by *ṇ*. *Upadhmānīya* has been used in two places: *kālīna-putra* (l. 16) and *nripatibhi-prabala* (l. 19). In *kālē* (l. 26) *l* has been substituted by *ḷ*.

The **language** of the inscription is Sanskrit prose all through, excepting the verses in ll. 22-25.

The record belongs to the king **Nikumbhāllaśakti** of the Sēndraka dynasty, whose father and grandfather were Ādityaśakti and Bhānuśakti respectively. In all the records of this branch of the Sēndrakas that have come to light hitherto, the name of the last member was spelt as Nikumbhallaśakti, i.e., with a short *a* in *bha* and we were unable to split the word correctly.¹ But here the *ā* in *bhā* is clearly long and we can easily split the word into Nikumbha and Allaśakti meaning thereby Allaśakti of Nikumbha. In the following grant we actually get the name Allaśakti as a variant for Nikumbhāllaśakti. The same kind of genealogy appears in the Bagumra and Kaḷwaṇ plates with the exception that the Kaḷwaṇ plates carry the pedigree one generation further and names Jayaśakti as the son of Nikumbhāllaśakti. The plates under discussion supply no historical information about the three members of the dynasty mentioned in it. But being dated in Śaka 577 current they would show that Nikumbhāllaśakti died some time between Śaka 577 and Śaka 602 which is the date of the Kaḷwaṇ plates of his son Jayaśakti.

After the eulogy of the three members in general terms, which closely resembles that in the Kaḷwaṇ plates, comes the description of the grant proper. We are told that Nikumbhāllaśakti, while camping near the lake Vṛiśchi...ndha in the vicinity of the austerity-grove at Kāyāvatāra, with a view to gain merit for himself as well as for his parents, granted the village Suśchirākhōli, situated to the south of the hill Bāruvāṇa, which was lying in the district of Nāndipuradvāri to the Brāhmaṇa Bhōgika, the son of Nannasvāmin, a student of the *Ṛigveda*, belonging to the Ātrēya gōtra and a resident of the village Prāktaṅgarā. The boundaries of this village are not specified. The charter was drafted by Mātṛidatta by the order of the generalissimo Vāsava and with the consent of Dēvadinna, the minister for peace and war. In the Bagumra plates, both Vāsava and Dēvadinna figure in the same capacities and in addition it has been stated there that the latter was the younger brother of the former.

The **date** of the inscription is given as the year 577 without quoting any era, cyclic year Ānanda, the month Māgha, and the 3rd day of the bright fortnight. As 577 of the Śaka year current coincides with the cyclic year Ānanda according to the southern system of reckoning, it must be referred to the Śaka era. The corresponding Christian date is the **15th of January 655 A.C.**

Of the place-names occurring in this record, I am unable at present to identify any except **Kāyāvatāra**. This place is referred to in another grant found at Nausari,² which is later in date and issued by the Gūrjara king Jayabhaṭa III. The editor of the grant was inclined to look

¹ Prof. V. V. Mirashi has rightly pointed out that the name Jayaśakti in the Kaḷwaṇ (Mundakhēḍē) plates is preceded by the word Nikumbha, but I cannot understand how he calls it a *biruda* (*D. R. Bhandarkar Commemoration Volume*, p. 53, note 4).

² *Ind. Ant.*, Vol. XIII, p. 71.

upon Kāyāvatāra as the Sanskrit form of Kāvī¹ (Jambusar-Broach). Dr. A. S. Altekar of Patna, in his monograph on the *History of Some Important Ancient Towns and Cities in Gujarat and Kathiawad* by oversight assumes the place-name to be Kāvīvatāra instead of Kāyāvatāra and opines that this Kāvīvatāra is the same as ancient Kāpikā or modern Kāvī.² But both of these scholars seem to be in the wrong. Kāyāvatāra must be identified with the modern Kārwaṇ near Dabhoi in the Baroda State. For this is the very place that was sanctified by the residence of Lakulīśa, the pioneer exponent of a Śaiva (Pāśupata) sect. The same is referred to as Kāyāvi-(va)rōhaṇa in the Ēkalingaji inscription and under the more simplified form Kārōhaṇa in the Cintra (Portugal) *praśasti*, in *Liṅga-Purāṇa* under its variant Kāyāvarōhaṇa, in the local *māhātmya* of Kārwaṇ under the slightly corrupted forms Kāyavirōhaṇa and Karōhaṇa, and in a still more corrupted form Kāyārōhaṇa in *Vāyu-Purāṇa*.³ But as Kāyāvatāra and Kāyāvarōhaṇa mean one and the same thing, Kāyāvatāra cannot be any other place but Kārwaṇ. It is interesting to note that there is also a very large and holy tank at this place as stated in the present record.⁴ But unfortunately I could not trace the name of the tank even after much correspondence and oral enquiry. The place-name Nāndipuradvārī mentioned in the present record occurs also in the Jethwai plates⁵ of the Rāshtrakūṭa queen Śīlamahādēvī and in the Bhāndak plates⁶ of Rāshtrakūṭa Kṛṣṇarāja I dated Śaka 708 and 694 respectively. The editor of the former grant has left this place unidentified; and the late R. B. Hiralal in his note on the latter has identified this place with Nāndorā, a village just near, and to the north of, Wardha, the headquarters of the district of the same name in Berar. I would like to suggest the following: Nāndipuradvārī literally means a door to Nāndīpura. Nāndipuradvārī, therefore, must be a locality wherefrom a road should lead one to Nāndīpura. Now Nāndīpura or Nāndīpurī which could have some possible connection with Nāndipuradvārī and which was situated in Western India, is the one referred to in the two Kaira and the two Sāṅkhēḍa⁷ plates of Gūrjara Dadda II which were issued from Nāndīpurī or Nāndīpura itself. Dr. Bühler identified this place with an old fort just outside the town of Broach;⁸ but the late Dr. Bhagwanlal Indraji's suggestion that it should be identified with Nandod in the Rajpipla State stands on a firmer ground.⁹ The only place which could have served as a door-way to either of the places and especially the latter, is Nandurbār, a *talūqa* town in the West Khandesh District. It is only sixty miles from Nandod and has some ancient remains.¹⁰ Moreover it is interesting to note that the feminine gender of the name is still retained in colloquial language.

B. Kāsārē Plates of Sēndraka Nikumbhāllasakti; year 404

These plates were indeed originally edited by the late G. K. Chandorkar in a now-defunct Marāṭhī quarterly *Itihāsa Āṇi Aitihāsika* (year 3, Nos. 26, 27; p. 44); but the editing was done in such a way that no apology was needed when I re-edited them in *The Sources of the Medieval History of the Dekkan*, Vol. III, p. 66. I edit them here for the third time.

The plates originally belonged to one Bhikā Pāṇḍū Chaudharī, of the village Kāsārē, *talūqa* Sākri, District West Khandesh. I secured them for the *Bharata Itihasa Samshodhaka Mandala*

through the good offices of Professor N. R. Phatak (Bombay), the late V. G. Joshi (Poona) and Mr. Balubhai Mehta, M.A., LL.B. (Dhulia), all of whom I thank heartily.

The set consists of two plates, $7\frac{3}{4}'' \times 5\frac{1}{2}''$ in length and breadth, which were strung together with two rings $2''$ and $1\frac{1}{2}''$ in diameters respectively through two holes bored lengthwise. One of the rings was found already cut and without a seal. The two ends of the other were soldered into a circular seal $\frac{1}{8}''$ in diameter and bearing the legend *Śrī Allāśakti* engraved on it. Both the sides of the first plate and the inner side of the second are inscribed containing 4, 14 and 15 lines respectively. The 4 lines of writing on the outer side of the first plate are in continuation of the second plate and form the concluding portion of the grant. On the inner side of the second plate, just in the space between the lines 19 and 20, are inscribed the words *yathā mayā brāhma* and below the lines 20 and 21 are inscribed some words which have been partially erased. The upper lines are, therefore, so much obliterated that it is very difficult to decipher either of the two writings satisfactorily.

The characters of the inscription resemble those of the Nāgad and the Bagumra plates with little variations and consequently require no special remarks.

About **orthography** some points deserve mention here. *Ri* is invariably substituted for *ri* except in *bhūbhri* (1.8). The *anusvāra* is generally changed into the nasal of the class to which the following consonant belongs. But in *khaḍgāṇṣu* (1.5), *vaṇśajāḥ* (1.7) and *=mad-vaṇśajāḥ* (1.26), the *anusvāra* has been wrongly changed to *ṇ*. In *°rāgaṇṇmkurvāṇaḥ* (1.8) *m* is redundant and the two words are unnecessarily joined together. In several places *visarga* or its transformation is dropped. In *°bhūtaś=śamita* (1.9) and *°nishēvitas=sēvyō* (1.12) *visarga* has been changed to the following consonant. *Jihvāmūliya* occurs in *°śaktiḥ=kuśali* (1.18) and *Upadhmāniya* in *ātmaajāḥ=prabala* (1.10), *māhēśvaraḥ=para-* (1.17), and *mantavyaḥ=prati-* (1.27). In *kurvāṇapprōṇnatānām* (1.8), *visarga* has been wrongly changed to *p*. The doubling in *Māddhyandina* (1.22) and *°rvvāggāmi* (1.26) also deserves notice.

The **language** of the inscription is Sanskrit, prose and poetry intermingled.

The grant begins with the preamble beginning with *Mēru* and ending with *nighṛishṭa-pāda-paṅkajaḥ* as we find in the other three Sēndraka plates. After it, comes the prose as well as the versified description of the king Nikumbha of the Sēndraka family, his son Ādityarāja and his son Nikumbhāllāśakti or simply Allāśakti. It is interesting to tabulate the pedigrees in the four grants here :—

(I) Kāsārē (653 A.C.)	(II) Nāgad (655 A.C.)	(III) Bagumra (655 A.C.)	(IV) Mundakhēḍē (680 A.C.)
(1) Nikumbha	(1) Bhānuśakti	(1) Bhānuśakti	(1) Bhānuśakti
(2) Ādityarāja	(2) Ādityaśakti	(2) Ādityaśakti	(2) Ādityaśakti
(3) Nikumbhāllāśakti or Allāśakti	(3) Nikumbhāllāśakti	(3) Nikumbhāllāśakti	(3) Nikumbhāllāśakti
			(4) Jay śakti

From the table it becomes quite evident that in the Kāsārē grant the first member is named Nikumbha, while the other three grants name the same member as Bhānuśakti. The Kāsārē grant mentions Ādityarāja as the son of Nikumbha while the other three grants give Ādityaśakti as the son of Bhānuśakti. The name of the member of the third generation is the same in all the four grants with the difference that Kāsārē grant supplies a variant Allāśakti in addition. But does this mean that the Sēndraka branch represented by the Kāsārē grant is different from the

one represented in the other three ? It is difficult to answer in the affirmative. For, besides the date of the Kāsārē grant which is very near to that of the Nāgad and the Bagumra grants, the writers and the commanders are practically the same in all the three. Thus the *Mahābalādhikṛita* Vāsava was the person at whose command all the three grants were issued. The Kāsārē grant was drafted by one Dēvadinna. In the Nāgad plates, Dēvadinna figures as the minister for peace and war and the charter was drafted by one Mātridatta with the consent of Dēvadinna. The draft of the Bagumra grant was also prepared by Dēvadinna, the minister for peace and war and the charter adds that Dēvadinna was a younger brother of Vāsava. I tabulate the above information in order to have a clear idea.

Grant	Commander	Drafter
Kāsārē (653 A.C.)	Generalissimo Vāsava	Dēvadinna.
Bagumra (655 A.C.)	Do.	Dēvadinna, the minister for peace and war and the younger brother of Vāsava.
Nāgad (655 A.C.)	Do.	Mātridatta with the consent of Dēvadinna, the minister for peace and war.

Thus it is evident that all the four plates represent one and the same family in spite of a slight variation in the name of the first member of the family in the record under discussion.

In an inscription at Bādāmi (Bijapur) occurs the stray name of one Bhīmaśakti Sēndrakan who undoubtedly belonged to a Sēndraka family and the same person appears to have been mentioned in other inscriptions of the same place.¹ But I fear that at this stage of our knowledge of the Sēndraka dynasty it is not possible to assign a definite place to this Bhīmaśakti.

From line 18 begins the description of the grant proper. Nikumbhāllaśakti, the last member of the family, who meditated on the feet of his parents, who was a great devotee of Mahēśvara, who had acquired the five great sounds and who was the master of the earth, with a view to acquire merit for himself as well as for his parents, gave fifty *nivartanas* of land lying to the south of the river at the village Pippalakhēṭa to the *Brāhmaṇa* Bālaprasasita, of the Kṛishṇātrēya *gōtra* and of the Mādhyandina branch of the *Vājasanīyī Saṁhitā*, i.e., white Yajurveda, for the *upabhōga* of the god Laṅghyēśvara. The phrase *samāvāptapañchamahāśabala* clearly indicates that the last member was a feudatory prince, apparently of the Western Chālukyas of Bādāmi.

The date on which the grant was issued is denoted by two symbols (1.31). The first symbol undoubtedly represents 400. The second symbol must be taken to represent 4. It is appended with a zig-zag horizontal line at the upper right corner and if this line has been appended purposely the symbol probably represents the number 70. But then we would be confronted with insurmountable difficulties. I, therefore, take the second symbol to represent 4. Thus the year will be 404. The further details of the date are the new-moon day of the month Āshāḍha and the solar eclipse. To what particular era this year of the grant is to be referred ? In the Nāgad and the Mundakhēḍē plates, though no era has been specified, the years 577 and 602 which occur in them can easily be referred to the Śaka era. In the Bagumra grant also though no era has been specified, the year 406 in which it is dated must be taken to belong to the Kalachuri era. The year 404, the date of this grant must also be referred to the same era as both the grants have many points of similarity as shown above. If, according to Prof. Mirashi's calculations, we grant that the initial year of this era began on 6-10-248 A.C., we must add 249 to 404 to get a date in Āshāḍha of that year.² According to the *pūrṇimānta* system of reckoning Hindu months, the new-moon

¹ *Annual Report on South Indian Epigraphy*, for the year 1928-29, Appendix E, Nos. 125, 101, 126, 127.

² Above, Vol. XXIV, p. 12.

day of Āshāḍha of the year 404, *i.e.*, 653 A.C. (404 *plus* 249) fell on June 1 when there was a solar eclipse visible in India. 1-6-653 A.C. must, therefore, be the date of the grant.

If on the other hand the numerical symbols are taken to denote the year 470 (*i.e.*, 719 A.C.), there was no solar eclipse on the new-moon day of the Nija-Āshāḍha according to either system of reckoning Hindu months. Though there was a solar eclipse on the new-moon day of the intercalary Āshāḍha of this year, there is no mention of such a month in the grant itself. Moreover, it is well nigh impossible for the same generalissimo and the same writer to have lived under the same king in 406 and 470 which will be the dates for the Bagumra and Kāsārē grants respectively.

Pippalakhēṭa is the only **locality** that I can decipher. Some river or rather stream is mentioned to be flowing by the side of the village ; but its name cannot be properly deciphered. As the boundaries of Pippalakhēṭa are not specified, it is difficult to identify it.

Though each of these two grants supplies very little direct historical information by itself, the facts supplied by the above-mentioned four grants when pieced together indeed shed much light on some points regarding the history of the Sēndraka family referred to in the grants, and it would not be out of place if I say a few words about them.

First, what was the extent of the country which the Sēndrakas ruled over ? The village granted in the Bagumra record has been rightly identified with Nausari in the Surat District. The place of encampment mentioned in the Nāgad plates from which the plates were issued is Kāyāvatāra or modern Kārwaṇ near Dabhoi which in itself is twenty miles to the south-east of Baroda. I may, therefore, be not far wrong if I surmise that the power of the Sēndrakas had extended upto Baroda at the time of the grant. If my conjecture about Nāndīpuradvārī, the province which included the village granted in the Nāgad plates, be correct, it follows that at least the southern half of the present West Khandesh District was under the sway of the Sēndrakas at the time of the grant. The places mentioned in the Kaḷwaṇ plates have not been finally identified as yet, I believe. But if Prof. Mirashi's suggestion about the identification of the places in the grant be accepted as correct, the village granted should be supposed to lie in the north-eastern extremity of the Nasik District. The village granted in the Kāsārē plates should be searched for somewhere in the north-eastern extremity of the Nasik and the south-western extremity of the East Khandesh Districts. For, it is in this part of the country that places bearing the names Pimparkheḍ, Pimpalwāḍī-Nikumbha (Pimpalwadi of the Nikumbhas), Ālwāḍī (Allavāṭikā), etc., lie and it is this part which the Nikumbhas who seem to be related to the Sēndrakas were ruling over in the eleventh and the twelfth centuries of the Christian era. Thus it is evident that the Sēndrakas most probably ruled over the modern Surat and Broach Districts, the southern half of the Baroda State, the West Khandesh District, the south-western part of the East Khandesh and the north-eastern part of the Nasik Districts.

Is there anything to show that the Sēndrakas were connected with the Nikumbhas in any way ? On the one hand the Bagumra grant begins with a verse in praise of the Sun. The names of the majority of members of the Sēndraka family begin with some word meaning the Sun, *e.g.*, Bhānuśakti, Ādityaśakti ; and Nikumbha was the name of a well-known mythical king belonging to the solar race. On the other hand the Nikumbha inscriptions begin with homage to the solar race and then Rāma and Nikumbha belonging to the same race are extolled. Lastly, it is stated in Nikumbha inscriptions that in the family of Nikumbha was born the first ancestor from whom begins the pedigree of the Nikumbha dynasty. In these circumstances it appears that the Nikumbha dynasty was either an off-shoot of the Sēndraka family or both of them were descended from a common stock.

^१ The reading of this and the following lines is unsatisfactory owing to erasure and corrosion.

^२ In the space between the letters from *ka* to *rā* in this line and the word *Pippalakhēṭ* in the next line are engraved the words *yathā mayā brāhma*.

^३ Exactly below the portion of the text beginning here and ending with the 22nd line was originally engraved a different text which seems to run thus : *gasya ch=āghātānāni uttaratō snānā ? nadi pūrvatō Rāsiyānaka grāmē -na dukṣiṇatōś=śāśāni [na*] hō(hah) paśchimata(tas)=tafāka-samētō vaha ēvam chaturā°*. But as this portion was unnecessary, it was subsequently erased and substituted by the present portion. But owing to this very reason the text here has become so obliterated that it is not possible for me to give a satisfactory reading and as this very part contains the details about the village connected with the grant the loss is greater.

^४ Delete *varṭanāni* which is redundant.

^५ Read °*y=āsmat-pit°*.

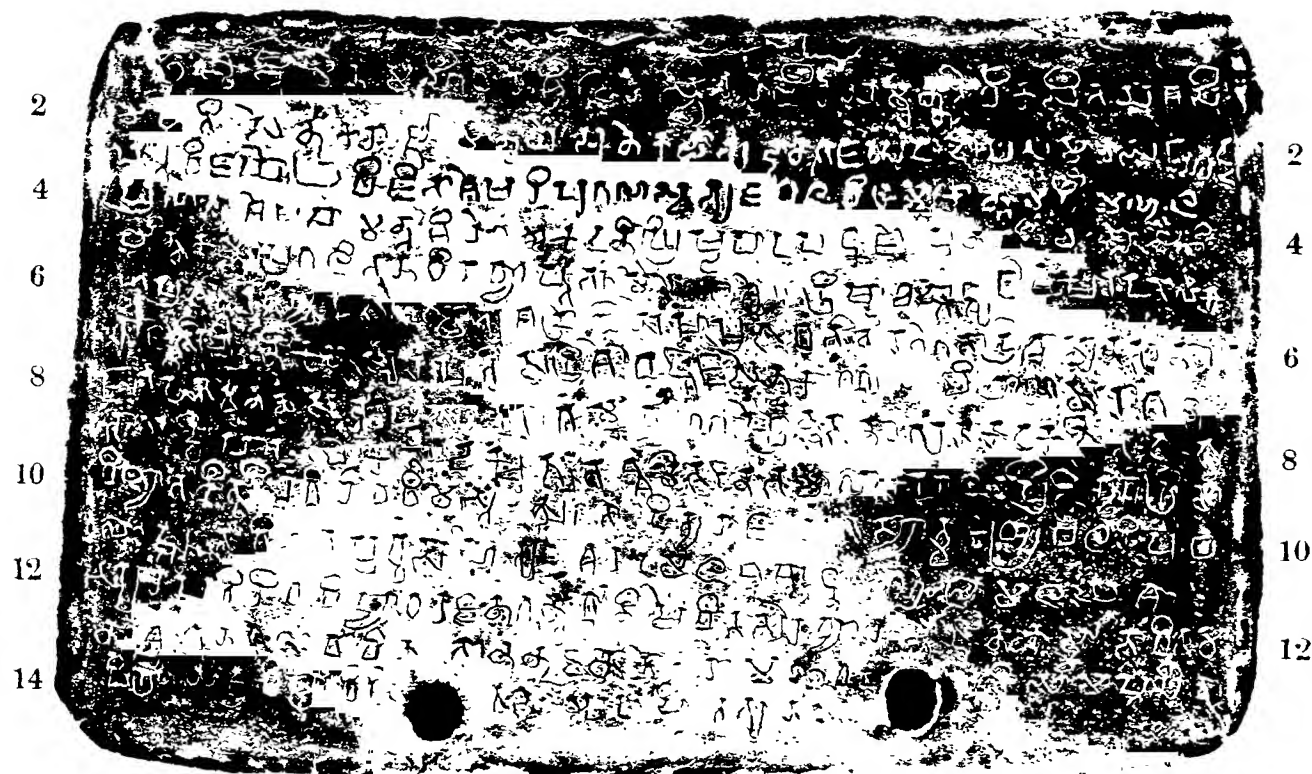

^६ Read *vaśśajni°*.

^७ Metre : *Anuṣṭubh* ; read *śaṣṭīm varṣa*.

^८ This portion should follow, I think, *nadidakṣiṇatah* in line 21.

No. 35—VELICHERLA GRANT OF PRATAPARUDRA GAJAPATI : SAKA 1432*(1 Plate)*

G. RAMADAS, JEYPORE

This copper-plate charter was sent to the Assistant Archæological Superintendent for Epigraphy in the year 1920-21, by the District Munsiff of Kāvali and in the *Madras Epigraphical Report* of that year issued by him, it is registered as No. 12 of Appendix A. The Assistant Superintendent makes the following note on it in part II, para. 70 of the report.

“ A set of three copper-plates strung on a ring belonging to Pratāpa-Rudra of the Gajapati family of Orissa, was sent to me by the District Munsiff of Kāvali. This is given as No. 12 of Appendix A to this Report. The plates measure 8·1 inches in breadth and 3·7 inches in height. The ring that holds them together is 2·5 inches in diameter and carries a fixed seal, the circular surface of which is blank.”

Sri Ongole Venkatarangayya Garu, B.A., B.L., edited this grant in English in *J.A.H.R.S.*, Vol. XI, pp. 51 ff. and in Telugu in the *Bhārati*, Vol. XIII, pt. II, pp. 271 ff.

He says, “ Mr. Pulugulla Venkataramaniah, a pensioner (since deceased) was kind enough to lend the engraved plates for publication. They contain a petal-like projection with a hole in the middle about $\frac{3}{4}$ inch long on the left side of each plate. The ring with which these three plates were strung together passed through the round hollow in these projections. Unfortunately this ring is missing.” The same information is given in the Telugu article in the *Bhārati*, where the author states (p. 274) : “ In the year 1917, in the O. S. No. 388, between the *Agrahārikas* and the ryots of the village, regarding certain cultivation rights, the *Agrahārikas* obtained the judgement in their favour in the court of the District Munsiff of Kāvali by filing this document as exhibit R.”

This charter is written in the Telugu script and there are many orthographical peculiarities. The first 32 lines are in Sanskrit verse ; the last 4 lines (lines 36-39) give the imprecatory verses. The boundaries of the gift village are given in lines 32-36 in Telugu prose. The following orthographical peculiarities are noticed in the record.

The *anuvāra* generally takes the place of the nasal and the consonant after an *anuvāra* is doubled, sometimes the aspirate or the unaspirate form of the same consonant being employed while doubling, e.g., line 1, *saṃghā-* ; line 2, *viśṛimkkhala* ; line 3, *saṃssarggā-* ; line 5, *ambbhō-jinī-* ; line 9, *-āmśśāt* ; line 12, *phullamtti* ; line 17, *Gōvimdda* ; line 18, *Vēmkkata* ; line 19, *komdda* ; line 21, *sāmamttai* ; line 32 *damdda* ; but in *gumta* line 34, the letter *ṭ* is not doubled. This is to show the difference in the significance of each.

¹ Read *Vāsava-samādēśāt*.

Similarly the consonant after *r* is doubled, e.g., line 2, *-ōrmmi* ; line 5, *Harēr=ddakshīṇa* ; lines 9 and 19, *durrga* ; line 10, *karṇṇa* ; line 21, *sarvva* ; line 25, *Velicherlla* ; line 28, *udakair=ddhārā* ; line 33, *barllō* ; line 36, *sarvvē*. The final *n* (*nakārapollu*) at the end of a *pāda* is given, e.g., line 4, *°udvahan*.

In the Telugu portion giving the boundaries, the word *rāyi* (stone) is written with only the initial vowel *i* (short) as *rāi* ; *pūrṇānūsuvāra* is used where *ardha anusvāra* is used now, e.g., line 35, *vūṁgu* ; *tūrpumgommuna*.

Lines 1 to 4 ; the charter opens with a prayer to Gaṇēśa and to the Varāha incarnation of Viṣṇu who raised the earth from the ocean. Lines 4 to 6 ; the family of the donor is said to have been descended from the Sun-God who is also praised. Lines 6 to 12 ; in that family was born Kapilēśvara and to him was born Purushōttama. To the latter was born Pratāpa-Rudra. The charter ratifies the gift of the village, Velicherla, by Pratāpa-Rudradēva Gajapati to a Brāhmaṇa on the 3rd *tithi*, Friday, of the bright half of the (lunar) month of Kārttika of the (cyclic) year (*Pramōdād=any-ābdavarē*) which corresponded to the Śaka year indicated by the chronogram *kara-rām-ābdhi-śītāmśu*, (2, 3, 4, 1).

As this date is important to clear some fallacies created by the historians regarding the relations of Kṛṣṇadēvarāya of Vijayanagara and Pratāpa-Rudra Gajapati, I undertake to discuss this first before I proceed to comment on the text of the document. Mr. Venkatarangayya, who published this copper-plate grant, said that the date corresponded to 1510 A. C., October, 4, Friday ; but on examination it is found that the *tithi* on that day was not *trītiyā* but partly *prathamā* and partly *dvitīyā*. The editor of the journal (*J.A.H.R.S.*, Vol. XI, pp. 57.) argued thus :—Unfortunately the Śaka saṁvat and the cyclic year do not agree ; for Śaka 1432 (expired) coincided with Parīdhāvi (*sic*), Śaka year 1433 expired or 1434 current alone (*sic*) would correspond to the cyclic year Pramōdūta. The date of the grant in Christian era would be equivalent to Friday, 24th October, 1511 A. C.

In the *Madras Epigraphical Report* for 1921, para. 70, it is said that Pramōdūta corresponded to 1510-11 A. C. None of these examiners seem to have understood the passage giving the date rightly. I quote here the verses (lines 22 to 24) to make it clear.

Line 22. *kara-rām-ābdhi-śītāmśu-saṅkhyāka-Śaka-vatsarē Pra-*

Line 23. *mōdō(dā)d-any-ābda-varē māsi Kārttika-nāmani śukla-trītiyā-divasē Bhā-*

Line 24. *rggavasya cha vāsarē*, etc.

Here the cyclic year Pramōda or Pramōdūta correctly corresponds to the Śaka year 1432 ; but the compound *Pramōdō(dā)d-any-ābda-varē* clearly indicates that the year other than (next to) Pramōda, i.e. Prajāpati—consequently, the Śaka year next to that quoted in the inscription, viz., 1433 seems to be intended. The date now resolves itself to Śaka 1433, (cyclic year) Prajāpati, (the lunar month) Kārttika śuddha 3, Bhārgava's (week-)day, which corresponds to 1511 A. C., October 24, Friday.

Since the grant was made when the king was holding court in the great fort of Uṇḍrakonḍa, it is certain that he was in the south in 1511-12 A. C. ; it was his *anka* 17 as his father died in 1496-97. That the Gajapati king was in the south about 1511 A. C. is corroborated by other sources of information. The *Kaṭakarājavamśāvalī*¹ says that, when, in the 17th year (of reign) Cuttack was attacked by the Mogul called Hussan Shah, the king (Pratāpa-Rudra Gajapati) who went

¹ *Further Sources of Vijayanagar History*, No. 94. The rest of the passage mentions the regnal year as *varsha* and not as *anka*. However since the Gajapati rulers invariably reckoned their reign in *ankas*, we may understand by *varsha* only the *anka* year.

south to conquer, returned and defeated the Mogul. This was in the 17th year of Pratāpa-Rudra. Jivadēvāchārya in the *Prasasti* of his *Bhaktibhāgavata*¹ says, 'the king, in his 17th year, was at Tirumala, fighting.' All these prove that Pratāpa-Rudra Gajapati of Orissa was in the south till October 1511 A. C.

Yet, basing his arguments on the Gōnuguṇṭa rock inscription of Kṛishṇadēvarāya, the Superintendent for Epigraphy in the *Annual Report on South Indian Epigraphy* for the year 1933-34, para. 41, says that Kṛishṇadēvarāya subdued Udayagiri some time between 24th January 1510 A. C. and 15th October of the same year. This argument becomes untenable if the date of the said Gōnuguṇṭa epigraph is taken into consideration. The date given in it is Śaka 1433, Pramōdūta, Kārttika śu. 11, Tuesday. Firstly, Śaka 1433 was not Pramōdūta; but it corresponds to Prajāpati, 1511 A. C. If the cyclic year Pramōdūta is taken, Kārttika śu. 11 falls on 13th October, Sunday, 1510 A.C. If Śaka 1433, Prajāpati, is taken, the date corresponds to Saturday, 1st November, 1511 A. C. Either way, the date of the epigraph is not correct, since the week day does not tally; and therefore it cannot be accepted as genuine.

The same officer in the beginning of the paragraph corrects the date of another inscription at Guṇḍlapālem, of Pratāpa-Rudra Gajapati, and says that he granted a piece of land in 1510 A. C., sometime after January. Guṇḍlapālem is in Kandukur *tāluk* and Gōnuguṇṭa is in Ongole *tāluk*. The two *tāluk*s are so adjacent that it cannot be accepted that two hostile kings could hold sway here so closely.

In view of what has been stated above, the conclusions of the Superintendent for Epigraphy regarding the date of Kṛishṇadēvarāya's conquest of the Udayagiri fort need to be modified.

In the Velicherla copper plate under review, Pratāpa-Rudra of Orissa bears several titles. It is but necessary to see if they were mere vainglorious ones or were really deserved. He was the overlord of the five Gauḍas, (*Pañcha-Gauḍ-ādhināyakaḥ*, line 16). Kapilēśvara, his grandfather, acquired the title of Gauḍēśvara which became hereditary in his family. Only one part of the Gauḍa country must have been subdued during the time of Kapilēśvara. But Pratāpa-Rudra of Orissa defeated the ruler of Bengal (Gauḍa) and pursued him till the latter hid himself in his fort (lines 13-15). The *Bhaktibhāgavata Prasasti* says (verse 27), 'while his hair was still wet with the bath of coronation, he defeated the Sultan of Gauḍa, a conqueror in many battles, and at the end of the sixth week of his father's death he offered handfuls of water of the Gaṅgā for the merit of his father. The Anantavaram plates² with the date corresponding to 1500 A. C., November 5, Thursday, lunar eclipse, say that Pratāpa-Rudra drove the Aṅga king to the mountain refuge. This victory is amplified in the Iḍupulapāḍu-Garuḍastambha inscription,³ the date of which corresponds to 1500 A. C., November 5, Thursday, lunar eclipse, which declares *Gauḍendra-krandana-kathit-āśēsha-vijayaḥ*. Since these records bear the same date, this particular exploit must have been achieved before 1500 A. C.

Then we consider the other epithet, *Raṇa-Baṇijāra*. *Raṇa* means battle or fight; *Baṇijāra* is an Urdu word meaning the same thing as *Lambāḍi* (C. P. Brown), which means a trader.⁴ So the phrase means a trader in battles, i.e., a victor in battles.

Since Anantavaram and Iḍupulapāḍu, where the grants of this Pratāpa-Rudra Gajapati were found, are located to the north of the river Kṛishṇā, and since the village of Velicherla, the

¹ *Report on the Search for Sans. Mss., 1901-02 to 1905-06*, by M. M. H. P. Sastri, pp. 14 ff, vv. 31 and 32.

³ *S. I. I.*, Vol. X, No. 732, text lines 38-9.

⁴ [Really speaking, the word *baṇijāra* is derived from Sanskrit *bāṇijya* (or *vāṇijya*)-*kāra*.—Ed.]

object of this grant, is said to be in Pāka-nāḍu, it may be inferred that the region along the sea-coast might have been called by the name of Pāka-nāḍu.

Uṇḍrakonḍa, one of the forts said to have been captured by Kṛishṇadēvarāya, was a *mahādurga* where Pratāpa-Rudra Gajapati held his court, attended by learned men (*Paṇḍits*), *Pātras* (commanders of army), *Bēharā Mahāpātras* (collectors of revenue as well as commanders of army), and *Sāmantas* (vassals) (lines 19-21). The Assistant Superintendent for Epigraphy takes this to be the same as Indrakonḍa of Briggs' *Ferishta*, II.

Vidyānidhi is the last of his titles and it requires explanation. His work, *Sarasvatīvilāsa*, is a living evidence of his lore in *Śāstras*, *Purāṇas* and other works in Sanskrit literature. Some scholars contend that the work was written by Lakshmīdhara Paṇḍita; yet it may be said that the Paṇḍit might have helped the Gajapati in compiling the work.¹ His father Purushōttama Gajapati was such a great scholar that his poetic flourishes were elixir to the ears (*Karṇa-rasāyanāni*) (line 10). The son of such a scholar king must have been educated well in his boyhood. In his 15th year while being the governor of Śrīkūrmam(-Maṇḍala), he wrote such a beautiful and scholarly book as *Śyainika-śāstra* (the science of Hawking).² M. M. H. P. Sastri, who was not aware of the learning of the Gajapati prince of Kūrmam, considered Kūrmāchala as referring to Kumaun and Rudradēva as its king. The other details recorded in the inscription are the following.

Lines 26-28 : The donee Koṇḍayya, was the best of the twice born (*dvija-rājah*), shone with all good qualities, was the son of Tammaya and the grandson of Nārāyaṇa Yajvan (who performed a sacrifice) of the Bhāradvāja *gōtra*, of the Yajus(-śakhā) sect, and was a resident of Puluguḷla.

Line 28 : The object of the grant was Velicherla, the gem amongst villages situated in the region of Jaladaṅki, in the district (*sīman*) of Pāka-nāḍu. This gift was made with reverence (*samādarāt*), associated with libations of water and gold (*hiraṇya*).

The gift, exempted from the thirty six kinds of demands and other imposts, was given to last till the moon and the sun endure, to be enjoyed from son to grandson (for generations). Such rights as those of mortgage and sale were also given. The gift was made in the presence of Durgā and Jagannātha for the increase of merit (lines 31-32). The boundaries of the village were shown by the boundary stones.

The boundaries are mentioned in Telugu from line 32 to line 36. Lines 36-39 contain two imprecatory verses.

The charter is ratified by fixing the royal seal which is divided into two parts. The first represents a 'rampant lion' in writing. Many people understand it to be the Telugu letter *kha* which forms the initial of the word *Khāmāṇḍu*. This is not tenable as there was no occasion for the kings of Orissa to adopt this word of Urdu origin.

The significance of this seal requires to be traced from the time of the Eastern Gaṅga kings of Orissa. They ratified their grants by securing the ends of a metallic ring on which the plates containing the document were strung, in a metallic lump on which was fixed the seal consisting

¹ [For a discussion regarding the authorship of *Sarasvatīvilāsa*, see *J. B. R. S.*, Vol. XXXVI, pp. 15 ff.—Ed.]

² Published by the *A. S. B. New series*, No. 1252, edited by M. M. H. P. Sastri. Mr. Sastri understood the author as the lord of Kūrmāchala, which is supposed to be the modern name of Kumaun; but considering the internal evidences in the work, Pratāpa-Rudra was really the Governor of Kūrmam which, in analogy with *Sīmha-chalam*, was named Kūrmāchala. As in the *Sarasvatīvilāsa*, in this work also, he collects authorities from several books of Sanskrit literature. References to *Purāṇas*, *Vēdas*, and other works of Sanskrit are a peculiar feature in the authorship. Gajapati kings. Purushōttamadēva Gajapati in his *Nāmamālikā* says that he had studied several books.

of a couchant bull, conch, sword and elephant-goad. When the Sūryavamśi kings succeeded to the government of Orissa, they replaced the four objects so as to suit their faith and prowess. Kapilēśvara's copper-plate grant shows a harnessed elephant and the hilt of a sword. There are some ornamental engravings on the hilt.

Only one charter of Purushōttama Gajapati is found till now and it is published in *J. B. and O. R. S.*, Vol. IV, pp. 361 ff. and plate, under the caption : *A note on an inscribed copper axe-head from Orissa*. The seal represented at the end of the inscription is composed of the engravings of four objects :—(1) a letter (2) a conch (3) a double-edged long sword (4) a dagger.

The first looks like the figure 3 with an uplifted tail behind. Since the donor was a worshipper of Durgā (*Śrī-Jayadurgāyai namaḥ*), he might have adopted the lion, the vehicle of Durgā as his emblem or crest. This figure represents the rampant lion. (2) The conch may stand for the *pañcha-mahā-śabda*, often found mentioned in the copper-plate charters of the early Gaṅga kings.

(3) The long sword is always a sign of royal authority and valour.

(4) The dagger is another weapon used in a closer fight.

Purushōttama's son Pratāpa-Rudra Gajapati reduced these signs, omitting the conch, to the writing form.

The first crest lost its middle horizontal projection but retained its tail. This stands for the rampant lion, as emblem of valour and royalty. Then the long sword and the dagger are combined together. The first two ovals stand for the hilt of the sword ; the third oval stands for the handle of the dagger the blade of which is shown by a line from the lower part of the oval.

There are some signs on the handle of the long sword. They are the representation of some ornamental carvings of the hilt as found in the Veligalani grant of Kapilēśvara.¹

No. 36—TERUNDIA PLATE OF SUBHAKARA II*(I Plate)*

D. C. SIRCAR, OOTACAMUND

About the close of May 1950, I received for examination a copper-plate inscription from Mr. C. M. Āchārya, M.A., LL.B., Vice-Chancellor of the Utkal University, through the Registrar of the said institution. No information was then available as to its findspot and the circumstance of its discovery. Sometime afterwards Mr. Āchārya kindly agreed to my suggestion that the inscription should be edited by me in the pages of the *Epigraphia Indica*. My sincere thanks are due to him for his kindness in allowing me to publish the record. In December 1950, I visited Puri in course of my annual tour in search of inscriptions. There I met Pandit Sadāśiva Ratha Śarmā who collects inscriptions on behalf of the Utkal University. I learnt from the Pandit that the plate under discussion had been recovered by him, together with some interesting articles of pottery, from an old well in the house of Śrī Chakradhara Sāmal of Terunḍiā, a village about five miles from Nimāpārā which is the headquarters of a Police Station of that name in the Puri District of Orissa.

The inscription is written on a single plate measuring about 16" in length and 8½" in height. The proper right end of the plate, to which a copper lump containing the seal is soldered, does not run in a straight line but is slightly curved. The plate is thus more than ½" longer in the middle than in the upper and lower sides which are both about 16" long. The seal is much corroded and only the traces of an emblem looking like a couchant bull are visible. The round surface of the seal is 2½" in diameter. The thickness of the lump of metal, on which the seal emblem is counter-sunk, is 1¼". The plate is not in a satisfactory state of preservation and the writing, especially on the obverse, has suffered considerably from the effects of corrosion. There are 20 lines of writing on the obverse and 10 lines on the reverse. The weight of the plate together with the seal is 191 tolas.

As regards palaeography and orthography, the inscription under discussion resembles very closely the published records of the Bhauma-Kara dynasty of Orissa, including the *Sāntiragrāma*

grant of Daṇḍimahādēvi (who flourished about three quarters of a century later than the issuer of the present charter) and the Jajpur (Haṁsēśvara temple) inscription mentioning the royal couple Śubhākara I and Mādhavadēvi (who were the grandparents of the issuer of our charter), both of which have been recently edited by me for the pages of this journal.¹ The only point of palaeographical interest, to which attention may be drawn, is the way in which the number 100 is written in line 22. Here the usual *lu* symbol indicating 100 is rather unusually followed by a cypher apparently indicating the absence of the ten and unit elements in the number. This is no doubt due to the influence of the decimal system of writing numerals which was becoming popular in various parts of India even before the rise of the Bhauma-Karas of Orissa. The Bhauma-Kara king, who is usually styled Śubhākara II, is already known from his two copper-plate grants, *viz.*, the Hindol and Dharakota plates,² both of which are dated in the year 103, the former on Śrāvaṇa śudi 7 and the latter on Bhādrapada śudi 7. It is interesting to note that, while the number 103 has been written in the Dharakota plate as 100 3 in the usual way, the same number has been written in the Hindol plate³ as 100 0 3 with the cypher indicating the absence of the ten element in it. The charter under discussion was issued about three years earlier than the Hindol and Dharakota plates referred to above.

The **language** of the inscription is Sanskrit. It is written in both prose and verse. It should, however, be pointed out that, while the texts of the Hindol and Dharakota plates of the year 103 closely resemble each other, the draft of the present document issued in the year 100 is quite different. The verses employed in the charter under review are also different from those found in the Hindol and Dharakota records. As, moreover, will be seen from our discussion below, the present inscription offers some interesting new information.

The inscription is **dated** in the year 100 Vaiśākha sudi 5(?). As is well known, the era used by the Bhauma-Kara kings of Orissa is identified by some scholars with the Harsha era of 606 A.C., although there are writers who are inclined to assign the epoch of the era to a later date. Thus the date of the record under discussion falls in 706 A.C. or, if the views of the second group of scholars are preferred, to sometime in the eighth century or later. I have fully discussed the problem of Bhauma-Kara chronology in connection with the Sāntīrāgrāma grant of Daṇḍimahādēvi recently,⁴ and hardly anything in this connection requires special mention here.

The charter belongs to king Śubhākara II of the celebrated Orissan imperial family called usually Bhauma in earlier records and Kara in the later. It was issued, like other grants of the family, from the city of Guhadēvapāṭaka, otherwise called Guhēśvarapāṭaka. This city, which was apparently the capital of the Bhauma-Kara kings, has been identified with modern Jajpur on the Vaitaraṇī in the Cuttack District of Orissa.⁵ It is mentioned as a *jaya-skandhāvāra*; but it has been shown that, although the word *skandhāvāra* usually means 'a camp,' it has also the sense of a *rājadhānī* in medieval lexicons.⁶ The description of Guhadēvapāṭaka in prose in lines 1-2 of the record under review is followed by another prose passage saying that, after the death of the Bhauma kings beginning with Lakshmīkara, the throne passed to *Mahārājādhirāja Paramēśvara Śubhākara I* who was a *paramōpāsaka*, 'a follower of the Buddhist faith.' It may be pointed out in this connection that, in the Neulpur⁷ plate of Śubhākara I himself, the king is described as a

¹ Above, p. 180.

² B. Misra, *Orissa under the Bhauma Kings*, pp. 12-22; *JBORS*, Vol. XVI, pp. 69-83; *JAHRS*, Vol. IV, pp. 189-94.

³ The plate now belongs to the collection of the Utkal University, Cuttack, and I had recently an opportunity of examining it through the kindness of Mr. C. M. Āchārya. An examination of the original plate revealed the fact that the published transcript of the text of this inscription contains some errors.

⁴ My article on the inscription is being published in this journal.

⁵ Above, p. 183.

⁶ *Successors of the Sātavāhanas*, pp. 47-48.

⁷ Above, Vol. XV, pp. 3; Misra, *op. cit.*, p. 4.

paramasaugata 'a devout worshipper of the Sugata or Buddha,' while his father Śivakara I (also known as Unmaṭṭasiṃha *alias* Bharasaha) and his grandfather Kshēmaṅkara are called respectively a *paramat[ā]lāgata* and a *paramōpāsaka*. The most interesting epithet of king Śubhākara I in our record is *sva-prabhāva-samāsādita-sārvabhauma-bhāva* in lines 3-4, which suggests, as already conjectured by me elsewhere,² that he was the first imperial ruler of the family. It was also suggested by me that Lakshmikara was just another name of Kshēmaṅkara, grandfather of Śubhākara I.

The above section of the inscription in prose is followed by three verses in lines 4-8, describing Śivakara II who was the eldest son and successor of Śubhākara I. In the last of these verses, king Śivakara II is described as *Sugat-āśraya*, 'a Buddhist.' The three verses are followed by a long passage in prose in lines 8-13, introducing *Paramabhaṭṭāraka Mahārājādīrāja Paramēśvara* Śubhākara II described as the son and successor of Śivakara II and the issuer of the charter under discussion. He was a *paramasaugata*, 'a Buddhist,' like his predecessors. (It is interesting to note that, like some of the Buddhist kings of the Pāla dynasty of Bengal and Bihar,² *paramasaugata* Śubhākara II claimed to have established the order of the *varṇ-āśrama* in its golden age purity in strict accordance with the scriptures (cf. *niratisāya-śāstr-ānusāra-pravartita-kṛtayaug-ōchit-āsāṅkirṇa-varṇ-āśrama-vyavastha* in lines 9-10). This no doubt points to the great influence of the Brahmanical social system on the lay followers of Buddhism which, along with several other factors, ultimately led to the complete absorption of the latter into the Brahmanical fold.) (But the most important point in the description of king Śubhākara II in our record is that he is here represented as the son of Śivakara II. He is, moreover, said to have been born of the queen Mōhinīdēvī who belonged to the Bhavāna-vaṃśa, possibly indicating a royal family of which the progenitor was a ruler named Bhavāna, although no such king or dynasty is so far known to us from other sources. We know that, according to the Hindol and Dharakota plates of the king usually styled Śubhākara II, he was the son of Śāntikara I, younger brother of Śivakara II, and was born of the queen Tribhuvanamahādēvī belonging to the *Nāg-ōdbhava-kula*, i.e., possibly a certain Nāga family.³ We also know that after the premature death of that king, his mother Tribhuvanamahādēvī, also called Siddhagaurī, ruled the Bhauma-Kara kingdom for some years during the minority of her son's son Śāntikara II.⁴ King Śāntikara I is known to have ruled in the year 93.⁵ He was therefore followed on the Bhauma-Kara throne by Śubhākara represented in the present inscription (dated year 100) as the son of his elder brother Śivakara II from Mōhinīdēvī, although the Hindol and Dharakota plates (dated year 103) speak of a ruler of the same name as his own son from queen Tribhuvanamahādēvī *alias* Siddhagaurī. The information offered by the present inscription is a very valuable addition to our knowledge of Bhauma-Kara history. Śāntikara I seems to have been succeeded by Śubhākara who was the son of Śivakara II from Mōhinīdēvī and this Śubhākara was succeeded by another Śubhākara who was the son of Śāntikara I from Tribhuvanamahādēvī. If such was the case, Mōhinīdēvī's son Śubhākara (to be called Śubhākara II) must have ended his rule shortly after the year 100 and Tribhuvanamahādēvī's son Śubhākara (to be called Śubhākara III) must have succeeded him shortly before the year 103. It may, however, be argued that the issuer of the present charter as well as of the Hindol and Dharakota plates may have been one and the same king named Śubhākara II and that he was actually the son of Śivakara II from the queen Mōhinīdēvī but was adopted by Tribhuvanamahādēvī queen of Śāntikara I between the years 100 and 103 of the era used by the Bhauma-Karakings, when he was actually on the throne. But I consider it impossible

¹ *JKHRS*, Vol. II, p. 103. Cf. the expression *prati-sāmanta*, probably meaning 'rival feudatories,' used in connection with the adversaries of his predecessor in lines 2-3.

² *Grauṇa-lēkha-mālā*, p. 36 : *śāstr-ārtha-bhājā chalatō=nuśāsa varṇān pratishṭhāpayatā sva-dharmē, etc.*

³ Misra, *op. cit.*, p. 14.

⁴ *Ibid.*, pp. 23 ff. In her own Dhenkanal plate, queen Tribhuvanamahādēvī is described as the daughter of Rājamalla of the southern country.

⁵ Above, Vol. XIX, pp. 263-4.

that a reigning monarch could have been adopted as son by one of his female relations. Moreover the accession to the Bhauma-Kara throne of five queens (*viz.* Tribhuvanamahādēvi I-II, Gaurīmahādēvi, Vakulamahādēvi and Dharmamahādēvi) and of a princess (Daṇḍimahādēvi) points to the unpopularity of the institution of adoption in the Bhauma-Kara family. The difference of the draft of the present charter from that of the Hindol and Dharakata plates has also to be noted in this connection. It is, however, as yet unknown whether there was a struggle for the throne between Śubhākara II and Śubhākara III after the death of Śāntikara I. It is also uncertain why Śāntikara I succeeded his elder brother when the latter had left a son.

The royal order in respect of the grant was addressed to the present and future officials and subordinates belonging to Dakṣiṇa-Tōsalī such as the *Mahāsāmanta*, *Mahārāja*, *Rājaputra*, *Antaraṅga*, *Kumārāmātya*, *Uparika*, *Vishayapati*, *Tadāyuktaka*, *Dāṇḍapāśika*, *Sthānāntarika* and other dependants, including persons of the *chāta*, *bhaṭa* and *vallabha* categories (lines 13-15). It was also addressed to such offices (*adhikaraṇa*) within the Sulāntarakurbha *vishaya* as those of the *Muhāmahuttara*, *Brihadbhōgin*, *Pustapāla* and *Kulakōlasa* (lines 15-16). It is well known that the kingdom of the Bhauma-Karas was divided at least into two provinces, *viz.*, Uttara-Tōsalī and Dakṣiṇa-Tōsalī, *i.e.*, the North and South Tōsalī. The *vishaya* or district, called Sulāntarakurbha in our record, formed a part of South Tōsalī. A village called Lavāgaṇḍā, situated in the said *vishaya*, was granted by the king as a revenue-free permanent gift in favour of certain Brāhmaṇas at the request of the queen (*rājñī*) Nṛiṇṇā who was apparently one of the king's wives (lines 16-22). The donees, who were inhabitants of Taramaṇḍapagrāma, belonged to the Bhāradvāja *gōtra* and were students of the Kāṇva *śākhā* of the Vājasaneyā *charaṇa* of the Yajur-veda. They were six in number, *viz.*, Bhaṭṭa Bhēṇḍadēva, Bhaṭṭa Vidrāvanadēva, Bhaṭṭa Khēlāvanadēva, Bhaṭṭa Mērudēva, Bhaṭṭa Rāṅgadēva and Bhaṭṭa Śaṇḍhadēva. Most of the technical terms used in connection with the grant are also found in other copper-plate charters of the family and have been discussed already in connection with the Śāntīrāgrāma grant¹ of Daṇḍimahādēvi. The grant was made for the upkeep of the *ma'ha* and *maṇḍapas* established by the Brāhmaṇas in their native village. The words *ma'ha* and *maṇḍapa* appear to mean here respectively 'a college' and 'a public building.' They are often mentioned in later Gaṅga records.² Lines 22-23 contain the king's entreaty to the future rulers of the country as well as the date discussed above. This is followed by the passage *uktañ=cha dharmma-śāstrē* which introduces five of the usual imprecatory and benedictory verses in lines 23-27. There is another verse in lines 27-28, praying for the permanence of the Kara (*i.e.*, Bhauma) king's charter recorded on the plate. Similar verses are also found in some other charters of the family.³ It is interesting to note that our record thus speaks of the royal family in question both as Bhauma (line 3) and as Kara (line 28). This is, again, the earliest record of the dynasty in which the family name Kara occurs. The dynastic name Kara was no doubt due to the crystallization of the name-ending of all kings (*e.g.* Kshēmanikara-Lakshmīkara, Śivakara I-III and Śāntikara I-III) of the family, excepting those bearing the name Śubhākara (I-V). The *dūtaka* or executor of the grant was the *Mahākshapa/alādhikṛita* (*i.e.*, an officer of the *akshapa/ala* or record department) named Tāradatta. The writer of the document was the *Mahākshapa/alika* (*i.e.*, record-keeper) Bhōgin Ānandanāga. The plate was heated (*tāpita*), apparently for soldering the seal, by the *pēḍāpāla* Nārāyaṇakara. The epithet *pēḍāpāla*, also found in many other records, has not been satisfactorily explained. The word *pēḍā* seems to be used in the *Divyāvadāna*⁴ in the sense of 'a basket.' The *pēḍāpāla* thus may have been a storekeeper of the king's record department. It is difficult to say whether *Pēḍāpāla*

¹ The inscription is being published in this journal.

² See the grants of Narasimha II, edited above, pp. 187 ff.

³ Misra, *op. cit.*, p. 16 (lines 30-32 of text), p. 27 (lines 39-41 of text), etc.

⁴ Cf. Monier-Williams, *Sanskrit-English Dictionary*, 1899, s.v. The word is found in some records as *pēḍāpāla*.

22 24 26 28 30

Nārāyaṇakara of the present record is the same as *Pēṭapāla* Nārāyaṇa who heated the Neulpur plate of Subhākara I. The plate was engraved by the *ta'hākāra* (i.e., metal-worker; cf. Hindi *ṭhaḥērā*) Āghāka who was the son of Mallu.

Of the geographical names mentioned in the charter under discussion, Dakṣhiṇa-Tōsalī included the present Puri District of Orissa together with parts of the Cuttak and Ganjam Districts. I have not been able to locate the Sulāntarakurbha *viśhaya* and the villages called Lavāgūṇḍā and Taramaṇḍapa. The location of Guhadēvapāṭaka or Guhēśvarapāṭaka has already been indicated above.

No. 37—TALI INSCRIPTION OF KODAI RAVI : 17TH YEAR

(1 Plate)

V. VENKATASUBBA AIYAR, MADRAS

The inscription² published below is engraved on a slab of stone kept in the *vādīl-māḍam* or the entrance-porch of the Śiva temple at **Tali** in the Talappuḷḷi taluk of the Cochin State. The temple contains some records of the time of the Chēra kings Kōvindēśvaran Kōdai³ (Indu-Kōḍai-varman)

¹ The single *dandas* are used in lines 20-21 as the hyphen is done in English.

² No. 344 of the Madras Epigraphical collection for 1924.

³ No. 341 of the Madras Epigraphical collection for 1924.

and his successor Bhāskara-Ravivarman¹ and may therefore be considered to have been in existence from the middle of the tenth century at the latest.

The Vaṭṭeḷuttu characters in which the record is neatly engraved can be approximately attributed to the 11th century A. C. The medial *i* sign which is attached to the left side of the letters in most of the cases is put on the top of the letter in a few instances, as in *vi*, *tī*, *mī* in line 1 and in *ḷi* in line 2. The letter *ya* is engraved in the earlier form and in the later cursive variety. Grantha letters have been employed in the words *Śvasti śrī* (line 1), *Nityavichārēśvara* (line 2) and *Uttama-madhyama-adhama* (line 13). The language of the record is correct Tamil prose except the word *iṭṭidu* in line 5 which is a slightly corrupt form of the word *iṭṭadu* now in use in the Malayalam language. *Īyāna* is the dialectical form of *Īśāna*, *ya* being the usual substitute for *śa*. Rules of sandhi have generally been followed.

The object of the record is to register a gift of the villages Ukkiramaṅgalam (Ugramaṅgalam) and Īyānamaṅgalam (Īśānamaṅgalam) made by the (Chēra) king Kōdai-Ravi in his 17th regnal year to the temple of Nityavichārēśvara so as to provide, from the annual income of 300 kalam therefrom, for the expenses of worship, etc., in the temple. The *Taḷiyār* and *Taḷi-adhikārar* of the temple are stated to have met under the presidency of a certain Kōdai-Ravi² of Veṇṇoli-nāḍu and to have made the arrangement noticed in this document. As published Chēra records are very few, this record of Kōdai-Ravi is edited here and an attempt is made to fix his place tentatively in the line of Chēra kings. Only a few records of a king named Kōdai-Ravi have been secured till now. They are :—

No.	Name of village.	Regnal year.	Position of Jupiter.	Reference.
1	Chōkūr (Malabar)	15	..	No. 13 of 1901 ; S. I. I., Vol. VII, No. 173.
2	Taḷi (Cochin)	17	Mithuna . .	No. 344 of 1924.
3	Aviṭṭattūr (Cochin)	20	Kanni . .	Nos. 360, 361, 362 of 1927.
4	Tirupparaṅgōḍu (Malabar)	23+4	..	No. 219 of 1895, S. I. I., Vol. V, No. 783 and plates.
5	Tripūnittura (Cochin)	30	..	No. I of 1902 (T. A. S., Vol. VI, p. 64).

Of these, the king mentioned in No. 2 is identical with the Kōdai-Ravi of the Aviṭṭattūr records (No. 3), because Jupiter which was in the *Mithuna-rāśi* in the 17th year would correctly be in the *Kanni-rāśi*, three years later in the 20th year of the king's reign. Though the position of the Jupiter is not specified in the other three records (Nos. 1, 4 and 5), they can all be palaeographically assigned to the same period and the king. If this is conceded, then the 30th year quoted in the Tripūnittura record (No. 5) may be considered as the highest so far discovered for this king.

¹ No. 348 of the Madras Epigraphical collection for 1924.

² Kōdai and Ravi are very popular names in the west coast: and so this Kōdai-Ravi of Veṇṇoli-nāḍu, as well as another Kōdai-Ravi of Neḍumpuraiyūr-nāḍu, figuring as a signatory in the Cochin plates of Bhāskara-Ravivarman (above, Vol. III, p. 69) and a third Kōdai-Ravi of Vanrājūchechēri (T. A. S., Vol. II, pp. 154, 164 and Vol. III, p. 165), a contemporary of Indu-Kōḍaivarman, were evidently private individuals, having no connection with the king of that name.

- (1) Sthāṇu-Ravi,¹ of the Kōṭṭayam and Tiruvalla plates, who was a contemporary of the Chōla king Āḍitya I (870-906 A. C.);
- (2) his successor Vijayarāghavadēva,² who was a contemporary of the Chōla king Parāntaka, in the first half of the 10th century, in 936 A. C.;
- (3) Indu-Kōḍaivarman³ of the Tirukkākkarai and Taḷi inscriptions, who reigned from 955 to 978 A. C. ;⁴
- (4) Bhāskara-Ravivarman,⁵ the contemporary of Vēṇāḍuḍaiya Śrīvallabhañ-Kōḍai of Kollam 149 and who ruled from 978 to 1036 A. C. ;⁶
- (5) Ravi-Rāma⁷ of the Tirukkāḍittānam record, who was probably a successor of Bhāskara-Ravi (circa 1040), and
- (6) Rāman Tiruvaḍi⁸ Kulaśēkhara-Kōyiladhikāri of the Quilon epigraph dated in Kollam 278 (=1103 A. C. ; date of accession 1090 A. C.).

Taḷiyār and *Taḷi-adhikāra* (lines 2-3). According to the *Kēraḷōtpatti*, a Malayālam prose work of no great antiquity, the early Chēra rulers were helped in their administration by an advisory council consisting of the presidents of four assemblies representative of respective portions of their dominions. These assemblies met in halls called *taḷis*, and references to them are found in inscriptions. *Taḷi* is derived from the Sanskrit word *sthalī*, and here it appears to mean simply the temple. *Taḷiyār* may mean 'the temple officials' and *taḷi-adhikāra*, 'the temple manager.'

* *Ibid.*, pp. 40, 41. The date 2+14th year of this record, as read by Mr. K. V. Subrahmanya Ayyar (No. 54 of the *Trav. Arch. Report* for 1095 M. E.) is corrected as 2—11th year in the *Trav. Arch. Series*, Vol. V, p. 44.

Seṇṇaḍai (line 5) has been understood to mean 'the sacred temple expenses.' *Naḍai* is still in use in Malayālam as a word signifying 'a temple.' *Agambaḍip-paṇimakkaḷ* (lines 7-8); *agambaḍi* are servants in palace service such as personal attendants of the king, etc. The temple establishment is probably meant here. In other records of this period, they are called *mēl-Śānti*, *kīl-Śānti*, etc.

Gāndharvikaḷ (line 10). This word is derivable from *gāndharvam* 'music and dance' from *gandharva*, 'a class of celestial musicians.' *Gāndharvikaḷ* were probably the musicians attached to the temple, who rendered service in the temple by playing on musical instruments such as the flute, drum, etc., and by singing hymns during the time of worship.

Naṅgaimār (line 10) in conjunction with the *gāndharvikaḷ* may have reference to the wives of the *chākkīyār* actors who have to sing and mark time during the staging of dance-performances in the temple. This institution of acting and dancing was a permanent feature in West Coast temples and formed part of the daily ritual, while special performances were celebrated during the festivals. From lines 13 to 15 it is learnt that three different scales of payment in kind prevailed in respect of the remuneration paid to the *naṅgaimār* of the temple, viz., $2\frac{1}{2}$ *nāli* to the *uttama* (higher grade), 2 *nāli* to the *madhyama* (middling), and $1\frac{1}{2}$ *nāli* per day to the *adhama* (lower grade) of incumbents.

Ōrviyaṇ (line 12) may perhaps be a mistake for *ōviyaṇ*, a painter. The walls in the West Coast temples are frequently found decorated with mural paintings of Purāṇic episodes; and a painter may have been borne on the establishment, in the same way as a *Śiṭṭipāchāri* or a sculptor was provided for in South Indian temples of the East Coast.

The meaning of the word *kāṇaṇ* (line 12) is not clear. It has to be ascertained whether the duties of a *kāṇaṇ* have any connection with the weighing of the articles (*kūṇam*¹) brought to and issued from the temple.

Āṇiyam (line 13) derived from the word *āhnikā* means 'pertaining to a day.' *Śattiram* (line 14) was probably a local measure of quantity.

The territorial division *Veṇṇoli-nāḍu* is mentioned in the Cochin plates of Bhāskara Ravi-varman,² where it is engraved as *Vēṇapāli-nāḍu*. The back-water called *Vēmbānāḍukāyal* between Alleppey and Cochin seems to derive its name from this division which embraced roughly the present taluks of Kōṭṭayam and Vaikam in the Travancore State. The late Mr. Gopinatha Rao connected the Tekkinkūru-rājas with this region.³ Ravi-Śrīkaṇṭhan was the governor of this province according to the Huzur office plates,⁴ but whether he was related to Kōḍai Ravi mentioned in the present inscription has yet to be ascertained. This province was divided into two divisions called Tekkinkūru and Vaḍakkinkūru.

The details furnished in the inscription regarding the distribution of paddy are:

For offerings and servants	109 <i>kalam</i> and 20 <i>nāli</i>
<i>Paṅguvilai</i> and lamps	0 <i>kalam</i> and 806 <i>nāli</i>
<i>Gāndharvikaḷ</i> and <i>naṅgaimār</i>	164 <i>kalam</i> and 50 <i>nāli</i>
<i>Kāṇaṇ</i> and <i>ōviyaṇ</i>	16 <i>kalam</i> and 50 <i>nāli</i>
i.e., in all	298 <i>kalam</i> and 26 <i>nāli</i>

There is thus a balance of 1 *kalam* and 74 *nāli* from the annual income of 300 *kalam*, which has not been accounted for in the inscription.

TRANSLATION

Hail ! Prosperity ! In the seventeenth year of king Kōdai-Ravi, (*when*) Jupiter stood in (*the*) Mithuna-*(rāśi)*, the following transaction was made by the temple officials and the manager of the Nityavichārēśvaram, at a meeting over which Kōdai-Ravi of Veṇṇoli-nāḍu presided.

(*The villages*) Ukkiramaṅgalam and Īyānamaṅgalam were set apart for the sacred temple expenses. Three hundred *kalam* of paddy by the *iḍaṅgaḷi* (*measure*) shall be measured in the (*temple*) verandah as *pāṭṭam* payable to the temple.

Out of this, the paddy required per annum for the sacred offerings and the servants is one hundred and nine *kalam* and twenty *nāḷi* ; for *paṇḍuvilai* and lamps, eight hundred and six *nāḷi* ; for rice to the *gāndarvikaḷ* and *naṅguimār*, one hundred and sixty four *kalam* and fifty *nāḷi* ; and for the *kāṇaṇ* and the *ō[r]viyaṇ* sixteen *kalam* and fifty *nāḷi*.

The allowance in rice to (*be given to*) the *naṅgaimār* according to the high (*uttama*), middling (*maddhyama*) and low (*adhama*) scales is (*respectively*) two *nāḷi* (*and*) one *uri*, two *nāḷi*, and one *nāḷi* (*and*) one *uri* by (*the measure called*) *śattiram*.

No. 38—FOUR BHAIKSHUKI INSCRIPTIONS

(1 Plate)

D. C. SIRCAR, OOTACAMUND

A. Three Buddhist Inscriptions from Uren

Uren is an old village in the western part of the Monghyr District of Bihar. It lies by the side of the railway line between the Kiul and Kajra stations on the East Indian Railway—about

¹ These words are engraved in Grantha characters.

² The i is shown with a loop at the right side.

³ The i sign is engraved slightly over the letter, and not at its side.

TALI INSCRIPTION OF KODAI RAVI: 17TH YEAR

7 miles from Kiul and 2½ miles from Kajra. On the other side of the village stands the small range known as the Uren hills. About sixty years ago, L. A. Waddell visited the village of Uren which he identified, in an interesting paper published in the *Journal of the Asiatic Society of Bengal*, Volume LXI, part i, 1892, pp. 1-24, with one of the Buddha's hermitages on the western frontier of the country of I-lan-na-po-fa-to (Hiranyaparvata, roughly identical with the present Monghyr District) as described by the seventh century Chinese pilgrim Hiuen Tsang.¹ He noticed a large number of inscribed images in the village as well as inscriptions, markings, sculptures and other ancient remains on the hills. But as regards the process of the loss and destruction of ancient remains from which the village was suffering at that time, Waddell observed, "the unfortunate proximity of the hill to the railway and the excellent quality of the rock (granite) have induced the railway authorities to use the hill as a quarry for road-metal and only about six years ago two of the most interesting of the rock-sculptures were in this way demolished and the fragments further broken up and carried off as ballast, and the blasting operations have now extended to within a few feet of the more important rock-sculptures and markings still remaining. Many of the inscribed statues also have been carried off from time to time by the overseers or contractors supervising the quarrying operations; one of these in particular, a Mr. S., is reported to have carried off, about thirty-six years ago, a full cart-load of the best preserved statuettes, the ultimate destination of which cannot now be traced."² In a foot-note to these observations, Waddell further says, "Since writing the above, I have again visited the site and find that further quarrying operations have been extensively carried on since the submission of this report to the Society. The western cliff bearing numerous *chaitya* figures has been in great part removed by blasting, only the fractured bases of a few of the *chaityas* still remaining. Also at the south-east margin of the hill, where the rock was highly polished and contained ancient markings, most of this surface has been removed by blasting."³ It is therefore no wonder that I could not trace most of the inscriptions and other ancient remains that had been noticed by Waddell about sixty years previously, when I visited the village of Uren in January 1950. On the hills, I found only the engravings of several *stūpa* designs, one of them alone containing a line of inscription. I also examined a collection of extremely mutilated images and votive *stūpas* at the *Chanḍī-sthāna* in the village and another at its *Śiva-sthāna*. Some of these images were found to contain a few lines of writing at their bases. A few broken images also were noticed half buried in the ground at the side of the main road running through the village and one of these was found to bear an inscription. I took impressions of altogether fourteen image inscriptions at Uren, many of which, however, contained nothing but the Buddhist formula *yē dhammī*, etc. Two of the records refer to the reign of Rāmapāla (circa 1084-1126 A.C.), the Pāla king of Bengal and Bihar, one of them being dated in the fourteenth regnal year of that monarch. Two of the image inscriptions at Uren were found to be written in the so-called Bhaikshuki *lipi* or arrow-head characters.

When Waddell visited Uren about sixty years ago, he observed no less than four images with inscriptions in the Bhaikshuki or arrow-head script⁴ and photographs of two of them were published by him along with his paper in the *Journal of the Asiatic Society of Bengal*.⁵ It is possible that he himself or some other later visitor to the village carried away the images containing the two inscriptions of which photographs were published in the above journal. Thus the two Bhaikshuki inscriptions, examined and copied by me at Uren, may be the remaining two of the four such

¹ S. Beal, *Buddhist Records of the Western World*, Vol. II, 1884, pp. 190-91.

² *Op. cit.*, p. 2.

³ *Icc. cit.*

⁴ *Op. cit.*, p. 17.

⁵ *Vide op. cit.*, Plate IV, Nos. 1 and 2.

records referred to by Waddell. That these two inscriptions were also not similarly carried away was possibly due to the extremely mutilated condition of the images on which they are engraved.

Of the two image inscriptions in the Bhaikshukī or arrow-head alphabet copied by me at Uren, one, found on a broken Buddhist image at the *Śiva-sthān* of the village, has one line of writing, only a few *aksharas* of which have been preserved. The other one was found by me on the base of a mutilated Buddhist image lying half buried by the side of the main road running through the village. This inscription is fortunately in a quite satisfactory state of preservation. There are altogether four lines of writing covering a space of about 1·8 inches in breadth and 9·8 inches in length. The fourth line is short and covers only about half the length of the other three lines. Each *akshara* is about ¼ inch in height.

The most important feature of the inscription is its **palaeography**. C. Bendall, who first discovered the alphabet employed in the epigraph under discussion in certain manuscripts from Nepal and fully described it,¹ was inclined to identify it with the Bhaikshukī *lipi* mentioned by al-Bīrūnī as being used in Udunpūr in Pūrvadēśa (probably the Uddanāpura-vihāra located at modern Biharsharif near Patna) and as being "the writing of Buddha," probably meaning thereby that it was prevalent among Buddhist *Bhikshus* or monks.² The alphabet is characterised by the use of arrow-head marks usually at the top of the letters and, in some letters, also at the sides. Bühler therefore described this script as "the arrow-head alphabet."³ Bendall and Bühler believed that the script is the immediate offspring of an ancient form of Brāhmī retaining South Indian features in some letters and Northern characteristics in a few. An image inscription from Gayā, written in this alphabet but showing wedges instead of arrow-heads at the top and, in some cases, at the sides of the letters, was published by Bendall in 1890.⁴ Some years ago Dr. N. P. Chakravarti edited an inscription written in the Bhaikshukī or arrow-head alphabet, which comes from Kara about 41 miles from Allahabad.⁵ Another inscription in the same script is said to have been noticed on an image of Jambhala which is now preserved in the Indian Museum, Calcutta, but that epigraph is as yet unpublished.⁶ I edit below three out of the four Uren inscriptions referred to by Waddell as written in the Bhaikshukī or arrow-head script, the first from my own impressions and the second and third from the photographs published by that scholar.

The **characters** of these inscriptions closely resemble those found in the manuscripts as reproduced in Bühler's Table VI, columns xviii-xix; but there are some slight variations. In the first epigraph, among initial vowels, we have *a* (line 3), *ā* (line 1) and *ē* (line 3). Among these, *ā* differs from the form of this letter in the manuscripts in having its lower loop and curve not fixed below the upper body of the letter. Of the consonants, *p* has a curved base and an arrow attached to its left limb as in the Kara and Gaya inscriptions. The forms of *m* and *s* are not distinguishable. *N* has been written differently in lines 2 (cf. *dharmāṇām*) and 3 (cf. *śśamanō*). The marks of interpunctuation are the usual single and double *daṇḍa*; but, at the

¹ *Proceedings of the Seventh Oriental Congress*, Aryan Section, pp. 111 ff., and those of the Tenth Oriental Congress, part ii, pp. 151 ff.

² Sachau, *Alberuni's India*, Part i, p. 173.

³ *Ind. Ant.*, Vol. XXXIII, Appendix, p. 60; Palaeographic Table VI, columns xviii-xix.

⁴ Cf. *Ind. Ant.*, Vol. XIX, pp. 77-78. There are some mistakes in Bendall's transcript of this epigraph. It actually reads (1) *Śrī-dharmavarada-hētu* || *Śrī-Vra(Bra)hma-pautra-saṃgha-pa-* (2) *lāla-Śrī-rāṇā-Kuyaksha-Sāhitya Parishat Patrikā*, Vol. XX, pp. 153 ff. without noticing that it had been previously published. It is now preserved in the Vangliya Sāhitya Parishat, Calcutta.

⁵ Above, Vol. XXII, pp. 37-39.

⁶ *Op. cit.*, p. 37, note 4. The note is based on a statement of R. D. Banerji in his paper referred to above. My attempts to trace the image in the Indian Museum have proved unsuccessful.

end of lines 3 and 4, we have a *visarga*-like sign placed before the double *daṇḍa*. This no doubt forms part of the stop and the whole sign apparently indicates a full-stop.¹ The palaeography of the second and third inscriptions closely resembles that of the first epigraph. As suggested by the palaeography of other records of the locality, the inscriptions belong to the age of the Pālas of Bengal and Bihar. They may be roughly assigned to a **date between the ninth and the twelfth century, preferably to the latter half of this period.**

The **language** of the inscriptions is Pāli which is, however, greatly influenced by Sanskrit. The use of the palatal sibilant and the subscript *r* (cf. words like *prabhavā*, *śrī*, *prati*, *°śśamaṇō*, *dēśēti*, etc.) is a peculiar feature of the orthography of these records and go in favour of the above observation. Interesting from this point of view is also the Sanskrit *vibhakti* in the word *°pālasya* in line 4 of the first epigraph. The word *dharmāṇāṃ* (line 2 of the first epigraph) stands midway between Sanskrit *dharmāṇām* and Pāli *dharmānaṃ*, while *tēsāṃ* stands in similar relation to Sanskrit *tēśām* and Pāli *tēsāṃ*.

The text of all the three epigraphs is the same ; but the second inscription begins with a symbol for *siddham* which is not traceable at the commencement of the two other records, while the first inscription ends with an additional reference to the person responsible for the construction and installation of the image on which it is engraved. The first sentence of the three inscriptions reads : *bhagavā āvusō paṭichchasamuppādaṃ dhammaṃ dēseti*, "Brethren, the Lord expounds the doctrine of the chain of causation." The word *āvusō* was often used as an address by the priests to Buddhist lay worshippers. Whether the reference to the preaching of the Lord, *i.e.*, the Buddha, may suggest that the images on which these records were incised represented the Buddha in the preaching attitude or *vyākhyāna-mudrā* cannot be determined. The doctrine of *Paṭichchasamuppāda*, as is well known, is the formula embodying the Buddha's solution of the great problem of the origin of evil. It is one of the most fundamental and characteristic doctrines of his teachings.² It is said that "from error springs *karman*, from *karman* springs consciousness, from consciousness springs the organised being, from the organised being spring the six organs of sense, from the six organs of sense springs contact, from contact springs sensation, from sensation springs desire, from desire springs attachment, from attachment springs continued existence, from existence springs birth, from birth spring decay and death, sorrow, lamentation, pain, grief and despair." The origin of evil is here traced back to error or ignorance which is no doubt the ignorance of the truth, *i.e.*, the four great truths of the Buddhists, *viz.*, "suffering, the cause of suffering, the cessation of suffering, the path leading to the cessation of suffering."³

The second sentence of our inscriptions is : *paṭichchasamuppānnānaṃ cha dhammānaṃ yō nirōdhō*, "also the destruction of the conditions arising from preceding causes [is taught by the Lord]." This refers to the destruction of the five "elements or attributes of being" such as form, sensation, perception, discrimination and consciousness.⁴ These two sentences appear to be represented in the first inscription as a verse. The metre may be regarded as an irregular form of *Āryā*.

The above is followed in the inscriptions by the well known Buddhist formula in the *Āryā* metre : *yē dhammā hētu-ppabhavā hētuṃ tēsāṃ tathāgatō avacha* (or *avadat*) | *tēsāṃ cha yō nirōdhō ēvaṃ-vādī mahā-samaṇō* || "The Lord spoke of the conditions which arise from a preceding cause as well as of their cause. The great teacher has also said about their destruction." But this formula practically repeats what is already said in the previous two sentences. The subject

¹ Cf. the Madras Museum plates of Narēndradhavalā edited above, p. 45 and plate.

² See Childers, *Pāli Dictionary*, s. v.

³ Ibid., s. v. *ariya-saccaṃ*.

⁴ Ibid., s. v. *nirōdhō*, *khandhō*, etc.

of the first two sentences is the lord's preaching about the chain of causes and the destruction of the conditions arising from causes, while the formula also speaks of the cause of the conditions arising from it and their destruction. The *nirōdhō* of the *hētu-ppabhavā dhammā* is the same as the *nirōdhō* of the *paṭichhasamuppannā dhammā*.

So far the three inscriptions offer practically the same text. But the first epigraph adds to the above text the following passage : *Śrī-Pratinava-Śrādatapālasya*. There is little doubt that we have here a reference to the person who was responsible for the construction and installation of the image on which the inscription is engraved ; but the expression *śrādatapāla* is rather unusual and may be a mistake for *śrāvītapāla*. The word *pratinava* means " fresh " or " new " and *śrāvīta* may have been intended to mean " religious instruction."

TRANSLATION

Brethren, the Lord teaches the doctrine of origination as a necessary result from an antecedent cause. The cessation of the conditions having its origin in a preceding cause [is also taught by the Lord]. The sentient being (the Buddha) spoke of the cause of the conditions arising from a preceding cause. The great ascetic (the Buddha) also spoke about their destruction. [This image is the gift] of the illustrious Pratinava-Śrāda(vi)tapāla.

B. A Buddhist Inscription from Maldah Museum

About the middle of April, 1950, the Government Epigraphist for India received for examination impressions of some inscriptions copied by the Eastern Circle of the Department of Archaeology. The inscriptions belong to the B. R. Sen Museum at Maldah in West Bengal. While examining the impressions under instructions from the Government Epigraphist for India, I found that one

³ Expressed by a symbol.

⁴ From the photograph published in *J A S B*, loc. cit., No. 2.

A: No. I: On a broken Buddhist image at Uren

B: A Buddhist inscription from Malda Museum

of them is written in the interesting Bhaikshukī or arrow-head script employed in certain Buddhist inscriptions from Uren which had been the subject of my study only three months earlier and have been dealt with in the first part of this paper. At my request, Dr. B. Ch. Chhabra, Government Epigraphist for India, kindly permitted me to edit the inscription for this journal.

No information was available to me about the exact findspot of the inscription. It is reported to be engraved on the pedestal of an image of the Buddhist deity Avalōkitēśvara-Lōkanātha now preserved in the B. R. Sen Museum, Maldah, with the exhibit number M. M. R. 110. It is very probable that the image was collected from a village in the Maldah District. The inscription is written in four lines which are divided into two halves, each containing two lines. The upper half is subdivided into four parts, apparently due to exigencies of space on the pedestal of the image in question, while the lower half has three subdivisions. The letters are of the same small size as in the Uren inscriptions written in the same script.

As already observed, the **characters** belong to the class called the Bhaikshukī or arrow-head alphabet known to have been used by the Buddhist monks of the Magadha region in Eastern India in the age of the Pālas of Bengal and Bihar. Although al-Bīrūnī seems to confine the use of the Bhaikshukī script to the monks of Uldanḍapura, identified with modern Bihar in the Patna District, the discovery of the Kara inscription in the Allahabad District of the U. P. and that of the present one in the Maldah District of West Bengal appear to suggest a wider distribution. The letters employed in the inscription under discussion closely resemble those of the Uren inscriptions, although there are certain palaeographical peculiarities in the present record that are not noticed in the latter. We have here no confusion between the forms of *m* and *s*, the loop of the latter being put a little lower than that of the former. *Ch* has, however, two different forms, one of which having no appreciable distinction from *v* (cf. *āchāryya* in line 1; *avacha* in line 3; *cha*, *ēvamvādī* in line 4). There is no marked difference between the sign for medial *i* and medial *ī*. Medial *ō*, joined with the consonant by a vertical stroke, as in *mō* (line 2) and *rō* (line 4), is interesting. The different forms of *p*, already noticed by scholars,¹ are to be observed in °*pālita*° in line 2 and °*prabhavā* in line 3, one of the forms differing very little from *d*. *B* and *v* are indicated by different signs. The initial vowels *a*, *ā* and *ē* occurring in the inscription resemble the forms of these letters as found in the Uren inscriptions.

The **language** of the inscription is a mixture of Sanskrit and Pāli. Its orthography closely resembles that of the Uren inscriptions. It may be noted that *y* preceded by *r* has been duplicated.

The second part of the inscription consisting of lines 3-4 reproduces the celebrated Buddhist formula, *Yē dhammā*, etc., also quoted in all the three Uren inscriptions. Like, however, the interesting additional passage referring to the monk who was responsible for the installation of the image in question in the first of the three Uren inscriptions, we have in the present record information regarding a Buddhist monk whose *dēya-dhamma* the image of Avalōkitēśvara-Lōkanātha bearing the epigraph was. This section says that the image was the meritorious gift of *Bhadanta* Buddhapālita. The word *bhaḷanta* (also *bhanta* and *bhaddanta*) is well-known from Pāli literature to have been used as an honorific epithet (cf. English *Reverend*, *Venerable*, etc.) or as an address in cases concerning Buddhist monks, although there is difference of opinion in regard to its derivation. I am inclined to trace it to Sanskrit *bhavat*; but some scholars think that it is derived from a word like *bhadr-ānta*, i.e., "one who is the foremost of the noble," while others suggest that its root lies in the expression *bhaddam tē* or *bhadram tē* (literally, "let there be good to you") with which the monks greeted every one paying homage to them.²

¹ Bühler, Table No. VI, columns xviii-xix, line 35.

² *Select Inscriptions*, Volume I, pp. 80, note 1; 223, note 6. The early Prakrit form of the word, *bhanta*, is found in the Bairat inscription of Asoka. The form *bhaddanta* seems to be influenced by the conception of its derivation from *bhadrānta*. The word may be compared with Sanskrit *atra-bhavat* and *atra-bhavat*.

An interesting fact about the monk Buddhapālita is recorded in line 1 which says that he was a *śrī-Bhakōkkā-sāṃghīya-āchāryya*, i.e., a teacher belonging to the Bhakōkkā *saṅgha*. The word *saṅgha* here appears to refer to a particular community of Buddhist monks styled Bhakōkkā to which Buddhapālita belonged. Unfortunately I have not come across the name Bhakōkkā.¹ It is not impossible to suggest that it was a local community of monks belonging to a monastery in the present Maldah region of West Bengal. Whether the Bhakōkkā community of Buddhist monks had anything to do with the celebrated Mṛigasthāpana monastery,² apparently situated in the same area or its neighbourhood, cannot be determined in the present state of our knowledge.

TRANSLATION

Part I

This (i.e., the image bearing the epigraph) is the religious gift of the Venerable Buddhapālita who is a teacher pertaining to the illustrious Bhakōkkā community.⁴

No. 39—MADRAS MUSEUM PLATES OF ANANTASAKTIVARMAN; YEAR 28

(1 Plate)

M. VENKATARAMAYYA, OOTACAMUND

These copper plates were received for examination in 1934 by the Superintendent for Epigraphy, Mylapore, Madras, from the **Government Museum, Madras**, and noticed by him as C.P. No. 24 of 1934-5. The plates were sold to the Museum by Mr. M. Somasekhara Sarma, Madras. The Superintendent for Epigraphy reports on them as follows: "No information is forthcoming regarding the place or history of their discovery. The plates which are rather thin, measure $6\frac{1}{2}$ " by $2\frac{3}{4}$ " and bear a ringhole of about $\frac{7}{16}$ " in diameter near the proper right margin. The ring and the seal that must have accompanied the grant are now missing. The plates have four faces of writing in all, the first and the third plates are slightly corroded, so much so that there are some holes in the body of these plates and their right bottom corners have been partly eaten away. the grant is itself a palimpsest written over a previous charter, the letters of which though completely effaced are partly and faintly visible in a few places. It must also be remarked at the

¹ The name Bhakōkkā, which reminds us of that of the Pakokku monastery about 30 miles from Mandalay in Upper Burma, may be of foreign origin.

² *History of Bengal*, Dacca University, Vol. I, pp. 69 f. For a Chinese monastery near it, see *loc. cit.*

³ From an impression.

⁴ For the translation and explanation of Part II of the inscription, see above, p. 224.

same time that the erased writing does not appear to have been of a more archaic variety than the present inscription."¹

I edit the record here with the kind permission of Dr. B. Ch. Chhabra, Government Epigraphist for India.

The **characters** of the inscription belong to the southern class of alphabets. Some of them are written in a cursive style. The majority of the characters employed in the record, barring those in cursive style, can roughly be placed in the 5th century A. C. for the reason that while they appear more developed than those found in the Rāgōlu plates of Śaktivarman² of the 4th century A.C., they are more or less of the same period of development as those of the Bṛihatprōshthā grant³ and the Dhavalapēṭa plates of *Kaliṅgādhipati* Umavarman which are of the 5th century A.C.⁴ They also closely resemble the alphabet of the Bobbili⁵ and the Kōmarti⁶ plates of *Kaliṅgādhipati* Chaṇḍavarman. All these charters have been placed approximately in the 4th-5th century A.C. Those letters in our grant which are cursive, such as *l*, *n*, *kṛi*, *jñā*, *jā*, *su* and *pu*, show somewhat developed forms. This, in my opinion, may be due to the very cursive style of the writing.⁷ The occurrence of both early and later forms of the same letters in one and the same record⁸ or in charters of one and the same king⁹ is not unusual, the best explanation for it being the tendency to cursive writing which the scribes developed. It should be remarked, however, that the way in which the letters *l*, *n* and *kṛi* of our inscription are written is for the first time met with among the early Kālīṅga grants in the Jirjiṅgi plates of Indravarman¹⁰ and the Gōdāvarī copper-plate grant of Prithivīmūla,¹¹ both of which are placed in the sixth century A.C. The presence of such forms in our grant assignable to a date about half a century earlier need not be considered as anything irregular. Attention should be drawn, however, to the dissimilarity that exists in respect of the letters *t* and *n* between the script of our record and that of the newly discovered Andhavaram plates of Anantaśaktivarman¹² who, as shown in the sequel, appears to be identical with the ruler who issued the present plates. Whereas in the Andhavaram plates *t* is angular (being two-pronged) and *n* is looped, in the present plates they are formed in the reverse way, *t* being looped and *n* without such a loop but having a curve at the left as found in the Siripuram plates of Anantavarman¹³ of the 6th century A.C. This difference may not be considered as irregular in our grant since the looped *t* and the unlooped *n* occur in grants of the 5th century A.C., for example, in the Sāsanakōṭa plates of Western Gaṅga Mādhavarman¹⁴ and in the Śālaṅkāyana grants generally.¹⁵ Further, the looped *t*, as found in our grant, and the unlooped *t* as in the Andhavaram plates occur in one

⁴ *Ibid.*, Vol. XXVI, p. 133 and plate.

⁵ *Ibid.*, Vol. XXVII, pp. 33 ff. and plate.

⁶ *Ibid.*, Vol. IV, p. 142 and plate.

⁷ Some of them are formed peculiarly; the medial *ā* is attached to *jā* and *jñā* at the topmost prong of the consonant *j* which is unusual, since this vowel mark is usually attached to its middle prong.

⁸ Ahadanakaram Plates of E. Chālukya Viśhṇuvardhana (V), *Ind. Ant.*, Vol. XIII, p. 186 and plate.

⁹ The Kēsariḃēḍa and the Rithapur plates issued by the same king Arthapati Bhaṭṭāraka and drafted by one and the same individual, however, differ in their characters indicating the former to be rather earlier. See above, Vol. XXVIII, p. 12.

¹⁰ Above, Vol. XXV, p. 281 and plate.

and the same inscription, viz., the Gurzāla Brāhmī inscription of the 3rd-4th century A.C.¹ so that in so far as these two letters are concerned, the looped and unlooped forms are not of much consequence in the matter of palaeographical dating. In addition to the above peculiarities, our charter exhibits other features which are not seen in the Andhavaram plates, although in phraseology both grants are almost alike. One such feature of our grant is the mention of two *dūtakas* in place of the *ājñapti* and another is its faulty orthography as compared with the correct Sanskrit in which the Andhavaram charter is composed.

The orthography of the inscription, as already remarked, abounds in errors. Incorrect writing, for example, *pta* for *tpa* in line 1, *pāriśvē* for *pārśvē* in line 3, *taitriya* for *taittirīya* in line 6, *bhaviśya* for *bharishya* in line 9, *kumārāmātau* for *kumārāmātau* in lines 17-18 may be ascribed to the ignorance of the scribe. An instance of incorrect syntax is found in line 7. Non-observance of *sandhi* is found in *Mahārāja Anantaśaktivarman* (line 3). The use of *b* for *v* is noticeable in *Barāhavarantanyām* (line 3) and *barsha* (line 14); and of *v* for *b* in *valādhikṛita* for *balādhikṛita* in line 18.

The language of the record is Sanskrit. Except the imprecatory verses, the whole inscription is in prose. The phraseology of the inscription is almost similar to that obtaining in the Andhavaram plates of the same ruler, but contains some such phrases as are not found in the latter. For instance, the passage *dharmma-kkrama-vikkramañām=anyatama-yōgād=avāpya mahīm=anuśāsātām* (lines 10-11) is not found in the Andhavaram plates but finds place in our grant as also in a few other charters of the period such as the Brihatprōshthā grant² and the Dhavalapēṭa plates³ of Umavarman and the Bobbili plates of Chaṇḍavarman.⁴ The date of the record is given at the end of the charter as year 28, the tenth day of the bright fortnight of Phālguna. The numerals 20 and 8 occur in this connection.⁵

The plates are issued by *Mahārāja Anantaśaktivarman* from his capital *Siṅghapura*. They record the royal gift of a village called *Sakuṇaka* situated in *Āvi-pārsva* of (the district of) *Varāhavarṭani*, as an *agrahāra*, to two Brāhmaṇa brothers, *Nāgaśarman* and *Durgaśarman* of the *Kātyāyana gōtra* and the *Taittiriya śākhā*. The king is described as *Kaliṅgādhipati*, as belonging to the *Māthara kula* and as one who obtained his body, kingdom and prosperity through the grace of his father, (who was) a great devotee of the *dēvatīs* (*paramadaivata-Bappa-bhaṭṭāraka-pāda-prasād-āwāpta-śarīra-rājya-vibhavaḥ*). To my knowledge, the form in which this epithet occurs, embodying, as it does, such elaborate expression of deep devotion to one's father is found only in one other grant, viz., the Andhavaram plates cited above. In all other early charters where the king's devotion to his father (*bappa*) is recorded, whether in Pallava, Śālaṅkāyana, or in the early Kalinga charters other than the two cited above, the terms are simpler like *Bappa-bhaṭṭāraka-pāda-bhaktah*, *Bappa-pāda-bhaktah* or *pitri-pāda-bhaktah*, even the epithet *bhaṭṭāraka* sometimes being dropped.⁶ The other epithet *paramadaivata* applied to *Bappa-bhaṭṭāraka* in the present grant needs some comment: it is here applicable to *Bappa*, while in the Kōmarti plates of Chaṇḍavarman⁷ this epithet applies to the issuer of the grant himself, i.e., Chaṇḍavarman. Usually, the grants that contain this epithet, as far as I have examined, prefix it in a compound either to *Bappa-bhaṭṭāraka* or, as in some cases, to the name of the overlord as whose feudatory the issuer of the grant figures. Instances of the former are available in the Kalinga grants including the present charter and those

¹ Above, Vol. XXVI, p. 125 and plate.

² *Ibid.*, Vol. XII, pp. 4 ff and plate.

³ *Ibid.*, Vol. XXVI, pp. 133 ff. and plate.

⁴ *Ibid.*, Vol. XXVII, pp. 33 ff. and plate.

⁵ [The symbol read as 8 more probably stands for 6: see above, Vol. XXVII, p. 30.—Ed.]

⁶ *Ibid.*, Vol. XII, p. 4 (Brihatprōshthā grant of Umavarman).

⁷ *Ibid.*, Vol. IV, p. 142.

of the latter in the Damodarpur plates¹ of the Gupta kings, the Patiakella² and the Soro plates of Śambhuyaśas.³

To assess the exact significance of *paramadaivata* and its variants *paramadēvatādhidaivata*, and *paramagurudēvatādhidaivataviśēsha*, one may cite, by way of comparison, similar epithets, viz., *paramabrahmaṇya*, *paramasaugata*, *paramabhaṭṭāraka*, etc. In the last example, the import of the term is clear. It signifies paramountcy. The others have also been considered as indicative of paramount status.⁴ The latter assumption, however, appears to be doubtful. For these terms which mean 'a great devotee of the gods,' 'a great devotee of gods and super-gods,' 'a great devotee of the *Brāhmaṇas*' and 'a great devotee of *Sugata*' should be taken to indicate only the religious devotion or persuasion of the ruler concerned and not as signifying any political paramountcy that he wielded. This will become clear on an examination of the instances where the epithets are used without the additional title of *paramabhaṭṭāraka*. In such cases, the particular person concerned was certainly not holding any paramount status. One such instance has been pointed out by Dr. Chhabra, namely that of Nāgabala and Bharatabala of the Bamhanī plates.⁵ They are both described as *paramagurudēvatādhidaivataviśēsha*, but not as *paramabhaṭṭāraka*; and the record gives other indications to prove that really they were not paramount. Another instance is provided by the Soro plates of Śambhuyaśas wherein his father (*bappa*) is called *paramadaivata* but not as *bhaṭṭāraka*. As Mr. N. G. Majumdar has remarked, Śambhuyaśas was only 'enjoying a sort of independent status.' In fact, even in the Patiakella plate of Śivarāja, wherein Śambhuyaśas also figures, the person referred to as *paramadēvatādhidaivata* and *paramabhaṭṭāraka* under whom Śivarāja ruled seems to be a third person different from both Śivarāja and Śambhuyaśas, as these epithets are not applicable to Śambhuyaśas as has been wrongly assumed;⁶ for, he is introduced in the record with the simple title of *Paramamāhēśvara* and as the ruler of Tōsalī. Evidently Śambhuyaśas was the immediate overlord of Śivarāja and both were apparently subordinates of yet another paramount ruler alluded to by the titles *paramadēvatādhidaivata* and *paramabhaṭṭāraka*. One curious feature about the occurrence of the title *paramadaivata*, 'the great devotee of the gods,' is that it is rarely found applied to the ruler actually issuing the grant, but that it is applied usually to his predecessors, father (*bappa*) or overlord, as the records cited above would show.

Mahārāja Anantaśaktivarman, describing himself as Lord of Kaliṅga, issues the present grant from his capital, Singhapura. The title *Kaliṅgādhipati* held by him is partly justified by the fact that his capital Singhapura (Sinihapura) was well known as one of the chief cities of Kaliṅga mentioned in quite a number of early Kaliṅga grants and in early Buddhist literature.⁷ Other cities in Kaliṅga which also served as capitals of kings describing themselves as lords of Kaliṅga were Pisṭapura,⁸ Sārapalli,⁹ Dēvapura,¹⁰ Dantapura¹¹ and lastly Kaliṅganagara. Although these cities were far from one another (Pisṭapura being the southernmost situated on the Gōdāvarī, and Sinihapura being the northernmost in Chicacole *tāluk*), it would appear that the lordship over Kaliṅga could be claimed from any of these cities fixed as capitals. The village Sakunaka granted by Anantaśaktivarman was situated in Varāhavartanī, a well-known territorial division of Kaliṅga.¹²

¹² See below, p. 234.

What is of more than passing interest in the record is the mention of the name of the king's family as *Māṭhara kula*. Besides Anantaśaktivarman of our grant, two others, viz., his namesake of the Andhavaram plates and *Kalingādhipati* Śaktivarman of the Rāgōlu plates claimed to belong to this family. The latter, in addition, styles himself Vāsishṭhīputra. Since *Māṭhara* was a *gōtra rishi*,¹ we have in the case of these chiefs an instance of a royal family named after a *gōtra rishi*.² That Śaktivarman of the Rāgōlu plates also bears the metronymic Vāsishṭhīputra reminds one of the Śātavāhana and Ikshvaku practice in this regard,³ although the mention of both father-kinship and mother-kinship by Śaktivarman is quite unique. It is interesting to find a reference to the Vāsishṭha *kula* as the family to which two other kings of Kalinga are stated to have belonged, viz., *Mahārāja* Guṇavarman and *Mahārāja* Prabhañjanavarman, the grandfather and father respectively of Anantavarman, lord of Kalinga, the author of the Śrīngavarapukōṭa⁴ and the Siripuram plates.⁵ Śaktivarman of the Rāgōlu plates mentions his descent from both paternal (*Māṭhara*) and maternal (Vāsishṭha) *gōtras* and he also enjoins first upon his *gōtra*jas to protect his charity and next upon the other kings (*anyē rājānaḥ*).

In what lineal relationship our Anantaśaktivarman stood to the Śaktivarman of the Rāgōlu plates, both being of the same *Māṭhara* family, has already been discussed, and it has generally been assumed that, as the palaeography of the two grants differs by about a century, Śaktivarman was the grandfather. The possibility of an Anantavarman intervening between them as the father has been stressed, it being assumed that the father's name is perhaps indicated in the double form Ananta-Śaktivarman which is the appellation of the king of our grant, who was perhaps christened only as Śaktivarman after his grandfather.⁶ That this genealogical construction is very possible is further substantiated by the evidence afforded by the Andhavaram plates of Anantaśaktivarman. On a comparison of the text, script and other particulars of this record with those of the present plates, it has been rightly surmised that the issuers of the two records are one and the same.⁷ In the Andhavaram charter a passage occurs in the form of preamble to the donation made by the king. It relates that since the gift-village had already been granted by Āryaka-Śakti-bhaṭṭāraka-pāda, he (Anantaśaktivarman) only regranted it to the same Brāhmaṇa families (*asty=avanipa-yath-ōkta-dharmm-āvasthāna-vijita-ttrivishṭap air=Āryaka-Śakti-bhaṭṭāraka-pādaiḥ nānā-gōtra-charaṇēbhyaḥ brāhmaṇēbhyaḥ=pūrva-datta ity=asmābhīr=api*, etc.). Here the person referred to as *Āryaka-Śakti-bhaṭṭāraka-pāda* (with the honorific plural)⁸ was doubtless an ancestor of Anantaśaktivarman. He was a king (*bhaṭṭāraka*) and was referred to by the respectful appella-

¹ In the *Gōtraprataraṇibandhakadamba*, there is mention of *Māṭhara* as a *gōtra rishi*. Evidently *Māṭhara* and *Maṭhara* are identical, or the former was descended from the latter.

² The kings of the Ānanda family (*ānanda-maharshi-vaśa-samudbhūtaḥ*) and the Śālaṅkāyanas of the Telugu country may be considered as other such families.

³ Among the Ikshvaks there are metronymics Vāsishṭhīputra and Mātharīputra. Above, Vol. XX, pp. 16 ff. See also *Early History of the Andhra country*, pp. 44 ff.

⁴ Above, Vol. XXIII, p. 56.

⁵ *Ibid.*, Vol. XXIV, p. 47.

⁶ *ARSIE*, 1934-5, part II, item 3.

⁷ Above, p. 177.

⁸ In a similar way, Viśākhavarman, a ruler of Kalinga in the 5th-6th century A. C., refers to his father (*bappa*). In the Koroshanḍā plates of this king, he is stated to have made the gift of a village to a number of Brāhmaṇas for the purpose of increasing the merit of his father who was in heaven (*asmad-bappa-bhaṭṭāraka-pādānāḥ sūralōkād=aprachyutānām bhūyaḥ puṇy-āpyāyanāya*), above, Vol. XXI, p. 24, text lines 3-4.

tion of *Āryaka*. By his practice of *dharma* he had even conquered the celestial beings.¹ Although this term *āryaka* should generally be understood as one of respect, yet in some inscriptional cases there is reason to interpret it as grandfather, much in the same way as *bappa* meant father. Fleet was the first to think so.² Yet in the inscriptional instances,³ which are not many, the manner in which it occurs leaves some ambiguity as to whether the term meant father, grandfather or simply a respectable person. In the Rithapur plates of Bhava[da*]ttavarman⁴ it is recorded that Arthapati Bhaṭṭāraka was favoured by *āryaka* (*āryyaka-pāda-prasād-ānugrihita*). The context here leaves it doubtful whether by *āryaka*, Arthapati's father is referred to, whether his grandfather is meant as Dr. Sircar has assumed,⁵ or whether it alludes to some 'respectable people' as the editor of the plates Y. R. Gupte translates the term. Similarly in the Halsi plates of Kadamba Mṛigēśa,⁶ this king is stated to have built a temple of Jina 'through devotion for the king, his *āryaka*' (*sv-āryyakē nṛpatau bhaktyā*). Dr. Fleet, who has edited the record, translates *āryaka* by 'father, who was dead (sic).' In a literary passage occurring in the *Chīvaravastu*,⁷ the word *āryaka* is used obviously in the sense of father. None-the-less, so far as inscriptions go and as Fleet has also pointed out, *āryaka* may be understood to stand for grandfather just as *bappa* meant father. A piece of inscriptional evidence, which may be pressed into service here to clinch the issue, is provided by a Nāgārjunikoṇḍa Prakrit inscription.⁸ In this, the words *āyaka* and *ayikā* are used to describe the relatives of the donatrix who mentions, besides, her *pitu*, *mātu*, *mātula*, etc. Evidently *āyaka* and *ayikā* here meant grandfather and grandmother respectively. Its editor, Dr. Vogel, too, interprets the terms that way.⁹ From the foregoing discussion, it may safely be assumed that Āryyaka-Śaktibhaṭṭāraka of the Andhavaram plates was the grandfather of Anantaśaktivarman and identical with *Kaliṅgādhīpati* Śaktivarman of the Rāgōlu plates. While the latter issues his charter from Pishṭapura, the grandson is found to have fixed his capital at Simhapura in the north. Since both were *Kaliṅgādhīpatis*, the change of capital need not be considered as any extension of territory effected by the grandson over and above what the grandfather had already acquired. Moreover the object of Śaktivarman's grant was Rākaluva in the *Kaliṅga vishaya*, the same as Rāgōlu

¹ The conception that the kings of the earth conquer those of the heaven by deeds of piety, if not by deeds of valour, is profusely illustrated in Gupta inscriptions, especially those occurring on their coins. Some of the legends on their coins read like—

Apratirathō vijitya kshitim sucharitair=divam jayati (archer type of Samudragupta).

Kshitim=avajitya sucharitair=divam jayati Vikramādityah (Chandragupta II).

Gām=avajitya sucharitair Kumāraguptō divam jayati (Kumāragupta I).

The idea seems to be a very old one. Vālmiki put it in these words :

Rājā tu dharmēṇa hi pālayitvā

mahāmatir=daṇḍadharaḥ prajānām ||

avāpya kritsnām vasudhām yathāvad

itāś=chyutāḥ svargam=upaiti vidvān ||

(*Rāmāyaṇa*, *Ayōdhyākāṇḍa*, canto 100, verse 76)

I am obliged to Dr. Chhabra for the above references. See his article on *Chandragupta prathama kī advitīya suvarṇa mudrā* (A Unique Gold Coin of Chandragupta I) in the Hindi journal *Kalānidhi*, Vol. II, pp. 113 ff. (For its version in English, see *JNSI*, Vol. XI, pp. 15 ff.) Also see *JRASB*, Letters III (1937), Num. Sup. XLVII, pp. 109-10 : Allan : *Catalogue of the Coins of the Gupta Dynasties*, etc., pp. 1 ff.

⁸ Above, Vol. XX, p. 22, Ins. F. line 2.

⁹ I may add here that later, when this article was going through the press, I happened to come across the word *ayyaka* (Skt. *āryaka*) in certain Jataka stories (e.g. Nos. 352 and 542 of Fausboll's edition). Everywhere it stands for 'grandfather.'

near Simhapura. Śaktivarman and his grandson Anantaśaktivarman of the Māṭhara family were thus presumably paramount rulers of Kalinga during the 4th-5th century A.C.

We have now to determine the political status and the approximate period of some other kings of Kalinga who, as can be judged from the palaeography of their charters, flourished in the 5th century. These were *Kalingādhipati* Umavarman of the Bṛihatprōshthā grant, his namesake who issued the Dhavalapēṭa plates, and *Kalingādhipati* Chaṇḍavarman of the Bobbili and Kōmarti plates. It has been stated above that the characters of our grant resemble Umavarman's grants. If we accept this proposition, the exact priority or posteriority of our Anantaśaktivarman to *Kalingādhipati* Umavarman should be determined. In regard to Umavarman of the two charters cited above, what Mr. R. K. Ghoshal has said¹ may be accepted, viz., that the kings of both the grants are identical, although the Dhavalapēṭa plates were not issued from Simhapura and the king therein is not called *Kalingādhipati*, both details being present in the Bṛihatprōshthā grant. And this Umavarman's proximity to Anantaśaktivarman in point of date is further attested to, not only by the palaeographical resemblance, but also by another crucial evidence, viz., that the composer of the Andhavaram plates of Anantaśaktivarman, *Daṇḍanāyaka Mātṛivara*, was also the composer of the Bṛihatprōshthā grant wherein he is described as the son of Haridatta.² Yet this does not solve the question as to whether Umavarman preceded or succeeded the other Kalinga ruler. However, the following considerations tend to show that Umavarman should have come only after Anantaśaktivarman. While Anantaśaktivarman calls himself a *Kalingādhipati* in both his grants, dated 14th and 28th regnal years, Umavarman was not a *Kalingādhipati* when he issued the Dhavalapēṭa plates from Sunagara but assumed that title and changed his capital to Simhapura, too, when he made the grant of Bṛihatprōshthā, in his 30th regnal year. Hence Umavarman was not a *Kalingādhipati* to start with, whereas Anantaśaktivarman was the lord of Kalinga from the very beginning of his career, having inherited the kingdom from his father, a fact which is made clear by his epithet *bappa-bhaṭṭāraka-pāda-prasād-āvāpta-sarīra-rājya-vibhava*. This circumstance precludes the possibility of Umavarman having become *Kalingādhipati* or of his having fixed his capital at Simhapura before Anantaśaktivarman's accession and of having caused a sort of interregnum in the Māṭhara lordship over Kalinga.³ Until evidence is found to the contrary, it may, therefore, be assumed that Umavarman, who did not belong to the Māṭhara family, acquired the title *Kalingādhipati* and lordship over the Kalinga kingdom, as well as over the city of Simhapura by conquest,⁴ or otherwise, from Anantaśaktivarman after the latter had ruled it peacefully for at

¹ Above, Vol. XXVI, p. 134. There was another *Mahārāja* Umavarman who issued the Tekkali plates (C. P. No. 13 of 1934-5), who belonged to the same century and was ruling over a part of Kalinga. Since the seal of his grant bears a different legend from the one on the two charters cited above, and as he was not a *Kalingādhipati* like Umavarman of the Bṛihatprōshthā grant, he seems to be a different king.

² The composer of the present Madras Museum plates of Anantaśaktivarman was a different person, viz., *Talavara Arjunadatta*.

³ There is some evidence which seems to show that Anantaśaktivarman was engaged in some military expedition in or about the 14th year of his reign as pointed out by Dr. R. Subrahmanyam (above, Vol. XXVIII, p. 178). This ruler issued his Andhavaram plates in his 14th regnal year from a military camp at *Vijayapura* (*hastyaśva-skandhāvarād=Vijayapurāt*). *Āndoreppa*, the gift-village mentioned in this record, is doubtless Andhavaram which lies within a distance of only 10 miles from Simhapura, modern Singupuram near Srikakulam. There is, therefore, some ground for the assumption that this military expedition might have resulted in the capture of Simhapura by Anantaśaktivarman from some enemy. Or, in the alternative, Anantaśaktivarman might have been proceeding from Simhapura, which was already his capital, against the same enemy. If this enemy was *Kalingādhipati* Umavarman who issued his Bṛihatprōshthā grant from Simhapura in his 30th regnal year, one may doubt if Anantaśaktivarman's Andhavaram plates were issued subsequent to the Bṛihatprōshthā grant of Umavarman's 30th regnal year. In such a case we have to postulate that an interregnum in the Māṭhara rule over Kalinga (from capital Simhapura) was caused by *Kalingādhipati* Umavarman.

⁴ Above, Vol. XXVI, p. 134. Mr. R. K. Ghoshal advances here the view that the Bṛihatprōshthā grant seems to have been issued by Umavarman on the occasion of some notable military success achieved by him at the expense of some local ruler.

least 23 years. The view that *Kalingādhipati* Umavarman may not have been altogether unrelated to his political predecessors of the Māṭhara family is not improbable if we compare the seals of his grants with those issued by Śaktivarman and Anantaśaktivarman. The legend on the seals of the Andhavaram plates of the latter and on those of Umavarman's two grants is in four lines, ending with the name of the king in the genitive case.¹ In the same form is found the legend on the seal of the Rāgōlu plates, too, which is, however, in two lines and ends with the king's name likewise in the genitive case.

This similarity in the seals of the above three kings is noteworthy since in regard to the seals of the other kings of Kalinga who immediately followed them, viz., Chaṇḍavarman and Nanda-Pra-bhañjanavarman, and Umavarman of the Tekkali plates, the legend is different and it reads *pitribhaktah*. These 'Pitribhakta' kings, as they may be tentatively designated, were evidently of a different stock from the Māṭharas and were again different from the family of Umavarman of the Brihatprōshthā grant. With the evidence now at our disposal, it is obviously incorrect to call all the kings of Kalinga from Śaktivarman down to Viśākhavarman as of one and the same family, Māṭhara or Pitribhakta.² *Kalingādhipati* Chaṇḍavarman of the Bobbili plates seems to have succeeded *Kalingādhipati* Umavaraman not long after, since it is found that the composer of his record was Rudradatta, son of Mātrivara. The latter, as pointed out above, had composed both Anantaśaktivarman's Andhavaram plates and Umavarman's Brihatprōshthā grant.³ In phraseology the grants of all the three rulers show affinity. Thus the passage *dharmma-kkrama-vikkramāṇām-anyatama-yōgād=avāpya*, etc., is found in our grant as well as in the Bobbili plates of Chaṇḍavarman. *Shatṭrinśad-agrahāra-sāmānyam*, etc., is common to both the Bobbili plates and the Brihatprōshthā grant. In the scheme of early Kalinga chronology, the Māṭharas preceded a certain *Kalingādhipati* Umavarman, of unknown dynasty, who was himself closely followed by the 'Pitribhakta' kings led by Chaṇḍavarman.⁴

As already observed, the present record mentions two *dūtakas* in place of *ājñapti*. Evidently the task of the *dūtaka* and that of the *ājñapti* were similar, viz., that of executing the royal gift.⁵ In the Andhavaram plates of the king no specific person is mentioned as the *ājñapti*, the task having been entrusted to the *mahādāṇḍanāyakas* as the record states. In the present grant, however, two *dūtakas* are mentioned, Śivabhōjaka and Vasudatta by name. Both are described as *kumārāmātyas*. But Śivabhōjaka is given the additional epithets of *Mahābalādhikṛita* and *Dāṇḍanētri*.⁶ The latter was thus a more dignified official, being both a generalissimo and a judge. The grant is stated to have been written by *Dēśākshapaṭalādhikṛita Talavara* Arjunadatta. An *amātya* Arjunadatta is stated to have written the Rāgōlu plates issued by Śaktivarman whom we have considered as the grandfather of Anantaśaktivarman. It may not be improbable that

¹ The legend on the seal of the Andhavaram plates is highly damaged. But that it contained the name of the king in the genitive case and the whole legend was in four lines may be safely assumed.

² *Early History of Andhradesa* (1942), pp. 387-8.

³ Contra : *ARSIE*, 1934-5, part II, item 1, wherein Mr. C. R. K. Charlu considers that there were two persons of the name of Mātrivara, and that Mātrivara son of Haridatta of Umavarman's Brihatprōshthā grant was a later descendant of Mātrivara, father of Rudradatta of the Bobbili plates of Chaṇḍavarman. But there is really no need to postulate two Mātrivaras as has been pointed out by R. K. Ghoshal (above, Vol. XXVI, p. 133 f.n. 4).

⁴ The scheme of chronology of these kings which is proposed in *Early History of Andhradesa*, pp. 387 ff., appears faulty and I am unable to accept it for various reasons.

⁵ Fleet, *CII.*, Vol. III, p. 100 n.

⁶ [From the wording of the record, one may apply the titles *Mahābalādhikṛita* and *Dāṇḍanētri* even to both *Śivabhōjaka* and *Vasudatta*. Yet, I am inclined to connect the first with the former and the second with the latter : *Kumārāmātya Mahābalādhikṛita* Śivabhōjaka and *Kumārāmātya Dāṇḍanētri* Vasudatta. Besides, *Dāṇḍanētri*, in my opinion, is a military rank like *Mahābalādhikṛita*, though inferior to it. *Dāṇḍanētri* may be equal to *Sēnāpati* and *Mahābalādhikṛita* to *Mahāsēnāpati*.—Ed.]

Talarava Arjunadatta of Anantaśaktivarman's present grant was a grandson of *Amātya* Arjunadatta.¹ That a purely civil officer, viz., *Dēśāl-shapaṭalāḥhikṛita*, that Arjunadatta of the present record was, had also the title *talarava*, which means 'a noble person,' is interesting. This office is mentioned in some Nāgarjunikoṇḍa Prakrit inscriptions and also in the Allāru Brāhmī epigraph.²

Of the places mentioned in the inscription, Siṅghapura, the capital of the king, occurs in many other records of the Kāliṅga kings and has already been located at Siṅgupuram³ near Chicacole (Śrikākuḷam) in the present-day *tāluk* and district of the same name. Sakunaka, the donated village, which is stated to be in *Āvi-pāriśva* (in the district) of Varāhavarttanī, finds mention as Śakunagrāma in the Andhavaram plates of Gaṅga Anantavarman⁴ as one of the villages situated on the boundary of a village (name not clear) in Varāhavarttanī. Śakunagrāma is in this record described as touching other villages like Dīrghavāṭa and Sindhivāsi. The last two may be identified with Dīrghāsi and Sindhuvāḍa in the same *tāluk*. Sakunakagrāma of our grant must lie somewhere in the neighbourhood of these villages in the same *tāluk*. I am unable to establish at present its exact identification with any modern village in this locality. But that the territorial division Varāhavarttanī should be located in this and the adjacent *tāluk* of Tekkali is more than certain; for, a number of villages mentioned as situated in this ancient division in some E. Gaṅga grants are all identifiable with their modern representatives in the Tekkali and Chicacole *tāluka*. The following table illustrates this.

Name of the village as in the inscription.	Modern name.	Taluk.	Reference.
1 Rōhanaki	Rōhanaki, hamlet of Siṅgupuram.	Chicacole	Above, Vol. XXIII, p. 62.
2 Navagrāma	Naogam	Tekkali	Ibid, p. 67.
3 Siddhārtthaka	Siddhantam	Chicacole	Above, Vol. XIII, p. 213, and Vol. III, p. 127.

In the late E. Gaṅga inscriptions, the territorial division Kōluvartanī is mentioned and Krishna Sastri considered the division as being the same as Varāhavarttanī since *kōla* is a synonym of *varāha*.⁵ Sen Konow located this division roughly along the course (*vartanī*) of the Varāhanadī which rises in the Gōlkoṇḍa (Gōlugoṇḍa) Hills to the north of Narasapatam and flows into the Bay of Bengal at Vatāda.⁶ Mr. G. Ramadas states that it is probably the region between the Vamśadhārā and the Nāgavālī.⁷ Both these locations are approximately correct, since the modern Chicacole and Tekkali *tāluka* are situated in this area. The derivation of its name from *varāha* 'boar,' is interesting as there existed another territorial division called after *krōshṭu*, 'jackal,' viz., the Krōshṭukavarttanī.⁸ Presumably the areas were so named owing to profusion of boars and jackals in them. I am unable to identify *Āvipāriśva* in which Sakunaka lay. If *pāriśva* is a mistake for *pārśva*, then the village or locality was called simply *Āvi*. The name, however, seems to be non-Sanskritic.

No. 40—NAGARI PLATES OF ANANGABHIMA III ; SAKA 1151 AND 1152

(3 Plates)

D. C. SIRCAR, OOTACAMUND

In November 1949, I received a set of inscribed copper-plates for examination from Mr. P. Acharya of Baripada in the Mayurbhanj District of Orissa through Mr. K. C. Panigrahi, Curator of the Orissa Provincial Museum, Bhubaneswar. The plates, which were thickly covered with verdigris, were properly cleaned and good impressions of their inscribed sides were prepared in the office of the Government Epigraphist for India at Ootacamund. After having completed the

¹ From impressions.² Sandhi is not observed here.³ Read *Durggaśarmmaṇē ch=ābhyām dvābhyām bhrātribhyām*.⁴ Sandhi is not observed here.⁵ For interpretation, see above p. 223 and n. 6.⁶ [See above, p. 228, n. 5.—Ed.]

examination of the inscription from both the original plates and the impressions, I personally carried the plates to Cuttack, where I had to attend the Indian History Congress in December 1949, and handed them over to Mr. Acharya. At Cuttack I came to learn that the plates belonged to Mr. Harekrishna Mahatab, then Chief Minister of Orissa. Considering the importance of the inscription I requested Mr. Mahatab in March 1950 to be so good as to permit me to edit it in the *Epigraphia Indica*. I also requested Mr. Mahatab to supply me with details of the discovery of the plates, which could be incorporated in my paper on the subject. In a letter, dated the 15th March, 1950, Mr. Mahatab kindly agreed to my editing the inscription and also furnished me with the following story of its discovery. "The set of plates," Mr. Mahatab wrote to me, "was recovered in a village called **Nagarī** about eleven miles from the town of Cuttack. The villagers were sinking a well and the copper plates were found about six feet below the surface level. As soon as the villagers found the set out, somehow it struck them to present the plates to me. They could have easily disposed them of and got a good sum as the value of the copper; but instead they came all the way and presented the plates to me in my office. I offered to pay them Rs. 100 which too they declined and expressed the desire that the amount should be spent for some public work in their village. Recently I went to the village. Near about it there are traces of ancient structures. Probably it was at one time a prosperous town as the name *Nagarī* of the village implies." I am very grateful to Mr. Mahatab for his kindness in allowing me to publish the Nagarī plates. Thanks are also due to the villagers of Nagarī whose good sense saved the plates from being lost to the students of Indian epigraphy and history.

The **set** consists of **five plates** each measuring 12·6 inches by 7·9 inches. They are held together by a ring to which a **seal**, resembling those attached to other imperial Gaṅga records, is soldered. The thickness of the ring is 7 inch and it passes through a ring-hole which is 1 inch in diameter. The seal, which is 3·5 inches in diameter, has the form of an expanded lotus or a radiating sun-dial and has in the centre an embossed figure of a seated bull, caparisoned and bedecked with ornaments, facing front and having raised neck and head. To the proper left of the bull are found the emblems of a conch, the crescent moon, a dagger pointed downwards and a *ḍamaru*. To the right of the bull are similarly found a *triśūla* and an *aṅkuśa* or a *chāmara*. In front of the bull there is an emblem possibly representing the solar orb. The plates have raised rims for the protection of the writing. The first plate is written on the inner side only, the rest being engraved on both the sides. There are altogether 156 lines of writing. The first side of the third plate has 17 lines, the first sides of the fourth and fifth plates 19 lines each and the second side of the fifth plate only 11 lines. All other inscribed sides have 18 lines each. The writing is well-preserved with the exception of a few slightly damaged passages on the second side of the last plate. The *aksharas* are deeply incised and measure about 4 inch in height. The plates alone weigh 596 *tolas* while the weight of the ring and the seal is 111 *tolas*.

The **characters** belong to the class usually termed proto-Bengali, although a more appropriate name of the script ought to be Gaudī.¹ Many of the letters have developed Bengali forms of the thirteenth century; but there are a few traces of Oriya (cf. medial *i* sign in *khi* in line 4, *si* in line 44 and *ni* in line 94) and Dēvanāgarī (cf. medial *ō* sign in *dhō* in line 41 and medial *u* sign in *bhu* in line 104) influence. An interesting fact about the palaeography of the inscription under discussion is that there are many cases in which different *aksharas* are indicated by the same or similar signs. Thus there is absolutely no appreciable difference between *tū* and *tā*, between *tva* (cf. also cases where it looks like *ty*) and *rtha*, and between *dga* and *dga* (cf. also *nga* which has only an additional loop at the top right end). *Hu* has the ordinary sign for medial *u* in a few cases (cf. line 95); but it is often indistinguishable from the sign for *hva* (cf. lines 11, 12, 18, 19, 69, 78, etc.).

¹ For the literary style, dialect and script of Gauda or Eastern India, see *A. I. O. C. Summary of Papers* Lucknow, 1951, p. 177.

Similar is the case with *tu* and *ta* (cf. lines 54, 64, 66, 69, 71, 74, 114, 128, etc.). In some cases *n* is not distinguishable from *v* (cf. *yasy-āna*^o in line 109). The sign for medial *i* often does not rise much above the top *mātrā* of the consonants and somewhat resembles the *ā-mātrā* (cf. *kshmi* in line 1). It is of course expected that *b* should be indicated by the sign for *v*. Of initial vowels, the inscription under discussion employs *a* (lines 60, 66, 82, 96, 97, 121, 123, 134, 146), *ā* (lines 25, 50, 89, 120), *i* (lines 9, 10, 36, 37, 47, 64, 67, 69, 87, 105, 123, 132, 133), *u* (line 122), *ri* (lines 144, 145), *ē* (lines 16, 56, 75, 81, 90, 103, 140, 141) and *ō* (line 1). Of final consonants there are *t* (line 15), *n* (lines 29, 62, 79, 85, 126, 130, 140, 145) and *m* (lines 4, 10, 11, 20, 27, 35, 41, 43, 45, 48, 53, 61, 67, 89, 111, 116, 146, 150, 151, 153). The half-nasal sign called *chandra-bindu* is employed in writing *ōm* in line 1. Double *daṇḍa* as a mark of interpunctuation is usually joined at the bottom. In some cases the *anusvāra* looks like the superscript *r*.

The language of the inscription is Sanskrit. Its composition is partly in prose and partly in verse. With the exception of only one, all the eighty verses of the introductory portion of the epigraph are found also in the copper-plate records of the successors of the king who issued the charter under discussion.

As regards orthography, attention may be drawn to the occasional reduplication of certain consonants in conjunction with *r*. A common mistake in the record is the confusion between *ś* and *s*. Interesting is also the spelling of words like *śrēyānsi* (for *śrēyānsi*) in line 1, *paṇi-i* (for *payānsi*) in line 79, *vanśa* in lines 8 and 10 and *vansa* in line 83 (for *vaśa*), *tūmra* (for *tāmra*) in line 142, *siṃgha* (for *siṃha*) in line 132, etc. *Ṛ* is once indicated by *ru* in line 144. In a large number of cases final *m* followed by a consonant has not been changed into *anusvāra*, while in a few it has been substituted by the *anusvāra* wrongly (cf. lines 102, 137). It has been usually joined with *v* in wrong *sandhi* (lines 40, 48, 53, 150, 151, 152).

The inscription contains several dates on which different gifts of land were made by the king responsible for the charter, although the exact date when the charter was issued is not mentioned. Lines 122-23 refer to the *Mina-saṅkrānti* on Saturday, Chaitra sud 9, in the Śaka year counted by *chandra* (1), *ishu* (5) and *rudra* (11) which indicate, according to the well known principle *aṅkānām vāmatō gatiḥ*, the Śaka year 1151. The date regularly corresponds to Saturday, the 23rd February, 1230 A.C. Line 126 speaks of a gift made on Thursday, Māgha badi 6 in the next year (*abḍ-āntarē*), i.e., in Śaka 1152. This date corresponds to the 26th December, 1230 A.C. Lines 134-35 refer to a lunar eclipse on Thursday, Mārgaśīrsha śudi 15 in the same year (*tasman-ēv-ābdē*), i.e., in Śaka 1152. The date corresponds to the 21st November, 1230 A.C. Line 137 speaks of the *Makara-saṅkrānti* no doubt in the same year falling on the 26th December, 1230 A.C. Line 142 refers to a solar eclipse on the *Karkaṭak-āmāvāsya* apparently in the same year (i.e., Śaka 1152), although it has to be admitted that, according to Swamikannu Pillai's *Indian Ephemeris*, the solar eclipse took place in Śaka 1152 not on the *Karkaṭak-āmāvāsya* (Thursday, the 11th July, 1230 A.C.) but on the *Vṛishabh-āmāvāsya* (Tuesday, the 14th May, 1230 A.C.). The last date is found in line 146 which speaks of the *Makar-āmāvāsya* on Sunday apparently in the same Śaka year. This date corresponds to the 5th January, 1231 A.C. The actual date when the charter under discussion was issued must have come sometime after this date probably in the same year 1231 A.C.

The prose portion of the inscription in lines 122-49 records a number of grants of land made by the celebrated Gaṅga monarch **Anaṅgabhima III** (circa 1211-38 A.C.) in favour of certain Brāhmaṇas. As already indicated above, this part of the charter is preceeded by no less than eighty verses (with a prose passage between verses 6 and 7), seventynine of which are found quoted with slight variations in some later records of the family. These verses describe the genealogy of the Imperial Gaṅga family up to the reigning monarch. The resemblance of our text is the closest

with the corresponding part of the copper-plate charters¹ of Narasimha II (*circa* 1278-1305 A.C.), great-grandson of Anaṅgabhīma III. Of the two Puri copper-plate grants² of Narasimha IV (*circa* 1379-1414 A.C.), the one styled B agrees more closely with our text than that styled A. It has to be noticed that the verses describing the activities of the successors of Anaṅgabhīma III up to Narasimha II are similarly found quoted in the records of Narasimha IV. In spite of the fact that we have as yet not secured copper-plate grants of all the imperial Gaṅga rulers, it is clear from the records at our disposal that each of these later Gaṅga monarchs quoted in their charters the introductory portion of the records of his predecessor and added to them some new verses describing his own activities. That this custom must have been introduced after the days of Anantavarman Chōḍagaṅga (1078-1147 A.C.) is shown by the fact that the verses cannot be traced in the introduction of the charters issued by that monarch and his predecessors.³ In the absence of any copper-plate grant of any of the Gaṅga monarchs ruling between Anantavarman Chōḍagaṅga and Anaṅgabhīma III, it is indeed difficult to determine as to who among them was actually responsible for the composition of the earlier part of the genealogy copied in later records. It may, however, be pointed out that, in the whole genealogy as found in so many records, only the description of Kāmārṇava (*circa* 1147-56 A.C.), the immediate successor of Anantavarman Chōḍagaṅga, gives astronomical details about the date of the king's accession. This fact singles him out amongst the successors of Anantavarman Chōḍagaṅga in the genealogy under discussion and may suggest that it was the poet at his court who composed the earlier part of the genealogy that was copied in the copper-plate grants of his successors.

The mythical genealogy from the moon to Kōlāhala-Anantavarman given in a prose passage between verses 6 and 7, in lines 12-16, of our record was drawn on the basis of the later records of Anantavarman Chōḍagaṅga. We know that the records of Vajrahasta III, grandfather of Anantavarman Chōḍagaṅga, offer the following genealogy :—

In the Gaṅga family belonging to the Ātrēya *gōtra* :

1. Guṇamahārṇava (*i.e.*, Guṇārṇava) who acquired the glory of *sāmrajya*.

2. Vajrahasta I who united the earth that had been divided into five kingdoms and ruled for 44 years.

3. Guṇḍama I (3 years)	4. Kāmārṇava I (35 years)	5. Vinayāditya (3 years)
---------------------------	------------------------------	-----------------------------

6. Vajrahasta II Aniyaṅkabhīma (Anan abhīma I)
(35 years)

7. Kāmārṇava II who married the Vaiḍumba princess Vinaya- mahādēvī (½ year)	8. Guṇḍama II (3 years)	9. Madhukāmārṇava (19 years)
---	----------------------------	---------------------------------

10. Vajrahasta III
(1038-68 A.D.)

¹ Cf. *J. A. S. B.*, Vol. LXV, Part I, 1896, pp. 235 ff. Unfortunately the text published by N. N. Vasu is not free from mistakes.

² *Ibid.*, Vol. LXIV Part I, 1895, pp. 136 ff.

³ Cf. such records as the Kōrnī and Vizagapatam plates of Anantavarman Chōḍagaṅga (*J. A. H. R. S.*, Vol. I, pp. 43-48; 113-24; *Ind. Ant.*, Vol. XVIII, pp. 161-76) and the Narasapatam, Nadagam and Madras Museum plates of his grandfather Vajrahasta III (above, Vol. XI, pp. 147-58, Vol. IV, pp. 183-93, Vol. IX, pp. 94-98). Only verse 14 of our record appears to have been copied from Chōḍagaṅga's grants. Verse 15 is found not only in the charters of Chōḍagaṅga but also in those of his father and grandfather.

The same genealogy was copied in the earlier copper-plate grants of Anantavarman Chōḍagaṅga such as the Kornī and Vizagapatam plates of Śaka 1003 (1081-82 A.C.).¹ There is nothing suspicious about this genealogy. But the Kornī plates of Śaka 1034 (1112-13 A.C.)² and the Vizagapatam plates of Śaka 1040 (1118-19 A.C.)³ give a more elaborate genealogy, the beginning of which is practically the same as found in the later records of the family including the grant of Anaṅgabhīma III under discussion. This later genealogy traces the origin of the family to the god Viṣṇu through his navel-born son Brahman, his mind-born son Atri, his eye-born son Moon, his son Budha, Budha's descendants Purūravas, Āyus, Nahusha, Yayāti and Turvasu⁴ and a host of apparently imaginary personages from Turvasu to Guṇārṇava who is the progenitor of the family according to the earlier account but is represented here as Guṇārṇava II and is assigned a reign-period of 27 years.⁵ Names of a certain Kōlāhala, founder of Kōlāhalapura in the Gaṅgavāḍi *vishaya* in Mysore, and his successors, some of whom are said to have migrated to Kālīṅga, are cleverly inserted before the reference to Guṇārṇava. There is some confusion in the description of the sons of Guṇārṇava ; but the two accounts, earlier and later, tally with each other from Vajrahasta II Aniyāṅkabhīma I, grandfather of the great Vajrahasta III (1038-68 A.C.). It is impossible to believe that Vajrahasta III made mistakes in recounting the names of his immediate predecessors and that his grandson Anantavarman Chōḍagaṅga had more reliable information about them. It has to be noticed that even the name of the father of Vajrahasta III is wrongly given in the records of his grandson. I have therefore no doubt that whatever is new in the later genealogy and is conflicting with the earlier account is absolutely unreliable. It seems that Vajrahasta II Aniyāṅkabhīma I (also called Anantavarman like his grandson), who apparently was the issuer of the Mundasa plates of Śaka 917 (995 A.C.) and the Ponduru plates of the Gaṅga year 500 (996-98 A.C.) and ruled in the period circa 982-1016 A.C.,⁶ was the founder of the family's greatness and that there was little authentic information about his immediate predecessors up to Guṇārṇava, progenitor of the family, at the disposal of the court poets of Anantavarman Chōḍagaṅga. The genealogy from the god Viṣṇu to this Guṇārṇava was no doubt entirely fabricated. The fabrication was, however, dependent on several factors. In the first place, its basis was the Ātrēya *gōtra* and the status of the Brāhmaṇa⁷ claimed by the Gaṅga emperors. As the Pallavas belonging to the Bhīrūvāḍja *gōtra* claimed to have descended from the sage Bharadvāja, these Gaṅgas forged a genealogy tracing their descent from their *gōtrarshi* Atri. The second factor seems to be a desire to claim relationship with the Gaṅgas of Mysore, in whose tradition the city of Kōlāhalapura, mentioned in the genealogy under discussion, finds an important place. Another factor was apparently the desire to claim descent from the celebrated Chandra-varma or lunar dynasty of epic and Purāṇic fame and, unlike the case of the old Chandra-varma kings, from the god Viṣṇu himself. We know that the earlier Gaṅgas were all Śaivas, being staunch devotees of the god Śiva-Gōkarṇēvara worshipped at the

¹ J. A. H. R. S., Vol. I, pp. 40-48 ; *Ind. Ant.*, Vol. XVIII, pp. 161-65. One set of the Vizagapatam plates (*Ind. Ant.*, Vol. XVIII, pp. 172-76) tallies with these earlier records in respect of this and other early characteristics noticed below, although its date was read as Śaka 1057 (1135-36 A.C.). I have doubts that, in the date of this inscription, the word *kara* (2) was wrongly written or read as *sa(śa)ra* (5) and that the date should probably be Śaka 1027 (1105-06 A.C.) instead of Śaka 1057 (1135-36 A.C.).

² J. A. H. R. S., Vol. I, pp. 113-24.

³ *Ind. Ant.*, Vol. XVIII, pp. 165-72.

⁴ These names were taken from the epic and Purāṇic traditions.

⁵ Cf. Ray, *Dynastic History of Northern India*, Vol. I, pp. 451-53 below p. 240, note 2.

⁶ See J. K. H. R. S., Vol. I, pp. 219-21.

⁷ According to the *Ta'rikh-i-Firūz Shāhī* by Shams-i-Sirāj, which describes Sultān Firūz Shāh's war with Gaṅga Bhānu III (circa 1352-78 A.C.), the Rāis of Jājñagar (*i.e.* the Gaṅga kings of Orissa) were Brāhmaṇas (Rav. *op. cit.*, p. 492). That the claim for the Brāhmaṇa status was not regarded seriously is suggested by the Kālatriya name-ending *varman* preferred by Bhānu II and Narasimha IV (*J. R. A. S. B., I.*, Vol. XVII, p. 21). The Sōmavarman also claimed the Ātrēya *gōtra* and descent from the Moon.

top of the Mahēndragiri in the Ganjam District. Like his predecessors, Anantavarman Chōḍagaṅga is also called a *paramamūhēśvara* (devout worshipper of Mahēśvara or Śiva) in his earlier records, viz., the Korni and Vizagapatam plates of 1031-82 A.C. But the Korni plates of 1112-13 A.C. describe him both as a *paramamūhēśvara* and as a *paramavaishṇava* (devout worshipper of Viṣṇu), while the Vizagapatam plates of 1118-19 A.C. omit the title *paramamūhēśvara* altogether and represent Anantavarman Chōḍagaṅga as a devotee of Viṣṇu alone. It is very interesting to note that these later records refer to Anantavarman Chōḍagaṅga's conquest of the Utkala country which must have indicated the dominions of the Sōmavamśis including the Puri-Cuttak region.¹ This event, which took place earlier than 1112-13 A.C., seems to have had something to do with the change of the king's religious faith from Śaivism to Vaiṣṇavism. As will be seen below, one of the achievements of Anantavarman Chōḍagaṅga, as described in the introductory portion of later Gaṅga copper-plate charters, including the record under discussion, was the construction of the great temple of Puruṣhōttama-Jagannātha at Puri. In any case, the genealogy tracing Chōḍagaṅga's descent from Viṣṇu seems to be concocted after he had been initiated to the Vaiṣṇava faith.

The inscription begins with the usual symbol for *siddham* and with the *praṇava* written as (̐). Verse 1 is in adoration to the goddess of prosperity, while the following verse speaks of her husband, the god Viṣṇu. Verse 3 describes how the god Brahman sprang from the navel of Viṣṇu, how the sage Atri was produced by Brahman (from his mind) and how the Moon was born from Atri's eyes. Verse 4 describes the greatness of the Moon, progenitor of the Chandravamśis, and verses 5-6 with a prose passage refer to the glories of the Moon's descendants up to Kōlāhala who is said to have also been called Anantavarman. Verse 7 speaks of Gaṅgavāḍi; and Anantavarman (Kōlāhala) is said to have become the king of this land. It is further said that the descendants of this king became famous under the name of Gaṅga. Verse 8 says how Sarapura, the capital of Kōlāhala-Anantavarman's kingdom, came to be known as Kōlāhala (or more fully Kōlāhalapura) and how a number of kings ruled there in succession. Verse 9 suggests that Kōlāhala-Anantavarman had several (probably six) sons of whom the eldest Mārasimha succeeded him, while the latter's younger brothers left the country with a view to conquering other territories. Verse 10 says how these wandering brothers, the fifth of whom was called Kāmārṇava, reached Kālīṅga and fought with the people of that country. Verse 11 speaks of the conquest of the Kālīṅga country apparently by the Gaṅgānvaya indicating Kāmārṇava. Verse 12 says that Kāmārṇava became a *vamśa-kartri*, 'the progenitor of a royal family' and that his descendants became kings of renown. Verse 13 introduces Vajrahasta III (1038-68 A.C.) as sprung from the above Kāmārṇava (cf. *tasmāt* in line 26), although the real relationship is no doubt that Vajrahasta was a descendant and not a son of this Kāmārṇava. As already indicated above, this part of the genealogy is based on that found in the later records of Anantavarman Chōḍagaṅga, although there is some modification and omission of details.² The

¹ See *I.H.Q.*, Vol. XXII, pp. 300-07.

² According to the later records of Anantavarman Chōḍagaṅga, Kōlāhala was succeeded by his son Virōchana, in whose time 12 years after 81 kings had ruled at Kōlāhalapura, came Virasimha. This king had five sons, viz., Kāmārṇava, Dānārṇava, Guṇārṇava, Mārasimha, and Vajrahasta. We are told that Kāmārṇava gave over the kingdom to his paternal uncle and set out on *dyvājaya* with his four brothers. He came to Mount Mahēndra where he worshipped Gōkarṇasvāmin through whose favour he received the bull crest and the insignia of sovereignty. He then took possession of the Kālīṅga country after defeating Bālāditya and ruled from Jantāvura for 36 years. His brother Dānārṇava succeeded him and ruled for 40 years, while the other brothers, viz., Guṇārṇava, Mārasimha and Vajrahasta, were assigned respectively the Ambavāḍi *vishaya*, Sōḍā *mandala* and Kaṇṭhakavarttani. Dānārṇava's successors were: his son Kāmārṇava (50 years), his son Raṇārṇava (5 years), his son Vajrahasta (15 years), his younger brother Kāmārṇava (19 years), his son Guṇārṇava (27 years), his son Jitāṅkuśa (15 years), his brother's son Kālīgāṅkuśa (12 years), his father's brother Guṇḍama (7 years), his younger brother Kāmārṇava (25 years), his brother Vinayāditya (3 years), his son Vajrahasta (35 years), his son Kāmārṇava (1 year), his brother Guṇḍama (3 years), his step-brother Madhukāmārṇava (19 years), his son Vajrahasta (1038-68 A.C.). Cf. this with the genealogy found in earlier records and quoted above.

freedom with which the later poet handled the genealogy found in the later records of Anantavarman Chōḍagaṅga, as indicated by the present case, is possibly another argument in favour of its fabricated nature. As we have suggested above, much of this account is fabricated, and the genealogy found in the records of the time of Vajrahasta III (1038-68 A.C.) and of the earlier years of Anantavarman Chōḍagaṅga is much more reliable.

Verses 14-15 describe the greatness of **Vajrahasta** who is called 'lord of **Trikaliṅga**'. Verse 16 speaks of Vajrahasta's queen Naṅgamā and his son **Rājarāja I** born of her. Verses 17-18 deal with Rājarāja and his chief queen (*agra-mahishī*) Rājasundarī.¹ The following 15 verses (verses 19-33) describe the achievements of [Anantavarman] **Chōḍagaṅga**, son of Rājarāja and Rājasundarī. Verse 20 deals with his learning in various subjects, while the next verse refers to his great prowess. Verse 22 says that Chōḍagaṅga levied tribute from the whole land between the **Gaṅgā** (Bhāgī-rathī) and the **Gautama-Gaṅgā** (Gōdāvarī). Verses 23-24 again refer to Chōḍagaṅga's prowess. According to verse 25, Trilōchana-vibhu was bound in agreement with the Gaṅga (*i.e.*, Chōḍagaṅga) saying that no hero could venture to conquer him. Trilōchana may of course indicate the god Śiva; but the reference may also be to an enemy captured in battle by the Gaṅga king. Verse 26 speaks of Gaṅgōśvara's (*i.e.*, Chōḍagaṅga's) victory over the king of **Utkala**, which led to his obtaining *dharaṇī*, *i.e.*, new territories no doubt in the Utkala country. We have elsewhere² discussed the history of the Sōmavamśis who were ruling in Utkala comprising the Puri-Cuttack region about this time. The Utkala king defeated by Chōḍagaṅga was possibly a successor of the Sōmavamśī ruler Uddyōtakēśarin (circa 1060-85 A.C.). According to verse 27, Chōḍagaṅga built a temple for the great god Purushōttama, as the earlier kings were afraid to take up this great task, while the next verse seems to suggest that the temple was built on the sea-shore. It is rightly believed by scholars³ that these two verses refer to the erection of the great temple of Purushōttama-Jagannātha at Puri on the shores of the Bay of Bengal by king Anantavarman Chōḍagaṅga. As we have seen above, this Gaṅga king, like his predecessors, was at first a Śaiva, but later became a Vaishṇava, and that the annexation of the Puri region to his empire may have had some thing to do with this change in his religious faith. The language of verse 27 seems to suggest that the god Purushōttama-Jagannātha had been in worship at Puri for many years before the conquest of that region by Chōḍagaṅga, but that the Śaivite Sōmavamśis, who were supplanted from Utkala by the Gaṅgas, had neglected the erection of a temple for the Vaishṇavite deity. (It seems that like Mīnākshī at Madura, Bālājī-Vēṅkaṭēśvara at Tirupati, Vindhyavāsini near Mirzapur, Kāmākhyā near Gauhati and many other gods and goddesses worshipped in different parts of India, Purushōttama-Jagannātha of Puri was originally worshipped by the local aboriginal people but was later on gradually accommodated in the orthodox Brahmanical pantheon.⁴) The identification of this deity with the Brahmanical god Viṣṇu is, however, apparently earlier than the beginning of the twelfth century when Chōḍagaṅga conquered the Utkala country. Verse 29 refers to the hunting excursions of Anantavarman Chōḍagaṅga and the next verse to his victory over the king of Mandāra in a battle that took place on the banks of the Ganges. The walls and gates of **Āramyā**, the capital city of the **Mandāra** king who fled from it, are said to have been destroyed

¹ She was a Chōla or Chōḍa princess. Her father was king Rājendra Chōla (Bhandarkar, *List*, No. 1100). Her son's name Chōḍagaṅga points to the latter's claim to both Chōla and Gaṅga blood. Chōḍagaṅga is sometimes called Virarājendra-Chōḍagaṅga (Subba Rao, *History of Kalinga*, p. 136) apparently after his maternal grandfather. Thus Rājasundarī's father was actually Virarājendra Chōla (circa 1063-70 A. C.).

² *I.H.Q.*, Vol. XX, pp. 76-82; Vol. XXII, pp. 300-07.

³ *J. A. S. B.*, Vol. LXVII, 1893, pp. 323-31.

⁴ The *Utkala-khaṇḍa* (chapters VII-VIII) section of the *Skanda Purāṇa* (*Viṣṇu-khaṇḍa*, section II) clearly says that Purushōttama-Jagannātha of Puri was originally worshipped by the aboriginal Śabara people in secret in an inaccessible forest on the Nilichala and that the priest of king Indradyumna of Avanti, who popularised the god, received informations regarding the deity and his worship from a Śabara named Viśvāvasu.

by the Kaliṅga forces. Mandāra has been identified by scholars with Garh Mandaran and Āramyā with Arambag both in the Hoogly District of West Bengal.¹ Verse 31 speaks of the heaps of gold that the Gaṅga king used to grant to the people in distress and of the burning of the capitals of his enemies. Verse 32 says that Chōḍagaṅga reigned for 70 years. We know that Anantavarman Chōḍagaṅga was crowned in the Śaka year 999 (17th February 1078 A.C.),² although he may have actually occupied the throne sometime earlier after his father's death, and, as we shall presently see, his immediate successor was crowned in Śaka 1069 (1147-48 A.C.). Thus Chōḍagaṅga actually ruled for 70 years between Śaka 999 and 1069 (1078-1147 A.C.). Verse 33 refers to Chōḍagaṅga's queen Kastūrikāmōdinī and the next three verses to his son **Kāmārṇava** *alias* Kumāra from that queen. Verse 37 says that Kāmārṇava's coronation took place in the Śaka year measured by the Nandas (9), the seasons (6), the sky (zero) and *chitra* which is a mistake for *chandra* meaning the moon (1). According to the dictum quoted before, this date comes to Śaka 1069. It has to be pointed out that the same verse, as quoted in the later records of the family, reads *vēda* (4) instead of *nanda* (9). Consequently it was so long believed by scholars that the coronation of Kāmārṇava took place in Śaka 1064 possibly as a regent and that his extremely old father may have arranged then to transfer the active duties of kingship to him.³ Since the record under discussion is the earliest document containing the verse giving the date of Kāmārṇava's coronation, it appears that the original reading was *nanda* which was later made *vēda* by an error of one of the copyists. The suggestion is again supported by the fact that the latest recorded date found in the epigraphs of Chōḍagaṅga's time is Śaka 1069 and that the earliest record of his successor Kāmārṇava is dated in Śaka 1070.⁴ Verse 41 refers to a ceremony of the Hiranyagarbha *mahādāna* performed by king Kāmārṇava and verse 43 says that he ruled for ten years, *i.e.*, during Śaka 1069-78 (1147-1156 A.C.).

Verses 44-45 speak of Indirā who was the daughter of a king of the solar dynasty and was another queen of Anantavarman Chōḍagaṅga. Indirā's father, mentioned as a king, cannot be satisfactorily identified. Verse 46 introduces the king of kings **Rāghava** who was the son of Chōḍagaṅga by Indirā. King Rāghava's glory is described in verses 47-52. His claim of the status of a Brāhmaṇa is probably suggested by his comparison with Paraśurāma in verse 49. Verse 52 says that Rāghava ruled for fifteen years, *i.e.*, during Śaka 1078-1092 (1156-1170 A.C.).

Verse 53 introduces king **Rājarāja II**, another son of Anantavarman Chōḍagaṅga by the queen Chandralēkhā. The next five verses describe the glory of king Rājarāja II who is said in verse 58 to have ruled for twenty-five years. This has to be regarded as the number of *Aṅka* years which, deducting according to rule the first, sixth, sixteenth and twentieth years, would be equal to twenty-one actual years.⁵ Consequently the king actually ruled in Śaka 1092-1112 (1170-90 A.C.). The following five verses (verses 59-63) deal with Rājarāja's younger brother and successor **Aniyaṅkabhīma** (Anāṅkabhīma or Anaṅgabhīma II) who is said, in verse 63, to have reigned for ten years, which, regarded as *Aṅka* years, would be equal to eight ordinary years. This king therefore ruled in Śaka 1112-19 (1190-97 A.C.). Verse 64 introduces Vāghalladēvī, chief queen of Anaṅgabhīma II, and the next verse king **Rājarāja III** who was the son of Anaṅgabhīma II

¹ Ray, *op. cit.*, p. 360; *History of Bengal*, Dacca University, Vol. I, p. 168.

² Bhandarkar, *List*, No. 1099.

³ Ray, *op. cit.*, p. 469.

⁴ *Ibid.*, pp. 467-68, 472.

⁵ The use of the *Aṅka* reckoning is known from the time of Chōḍagaṅga; but, in mentioning the number of years in a reign in the introductory part of the genealogy in later imperial Gaṅga records, it is introduced here for the first time. According to the rules, established by M. Chakravarti (*J. A. S. B.*, 1903, p. 100), (1) 1 and all figures ending in 0 and 6 (except 10) should be omitted from the actual years to get the number of *Aṅka* years; (2) the last *Aṅka* year of one king and the first of his successor fell in the same year; and (3) the year begins on Bhādrapada sudi 12.

and Vāghalladēvi. Verses 65-70 describe the glory of king Rājārāja III who is said to have ruled for seventeen years apparently of the *Aṅka* reckoning, corresponding to fourteen actual years. Thus the king ruled in Śaka 1120-33 (1198-1211 A.C.).

Verse 71 speaks of Malhaṇadēvi who was descended from the Chālukya dynasty and was the queen of Rājārāja III. The name of this queen is found as Sadguṇadēvi in the grant (B) of Narasiṃha IV no doubt due to an error of one of the copyists. The reading *Maṅkupaṇḍevī* in the record of Narasiṃha II preferred by N. N. Vasu, however, is quite clearly *Mahāṇadēvi* as in our epigraph. It is only natural to expect that the queen's name has been correctly spelt in the present charter issued by her son. Verses 72-80 describe king **Anaṅgabhīma III**, who issued the charter under discussion, as the son of Rājārāja III from Malhaṇadēvi. Verse 77 of our record, which seems to have been dropped from later copies, seems to refer to the ceremony of the Hiranya-garbha *mahādāna* performed by the king. Verse 79 refers to his celebration of the Tulāpurusha *mahādāna*. This verse also refers to the numerous gifts of land made by the king in favour of the Brāhmaṇas. The claim is supported not only by the present charter, but also by the description of the king as found in the Oriya chronicle called *Mādālī Pāñjī*.¹ Later copper-plate records of the family add one verse to this description of Anaṅgabhīma III, saying that he ruled for thirty-four years, which regarded as *Aṅka* years would be equal to 28 actual years. He thus ruled in Śaka 1133-60 (1211-38 A.C.).²

The above introductory section of the inscription in verse is followed by a prose portion giving details of the several grants of land made by the illustrious Anaṅkabhīma-rāutta-dēva, i.e., king Anaṅgabhīma III, in favour of a number of Brāhmaṇas. The king is called *Rāutta* (from Sanskrit *Rājaputra* in the sense of a prince, nobleman or horseman) also in some other records and the title is also known to have been used by some, if not all, of his successors.

We have elsewhere³ shown that the title indicated a subordinate ruler and that Gaṅga Anaṅgabhīma III and some or more probably all of his successors adopted it because, as rulers of the Gaṅga empire, they considered themselves mere deputies of the god Purushōttama-Jagannātha of Purī, whom they regarded as the real lord of the dominions. It has been shown definitely that, like the present Mahārājas of Purī, at least Anaṅgabhīma III and his great-great-grandson Bhānu II (circa 1305-1327 A.C.) considered themselves servants of the god,⁴ but that, as the title *Rāutta* or *Rāuta* is known to have been assumed by some other later rulers of the imperial Gaṅga family, it is very probable that all the later imperial Gaṅga monarchs claimed the same relation with the god Purushōttama-Jagannātha of Purī to whom the empire must have been formally dedicated. Whether the ruler responsible for such dedication was Anaṅgabhīma III himself cannot be definitely determined until further evidence is forthcoming. It should, however, be noticed that he is the earliest imperial Gaṅga monarch who is so far known to have assumed the subordinate title *Rāutta* and claimed theoretically at least to have been a feudatory of the god Puru-hōttama-Jagannātha.

¹ Cf. Ray, *op. cit.*, p. 478.

² M. Chakravarti believed (*op. cit.*, p. 117) that the death of Anaṅgabhīma III and the accession of his son Narasiṃha I took place in Śaka 1160. But that the events may have occurred some time later is suggested by the Lingaraj temple inscription of Narasiṃha I dated in Śaka 1165 and in his fifth *Aṅka* (or fourth actual regnal) year. See *Ind. Cull.*, Vol. III, pp. 121-23. The point, however, cannot be settled finally unless further evidence is forthcoming. It is possible that in some inscriptions the *Aṅka* years of a reign were confused with the actual regnal years of the ruler in question.

³ J. K. H. R. S., Vol. I, pp. 251-53.

⁴ In inscriptions, the empire of Anaṅgabhīma III is mentioned as *Purushōttama-samarājya* (the dominions of Purushōttama) while Bhānu II is represented as a feudatory of Purushōttama or Jagannātha (called *dēv-ādvdēva* in one case). See J. K. A. S. B., L., Vol. XVII, p. 21.

The details of the grants of Anaṅgabhīma III recorded in the present charter throw some additional light on the religious activities of this Gaṅga monarch. There are altogether seven grants detailed in the charter, of which three are mentioned together, and they may be analysed as follows.

1. On the occasion of the *Mina-saṅkrānti* on Saturday, Chaitra śudi 9, in Śaka 1151 (i.e., on the 23rd February, 1230 A.C.), king Anaṅgabhīma III, while he was apparently taking a sacred bath in the waters of the **Mahānadī** between the temples of the gods Chitrēśvara and Viśvēśvara at the **Abhinava-Vārāṇasī kataka** (city of or camp or residence at 'New Banāras') granted twenty *vāṭis* of land at **Pūraṇagrāma** in the **Sāilō viśaya** to a Brāhmaṇa named Saṅkarshaṇānandaśarmaṇ. The grant is said to have been made in connection with a number of gifts of land made by the king on the occasion of a *dīna-sāgara* performed by him according to the recommendations of the *Mahābhārata*. The donee Saṅkarshaṇānandaśarmaṇ was a student of the Kāṇva branch of the Yajurveda and belonged to the Gṛitakauśika *gōtra*. The grant was made a permanently revenue-free gift for the *prīti* or favour of the god Puruṣhōttama.

According to Wilson's *Glossary of Judicial and Revenue Terms*, a *vāṭi* of land in Orissa is equal to twenty *mānas*. A *māna* seems to be otherwise called *bīghā* and is said to be equal to twenty-five *gunṭhas* at Cuttack.¹ A *gunṭha* (measuring "121 square yards or the fortieth part of an acre" in some places) is regarded as sixteen *biswas*, while a *biswa* is said to be one-twentieth of a *bīghā*. This seems to show that a *vāṭi* is sometimes regarded as equal to 12½ acres of land. But there seems to be varying areas of the *vāṭi* prevalent in different parts of the country and there may have also been difference between the areas of a *vāṭi* of the present day and that recognised by the Gaṅga kings of Orissa in the thirteenth century A.C. This is possibly suggested by the fact that the *Pramōda Abhidhāna*, an Oriya dictionary published in 1942, regards a *māna* as equal to one acre of land and a *vāṭi* as equal to 20 acres.

2. On Thursday, Māgha badi 6, in the following Śaka year, meaning Śaka 1152 (i.e., on the occasion of the *Makara-saṅkrānti* on the 26th December 1230 A.C.) the king, while he was taking a sacred bath in the same river (Mahānadī), granted a township covering thirty *vāṭis* of land to the same Brāhmaṇa Saṅkarshaṇānandaśarmaṇ. This grant was made in connection with a number of others made during the month by the king according to the recommendations of the *Vāmana Purāṇa*. Of the thirty *vāṭis* of land granted, twenty *vāṭis* of corn land lay in the above-mentioned **Pūraṇagrāma**, while ten *vāṭis* of homestead land were in **Jayanagaragrāma**. Both the villages were situated in the same **Sāilō viśaya** probably in the vicinity of each other. The township contained four houses resembling royal residences and endowed with walls, *mukha-maṇḍapas* and *madhya-maṇḍapas*, and also thirty other houses inhabited by a number of citizens. The inhabitants of the township included a number of merchants such as a perfumer, a worker or dealer in conch-shells, a splitter of wood (*pāṭakāra*), a goldsmith and a brazier or a worker in bellmetal. Their names were Vāpuli, Nārāyaṇa, Dāmōdara, Mādhava, Chitra, Sōma, Vālu, Kōśava, Mahādēva, Narasiṃha and Śivu. There were the sellers of betel (*tumbūlika*) named Mahānāda, Sōmā and Iraṇḍu, the florist named Manū, the maker of or dealer in sugar (*guḍlika*) named Mahādēva, the milkmen named Dhīru and Gabhī, the weavers named Nāgu and Jagāi, the oilmen named Gaṇū and Sunyā, the potters named Arjuna and Viśū, and the fishermen (*Kaivartta*) named Rājū, Vāsū and Padma. There were also a barber, some craftsmen and a washerman. This interesting list of the people of different castes inhabiting an Oriya township of the thirteenth century throws considerable light on the Orissan social life in that age. The grant of the township was made a permanently revenue-free gift for obtaining the favour of Lord Puruṣhōttama.

¹ That 1 *Vāṭi* or *Vāṭikā* was equal to 20 *mānas* and 1 *māna* to 25 *gunṭhas* in the age of the imperial Gaṅgas is known from the Alalpur plates of Narasiṃha II to be edited in a future issue of this journal.

3(a). In the same year, meaning Śaka 1152, while the king was taking a bath in the Mahānadi on the occasion of a lunar eclipse on Thursday, Mārgaśīrsha sudi 15 (i.e., on the 21st November 1230 A.C.), he granted eighteen *vāṭis* of land in the said **Pūraṇagrāma** to a Brāhmaṇa named **Dikshita Rudrapāṇīsarman**. The grant was made in connection with other grants of land made by the king according to the recommendations of Bṛihaspati. The donee Rudrapāṇīsarman belonged to the Bhāradvāja *gōtra*.

The area of 18 *vāṭis* of land is referred to here as a *gō-charman*. Originally *gō-charman* may have indicated that area of land which could be covered by the hides of cows slaughtered in a sacrifice and which was granted to the priests as sacrificial fee. But the expression is differently interpreted by later authorities. According to Nilakaṇṭha's commentary on the *Mahābhārata*,¹ it indicated a piece of land large enough to be encompassed by straps of leather from a single cow's hide. The *Parāśara-saṁhitā*² and *Bṛihaspati-saṁhitā*³ appear to suggest that the *gō-charman* was that area of land where one thousand cows could freely graze in the company of a hundred bulls. According to the *Viṣṇu-saṁhitā*,⁴ the area of land, sufficient to maintain a person for a whole year with its produce, was called a *gō-charman*. There is a more specific determination of the area of the *gō-charman* in the *Saṁhitās* of Śātātapa⁵ and Bṛihaspati,⁶ according to which it was ten times a *nivartana* which was the area of 300×300 square cubits (about 4½ acres). Unfortunately the area of the *nivartana* also is not the same with different writers. Even according to a variant reading⁷ of Bṛihaspati's text referred to above, the *nivartana*, regarded as one-tenth of the *gō-charman*, was the area of 210×210 square cubits (about 2½ acres). Bhāskarācārya's *Līlāvatī*⁸ speaks of the *nivartana* as 200×200 square cubits in area (about 2 acres). Elsewhere⁹ we have pointed out that the *nivartana* is 240×240 square cubits (about 3 acres) according to the *Kauṭīliya-Arthaśāstra* (II, 20), but only 120×120 square cubits (about ¾ acre) according to its commentator. All these differences were mainly due to the varying length of the cubit and the measuring rod, of which there were no recognised standards.¹⁰ But the very basis of the measurement of the *gō-charman* was in many parts of the country apparently vague and uncertain. Since 18 *vāṭis* of land is quite a large area, the *gō-charman*, mentioned in our record as an equivalent to that area, seems to be that recognised by such authorities as Parāśara referred to above. It may be pointed out that Bṛihaspati, who supports Parāśara in one passage, is actually mentioned in our record in this connection.

¹ Vāṅavāsī ed., I, 30, 23 : *Vadhrī ēka-tanukū charma-rajju ēkēna gō-charmanā kṛitayā rajjvā ūkrānta-bhūr=gō-charma-mātrā*.

⁸ Calcutta ed., I., 6 : *tathā karāṇām daśakēna vamsūh | nivartanam vimśati-vamśa-samkhyaiḥ kṣētram chaturbhiś=cha bhujair=nibaddham ||*

⁹ *Successors of the Sātavāhanas*, p. 330 note.

¹⁰ See my paper on the *Kulyavāpa*, etc., in the *Bharata-kosmudī*, Part II, pp. 943-48.

3(b). Likewise in the same year on the occasion of the *Makara-saṅkrānti* (December 26, 1230 A.C.), the king granted in accordance with the recommendations of the *Āditya Purāṇa*, five *vāṭis* of land, apparently in the same village of *Pūraṇagrāma*, to the *Āhitāgni* Brāhmaṇa *Sōma-pālaśarmaṇ* of the *Rāthītara gōtra*.

3(c). Likewise in the same year, on the occasion of the installation of the god *Purushōttama-dēva*, the king granted two *vāṭis* of land apparently in the same village of *Pūraṇagrāma* to the Brāhmaṇa *Āchūrya* *Chandrakaraśarmaṇ* of the *Kāśyapa gōtra*.

The three grants, mentioned together as one gift in a single sentence, were made permanently revenue-free gifts for obtaining the favour of the god *Purushōttama*.

All the donees of the grants previously mentioned were students of the *Kāṇva* branch of the *Yajurveda*. The amount of land granted to the Brāhmaṇas was altogether fifty-six *vāṭis* in the village of *Pūraṇagrāma*. This land was bounded in the west, north and east by well-defined boundaries and in the south it ran up to a locality called or a tree known as *Nalita*. Out of the fifty-six *vāṭis* of land, two *vāṭis*—one *vāṭi* of corn land and one of homestead land—were allotted to the *śāsan-ādhipikārin* *Gaṅgādhar-ārya* (*Gaṅgādhar-āchārya* ?) of the *Pūtimāsha gōtra* and an equal area of land was also allotted to the *tāmra-śilpin* (copper-smith) *Mahānāda* who was apparently the engraver of the plates and received the land as fees or perquisite. *Śāsan-ādhipikārin*s of the *Pūtimāsha gōtra* are also known from later records of the family. In one case, the *śāsan-ādhipikārin* is represented as the writer of the document. He seems to have been the keeper of records and used to receive a plot of land for writing a charter.¹

4. Apparently in the same year (Śaka 1152), on the occasion of a solar eclipse on the *Karkātaka-āmāvāsya* (*Viśvabh-āmāvāsya* on the 14th May, 1230 A.C.?), while king *Anaṅgabhīma* III was on a pilgrimage to *Purushōttama-kshētra* (i.e., *Purī*) on the shores of the south *Tīrtharāja* (i.e., the Southern Ocean), he granted five *vāṭis* of land in the said *Pūraṇagrāma* in favour of the Brāhmaṇa *Āchūrya* *Agnichit* *Kāyaḍīśarmaṇ*, who belonged to the *Kātyāyana gōtra* and was a student of the *Kāṇva* branch of the *Yajurveda*, and of some other Brāhmaṇas of various *gōtras* who were *ṛitviks* and students of the *Rigveda* and other *Vēdas*. The names of these *ṛitviks* were *Dhṛitikara*, *Ananta*, *Viśvāśvara*, *Yajña*, *Siddhū*, *Śaṅkara*, *Mādhava* and *Prithvīdhara*. This grant was made as a part of the *Hiraṇyagarbha mahūlāna* ceremony celebrated by the king and referred to above in verse 77 of the introductory part of the inscription. It is said that, of the five *vāṭis* of land, three *vāṭis* were granted to the *Āchūrya* (*Kāyaḍīśarmaṇ*) and the remaining two *vāṭis* to the *ṛitviks*. The land was made a permanently revenue-free gift.

5. Apparently in the same year (Śaka 1152), when the king was standing before the god *Purushōttamadēva* at *Abhinava-Vārāṇasī* on the occasion of the *Makar-āmāvāsya* on Sunday (5th January, 1231 A.C.), he granted four *vāṭis* and eight *mūnas* (i.e., $4\frac{2}{3}$ *vāṭis*) of land covered with barley, wheat and sugarcane crops situated in the village of *Vilāsapuragrāma* in the *Kuddiṇḍā vishaya* to the Brāhmaṇa *Dēvadharaśarmaṇ* who belonged to the *Bhāradvāja gōtra* and was a student of parts of the *Kāṇva* branch of the *Yajurveda* and the *Kauthuma* branch of the *Sāmaveda*. The grant was made in connection with a *dāna-sāgara* celebrated by the king in accordance with the recommendations of the *Viśvudharma* (i.e., the *Viśvudharmōttara*). The land was made a permanently revenue-free gift for obtaining the favour of the god *Purushōttama*.

¹ Cf., e.g., *asmīn Garuḍanarasīmghapura-śāsanē Pūtimāsha-gōtrāya Rīgvēd-āntargata-Śākalu-śākh-ādhyāyīnē śē(śē)napaty-Allālanāthaśarmaṇanē śāsan-ādhipikāra-xyarasthītā rāṭik-aikā || 0 || tāmera(mra)kārā(ra)-Pannāḍi-nāmnē rāṭik-urddhān=cha* in *JASB*, Vol. LXV, 1896, Part I, p. 256. Note the mistakes in the published transcript. See now *J. R. A. S. B.*, Vol. XVII, pp. 33-39.

It is not known why the grants made in favour of different donees were entered into a single record, especially when the lands were situated in two separate *vishayas*. The above details of the seven grants, three of which are mentioned together, are followed by the imprecatory and benedictory verses, eight in number (verses 81-88). The record ends with verse 89 which says that Nappana composed the *ślokas* of the *prāśasti*. As indicated above, this man appears to have copied the verses relating to the predecessors of Anaṅgabhīma III from an earlier record and composed only the verses describing the reign of Anaṅgabhīma III himself.

The details of the seven grants show that six of them were made when the king was staying at Abhinava-Vārāṇasī or Abhinava-Vārāṇasī-kaṭaka, which is no other than the present Cuttack (*Kaṭaka*), chief city of Orissa. As the contraction of the name *Satyabhāmā* was both *Satyā* and *Bhāmā*, so was the contraction of *Purushōttama-purī* both *Purushōttama* and *Purī* and of *Vārāṇasī-kaṭaka* both *Vārāṇasī* and *Kaṭaka* (Cuttack). One of the grants was made when the king was at Purushōttama-kshētra or Purī on the shores of the southern ocean, *i.e.*, the Indian Ocean. Very interesting is the reference to the king making a grant while standing before the god Purushōttama at Vārāṇasī-kaṭaka, *i.e.*, modern Cuttack, on the 5th January 1231 A.C. and to the installation of the said Purushōttama apparently during the Śaka year 1152 (1230-31 A.C.) by king Anaṅgabhīma III. We know that the temple of the god Purushōttama-Jagannātha of Purī was constructed by Anantavarman Chōḍagaṅga and the god was being worshipped there for a long time before the days of Anaṅgabhīma III. There is thus no question of Anaṅgabhīma III installing the god Purushōttama at Purī. The god Purushōttama installed by Anaṅgabhīma III must therefore be the god of the same name at Vārāṇasī-kaṭaka or Cuttack before whom the king was standing to make a grant of land on the 5th January 1231 A.C. There is little doubt that the temple for this deity at Cuttack was completed and its installation took place in Śaka 1152 (1230-31) shortly before the 5th January, 1231 A.C. We know that the *Mādalī Pāñjī* or the chronicle of the Purushōttama-Jagannātha temple at Purī attributes the construction of the Purī temple to Anaṅgabhīma III and not to its actual founder Anantavarman Chōḍagaṅga. This confusion may be due to the fact that Anaṅgabhīma III, as is now known, actually built a temple for a god of the same name at Cuttack. That Anaṅgabhīma III is represented as the most important Gaṅga monarch in the same chronicle may be due to the fact that it was this king who dedicated the empire to the god and became famous as the most ardent royal devotee of Purushōttama-Jagannātha. The idea underlying the installation of a substitute of the god Purushōttama-Jagannātha of Purī at Cuttack is apparently the same that inspired Śivāji to install a substitute of his patron deity, the goddess Bhavānī of Tuljapur near Osmanabad in the present Hyderabad State, in his newly built fort at Pratāpgarh near Javli.¹ Apparently the Gaṅga king wanted to live constantly in the company of his patron-deity at his residence at Cuttack. It is to be noticed that, during the time of Anaṅgabhīma III or sometime before his accession, the Gaṅga monarchs, who had been originally ruling from Kaliṅganagara (modern Mukhalingam in the Chicacole District), transferred their headquarters to Cuttack.

An interesting reference to the god Jagannātha (*i.e.*, Purushōttama-Jagannātha) worshipped by the kings of Jājñagar (*i.e.*, the imperial Gaṅga rulers of Orissa) in their fort at Banārasī (*i.e.*, Vārāṇasī-kaṭaka or the present Cuttack) is found in the *Ta'rikh-i-Firūz Shāhī* by Shams-i-Sirāj.² According to this work, Sultān Firūz Shāh of Delhi led an expedition against the kingdom of

¹ J. N. Sarkar, *History of Aurangzeb*, Vol. IV, p. 32.

² See Elliot, *The History of India as told by its own Historians*, Vol. III, pp. 312-15. There is another account of the Jājñagar expedition of Sultān Firūz in the *Sīrat-i-Firūz-Shāhī* (cf. *J. R. A. S. B., L.*, Vol. VIII, 1942, pp. 57-77). The author of this work, although he does not explicitly mention Purī, seems to have confused the Jagannātha of Cuttack with his namesake at Purī.

Jājnagar about 1360 A.C. when it was under the rule of the Gaṅga king Bhānu III (circa 1352-78 A.C.). The Sultān is said to have occupied Banārasī (Vārāṇasī-kaṭaka) when the Gaṅga king fled from the city. In connection with this expedition, the *Ta'rikh-i-Firūz Shāhī* says : "It is reported that inside the Rūi's fort (*i.e.*, the Gaṅga king's fort at Banārasī or Vārāṇasī-kaṭaka), there was a stone idol which the infidels called Jagannāth and to which they paid their devotions. Sultān Firūz in emulation of Mahmūd-i-Sabuktigīn, having rooted up the idol, carried it away to Delhi, where he subsequently placed it in an ignominious position."¹ From this account we come to know the fate of the god Purushōttama-Jagannātha installed by Anaṅgabhīma III at Cuttack and worshipped there for about 130 years from 1230 to 1360 A.C.

Of the **geographical names** mentioned in the inscription, the city of Kōlāhala in Gaṅgavāḍi is usually identified with modern Kolar in East Mysore. Gaṅgavāḍi was the name of the kingdom of the Gaṅgas of Mysore. In a wide sense Kaliṅga was the whole of the coast land between the Vaitaraṇī and the Gōḍavari, while in a narrower sense it indicated roughly the present Puri, Ganjam and Chicacole Districts. In the present record, however, the name Kaliṅga seems to be applied to the original Gaṅga kingdom round the capital city of Kaliṅganagara (modern Mukhalingam) in the Chicacole District, as the Puri region in the dominions of the Sōmavarmanās is seems to be referred to as lying within the Utkala country. There is difference of opinion as regards the location of the country called Trikaliṅga of which some kings are said to have been the overlords. Some writers are inclined to take it to mean the three parts (northern, central and southern) of the Kaliṅga country, while others prefer to take it as indicating three contiguous territories in the Kaliṅga region such as Kaliṅga, Utkala and South Kōsala. A third group of writers suggests that Trikaliṅga was the name of the tract of rather jungly land lying between Kaliṅga and South Kōsala.² The location of Utkala and Mandāra has already been discussed. Originally Utkala was the coast country lying between the river Kapīśā (modern Kānsāi) running through the Midnapur District and the Kaliṅga country in the Puri-Ganjam region. But the present inscription, as already indicated above, appears to locate the Puri temple in Utkala, probably intended to signify the dominions of the Sōmavarmanās in lower Orissa, which were conquered by Anantavarman Chōḍagaṅga. The extension of a country no doubt varied in accordance with the expansion of the dominions of its rulers. The location of Abhinava-Vārāṇasī, Vārāṇasī-kaṭaka or Abhinava-Vārāṇasī-kaṭaka, which was the place of residence of the Gaṅga kings after they had removed their headquarters from Kaliṅganagara and which is no other than the modern Cuttack, has been already discussed. It has also been noticed that the Southern Ocean is referred to in the record as *dakṣiṇa-tīrtha-rāja*, *i.e.*, the best of the Tīrthas in the south, the word *tīrtha* here meaning either "a sacred place of pilgrimage" or "waters." That Purushōttama-kṣhētra on the shores of this southern *tīrtha-rāja*, mentioned in the inscription, is no other than modern Puri has likewise been pointed out above.

The different pieces of land granted by king Anaṅgabhīma III as recorded in the charter were situated in Pūraṇagrāma and Jayanagaragrāma in the Sāilō *vishaya* (district) and Vilāsapuragrāma in the Kuddiṇḍā *vishaya*. The Sāilō *vishaya*, also known from other later Gaṅga records, is no doubt the present Sāilō Pargana in the Cuttack District, and the township, covering thirty *vāḍīs* of land and situated in Pūraṇagrāma and Jayanagaragrāma, may actually be represented by the present village of *Nagarī*, literally meaning 'a township,' which is about eleven miles from Cuttack and is the findspot of the charter under discussion.

¹ From the original plates and their impressions prepared at the office of the Government Epigraphist for India, Ootacamund.

² Expressed by a symbol.

³ Read *gunam* for the sake of the metre.

⁴ Some other later Gaṅga records make Purūravas the son of Anala and grandson of Budha, although the relationship indicated by our record is supported by ancient Indian literature.

⁵ Some records wrongly read Vāyu in place of Āyuh.

sarpādīnā | sindūrair=ati-

¹ Some inscriptions read Chitrāṅgada instead of Vichitrāṅgada.

² The *danda* is superfluous.

³ The first *akshara* of this name is often found to be śi, śī and sī. Sāradhvaja is a famous name in the epics and the Purāṇas.

⁴ The name has been read in one record as Mēdhāvi.

⁵ In some records Jayasēna's son is called Vijayasēna.

⁶ Read *Pragalbhā* and note how the word is written in line 76 below. In line 87 the word has been written as in the present case. In some records Pragalbha is mentioned as the father of Śakti.

⁷ An extra hook of *k* wrongly incised at the right of the superscript *n* has made *n=kra* look like *kkra*.

⁸ In some inscriptions the name has been read as Nārasimha.

⁹ A sign of superscript *r* had been incised above *sa* and then erased.

¹⁰ Read *n-chiram*.

¹¹ Verse 14 is found in some records of Anantavarman Chōḍaganga while the following verse is found in the records of Vajrahasta III, his son Rājarāja I and the latter's son Chōḍaganga.

ii, a.

¹ The *anuvāra* here looks like a superscript *r* sign.

² This seems to be the correct form of the name that has been read wrongly in one record as Mankupadēvi and actually reads Sagunadēvi in another. Cf. *prahlaḍa* in line 28 and *Vāh'u* in line 132.

³ Read *danturā*.

⁴ Read °y=āsmadīya.

⁵ Better read *sō=anartha*°.

⁶ An additional medial *u* sign is found with *nā*.

⁷ This verse is not found in some later records giving the genealogy of the Gatiḡas.

⁸ Note the same form of *bhu* in line 104.

No. 41—RUSSELLKONDA PLATES OF NETTABHANJA ; REGNAL YEAR 26

(1 Plate)

D. C. SIRCAR, OOTACAMUND

About the beginning of May 1950, a copper-plate inscription was kindly sent to me for examination by Śrīyukta Chintāmaṇi Āchārya, M.A., LL.B., Vice-Chancellor of the Utkal University. The inscription was discovered at a place² near **Russellkonda** in the Ganjam District, Orissa, and reached the hands of Mr. Ananta Rath, B.A., Headmaster of the Russellkonda High School. Mr. Rath lost no time in presenting the record to the University which has recently made arrangements for collecting materials for the reconstruction of the early history of Orissa under the guidance of its learned Vice-Chancellor. I am extremely thankful to Śrīyukta Āchārya for his kindness in allowing me to publish the document. The Headmaster of the Russellkonda High School should also be congratulated for the interest he has taken in bringing the scription to the notice of students interested in the past history of Orissa.

The set consists of **three plates**, rather thin, each measuring about 9·2" in length and about 3·4" in height. They are strung together on a copper ring about ·3" in thickness and about 3·7" in diameter. The ring passes through a hole, nearly ·5" in diameter, about the middle of the left end of the plates, leaving a margin of about ·4". The two ends of the ring are secured in a small oval **seal** (about 1" in length) which is of copper. No trace of any emblem or legend can now be found on the surface of the seal. The plates are not in a very good state of preservation and show signs of corrosion and also of the peeling off of a layer of metal here and there. But fortunately the preservation of the writing is on the whole satisfactory. The inscription is written on both sides of all the three plates. All the inscribed faces of the plates are serially numbered in the left margin towards the top, although the figure 6 on the second side of the third plate cannot be seen clearly owing to the peeling off of the metal from the area in question. There are altogether 40 lines of writing. Both the sides of the first plate and the reverse of the second plate have each 6 lines engraved on them, while the first sides of the second and third plates have each 7 lines. The second side of the third plate has as many as 8 lines. The weight of the three plates is 55 *tolas*, while the ring together with the seal weighs 15 *tolas*.

The **characters** belong to the Kālīṅga script influenced by the northern alphabet. They may be compared with the script employed in the early charters of the Śailōdbhava and Bhauma-Kara dynasties, such as the Ganjam plates³ (dated in the Gupta year 300=619 A. C.), the Neulpur plate⁴

¹ The name may also be read *Nayyana* or *Napyana*.

² About the end of November 1950, I visited Russellkonda and learnt on enquiry that the plates had been received from Śrī Raghunātha Rāuta of Bāpatumbu about four miles from the town. They were preserved in Raghunātha's family as an heirloom for a long time.

³ Above, Vol. VI, pp. 143 f., with plates.

⁴ *Ibid.*, Vol. XV, pp. 3-5, with plates.

of Subhākara I and the Dhauli cave inscription¹ of Śāntikara I (supposed to be dated in the Harsha year 93=699 A. C.). It is interesting to note that some characteristics of the alphabet of the inscription under review are found in the 8th century records of king Mēruvarman of Chamba.² The inscription may roughly be assigned to the eighth century A. C.³ The characters employed in the charter appear to be rather cursive and very often the same letter has been written in several varying forms. *S* is usually of the form found in the word *svasti* in line 1; but it is written differently in words like *sadā* (line 2) and has a third form in words like *nabhas=ta°* (line 3). In a few cases, *s* is written exactly like *m* (cf. the first *s* in *sahasra* in line 11). *V* is sometimes undistinguishable from *ch* (cf. *śiva*, *vida°* in line 2; *prasaravaṇa* in line 6) and often from *n* (cf. *vitānī°* in line 3; *jana* in line 4). *N* is again written in several forms (cf. *°māna* in line 4; *nabha°* in line 3, *vini°* in line 7; *anu°* in line 14), and one of these is the same as that of *t*. *Bh* is usually without the loop (cf. *prabhāvaḥ sva-bhuja°* in line 9); but often it has a looped form resembling that of *n* (cf. *nabha°* in line 3; *gambhīra* in line 7). Sometimes *t* has the same form as *g* (cf. *vikshōbhita°* in lines 9-10). *D* has usually a hanging tail; but in a few cases it is without that (cf. *padāti-pad-ō°* in line 3). Medial *u* is usually a straight downward stroke below a consonant (cf. *mu* in line 5, *du* in line 6, *pu* in line 7), although sometimes it is a curve (cf. cases of *nu*, *bhu*, etc.) or its end has a short upward curve towards the left. The forms of the medial vowels in *ru* (line 11), *rū* (line 8) and *pū* (line 15) are interesting. Medial *ē* is in some cases indicated by slight prolongation of the top *mātrā* towards the left and is almost undistinguishable (cf. *nē* in lines 11, 12). Medial *ī* is usually short and does not very often come below the line of the top *mātrā*. Only in a few cases it is found to be lengthened (cf. *svīkṛi°* in line 32). *B* is indicated by the sign for *v*. The half *t* is used in a large number of cases (cf. lines 3-8, 15, 32, 33, 35, etc.). It is without the covering curve in lines 4, 16 and 39. Of initial vowels, the inscription employs *a* (lines 11, 12, 22, 25, 26), *ā* (lines 13, 24, 29, 37), *i* (lines 13-15, 37), *u* (line 40), *ū* (line 34) and *ē* (lines 21, 27). Of numerical figures, we have those from 1 to 6 used in numbering the inscribed faces of the plates. Some of them are also used in specifying the shares of the donees. It is interesting to note that the figures for 2 and 3 are written in the old fashion.⁴ The figures for 4 and 5 are also of the old type. Interpunctuation marks are indicated often by a slightly curved stroke. There is a similar mark at the end of some lines (cf. lines 6, 10, 13, 19, 20) apparently used as a hyphen is done in English and a *danḍa* in certain later inscriptions.⁵ The sign of the *avagraha* and that of a half *visarga* appear to be wrongly employed in lines 11 and 21 respectively.

The language of the inscription is Sanskrit. It has an introductory verse in adoration to the god Śiva and only three imprecatory verses about the end; the rest of the record is written in prose. Among the peculiarities of orthography, the negligence in observing the rules of *sandhi* is often noticed. Wrong spelling in words like *Naghusha* (line 16) and wrong *sandhi* in expressions like *śivam=vō* (line 2) are also conspicuous.

The charter is dated in the 26th regnal year of the king who was responsible for its issue, without reference to any era or to astronomical details about the date. There is thus no clue to determine the year and the exact date of the grant. As already indicated above, palaeographical consideration would suggest a date about the 8th century A. C. or a little later.

The record belongs to the Śaiva king Nēṭṭabhaṇja of the Drumarājakula. It was issued from the victorious *skandhāvāra* of the king at Vārāḍḍā and records the grant of the village of

¹ *Ibid.*, Vol. XIX, p. 264, with plate.

² Vogel, *Antiquities of Chamba State*, Part I, Plates XI-XII; Ojha, *The Palaeography of India* (in Hindi), 1918, p. 67, Plate XXII.

³ As the Kalinga script was an artificial alphabet, the date may also be slightly later.

⁴ Cf. *JASB*, 1896, Part I, Plates VIII and X, left margin.

⁵ Cf. the Madras Museum plates of the time of Narēndradhavaḥ (above pp. 44 ff.).

Chaṇḍūtunḡam in the **Kāmvērāla** *vishaya* in favour of a number of Brāhmaṇas. The epigraphic text, as already indicated above, begins with a verse in adoration to the god Śaṅkara, *i.e.*, Śiva. This is followed by a description of the *skandhāvāra* situated at Vārāḍḍā (lines 2-8). It is said to have been endowed with gardens, groves and bowers which were attached to certain temples. The expression *shaṇḍa-maṇḍapa* may also mean shades for the bull attached to the temples of Śiva.¹ The population of the locality is described as fully contented and the place as free from quarrels, thieves, famines and diseases. The place is further said to be beautified by trees grown in deep glens watered by many springs and producing flowers and fruits of various kinds in great abundance. This description of Vārāḍḍā seems to suggest that it was not merely a camp but was actually the capital of Nēṭṭabhañja whether permanent or temporary.² The description of the *skandhāvāra* is followed by another of the king (lines 8-17) who is compared to the mighty epic kings like Raghu, Nahusha and Māndhātṛi but is not endowed with any specific royal epithet. The king is said to have been a *paramabrahmaṇya* (very friendly to Brāhmaṇas) and *paramamāhēśvara* (devout worshipper of Mahēśvara, *i.e.*, Śiva). One of the interesting epithets of the king says that Nēṭṭabhañja was born in the family of Drumarāja, while another seems to suggest that he was the inheritor of the fortune of ninety-nine past generations of kings. It seems that Drumarāja was the progenitor of the old royal family to which Nēṭṭabhañja belonged. The king's order regarding the grant in question was issued to the royal officers, to the *adhikaraṇas* (administrative offices) of that time as well as of the future (lines 18-20) and to other dependants serving in the **Kāmvērāla** *vishaya*. The officials and subordinates included the *sāmānta*, *mahāsāmānta*, *rājan*, *rājanaka*, *rājaputra*, *antarāṅga*, *kumārāmātya*, *uparika* and *talāyuktaka*. They were told (lines 20-22) that the king had granted the village of Chaṇḍūtunḡam as a free gift and a revenue-free holding in favour of certain Brāhmaṇas belonging to the Kauśika *gōtra* and the Vājasaneyā *charaṇa*. The names of the Brāhmaṇas and the shares of the holding allotted to each one of them were also specified in the following order (lines 23-27) : Vāsudēvasvāmin 3 shares, Gōlasvāmin 1, Ādityadēva 1, Yajñāsvāmin 1, Chharampasvāmin 1, Śivasvāmin 1, a second Chharampasvāmin 1, Gōpēndrasvāmin 2, Kayārasvāmin 2, Kārāyāṇasvāmin 1, Bhōyisvāmin 1, Jayasvāmin 1, a second Jayasvāmin 1, and Ravichōṇasvāmin 1. (Lines 28-32 suggest that the grant was actually made on behalf of the queens, Kshatridēvī and Kaivartadēvī, and the *rāja-putrī* (princess) Mēghāvalidēvī for the easy access of the three ladies to heaven.³ The names of the two queens are interesting as they appear to refer to the particular communities to which they belonged. If the queens of Nēṭṭabhañja belonged to the Kshatri and Kaivarta communities, we have here a glimpse of the working of the social order in ancient Orissa. After the usual entreaties to the future rulers for the preservation of the grant and imprecatory verses in lines 32-39, we have the date of the document in the 26th year of Nēṭṭabhañja's reign (line 39). The charter ends with the name of the writer and that of the engraver of the plate. The writer was Vandya-Dēvabhadra and the engraver Dhāra-bhōḡika. The correct interpretation of the designation *bhōḡika*, which occurs in a large number of inscriptions, is difficult; but the expression *Vandya* prefixed to the name of Dēvabhadra reminds one of the Vandy-ōpādhyāyas who are a section of the *Kulīna* class among the Rāḍhīya Brāhmaṇas of Bengal. Although the origin of the *Kulīnas* such as the Vandy-ōpādhyāya and Chāṭṭ-ōpādhyāya is referred to a late date, we know that the name Brihach-Chāṭṭa is found in a Bengal inscription of the sixth century⁴ and have elsewhere⁵ suggested that the Brahmanical cognomens in question

¹ [The context does not justify such an inference. The expression *vana-shaṇḍa-maṇḍap-ōpaśōbhita* simply means 'beautified by arbours and parks,' the word *shaṇḍa* meaning multitude.—Ed.]

² Cf. *Successors of the Sātavāhanas*, pp. 47-48.

³ It is possible to think that the ladies were dead and the grant was made on the occasion of their *brahṇa* ceremony.

⁴ Cf. *Select Inscriptions*, Vol. I, p. 351.

⁵ *Ibid.* pp. 498-99.

may not be so late as is usually believed. It seems probable that the epithet *vandya* applied in our record to the writer Dēvabhadra is not entirely unconnected with the origin of the cognomen Vandy-ōpādhyāya which became regular among a class of Bengali Brāhmaṇas at a later date. The tradition that these cognomens are all derived from the names of certain villages appears to be doubtful.

It is difficult to connect Nēṭṭabhañja who issued the charter under discussion with any of the four branches of the well-known Bhañja family of ancient Orissa, although in the family of the earlier Bhañjas of Khiñjalimaṇḍala we have actually a number of kings of the same name.¹ Our Nēṭṭabhañja seems to be earlier than even the earliest known members of the different branches of the Bhañja family. The draft of the charter under review is again remarkably different from any known record of the Bhañja family. Unlike the Bhañja inscriptions, our record does not offer any story about the origin of the royal family, nor does it refer to the places known to have been the headquarters of particular branches of the Bhañja dynasty. On the other hand, it describes king Nēṭṭabhañja as a scion of the family of Drumarāja and as representing the hundredth generation of an ancient royal family. It would thus appear that besides the king's name ending in the word *bhañja*, our record has little to connect king Nēṭṭabhañja with the Bhañja family, several branches of which flourished at a later date in Orissa. It may, however, be pointed out that, although the meaning of the Prakritic name *Nēṭṭabhañja* cannot be definitely determined, it was fairly popular in ancient Orissa as some of the Bhañja rulers are known to have assumed the same name. Whether the Bhañjas of Khiñjalimaṇḍala, among whom we find several Nēṭṭabhañjas, claimed any sort of relation with the earlier king named Nēṭṭabhañja who issued the Russellkonda plates can hardly be determined in the present state of our knowledge. The rise of Nēṭṭabhañja of our record, whose dominions included parts of the Ganjam District, seems to have synchronised with the decline of the Śailōdbhava dynasty of Kōṅgōḍa about the eastern part of the same district. It is possible to suggest that the family of Drumarāja originally enjoyed a feudatory status.

The palaeography and style of the record under review suggest that its issuer was no other than that of the Baudh plates edited rather carelessly in the *Journal of the Bihar and Orissa Research Society*, Vol. XVII, pp. 104 ff. This charter was issued by king Nēṭṭabhañja when he was staying at *Navāṅgulakapattana* (i.e., modern Angul) in the fifteenth year of his reign. The correct reading of the concluding part of the inscription (lines 53-56) is : *Svayaṁ rājñā pradatt= ājñā śrī- Naṇṇēna pralekhitam(tam)| utkīrṇa[m] Vāddurākēna(na) śāsanam tāmra-pattakam=iti |* (||) *Samvat 10 5 Kartti[ka*]vadi 10 3*. This identification would show that the dominions of Nēṭṭabhañja included parts of the Cuttack-Dhenkanal areas in the north-east. It is interesting to note that, in the tenth century A.C., the earlier Bhañjas of Khiñjalimaṇḍala ruled over the same region between the Ganjam and Baudh-Keonjhar areas of Orissa.

Vārāḍḍā, whence the charter under discussion was issued, seems to be the same as modern Bāraḍā or Bāruḍā seven miles from Russelkonda and two miles from Kulāḍagarh which was the capital of the Bhañja ruling family to which the poet Upēndrabhañja belonged and is probably to be identified with Kolāḍa-kaṭaka capital of the later Bhañjas of Khiñjali. I have not been able to identify the other geographical names mentioned in the inscription, viz., Chaṇḍūtuṅgam and Kāmvrāla.

² What looks like a half *visarga* sign is found after *ma*.

³ This name is again written below the line.

⁴ This number of the inscribed face stands in the left margin slightly towards the left above line 27.

⁵ The reading intended seems to be °jñābhyō dēvibhyāḥ or better āsām nripati-labdha-prasād-ānujñānām dēvinām(dēvyōḥ rāja-putryāḥ cha ?).

⁶ Pāthēya-sva seems to have been used in the sense of 'money required for provisions for a journey'.

⁷ There is a mark at the end of the line.

⁸ This figure is faintly visible in the left margin near the beginning of line 34.

⁹ *Cham* was originally engraved.

¹⁰ These two *aksharas* are superfluous.

¹¹ *Bha* is written below the line. There is a space left between the reference to the writer and that to the engraver.

¹² Read *utkirṇam*.

No. 42—JABALPUR PLATES OF MAHARAJA HASTIN ; G. E. 170

(1 Plate)

RAJ BALI PANDEY, BANARAS

The two copper plates, bearing a royal charter which is being published here, were found in a village between Rewa and Satna in the Vindhya Pradesh by a worker in R. M. S. and were handed over to Muni Kantisagar Ji, a distinguished Jain scholar who mostly resides at Jabalpur and is interested in archaeology. Their present whereabouts are not known. He took photographs of the plates and sent one set of them to Dr. A. S. Altekar,¹ who kindly forwarded it to me for editing and publishing the charter in the *Epigraphia Indica*.

The copper plates, as already pointed out, are two in number and are inscribed on one side only. They measure 8" in length and 4½" in breadth. They weigh 1½ seers each. The edges are thicker than the main sheets on which the charter is inscribed. This device was made in order to protect the letters from the rubbing of plates. But this circumstance could not prevent at least some letters from being damaged, specially on the second plate. There is a hole in the middle of the upper side of both the plates, which obviously suggests that the plates were fastened together by a ring which passed through the hole and the ends of which were joined together by a seal bearing the emblem of the grantor. The ring and the seal have, however, not been recovered. But one can see at the bottom of the second plate that there is an imprint of an oval seal bearing the legend *Śrīhastirājñah*. No other published charter of Hastin bears a seal imprinted at this place. The present seal like the other seals of this ruler is oval in shape but its legend is rather short. On other seals the legend reads, *Śrīmahārājahastinaḥ*.

The language of the charter is Sanskrit. There are some mistakes due to the scribe, e.g., *kul-ōpannēna* for *kul-ōtpannēna* (line 3), *kōl-ōntarēshu* for *kāl-āntarēshu* (line 17), and *savasnṛāta* for *sarvasnāta* (line 22).² The inscription is written in prose except the verses at the end quoted from the *Mahābhārata* (lines 19-22).

The characters belong to the eastern variety of the Gupta script and they differ from the nailheaded letters found in the Majhagawan plates of Hastin.³ There are only a few orthographical peculiarities to be noted. *Phālguna* is spelt, as in many other early inscriptions, with *ṇa* (line 2). The *anusvāra* in *Pañchamyām* is retained and not converted into *m*, though it is followed by a vowel *a* (line 3). The *anusvāra* in *asyām* is converted into *n* before *d* (line 3). *N* is used instead of *anusvāra* in the word *vanśa* (line 6). A consonant following *r* is doubled as in *pūrvvāyām* (line 3).

The object of the inscription is to record the grant of a village with all its assets and its boundaries properly demarcated, to a number of Brāhmaṇa grantees by *Mahārāja* Hastin in the year seventy increased by hundred (170) on the fifth day of the bright half of the month of Phālguna.

After the syllable *ōm*, the charter opens with a salutation to Mahādēva, indicating the Śaivite faith of the Parivrājaka family of kings. The year seventy increased by hundred is referred to the Gupta Era as clearly suggested by the expression *Gupta-nṛipa-rājyabhuktau*. The year fell within the Mahājyēshtha *saṃvatsara* of the twelve year cycle of Jupiter, which lasted from G. E. 166 to

¹ [The Muni sent one set of the photographs also to me in July 1949. Subsequently he published a description of it in the Hindi monthly *Jñānōdava*, Kāśī, for November 1951, pp. 357-365, along with a tentative transcript of the inscription and a note by me.—Ed.]

² [See below p 266, n 1—Ed.]

³ Fleet, *C. I. I.*, Vol. III, pp. 106 ff.

G. E. 178. The other known dates of Hastin range from the G. E. 156 to the G. E. 198.¹ The present inscription supplies only an intermediary date (the year 170 G. E.) during the rule of Hastin.

The genealogy² of the Parivrājaka kings as given in this inscription can be constructed as follows :

- (1) *Mahārāja* Dēvāḍhya (c. G.E. 96-116).
- (2) *Mahārāja* Prabhañjana (c. G.E. 116-136).
- (3) *Mahārāja* Dāmōdara (c. G.E. 136-156).
- (4) *Mahārāja* Hastin (G.E. 156-198).

The first known date of Hastin is G.E. 156. He ruled for an unusually long time, and, therefore, the same number of reign years cannot be assigned to his predecessors. We may, however, tentatively assign to them twenty years each. Thus for *Mahārāja* Dāmōdara we get c. G.E. 136—156, for *Mahārāja* Prabhañjana c. G.E. 116—136 and for *Mahārāja* Dēvāḍhya c. G.E. 96—116. In this way, the foundation of the dynasty can be traced back to c. G.E. 96=415 A.C., that is, the beginning of the reign of the Gupta emperor Kumāragupta I, who ascended the throne in about 413 A.C. The fourth king of the Parivrājaka dynasty started his reign in c. 475 A.C., when the Gupta empire was suffering from internal chaos and the threat of a foreign invasion, and he continued to rule at least up to c. 517 A.C. He saw the eclipse of the Gupta empire in Madhya Bharat by the Hūṇas in c. 500 A.C. and its liberation by Bhānugupta Bālāditya in 510 A.C.³ As indicated by the political titles of the Parivrājaka kings, *Mahārāja*, it is evident that they were feudatory chiefs owing allegiance to the Gupta emperors. Except Hastin no other member of the dynasty is credited in the inscription with any military achievements. Hastin is hailed as 'the victor in hundreds of battles' (*naika-samara-sata-vijayī*) (line 6). Perhaps he took an active part on the side of the Gupta emperor in the war of liberation against the Hūṇas.

The list of the Brāhmaṇa grantees is a long one and consists of the following persons : Kōdravaśarman, Nāgaśarman, Māṭridatta, Gaṅgābhadrasvāmin, Dhanadatta, Kapilasvāmin, Agniśarman, Viṣṇudēva, Viśākhadēva, Gandasvāmin, Paritōshaśarman, Kṛishṇasvāmin, Dēvaśarman, [Rō]haśarman, Dēvaśarman, Dēvāḍhyadattaśarman, Manōratha, Agnidatta, Rudradatta, Viśākhadatta, Viṣṇusvāmin, Viṣṇudēva (II?), Svātigaṅga and three more whose names are not legible in the inscription. The name of the village granted is also not legible. Its assets were as given below : *ghōṣha* (cattle-pound), *udyāna* (garden), *madhūka* (mahua trees), *palli* (hamlets), *vīthikā* (roads). The following taxes accrued to it : *udraṅga* (land-tax) and *uparikara* (additional taxes); it was immune from police and military interference (*a-chāṭa-bhaṭa-prāvēśya*). The boundaries of the village are fully demarcated. The village was given away according to the rules and rites of an *agrahāra* by *Mahārāja* Hastin for the attainment of religious merits.

The charter was drafted by Sūryyadatta, who was the minister in charge of peace and war (foreign minister). Sūryyadatta was a son of *Bhōgika* (provincial governor) Ravidatta, a grandson of *Bhōgika* (provincial governor) Naradatta and a great-grandson of a *Amātya* Vakra. Sūryyadatta was the writer also of some other grants of *Mahārāja* Hastin. He drafted the Khoh inscription of Hastin, dated G.E. 156, but there he was not yet a minister in charge of peace and war. In the G.E. 163 he drafted another Khoh inscription of Hastin. In G.E. 163 he was already promoted to the post of a *Mahāsāmdhivigrahika* (foreign minister). It appears that in the G.E. 191 either Sūryyadatta was dead or he was not in charge of drafting the charters, as the Majhagawan charter of Hastin was drafted by his son Vibhudatta, who was yet a *Sāmdhivigrahika*. The *Dūtaka* or the representative of the king at the time of drafting the charter was Nāgasimha.

¹ Fleet, *C. I. I.*, Vol. III; above, Vol. XXI, pp. 124 ff.

² It is already known from other inscriptions of Hastin.

³ Fleet, *C. I. I.*, Vol. III, p. 92 ff.

No. 43—TWO TAMIL INSCRIPTIONS FROM PUNGANUR

(1 Plate)

V. VENKATASUBBA AIYAR, MADRAS

The subjoined inscriptions A³ and B⁴ are found on both sides of two slabs found near the deserted Śiva temple at Puṅgaṇūr in the North Arcot District of the Madras State. Though the temple is now deserted without worship, its construction consisting of the central shrine with a *mahāmaṇḍapa* is intact containing inscriptions of Rājaraṇja I⁵ and Kulōttuṅga-Chōla III⁶ indicating the patronage it received under the Chōla monarchs. An inscription⁷ of Nripatuṅga-Vikramavarman in the village indicates that the locality, prior to the Chōlas, was under the rule of the Pallavas.

Both the inscriptions, A and B, are in a fair state of preservation, though the slab containing B is broken into two pieces.

The **language** of these records is **Tamil** prose which does not call for any special remark. Minor peculiarities in the script and language are noticed in foot-notes under the texts.

These epigraphs are important because (1) they are dated in Śaka years without mentioning any overlord of the region ; (2) they throw fresh light on the chronology of the rule of Pārthivēndravarmān which has not yet been satisfactorily settled, and (3) one of them, *i.e.*, inscription B, mentions a chief of the Lāḍa family which wielded considerable influence in the region roughly comprising the present North Arcot District in the 9th and 10th centuries A. C.

¹ [The reading is *sa nas=trāta(tā)*.—Ed.]

² This is upside down.

³ No. 13 of the Madras Epigraphical Collection for 1940-41.

⁴ No. 14 „ „ „ „ for 1940-41.

⁵ Nos. 8, 9 and 11 „ „ „ „ for 1940-41.

⁶ No. 7 „ „ „ „ for 1940-41.

⁷ No. 12 „ „ „ „ for 1940-41.

Inscription **A** is dated Śaka year 888=966-67 A. C. and it states that **Īsvarapichchan**, a member of (the trading corporation called) *Tigai-yāyirat-taiññurru-nagar* redeemed the lake at Puṅgaṇūr by payment of gold to the *Ūravar* of the village.

Inscription **B** dated in Śaka year 9 (*sic.*) records that **Āṇaiyamman**, son of **Īlādarāyan** **Taṭṭālaṇ** assigned (the taxes) *kaṇṇālakkāṇam* (marriage fee), *ūrppadiṇkāḍi* and *pidā-nāli* derived from the village (for the upkeep) of the tank called 'Paramaṇḍalāditta-pēreri' which he had constructed at Puṅgaṇūr.

It will be evident at the outset that both **A** and **B** refer to the same lake at Puṅgaṇūr which was constructed by **Āṇaiyamman** and called 'Paramaṇḍalāditta-pēreri', evidently after his surname. Since **A** is definitely dated in Śaka 888 and as there is no difference in the palaeography of these records, we may surmise that the Śaka year 9 quoted in **B** is an engraver's mistake for Śaka 889, in preference to a possible reference to the 9th regnal year¹ of an unspecified king. If this supposition is correct, it may be maintained that in Śaka 888, this lake, which was originally dug by **Āṇaiyamman**, but which in the meanwhile was under encumbrances, was redeemed by **Īsvarapichchan** and that in the next year, the founder **Āṇaiyamman** himself retrieved the situation by endowing certain specified taxes for its upkeep.

As no overlord is mentioned in these records it would appear that no one was acknowledged as such in the region about this time. Inscriptions not mentioning any king are found in the North Arcot District, dated in Śaka 810,² 830,³ 832,⁴ 85*,⁵ 871,⁶ 875,⁷ 878,⁸ 880,⁹ 885,¹⁰ 891,¹¹ and 892,¹² i.e., from 888 to 970 A. C. This period was one of transition as it saw the end of Pallava rule, the intrusion and the temporary occupation of the region by Rāshṭrakūṭa Kṛishṇa III before the final conquest and consolidation of the Chōla power, replacing the Pallava domination. Time was therefore opportune for local chiefs like the *Lāḍas* to assert their power. In inscription **B**, **Āṇaiyamman** is introduced without mentioning any overlord, but at Tirumālpuram in the same North Arcot District, this chief figures as a subordinate in the 12th and 13th years of the reign of **Pārthivēndravarman**.¹³

The period of rule of **Pārthivēndravarman** is not yet definitely settled, but the highest regnal year so far found for him in inscriptions is 13. On the basis of the similarity of titles such as **Parakēsarivarman** and **Vira-Pāṇḍyaṇ-talai-koṇḍa**, etc., which both this ruler and the Chōla king **Āditya II** bore, he has been taken to be a contemporary of and even identical with the latter. But the late Mr. H. Krishna Sastriyar doubted if **Āditya II** and **Pārthivēndravarman** could be assigned to the same period, as records of neither of them supply names which give a clue to their contemporaneity.¹⁴

¹ The words *Śakara-yāṇḍa* would make it clear that the regnal year of any particular king was not intended.

⁷ *Ibid.*, p. 195.

⁸ No. 473 of the Madras Epigraphical Collection for 1925.

⁹ No. 469 of the Madras Epigraphical Collection for 1925.

¹⁰ No. 470 of the Madras Epigraphical Collection for 1925.

¹¹ Nos. 96 and 100 of the Madras Epigraphical Collection for 1941-42.

¹² No. 246 of the Madras Epigraphical Collection for 1909.

¹³ Nos. 323 and 267 of the Madras Epigraphical Collection for 1906. The regnal year 3 (No. 267 of 1906) seems to be a mistake for 13 in the *Annual Report*.

¹⁴ *Madras Epigraphical Report* for 1910, pt. II, para 17.

Since Āṇaiyamman figures in B of Śaka year [88]9 (967 A.C.) which does not mention the ruling king and also in records of the 12th and 13th regnal years of Pārthivēndravarmaṇ, we have to take these regnal years as falling either before or after 967 A. C., and very probably after, because as stated above, there are inscriptions in this region dated in Śaka 875, 878, 880 and 885. Further, Vīra-Pāṇḍya whose head is claimed to have been taken by Pārthivēndravarmaṇ and Āḍitya II, ruled from 946-47 A. C.¹ to 967, A. C. corresponding to his latest known regnal year 15+5th year.² Vīra-Pāṇḍya, therefore, must have been alive till 966-67 A.C. I have elsewhere³ shown that the 2nd regnal year of Āḍitya II with whom Pārthivēndravarmaṇ has been sought to be identified must be placed after 959 A.C. from an examination of two records in one⁴ of which *Iruṅḡōlakkōṇ alias Puḡaḷvipparagaṇḍaṇ* figures in the Kali year 4060, i.e., 959 A.C. without mentioning any overlord, and in the other,⁵ dated in the 2nd regnal year of Parakēsarivarman 'who took the head of Vīra-Pāṇḍya,' i.e., Āḍitya II. It will thus be seen that the accession date 956 A.C. given to Āḍitya II in *The Cōlas*⁶ has to be modified and that the theory of the contemporaneity of Pārthivēndravarmaṇ with Āḍitya II, which was doubted, gains in strength.

The family to which Āṇaiyamman mentioned above belonged is called Ilāḍa⁷ and Virāṭa in inscriptions. Members of this family describe themselves as of the Solar race and claim descent from Sagara Virāṭa. In the 9th and 10th centuries A.C. we find this family wielding power in the region roughly comprising the present North Arcot District, having marriage alliances with the local chiefs of Paṅḡala-nāḍu, the Bāṇas or Vāṇakōvaraiyars and the Chōḷa sovereigns. I have made an attempt to trace the history of this family in a paper entitled 'the Lāḍa Chiefs of the Tamil Country' published in the *Proceedings of the Indian History Congress*,⁸ Seventh Session, Madras.

The genealogy of Āṇaiyamman is given as follows in an inscription from Tirumālpuram,⁹ North Arcot District.

Guṇaratnasindhu of the Solar race (and) of the family of Sagara Virāṭa.

|
 Aṇigōpa
 |
 Kampadigaḷ
 |
 Taṭṭāḷar
 |
 Āṇaiyamman Paramaṇḍalāḍittan Virāṭarājan

Āṇaiyamman was a feudatory of Pārthivēndravarmaṇ. He is said to have built of stone the central shrine of the Śiva temple at Śrīmālpēr and the enclosing *maṇḍapa*,¹⁰ as also another *maṇḍapa* in the Viṣṇu temple of the village.¹¹ Further, he made a gift of land for providing water

⁷ This has no connection with the country Lāḍa through which Mahāvīra is supposed to have travelled (*J.A.S.B.* New Series, Vol. IV (1908), pp. 285-86 and *J.A.H.R.S.* Vol. II, p. 91) or Rāḍha, i.e., West Bengal.

⁸ Pp. 203 ff.

⁹ *Annual Report on Epigraphy, Madras, for 1907*, para. 65.

¹⁰ *Ibid.*

¹¹ No. 323 of the Madras Epigraphical Collection for 1906.

during summer and firewood during winter in the *maṇḍapa* at Gōvindavāḍi,¹ besides making provision for feeding 15 Brāhmaṇas daily. The three taxes specified in B were evidently his levy, as the chief of the region, the proceeds of which he made over for the upkeep of the tank constructed by him and called after his surname Paramaṇḍalādittan.²

As stated in inscription A, Īśvarapichchaṇ belonged to *Tigai* or *Tisai-yāyirat-taiññūrru-nagar*, a trading corporation of South India whose activities extended even beyond the borders of India. An inscription in Tamil dated in Śaka 1010=1088 A.C. at Lobe Toewa, Baros, Sumatra,³ mentions this body which is also known as *Nānādēśi*,⁴ *Padineṇ-vishayattār* or *Padineṇ-bhūmi*⁵-*Tisai-yāyiratt-aiññūrruvar*. In an inscription⁶ from Viriñchipuram, North Arcot District, members of this body are mentioned as "merchants of the 18 countries trading in the four directions." The present inscription is one of the few early records mentioning this body.

From its appellation, this organisation may be taken as one containing 1,500⁷ or 500 members, but an inscription from Kalāśapākkam⁸ (North Arcot District) favours the latter interpretation. This inscription records an endowment of land by the *Nānādēśis* for feeding people during the annual festival of the local temple in the *maṇḍapas* called *Nānādēśiyaṇ-sālai* and *Āiññūrruwan-ambalam*. Generally in lithic records, this organisation is introduced with an elaborate string of *birudas* and its members enjoyed a considerable measure of autonomy, owing no exclusive political allegiance to any king in particular.

Of the taxes specified in B, the meaning of *Pidā-nāli*⁹ is not clear. It also occurs in the form *Pudā-nāli*¹⁰ and *Pudāli*.¹¹ *Pudā* means a door and the term may be interpreted to mean a levy of 1 *nāli* on each house. *Ūrpadin-kāḍi*¹² may be taken as a levy of 10 *kāḍi* of grain due to *Ūr*, i.e., assembly or village. *Kaṇṇālakkāṇam* is a fee of one *kāṇam* (of gold) received on every marriage occasion.¹³

The territorial division, Paḍavūr-kōṭṭam, comprised portions of the modern *taluks* of Arkonam, Walajapet, Vellore and Gudiyattam of the North Arcot District.

TRANSLATION

A

(In the) Śaka year 888, **Īsvarapichchan** (a member of the trading corporation) **Tigai-yāyira-** [i*]**taññūrṛṇu-nagar**, released the tank of the *Uravar* (by) giving gold to the assembly (*Ūr*) of **Puṇṇānūr** in **Paḍuvūr-kōṭṭam**. He who says ' nay ' to this shall incur the sins committed (by the sinners) between the Gaṅgai and Kumari. The sacred feet of him who protects this charity shall be on my head.

If this charity be violated, the *Uravar* of **Puṇṇānūr** agree to be liable for a penalty of a quarter *poṇ* daily to the reigning king. The sacred feet of those (who) protect (this charity) shall be on my head.

B

(In the) Śaka year 9, I, **Āṇaiyamman**, son of **Īlādarāyaṇ Taṭṭāḷan**, made a gift of (the taxes) **Kaṇṇālak-kāṇam**, **Ūrppadiṇ-kāḍi** (and) **Piḍā-nāli** (derived from) this village (i.e., **Puṇṇānūr**) to **Paramaṇḍalādittap-pērēri** (which) I constructed at **Puṇṇānūr**.

(I), **Īlādarāyaṇ Āṇaiyamman** (assigned this) gift to **Paramaṇḍalādittap-pērēri** (of this) village. Those (who) destroy this (charity) shall incur the sins committed by the sinners between the Gaṅgai and Kumari. The feet of (those who) protect this charity shall be on my head.

No. 44—TWO GRANTS OF BHANJA KINGS OF VANJULVAKA

(2 Plates)

D. C. SIRCAR, OOTACAMUND, AND P. ACHARYA, BHUBANESWAR

More than five years ago, two sets of copper-plate inscriptions were secured by Dr. Rādhā Charaṇa Paṇḍā, a medical practitioner of **Bālugaon** on the Bengal-Nāgpur Railway in the Puri District of Orissa. Ultimately the inscriptions found their way to the Orissa Museum, Bhubaneswar, where they are now lying. On examination it was found that both the charters belong to the Bhañja rulers of **Vanjulvaka**, a hitherto unidentified city in the present Ganjam region. One of the grants was issued by **Śilābhañja II** who was so long known only from the records of his descendants, while the other was issued by king **Nēṭṭabhañja Tribhuvanakalaśa** who is as yet unknown from any other sources. No information was supplied to us in regard to the findspot of the records and the story of their discovery.

A.—Plates of Śilābhañja Tribhuvanakalaśa

The inscription is written on a set of **three copper plates**. The outer sides of the first and third plates are blank. The plates measure each 6.6 inches by 2.9 inches. The central plate has

¹ The letters *dhanma* are engraved in Grantha.² Engraved in Grantha.

slightly raised rims and is a little thicker than the other two. The plates are not in a very satisfactory state of preservation. Small bits have broken away from the first and third plates together with a few letters at the end of the last line on Plate I and at the beginning of the last line on Plate III. The plates are strung together on a copper ring about 2.11 inches in diameter and .25 inch in thickness. The hole in the plates for the ring to pass through was apparently made after the plates had been engraved, as a few letters are found partially cut off by it. A circular brass seal (1.25 inches in diameter) is soldered on the joint of the ring. The upper part of the surface of the seal is occupied by the figure of a lion depicted as moving towards the left but having its face turned to the front. Its tail is curled above its back. As is well known, this was the emblem of the Bhañjas of Kñiñjalimaṇḍala ruling first from Dhṛitipura and then from Vañjulvaka. Below the lion emblem is the legend in two lines : (1) *Śrī-Śi[lābha]*- (2) *ñjadēvasya*. The subscript of *syā* has been so lengthened towards the left that the second line of the legend looks like having two straight lines below it. The three plates together weigh 50 *tolas*, while the weight of the ring with the seal is $8\frac{1}{2}$ *tolas*.

The **characters** employed in the inscription belong to the East Indian variety of the Northern Alphabet of about the tenth century A. C. and closely resemble those found in the records of the Bhañjas of Kñiñjalimaṇḍala, issued from Dhṛitipura and Vañjulvaka, and other Orissan inscriptions of about the same period. The **language** of the inscription is Sanskrit, although there are many errors of both language and orthography. In these respects, also, the record under discussion resembles many other inscriptions of about the same age found in Orissa. The palaeography and orthography of our inscription do not thus call for any special mention.

The charter is **dated** in the first regnal year of king **Śilābhañjadēva** who issued it. As will be shown below, this king flourished about the end of the tenth century A.C. The grant has therefore to be assigned to a date in the above period.

The charter begins as usual with the symbol for *siddham* and the word *svasti*, which are followed by the well-known verses, *Jayati kusumabāṇa*°, etc., and *Śēsh-āhēr=iva*, etc., found in all the Bhañja records issued from the city of Vañjulvaka. A short prose passage following the second verse actually says that the grant under discussion was issued from the victorious **Vañjulvaka**. Then follows another well-known verse, *Asti jaya-śrī-nīlayaḥ*, etc., which is found, with slight variations, in most of the Vañjulvaka records to introduce the reigning Bhañja king under one of his secondary names. The secondary or coronation name of the donor of the grant, disclosed by the verse under notice, is Tribhuvanakalaśa which was so long unknown from the epigraphic records of the family. Lines 8-10 mention the king, who was in good health, as the *Paramamāhēśvara* (devout worshipper of Mahēśvara or Śiva) Śilābhañjadēva, described as the son of Diśābhañjadēva and grandson of Raṇabhañjadēva who was an ornament of the Bhañja family. Lines 10-14 say how the king addressed the *rājan*, *rājanaka*, *rājaputra*, *vishayapati*, *dāṇḍapāśika* and other officers that were or might in future be put in charge of administration in the Śalvaḍa *vishaya* as well as the village-folk of the district headed by the Brāhmaṇas and Karaṇas. The mention of the Karaṇas together with the Brāhmaṇas at the head of the local population is very interesting as it speaks not only of their crystallization into a caste group, but also of their social position.¹ After declaring, in the style of the records of the Bhañjas of this particular branch, the all-round prosperity of the king to the addressees, the charter goes on to inform them (lines 14-22) that the village of **Dēūladḍa** in the above *vishaya*

¹ Cf. *Bhāratīya Vidyā*, Vol. X, pp. 280-84. The Karaṇas appear to have been originally an East Indian tribe. They gradually merged themselves in the community of scribe-accountants possibly for their predilection for the profession in question.

(district) was granted as a permanent revenue-free holding in favour of the Brāhmaṇa **Lumvā-dēva** who belonged to the Kauṇḍinya *gōtra* and the Kauṇḍinya, Vāsishṭha and Maitrāvaruṇa *pravaras* as well as to the Vājasanēya *charaṇa* and the Kāṇva *śākhā* (of the Yajurveda). The donee was the son of the *agnihōtrin* Agudēva and grandson of the *agnihōtrin* Gōlasvāmin. The grant was made by the king for the increase of merit to his parents and himself. It was free from all obstacles and was endowed with the privilege indicated by *a-chāṭa-bhaṭa-pravēśa*.

The grant proper is followed in lines 22-25 by a verse containing the donor's request to his own descendants and others, who might be in charge of the district in future, for the protection of his donation. Then follow some of the usual imprecatory and benedictory stanzas (lines 25-33) introduced by the passage *uktañ=cha dharmasāstrē*. The last three lines of the document (lines 33-35) give the names of the persons responsible for the preparation of the document and the execution of the grant. It is said that the order (for the issue of the charter) emanated from the king himself. The *dūtaka* or executor of the grant was *Bhaṭṭa* Stambhadēva who is already known from the records of Nēṭṭabhañja Kalyāṇakalaśa I and Vidyādharaḥbhañja Amōghakalaśa belonging to the same branch of the Bhañja family.¹ The writer of the document was the *Sandhivigrahin* (minister for war and peace) Māñju, while the engraver of the plates was the *akṣhaśālīka* (the same as Telugu *agasāli* meaning 'a goldsmith') Durgadēva. The same goldsmith is already known to have engraved some other charters² of the family issued by Nēṭṭabhañja Kalyāṇakalaśa I, Vidyādharaḥbhañja Amōghakalaśa and Nēṭṭabhañja Kalyāṇakalaśa II. The document was *lāñchhita*, i.e., registered with a seal, by Dēvarāja. The date of the record, viz. year 1 of the issuer's reign, comes at the end.

Śilābhañja Tribhuvanakalaśa, who issued the present charter belonged to the royal family known as the Bhañjas of Khiñjalimaṇḍala owing to the claim of the earlier members of the family to have been rulers of Khiñjalimaṇḍala or of Ubhaya-Khiñjalimaṇḍala (i.e., both of the two Khiñjalimaṇḍalas). As there was another later Bhañja line ruling from Kōlāḍa and claiming to have ruled over Khiñjali, they are more particularly called the earlier Bhañjas of Khiñjalimaṇḍala. The charters of *Rāṇaka* Śatrubhañja Gandhaṭa (son of Śilābhañja I Āngaddi, the progenitor of the line) and of his son *Rāṇaka* or *Mahārāja* Raṇabhañja were issued from Dhritipura. Most of these records have come from the old Sonpur, Baudh and Daspalla States of Orissa.³ The town of Gandhaṭapāṭi, named after Śatrubhañja Gandhaṭa, is the modern Gandharāḍhi in the old Baudh State. The family was Vaishṇava down to the earlier years of the reign of Raṇabhañja who became a Śaiva in the later years of his reign. Raṇabhañja's descendants, however, are known to have issued their grants from Vañjulvaka and the records have come from the Ganjam area (including the old Nayagarh State).⁴ It is clear that after Raṇabhañja the Bhañjas of Khiñjalimaṇḍala were driven from the region of Baudh and its neighbourhood by some undertermined circumstances to the Ganjam District. So long we knew of the following descendants of Raṇabhañja to have issued charters from Vañjulvaka in the Ganjam area : (1) *Paramamāhēśvara Rājan* Nēṭṭabhañja Kalyāṇakalaśa, son of Raṇabhañja ; (2) *Paramamāhēśvara Mahārāja* Vidyādharaḥbhañja Amōghakalaśa son of Śilābhañja (II), grandson of Digbhañja and great-grandson of Raṇabhañja, and (3) *Paramavaishṇava Mahārāja* Nēṭṭabhañja Kalyāṇakalaśa II, son of Vidyādharaḥbhañja Amōghakalaśa.

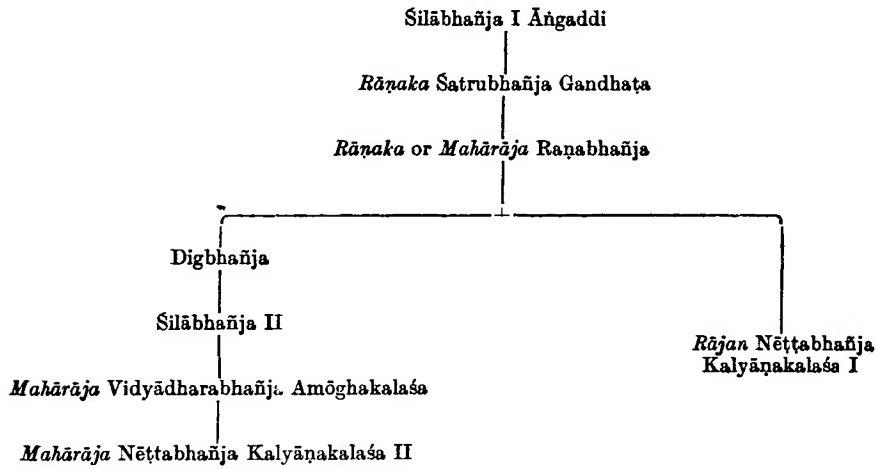

¹ Cf. Bhandarkar, List, Nos. 1497, 1500, 1501.

² Cf. *ibid.*, Nos. 1497, 1498, 1499, 1502. Read *Durgadēva* in place of *Dagadēva* in No. 1502. See also *J.K.H.R.S.*, Vol. I, pp. 288 ff.; above, Vol. XXIV, p. 175.

³ Bhandarkar, *op. cit.*, Nos. 1490-96, 2055.

⁴ *Ibid.*, No. 1497-1502; above, Vol. XXIV, pp. 174 ff.; *J.K.H.R.S.*, Vol. I, pp. 288 ff.

Bhandarkar thus rightly drew up the following genealogy of the earlier Bhañjas of Khiñjali-maṇḍala¹:

The inscription under review was issued by Śilābhañja Tribhuvanakalaśa, son of Diśābhañja and grandson of Raṇabhañja. There is no doubt that he is to be identified with Śilābhañja II of the above list. The present charter is thus the only record of the king so far discovered. An interesting fact known from our record is that Raṇabhañja's son, Digbhañja, was also called Diśābhañja which is apparently a variant of the same name. Whether, however, he was an elder or a younger brother of Nēṭṭabhañja Kalyāṇakalaśa and whether he actually ruled or not are facts that cannot be satisfactorily determined in the present state of our knowledge. The name Diśābhañja endowed with the title *Mahārāja* occurs in an inscription (painted on a rock) recently discovered at Sita-bhinji in the old Keonjhar State.² It is possible that this Diśābhañja is identical with Digbhañja-Diśābhañja of the Khiñjalimaṇḍala branch of the Bhañja family. If this suggestion is to be accepted, we have possibly to assume that Digbhañja-Diśābhañja actually ruled either before or after his brother Nēṭṭabhañja Kalyāṇakalaśa. The discovery of his inscription in the old Keonjhar State may suggest that he ruled before the family was driven to the Ganjam region, that is to say, before Nēṭṭabhañja Kalyāṇakalaśa. It may also lend some colour to the suggestion of those scholars who believe that the modern name *Keonjhar* is a corruption of the old *Khiñjali*³.

¹ *Ibid.*, p. 379. Another recent attempt to determine the genealogy of this family is that of Krishnamachari (above. Vol. XXIV, p. 17) whose views, however, are absolutely unwarranted.

² A photograph of this small record was shown to us by Mr. K. C. Panigrahi, Curator of the Orissa Museum, Bhubaneswar, at Nagpur where we assembled to attend the Indian History Congress in December 1950. The characters of the inscription belong to the Kalinga script which is known from a number of copper-plate grants coming from the Ganjam area and assignable to dates between the eighth and eleventh centuries. See Bühler, *Ind. Ant.*, Vol. XXXIII, Appendix, pp. 69-70, cf. Table VII, Column XIX, Table VIII, Columns X-XII; Ojha, *Prāchīna-lipi-mālā*, 1918, pp. 92 ff., Plates LVII-LXIX. The inscription has been recently published with a Plate in *J. A. H. R. S.*, Vol. XIX, pp. 191 ff. Its ascription to the fourth century A.C. (*ibid.*, p. 192; cf. *J. N. S. I.*, Vol. XIII, p. 69), on supposed palaeographical grounds, is entirely inadmissible. Other records of the same place, published with the above with inaccurate transcripts and assigned to the sixth century, are also not earlier than the tenth century.

³ It appears that Khiñjali was originally the name of a tract covering parts of the Baudh, Sonpur, Daspalla and Keonjhar regions, where these Bhañjas at first ruled, but that the name was applied to their new kingdom in the Ganjam area after the loss of their territories in Upper Orissa. Whether the Ganjam region formed a part of the dominions of the earlier rulers of the family and was one of the two Khiñjalis mentioned in some records cannot be satisfactorily determined in the present state of our knowledge. This is however not altogether impossible in view of the fact that these Bhañjas may have claimed descent from Nēṭṭabhañja of the Russellkonda plates edited above, pp. 258 ff.

As to the chronology of these rulers, we have elsewhere¹ seen that Raṇabhaṇja ruled about the middle or the third quarter of the tenth century, since he was a contemporary of the father and grandfather of the Kadamba chief Dharmakheḍi who is known from his records dated in the Śaka year 917 (995 A.C.) and the Gaṅga year 520 (1016-18 A.C.). It should also be noticed that the town of Gandhaṭapāṭi, founded by Śatrubhaṇja Gandhaṭa, was apparently the headquarters of the Gandhaṭapāṭi maṇḍala, in which a village granted by the Sōmavaṃśi king Mahāśivagupta Yayāti I (circa 970-1000 A.C.)² was situated.³ This fact not only suggests that Śatrubhaṇja Gandhaṭa flourished sometime before the end of the tenth century but also that it was the Sōmavaṃśis (probably Mahāśivagupta Yayāti I himself) who drove out the Bhaṇjas from Upper Orissa to the Ganjam region. Another inscription of the same Sōmavaṃśi king records a grant made in favour of an inhabitant of Śilābhaṇjapāṭi in the Ōdra deśa⁴, which seems to have been a town built by and named after Śilābhaṇja I Āṅgaddi. These facts are valuable for the chronology of both the Sōmavaṃśis and the early Bhaṇjas of Khinjalimaṇḍala. Since Bhaṭṭa Stambhadēva and Akṣaśālīka Durgadēva served no less than three of Raṇabhaṇja's descendants, viz. (1) Nēṭṭabhaṇja Kalyāṇakalaśa I, son of Raṇabhaṇja, (2) Śilābhaṇja II Tribhuvanakalaśa, grandson of Raṇabhaṇja, and (3) Vidyādharaḥhaṇja Amōghakalaśa, great-grandson of Raṇabhaṇja, while the goldsmith further served Nēṭṭabhaṇja Kalyāṇakalaśa II, son of Vidyādharaḥhaṇja, it seems that all the above rulers had short reigns. At least Digbhaṇja-Diśabhaṇja and his son Śilābhaṇja II Tribhuvanakalaśa, whose reigns are characterised by a paucity of records, appear to have had very short reigns. It is thus possible to assign the reign of Śilābhaṇja II Tribhuvanakalaśa, who issued the charter under discussion, to a period about the close of the tenth century A.C.

Of the geographical names mentioned in the record, Vañjulvaka, which was the capital of the later members of the royal family in question and apparently lay somewhere in the Ganjam region, has not been satisfactorily identified. We have not succeeded in identifying the village of Dēūlaḍḍa and the district of Śalvaḍa either.

B.—Plates of Nēṭṭabhañja Tribhuvanakalaśa

The inscription is written on a set of **three copper plates** (each measuring 6·85 inches by 4 inches), strung together on a copper ring 2·75 inches in diameter and ·3 inch in thickness. The first and third plates have writing only on the inner sides, while the second plate is inscribed on both the sides. The writing is in a fairly good state of preservation, although a small bit has broken away from the last plate together with a few letters at the beginning of the last line of the inscription. The circular bronze **seal** soldered on the joint of the ring is 1·6 inches in diameter. The seal closely resembles that attached to the grant of Śilābhañja II Tribhuvanakalaśa edited above (A) and the upper part of its surface bears the figure of a lion depicted as moving towards the left with its face turned towards the front and its tail curled above its back. Below the lion is the legend in two lines: (1) *Śrī-Nēṭṭabha-* (2) *ñjadēvasya*. The weight of the three plates together is 112½ *tolas* and that of the ring with the seal is 34 *tolas*.

The **characters** of the inscription resemble those employed in the charter A, although they have to be assigned to a slightly later date. On the grounds of palaeography, supported by the internal evidence of the inscription, the charter under discussion may be assigned roughly to a date in the eleventh century A.C. The **language** of the record is Sanskrit and there are numerous errors of language and orthography, the latter exhibiting considerable influence of the local pronunciation. The charter is **dated** in the 13th regnal year of its issuer and not in the year of any era.

The style of the record is similar generally to that of the other grants of the Khinjalimaṇḍala branch of the Bhañja family and particularly to that of the charter A above. The inscription begins with the symbol for *siddham* which is followed by the verses, *Jayati kusumabāṇa*°, etc., and *Śēśh-āhēr=iva*, etc. The word *svasti* is, however, put after the above verses and before the short prose passage speaking of the victorious **Vaṇjivaka** as the place whence the charter was issued. Next follows the stanza, *Asti*, etc., which differs in form only slightly from the third verse in the record A. But it is interesting to note that the secondary or coronation name of the issuer of the grant introduced in this verse is also Tribhuvanakalaśa as in the other epigraph. The following passage in prose (lines 9 ff.) says how the *Paramavaishṇava* (devout worshipper of Viṣṇu) **Rāṇaka Nēṭṭa-bhañjadēva** of the Bhañja family, who was the son of Rāyabhañjadēva and grandson of Pṛithvī-

¹ The figure is engraved below the *akshara mva* as the lower part of the *akshara ṇju* in the previous line occupied the space in front of *mva*. Read *Samvat 1*.

bhañjadēva, addressed the village folk of the Nānākhaṇḍa¹ *vishaya* (district) including the *sāmantas* (subordinate rulers) and *bhōgins* (*jāgirdārs*) together with their *karaṇas* (i.e. *ādhikaraṇas* or officers)². In the style of the charters of the branch of the Bhañja family in question, the king first informed the addressees of his all-round prosperity and next of the grant of *Sēdāgrāma* in the above district together with another locality called *Rāigrāma*, made by him in favour of a Brāhmaṇa named **Bhaṭṭa Dāuli**. The donee was the son of Bhaṭṭa Siḍa and grandson of Bhaṭṭa Balabhadra. He belonged to the Bhāradvāja *gōtra* having the Āngirasa *pravara* and the Bārhaspatya *anupravara* and was a student of the Chhandōga *charaṇa* and Kauthuma *śākhā* (of the Sāmaveda). He is described as a resident of Kōlakhalī, although the original home of his family is given as Vātala-vidīma. Lines 18-20 say that the above gift was made a permanent revenue-free holding by means of the copper-plate charter. Some of the usual imprecatory and benedictory verses are then quoted in lines 24-33. In this connection, the well known verse, *Sarvān-ētān=bhāvinaḥ pārthivēndrān*, etc., is quoted with the substitution of the donor's name, *Nēṭṭabhañja*, in place of the usual *Rāmabhadra* and a prose passage introducing the stanza says that the grant was made on Monday when the *tithi* was the *dev-ōtsava-dvādaśī* and the *nakshatra* Rēvatī. As all the *dvādaśīs* (the twelfth *tithi* of either half of the lunar months) are associated with the god Viṣṇu³, the *ishṭa-dēvatā* of the donor, it is difficult to determine, in the absence of any indication regarding the month and the fortnight, the particular *dvādaśī* referred to in the passage. The details are thus insufficient to calculate the exact date of the grant. Of the following two verses quoted in lines 36-39, the one beginning with *asmin=vamśē kshaya-kshīṇē* is found in numerous other Orissan records. The concluding lines (lines 40-42) give the names of the persons associated with the grant. The charter was registered with a seal (*lāñchhita*) by Jīvalōka-mahādēvī (or less probably, Śrījīvalōka-mahādēvī) who seems to have been a queen of Nēṭṭabhañja Tribhuvanakalaśa, issuer of the charter. We know of many other similar instances of the mention of queens in connection with the function indicated by the word *lāñchhita* especially in records coming from the Ganjam area⁴. The grant is said to have been approved (*anumata*) by Bhaṭṭa Arkadēva, while it was taken to the donee's home or executed (*pravēśita*) by the *Pratihāra* (officer in charge of the palace-gate and head of the palace guards) Rāula. It is further said that the grant was assented to (*anujñāta*) by the *Vārgulī* (bearer of the kings' betel-box) Mahindapa who seems to have been a witness or worked on behalf of the executor of the grant, Rāula. The plates were engraved by the *arkasālin* (i.e., *akshaśālin* or goldsmith) Napa. The document was written by the *Sandhivigrahin* (minister for war and peace) whose name was Pānā. The date of the grant, viz. year 13 of the donor's reign, comes at the end of the inscription in line 42.

There is no doubt that *Rāṇaka* Nēṭṭabhañja Tribhuvanakalaśa who issued the charter under discussion belonged to the family of the earlier Bhañjas of Khiṇjalimaṇḍala. This is suggested not only by the king's names and the issue of the grant from Vanjulvaka, the later capital of the rulers of that family, but also by the very style of the document. The genealogy of the family quoted above would show that there is hardly any space for Nēṭṭabhañja Tribhuvanakalaśa and for his father and grandfather in the family before Nēṭṭabhañja Kalyāṇakalaśa II. The secondary or coronation name ending in *kalaśa* was a style unknown in the family before the sons of Rāṇabhañja. The expression *pravēśita*, used in connection with the execution of a grant, is found in the

¹ It may be suggested that the passage *nānā-khaṇḍa viśayā* means "in the various subdivisions and districts (of the kingdom)". But the description of the gift village in line 14 below as "attached to this district" seems to presuppose the mention of the name of the *vishaya* in the passage under consideration. Note also the singular used in *viśayā*.

² Cf. *J.R.A.S.B.*, Letters, Vol. XVI, p. 117.

³ See *Śabdakalpadrūma*, s.v. *dvādaśī*. The *Viṣṇu-smṛiti* (XLIX, 1), however, lays special stress on Mārgaśīrṣa sudi 12, which may be the *tithi* intended in our record.

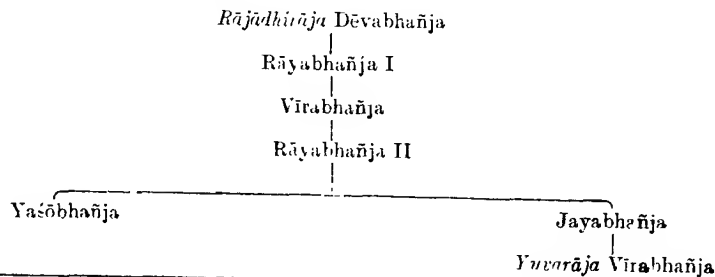

⁴ See Bhandarkar, *List*, Nos. 1500-02.

family's records only of the time of Vidyādharaḥaṇḍa Amōghakalaśa and Nēṭṭabhaṇḍa Kalyāṇakalaśa II. The officers of the king mentioned in the grant as associated with it are also not found in any other record of the family. These facts would suggest that Nēṭṭabhaṇḍa Tribhuvanakalaśa, who issued this charter, flourished sometime after Nēṭṭabhaṇḍa Kalyāṇakalaśa II and may be tentatively designated Nēṭṭabhaṇḍa III. This suggestion seems to be supported by his epithet *Paramavaishṇava*, as Vaishṇavism was reintroduced as the family's religion by Nēṭṭabhaṇḍa Kalyāṇakalaśa II. Whether Prithvībhaṇḍa and Rāyabhaṇḍa, father and grandfather respectively of Nēṭṭabhaṇḍa III Tribhuvanakalaśa (II), actually ruled cannot be determined in the present state of our knowledge. It seems however that Prithvībhaṇḍa was not far removed from Nēṭṭabhaṇḍa II and may have been the latter's son or grandson. It is difficult to determine whether the title *Rāṇaka* adopted by Nēṭṭabhaṇḍa III had any special significance. The seal of all these rulers bears the emblem of a lion moving to the left.

Another later member of the same family was Śatrubhaṇḍa Maṅgalarāja who was the son of Śilābhaṇḍa, grandson of Mallagambhīradēva and great-grandson of Yathāsukhadēva and who issued the Jangalpadu plates¹ in the fourteenth year of his reign. As in the case of Nēṭṭabhaṇḍa III, the relationship of Śatrubhaṇḍa Maṅgalarāja with the known members of the family of the earlier Bhaṇḍas of Kṛiṇḍalimaṇḍala is unknown. Whether the father, grandfather and great-grandfather of Śatrubhaṇḍa Maṅgalarāja were actual rulers is also not known. The place of issue of Śatrubhaṇḍa's charter is, however, not mentioned and he may have been a member of the same family ruling side by side with the ruler of Vaṇḍulvaka. But the *Salvāḍḍa* or *Sulvāḍḍa viśaya*, in which the village granted by Śatrubhaṇḍa Maṅgalarāja was situated, seems to be no other than the Śalvāḍa *viśaya* of the grant of Śilābhaṇḍa II edited above (A).

Another Bhaṇḍa king making grant of a village in Kṛiṇḍalimaṇḍala and ruling in the Ganjam region was the *Paramavaishṇava Mahāmaṇḍalēśvara* Nēṭṭabhaṇḍa who was the son of Raṇabhaṇḍa and grandson of Nēṭṭabhaṇḍa and issued a charter from Kumārapura.² The style of this record is quite different from that of the charters of the Bhaṇḍa rulers of Vaṇḍulvaka. The emblem on the seal is also not the lion but a *kalāśa* taken by some as *pūrṇa-kumbha* and by others as *amṛita-ghaṭa*. He must have represented a different branch of the Bhaṇḍa family just as the later Bhaṇḍas claiming to have ruled the Kṛiṇḍali country from the Kōlāḍa *kaṭaka*³ did. The *yuvarāja* Rāyabhaṇḍa mentioned in this inscription may have been the son of the issuer of the charter.

The genealogy of the later Bhaṇḍas of Kṛiṇḍali, as known from their two records so far discovered, may be tabulated as follows⁴:

¹ Inaccurate transcripts of this inscription have been published in *J. B. O. R. S.*, Vol. XVIII, pp. 387 ff., and *J. K. H. R. S.*, Vol. I, 181 ff. We have recently re-edited the record for the *Epigraphia Indica*. The first three verses of this record are the same as those in the epigraphs edited here.

² Above, Vol. XXIV, pp. 15 ff.

³ Cf. Bhandarkar, Nos. 1504, 2056. Kōlāḍa seems to be no other than modern Kulāḍa near Russellkonda, which was the headquarters of a family of Bhaṇḍa chiefs as late as the British period. The celebrated Oriya poet Upēndra-bhaṇḍa belonged to this family. It is possible to think that this family was an off-shoot of that of the later Bhaṇḍas of Kṛiṇḍali ruling from Kōlāḍa-kataka.

[illegible]

Only two copper plate grants of this family, one of Yaśōbhāṇja and the other of Jayabhāṇja, both from Antirigam in the Ganjam District, have so far been discovered. Yaśōbhāṇja, said to be the lord of the whole Kṛiṇjali country, is described as the conqueror of Jagadēkamalla who has been identified with the Western Chālukya king Perma-Jagadēkamalla II (*circa* 1128-51 A.C.¹). Jayabhāṇja's grant is dated in his third regnal year when there was a lunar eclipse on Jyēshṭha sudi 15. Bhandarkar, who assigns Yaśōbhāṇja's contemporary Jagadēkamalla to *circa* 1139-49 A.C., says, "The first lunar eclipse in Jyēshṭha after this date came off on Friday, 22nd May 1164. Jayabhāṇja therefore came to the throne in A.D. 1161." Unfortunately this is wrong as Bhandarkar confused in many cases the full moon with the new moon in the calculation of dates for his *List of Inscriptions of Northern India*.² As however, the exact date of the end of Yaśōbhāṇja's reign is unknown and as lunar eclipse occurred on the Jyēshṭha *paurṇamāsī* in 1145, 1146, 1147, 1164, and 1165 A.C., it is impossible to determine the exact date of Jayabhāṇja's accession on this basis. The fact that these petty rulers of the Ganjam region must have owed allegiance to the early imperial Gaṅgas of Kalinganagara (modern Mukhalingam near Srikakulam), who were themselves subordinate allies of the great Chōlas, would suggest that the battle against the Western Chālukya king was fought by the Bhaṇja king in the train of an early imperial Gaṅga monarch and on behalf of a Chōla emperor.³ The identification of Jagadēkamalla with the Western Chālukya king Jayasimha I Jagadēkamalla (*circa* 1015-42 A.C.), who is celebrated in history for his conflict with the mighty Chōla monarch Rājendra I thus does not appear to be altogether improbable. It should, however, be admitted that the ascription of Raṇabhāṇja's reign to the third quarter of the tenth century and the number of succeeding rulers belonging to his own family and to the branch lines represented by Nēṭṭabhāṇja of Kumārapura and Jayabhāṇja of Kōlāḍa favour Bhandarkar's view regarding the date of Yaśōbhāṇja and Jayabhāṇja about the middle of the twelfth century, unless it is believed that some of the rulers of Vaṇjulvaka, Kumārapura and Kōlāḍa were ruling contemporaneously. The problem of the chronology of these rulers cannot be satisfactorily and finally settled until further evidence is forthcoming.

Of the geographical names mentioned in the inscription, Vaṇjulvaka, as already pointed out, has not yet been identified. Nor can the district called Nānākhaṇḍa and the villages called Sēḍā-grāma, Rāigrāma, Vātalaviḍima and Kōlakḥali be identified with certainty.

No. 45--MAHADA PLATES OF SOMESVARADEVAVARMAN : YEAR 23

D. C. Sircar and M. Venkataramayya, Ootacamund

The above-mentioned plates were edited in this journal⁸ in 1913-4 by the late Mr. B. C. Mazumdar under the heading 'Mahaḍā Plates of Yōgēśvaradēvavarman.' Since then the record has not aroused further interest among scholars, although two more charters of the same family of chiefs, to which the donor of the Mahaḍā plates belonged, were subsequently discovered and their contents reviewed in this journal and elsewhere. They are (1) the Patna Museum plates of Sōmēś-varadēva II⁹ and (2) the Kumārisimhā plates of Chōlakula-Sōmēśvaradēva.¹⁰ In the light of these charters, latterly discovered, it seems now possible to assign a more specific date to the Mahaḍā plates than what Mr. Majumdar suggested, viz., the 16th century A.C. Further it is also possible to draw certain conclusions in respect of the chronology, genealogy and history of the rulers represented in the above charters, the scene of whose activities lay in South Kōsala with their capital at Suvarṇapura (Sonepur) in Orissa.

¹ Read *tāny=ēva*.

² This prose passage containing some astronomical details regarding the date of the grant is followed by verses.

³ Read *anuvichintya*.

⁴ Omit *iti*.

⁵ The rules of *sandhi* have not been observed here.

⁶ Read *utkīrṇam* and omit the *daṇḍa*.

⁷ The name appears without the third case-ending required by the context.

⁸ Above, Vol. XII, pp. 218 ff. and plate.

⁹ Above, Vol. XIX, pp. 97 ff. and plate.

¹⁰ J. K. H. R. S., Vol. I, No. 3, pp. 29 ff. and plate.

The said Mahādā plates are now the property of the Asutosh Museum of Indian Art attached to the University of Calcutta. They were obtained for examination through the kindness of Mr. D. P. Ghosh, the Curator of that Museum. On a careful examination of the original plates, it was found that a number of very important passages of the record were not properly read by Mr. Mazumdar in his edition of the record. In the first place, the name of the donor of the charter is not Yōgēśvaradēvavarman but Sōmēśvaradēvavarman (line 24).¹ Secondly, the name of the father of the donor is to be read as Dhāralladēvavarman (lines 16-17) and not Dhāraṇadēvavarman, as made out by Mr. Mazumdar. Thirdly, there is no mention in the inscription of Vaūdhapura which has been identified with modern Baudh and taken to have been the capital of the issuer of the charter. Lastly, the date of the record is not the 33rd regnal year of the issuer's grandfather (Sōmēśvaradēvavarman I) but really the year 23 (written both in words and in numerals in line 11) of his own reign. Hence the very title of the record has to be changed as the 'Mahādā plates of Sōmēśvaradēvavarman' since Yōgēśvaradēvavarman, in reality, did not exist at all. In view of all these important factors now brought to light on a re-examination of the plates, the record is re-edited here for the benefit of scholars.

After the introductory *siddham* symbol and the word *svasti* the inscription introduces, in lines 1-10, the reigning king Sōmēśvaradēva, who is called *pañcha-mahāśabda-samanvita*, *mahā-mahīmaṇḍalēśvara*, *mahā-bhūpatillu* and *chakravartin*. Of these titles, the first is known to have been used by feudatories and the last by paramount sovereigns. This combination of subordinate and imperial titles shows that the issuer of the charter owed only nominal allegiance to the overlords of his predecessors.² The same conclusion is further suggested by the titles *mahā-mahīmaṇḍalēśvara* and *mahā-bhūpati*, which were apparently deliberate modifications respectively of the feudatory titles of *Mahāmaṇḍalēśvara* and *Mahāvyūhapati* used by another member of the same family who issued the Kumārasinhā and the Patna Museum plates. Other interesting titles used by the issuer of the Mahādā plates are *dinakara-kula-nandana* (i.e., scion of the solar dynasty), *Karikālānaya* (i.e., of the house of Karikāla), *Kāśyapa-gōtra*, *Kāvērī-nātha* (i.e., lord of the river Kāvērī) and *Varaūrapuravar-ādhiśvara* (lord of Varaūra or Uraiyūr, the traditional capital of the Chōḷas), all of which refer to the descent claimed by the Telugu-Chōḷas from the celebrated Chōḷa royal family. The epithet *Siṃha-dhvaja-lāñchhana* may be either a modification of or a mistake for *rakta-dhvaja-siṃha-lāñchhana* of the Kumārasinhā plates. The expression *Ayōdhyā-vinirggata-simhāsana-manimakūṭa-patta-varḍhana-dvijarāja-lāñchhana* seems to suggest that the issuer of the Mahādā plates claimed to have been enjoying the privilege of using certain insignia brought from Ayōdhyā, the ancient capital of North Kōśala.³ This, no doubt, has a bearing on the claim that the family belonged to the solar race, the main branch of which represented by the epic hero Rāma ruled at Ayōdhyā. Another interesting epithet of the king, viz., *Śrī-Vaidyanātha-pāda-paṅkaja-bhramara*, speaks of his devotion to god Vaidyanātha (Śiva) whose temple lies on the river Tel, about 12 miles from Sonepur. The mention of the deity also in the Kumārasinhā and the Patna Museum plates shows that he was the tutelary deity of the Telugu-Chōḷa ruling family of South Kōśala.

The date of the charter is recorded, in lines 9-13 in the following words : *Śrī-Sōmēśvaradēvaru pravaraddhamāna-vijayarājya-samvatsarambūlu iruvai-muṇḍuṁ 23 śrāhī Māyghē māsi śukla-pakṣhē tithau sapṭamyāṁ makara-sthithē savitārī mīna-rāśi-sthita-chandramasī Ravau Rēvatyām=amṛita-yōgē*.

¹ Mr. K. G. Goswami of the University of Calcutta, who examined the plates in the Asutosh Museum of Indian Art, also suggested the same reading of the king's name.

² Above, Vol. XXVII, p. 326 ; *J. O. R.*, Vol. XVIII, p. 45.

³ The passage may also be suggested to stand as *Ayōdhyā-vinirggata[h*] simhāsana-manimakūṭa-pattavarḍhana[h*] dvijarāja-lāñchhana[h*]*. In that case, we may think that the king's emblem was both the lion and he *dviarāja* (the moon or Garuḍa).

There is considerable Telugu influence on the language, although there are grammatical errors. The 23rd regnal year of the king is given both in words (*iruvai-munḍum* for Telugu *iruvai-mūḍu* or *iruvadi-mūḍu*) and figures.

The details of the grant are given in lines 13-24. It was made by the king when he was standing before Laṅkāvarttaka on the bank of the river Chitrōtpalā (i.e., the Mahānadi).¹

The genealogy of the donor as well as that of the donee are traced to their respective grandfathers. The donor, king Somēśvaradēvarman, is described as the son of Dhāralladēvarman and grandson of Sōmēśvaradēvarman belonging to the Kāśyapa *gōtra*. The donee of the grant is described as the Brāhmaṇa Madhusūdana, who belonged to the Vatsa *gōtra* and was the son of Purushōttama and grandson of Gadādhara. The object of the donation was the village of Chāmpā-malla with the five *palikās* named Mahādā (the findspot of the present plates in old Sonapur State, still retaining its ancient name), Atāṇḍrelā, Mēḍhakā, Khādna and Kōkaṭidēva. The grant is stated to have been made for obtaining the favour of the god Vaidyanātha and for the increase of longevity, health and royalty of the donor, Sōmēśvaradēvarman, in the 23rd year of whose reign the record was issued.²

Lines 25-30 of the inscription quote some of the usual imprecatory and benedictory verses. This portion is rather abruptly followed by three verses, of which two are in the *Upajāti* and one in the *Indravajrā*(?) metre. These apparently form a part of an elaborate *praśasti* of the Telugu-Chōḍa family of South Kōsala. The employment of these verses, which are really uncalled for, reminds us of such records as the Guakuchi plates of king Indrapāla³ of Prāgjyōtisha, in which the engraver is found to have felt the necessity of filling up some blank space at the end of the charter. Since the script of the last lines of the plates does not differ from that of the rest of the record, there is little doubt that they are coeval with the date of the gift. The first and second verses do not relate to the same person, for the second verse beginning, as it does, with the words *yasy-ānvayē*, 'in whose lineage', referring to the person described in the first, introduces another chief who, being referred to as *ēsha bhūpatiḥ* 'this king', could be none other than the donor of the charter, Sōmēśvaradēvarman. He is again described as Yaśōgaja⁴ and as a lion to hostile⁵ kings. The third verse describes the king's sport in the river Chitrōtpalā (Mahānadi). Here the stanza, stating that when the king sported in the Chitrōtpalā, which was associated with Svarnavatī (*Svārṇavatī-gatī*), seems to imply that Sōmēśvaradēvarman had his capital at Svarnapura, of which Svarnavatī may be a feminine form. In a verse from the *Raghuvamśa* (VI, 48), to which Mr. Mazumdar draws our attention in this context, precisely a parallel sense is conveyed as the mention therein of Mathurā on the Kālindī implies its being the capital of the Śūrasēna⁶ king. Mukunda mentioned in one of the verses no doubt refers to the god Viṣṇu and not to a later Rājā of Purī,

¹ The passage *Chitrōtpalāyās-tirē Laṅkāvarttaka-sannidhau* reminds one of such similar passages as *Abhinava-Vārāṇas-yām Bhagavatah śrī-Purushōttamadēvasya sannidhau* in records like the Nagari plates of Anaṅgabhīma III. It is not clear if there was a deity at Laṅkāvarttaka or whether the king made obeisance to the holy spot of Laṅkāvarttaka itself. The modern Laṅkēśvarī, a hillock in the bed of the Mahānadi at Sonapur, seems to have been referred to as Laṅkāvarttaka in the inscription.

² That the actual donor Sōmēśvaradēvarman and the king Sōmēśvaradēvarman in whose reign the charter was issued were one and the same is apparent, although the text of the record does not explicitly say so. The fact that the donation is made for the increase of the royalty of the donor shows that it was 'he reigning king who was the actual donor.

³ *Kāmurāpaśū-anūvalī*, pp. 130 ff.

⁴ This word can be read as *Yaśōrāja*; but this does not suit the metre. The text is, however, metrically faulty even as it stands.

⁵ The word *āhita* used in the verse seems to be derived from *ahita*.

⁶ Mathurā was the capital of the Śūrasēnas. See B. C. Law, *Some Mid-Indian Kshatriya Tribes*, Vol. I, p. 83

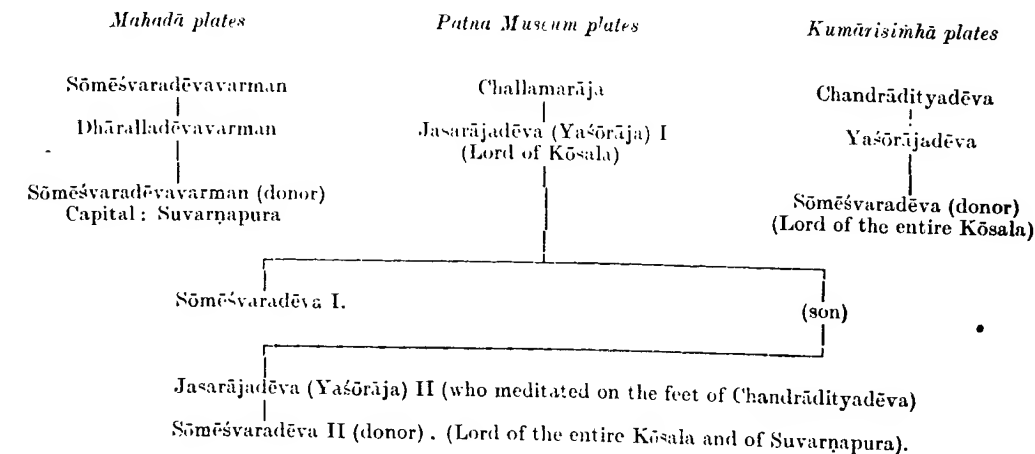

Mukundadēva, who flourished in the sixteenth century A.C., as the palaeography of the record under study does not warrant such a late date.

Mr. Mazumdar did not attempt the palaeographical dating of the record. In our opinion, the characters of the inscription can be assigned to the 12th century A.C. They closely resemble, in respect of almost every test letter, those of the Sonapur plates of Kumāra Sōmēśvara¹ which were issued, as stated in the record itself, soon after the Sōmavamśī kings, Uddyōtakēśarin and Abhi-manyudēva, had ceased to rule. These kings are known to have flourished towards the end of the 11th century A.C.²

Thus the Mahadā plates reveal the existence of a dynasty of Chōla kings who were ruling in Southern Kōsala about the 12th century A.C. and who were distinguished by the *birudas*, *aridurdharavarabhujāsibhāsura-prachanḍa-pradyōtadinakarakulanandana-Karikālānvaya-Kāśyapa-gōtrā-Kāvērinātha-kamalavarabhūṣaṇa-simhadheajalāñchhana-Varaūrapuravarādhīśvara*³-*Āyōdhyāvinirggatasimhāsana-maṇikuṭapa!tavaradhanā-dvijarājalāñchhana*, etc. They were :

Sōmēśvardēvavarman
|
Dhāralladēvavarman
|
Sōmēśvaradēvavarman (donor), capital : Suvarṇapura.

Now, king Sōmēśvaradēva, the donor of the Patna Museum and the Kumārisimhā plates, likewise claims in a similar *praśasti*⁴ to belong to the Chōla stock of solar descent and has the emblem of the lion figured on the seals of his grants. There are, therefore, strong *a priori* grounds to relate him and the members of his line to the family of Sōmēśvardēvavarman of the Mahadā plates. The possibility of a lineal connection between the two families is in a great measure strengthened by the close correspondence in the names of the several members of the two families. The genealogies supplied by the three charters under study stand thus :—

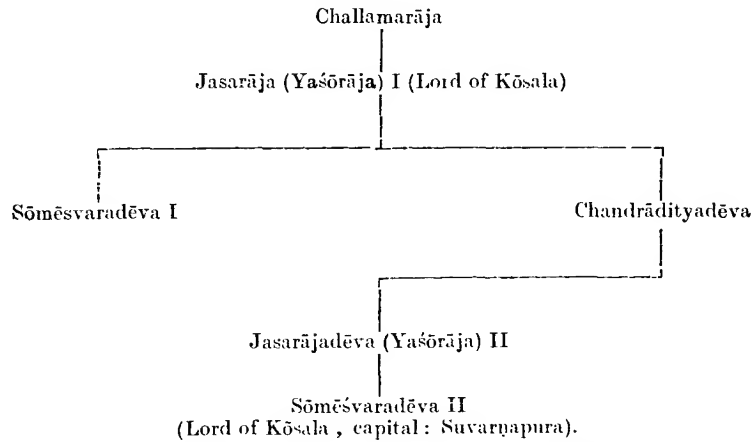

¹ Above, Vol. XII, pp. 237 ff. and plate.

² *Ind. Hist. Quart.*, Vol. XXII, p. 307; H. C. Ray, *Dynastic History of Northern India*, Vol. I, p. 499.

³ The text of the record at this place (l. 5) actually reads *Varaūrapura*. Dr. Raghavan suggested that *Vaūrapura* of Mazumdar's transcript is a corruption of *Urayūrapura*, the traditional capital of the Chōlas and of their ancestor Karikāla.

⁴ In the Kumārisimhā grant the *praśasti* is worded with slight difference as *durdharasamarajitānēkaripupārtha-Kāvērinātha-pradyōtadinakarakulanandana-raktadheaja-simhalāñchhana*.

Both the palaeography and contents of the Patna Museum and the Kumārisimhā plates indicate that they were issued by one and the same king, Sōmēśvardēva II, lord of Kōśala, from his capital at Suvarṇapura, the former in the 17th year of his reign and the latter in the 11th year. Both the charters were written by the same person, the *viṣṇūn* Lōkanātha. While the Patna Museum plates do not specifically mention the name of the grandfather of Sōmēśvardēva II, the Kumārisimhā grant names him as Chandrādityadēva. Since Jasarājadēva II of the former grant is clearly stated as meditating on the feet of Chandrādityadēva, we have here an indication that Chandrādityadēva was perhaps his father¹ and this is confirmed by the other grant which specifically says so. Hence the donor of the two charters is identical and the genealogies supplied by them can be combined to form a single family tree as shown below² :

Before the correlation of this line of chiefs with the one in the Mahadā plates is established, the chronological position of the rulers of the line has to be determined. And in this respect we are on much surer ground than what palaeography alone can furnish. The palaeographical dating of the Patna Museum plates, so far attempted, has been divergent. R. D. Banerji, who edited the plates, assigned them to the 14th century A.C., while Krishna Sastri thought the characters of the record were referable to the 11th century, a view with which Dr. Hirananda Sastri was inclined to agree. Indeed the palaeography of the record is not so late as Banerji suggests, since the letters show definitely much earlier forms than those found in the charters of the 13th or 14th century, of which we have instances in the Kēndupāṭṇā plates of Gaṅga Narasimhadēva II of Orissa, dated Śaka 1217 (1295 A.C.).³ They are also even earlier than the characters of the Bhuvanēśvar bi-lingual (Oriya-Tamil) inscription of Vira-Narasimha of the 13th century A.C.⁴ and those of the Liṅgarāja Temple inscription of the Gaṅga king Narasimha I of Śaka 1165.⁵ On the other hand, they have very close resemblance with the Bhuvanēśvar stone inscription of Svapnēśvara, a general of the Eastern Gaṅga king Aniyaṅkabhima who ruled in the 12th century A.C.⁶ The only difference noticeable between the records of Sōmēśvardēva II under study and the afore-mentioned inscription of Svapnēśvara is that the alphabet of the former shows rounded forms while the characters

¹ Suggested by Banerji, above, Vol. XIX, p. 97.

² Krishna Sastri thought that Chandrāditya was perhaps identical with Challamarāja, *An. Rep. of the Ar. Sur., Eastern Circle*, 1916-17, p. 4. G. Ramadas (*Journal of the Kalinga Historical Research Society*, Vol. I, No. 3, p. 231) identifies Chandrāditya with Jasarāja I, a view with which we do not agree. The wording of the Kumārisimhā grant is clear in indicating that Chandrāditya was the grandfather of the donor Sōmēśvara.

³ *J. A. S. B.*, Vol. LXV (1896), plates VIII to XVIII, now re-edited in the same journal, Vol. XVII, pp. 33-39.

⁴ *Bhandarkar's List*, No. 1527; *J. P. A. S. B.*, Vol. XX, p. 41 and plate.

⁵ *Ind. Cult.*, Vol. III, p. 122 and plate.

⁶ Above, Vol. VI, pp. 198 ff. and plate.

of the latter are straight and angular in shape, a difference which is perhaps due to our records being on copper-plates while the other is on stone. It is therefore permissible to conclude that the Patna Museum and the Kumārisimhā plates of Sōmēśvaradēva II were issued in the 12th century A.C. and that the five generations of kings figuring therein flourished during the 11th and 12th centuries A.C. It is found that the facts of contemporary history of the locality fully support the above chronological position for these chiefs.

Of the kings figuring in the genealogy, Chandrādityadēva seems identical with the Telugu-Chōḍa prince Chandrāditya who is described as a subordinate of the Nāgavaṁśi Sinda king, Dhāravarsha of Chakrakōṭa in two Telugu inscriptions dated Śaka 983, Śārvari, Kārttika śu. 5, Monday, corresponding to October 2, Monday, 1060 A.C., at Barasur and Potinar in the Bastar State.¹ This chief is introduced with the same Telugu-Chōḍa *prāśasti* commencing with the words *aridurdhharavara*, etc., which Sōmēśvaradēvavarman of the Mahādā plates and Sōmēśvaradēva II of the Kumārisimhā plates adopt. An additional detail found in Chandrāditya's *prāśasti* is that he is called the lord of Ammagāmapura. This city may be identified with Ambogramo in the Jeypore agency, Koraput District, Orissa. The village lies about 75 miles east of Jagadapur, capital of Bastar.² But both the charters of Chandrāditya's grandson, Sōmēśvaradēva II, were issued from Suvarṇapura (Sonepur). Whether Sōmēśvara II himself transferred his headquarters to Sonepur cannot be determined in the present state of our knowledge; but there is no doubt that the Telugu-Chōḍa occupation of Sonepur followed the rule of the Sōmavāṁśis in that region. Thus Sōmēśvara II must have issued his records from Sonepur sometime after the Kelgā (Sonepur) plates of the Sōmavāṁśi Kumārādhirāja Sōmēśvara³ had been issued from that city. It has been shown⁴ that the rule of the Sōmavāṁśi Sōmēśvara should be assigned to the close of the 11th century A.C. and the beginning of the twelfth. The rule of Telugu-Chōḍa Sōmēśvara II at Suvarṇapura should therefore be relegated to a period about the commencement of the 12th century A.C. Since Chandrāditya was living about 1060 A.C., the approximate dates of the members of his family might be: Challamarāja (c. 1025 A.C.), Jasarājadēva I (c. 1040 A.C.), Sōmēśvaradēva I (c. 1050-75 A.C.), Chandrādityadēva (c. 1055-80 A.C.), Jasarājadēva II (c. 1080-1105 A.C.) and Sōmēśvaradēva II (c. 1105-1130 A.C.).⁵

These conclusions in respect of the chronology of the family of Sōmēśvaradēva II of Suvarṇapura would now help us to correlate this line with that of Sōmēśvaradēvavarman, the donor of the Mahādā plates, who as shown above, must have flourished about the 12th century. Since both the sets of rulers belonging to the same Chōḍa stock are found flourishing in the same age and locality they apparently belonged to the same family, and, in all probability, Sōmēśvaradēvavarman, the grandfather of the issuer of the Mahādā plates, is identical with Sōmēśvaradēva II of the Patna Museum and Kumārisimhā plates.⁶ The main reason for identifying him with Sōmēśvaradēva II instead of Sōmēśvaradēva I is the following. The modification of the feudatory titles and the

¹ *Inscriptions in the C. P. and Berar* (1932), Nos. 269 and 270; *An. Rep. S. I. E.*, 1909, part II, para. 65; *S. I. I.*, Vol. X, Nos. 644 and 645.

² There is another place called Ambgaon in the Chanda District, Madhya Pradesh, about 120 miles north-west of Barasur. Whether this was the place referred to as the seat of Chandrāditya cannot be affirmed in the present state of our knowledge.

³ Above, Vol. XII, pp. 237 ff.

A revised edition of the inscription is being published in this journal.

⁴ *I. H. Q.*, Vol. XXII, p. 307.

⁵ The Kumārisimhā plates of king Sōmēśvara II refer to a lunar eclipse in the month of Māgha of the king's 11th regnal year. In the period to which we have assigned this king, the above details tallied on three dates, viz., February 1, 1124 A.C.; January 21, 1125 A.C. and January 10, 1126 A.C. The intended date may be any one of these.

⁶ Pandit Binayak Misra suggested the identification of the king with Sōmēśvaradēva I, the elder brother of Chandrāditya (*J. K. H. R. S.*, Vol. I, No. 2, p. 148 and note).

ATTENTION

The obituary note and the relevant illustration appearing in this issue may be removed and inserted in the beginning of the volume (Vol. XXVIII) at the time of binding.

DR. STEN KONOW
LATE GOVERNMENT EPIGRAPHIST FOR INDIA, 1906—1908
BORN DIED
17TH APRIL 1867 29TH JUNE 1948

STEN KONOW

Dr. Sten Konow, the celebrated Indologist, passed away at Oslo on the 29th June 1948. In his death, philological research, specially the branch concerned with Old Central Asian languages, Sanskritic learning and Indian epigraphy, have sustained a very great loss indeed.

Dr. Sten Konow was born on 17th April 1867. His father was a Norwegian pastor. He studied in Christiania under Sophus Bugge and took a Degree in 1891 in Classics and German Philology. For some time he was a pupil of Pischel in Halle where he took his D.Phil. in 1893. He served as Assistant Librarian in the Royal Library at Berlin from 1894 to 1896. From 1896 to 1899 he was Lecturer and Assistant Professor in Christiania. He collaborated with Grierson from 1900 to 1903 in the editing of the volumes of the Linguistic Survey of India. Later on he was appointed Government Epigraphist for India. In that capacity he edited parts i, ii, vi and vii of Volume X, part vi onwards of Volume XI, the whole of Volume XII and a portion of Volume XIII of the *Epigraphia Indica*. After his service as Government Epigraphist for India, he returned to Oslo where he became Professor of Indian Philology and continued there till his death, except from 1914 to 1919 when he served as Professor at Hamburg and in 1924-25 when he was a Visiting Professor at Santiniketan.

He was a member of several learned societies in Europe ; an Honorary Member of the German Oriental Society ; a Corresponding Member of the Berlin Academy ; an Honorary Member of the Royal Asiatic Society of Great Britain and Ireland and also of the Société Asiatique de Paris.

The range of his scholarly pursuit was as varied as it was extensive. In the field of epigraphy, his monumental work on the *Kharōṣṭhī Inscriptions* (C. I. I., Vol. II, Part I) is by far the most outstanding contribution. Other branches of research have been equally enriched by his facile pen.¹

assumption of the imperial title of *Chakravartin* by the issuer of the Mahadā plates, to which attention has already been drawn, as well as the influence of Telugu on the language of the record, as noticed from the revised text published now, would suggest that the donor of the Mahadā plates is later than the issuer of the Kumārisimhā and Patna Museum plates in which the above characteristics are absent. The grandfather of the issuer of the Mahadā plates being probably identical with Sōmēśvara II who issued the Kumārisimhā and the Patna Museum plates, Sōmēśvaradēvavarman who issued the Mahadā plates may be styled as Sōmēśvaradēva III. If the identification suggested above is correct, as it seems to be, the pedigree of the entire family of the Telugu-Chōḍa chiefs of Suvarṇapura (Sonepur) would stand as under :

The advent of these Telugu-Chōḍa chiefs into the South Kōsala country may be envisaged in this manner. We have stated above that Chandrādityadēva of the Kumārisimhā plates may be identical with Chandrāditya, a subordinate of the Nāgavaṁśī ruler of Chakrakōṭa (Bastar), Jagadēka-bhūshaṇa Dhārāvarsha, in 1060 A.C. Dhārāvarsha's son Sōmēśvara I is credited with the conquest of Kōsala in one of his records.² Jasarājadēva I, the father of Chandrādityadēva, is likewise described as having become the lord of the entire Kōsala country as a result of victories in battle. It is just possible that Jasarāja I took part in the campaigns of the Nāgavaṁśī Sōmēśvara I in Kōsala and, as a reward for his services, was made the ruler of that country or parts of it to administer on behalf of the Nāgavaṁśī kings.³

If it is admitted that the advent of these Telugu-Chōḍas into Kōsala took place through the agency of the Nāgavaṁśī Sindas of Chakrakōṭa (Bastar), it would be necessary to explain how the family came to be associated in the first instance with the Sindas. For, it is obvious that they must

¹ The Mahadā plates of this king are stated to have been issued on Sunday, Māgha śu. di. 7, when the sun was in Makara and the moon in Rēvatī during the 23rd regnal year of the king. In the period to which we have assigned this ruler, there are several dates on which the above details tallied, viz., January 1, 1156 A.C.; January 9, 1166 A.C. and January 2, 1183 A.C. The date quoted in the inscription might have been any one of these.

² Above, Vol. X, pp. 26-7, Kuruspaḥ Stone Inscription, text line 20.

have been emigrants from the Telugu country where they had their original home and where a number of Telugu-Chōḍa chiefs who were distinguished by the same *birudas*, *aridurddharavara*, etc., flourished in different parts of the Cuddapah, Anantapur and Kurnool Districts of the Madras State.¹ Some other princes of the same stock are found, at a later date, as subordinates of the Chālukya kings, Sōmēśvara I (1043-68 A.C.) and Vikramāditya VI (1076-1126 A.C.) administering parts of their dominions. These were Bācharasa, Gōnarasa and Bhimarasa (1058 A.C.) in the Bellary District,² Saṅkarasa (1059 A.C.) in the Anantapur District,³ his son Rēvarasa (1059-88 A.C.)⁴ and another prince Charṇpakarasa (1062 A.C.).⁵ Since so many of these chiefs were subordinates of the Western Chālukyas in different parts of their kingdom it is likely that still another branch of the same stock, *vic.*, that of Challamarāja, found its way into Bastar and came into contact with the Sindas evidently in the time of his son Jasarājadēva I (1040 A.C.) as Western Chālukya generals in the wake of the conquest of that country effected by Vikramāditya VI as *Yuvarāja* during the reign of his father Sōmēśvara I.⁶ The name Sōmēśvara held by the princes of the Sinda family and the Chōḷas of South Kōsala might perhaps be taken to indicate their vassalage, at least for a time, under Western Chālukya Sōmēśvara I. The title *Ayyanagandhavārāṇa*, assumed by Telugu-Chōḍa Sōmēśvara II, might be taken as an indication pointing in the same direction, since it was a well-known epithet of the generals and subordinates of the Western Chālukyas.⁷

⁶ Above, Vol. IX, pp. 178-9; *Ind. Ant.*, Vol. XLVIII (1919), pp. 119, 136, 140 and 142. Besides the testimony of Bilhaga to the campaigns of Vikramāditya VI in Chakrakōṭa, there are other grounds to substantiate the same. The Kazipet Dargah inscription of the Kākatiya chief, Bēta II (c. 1075-1100 A.C.), furnishes the information that Bēta's father Prōla I (c. 1050 A.C.) conquered the Chakrakōṭa-vishaya and the same record further states that he obtained the Annakōṇḍa-vishaya from king Trailōkyamalla (Sōmēśvara I). See *Hyd. Arch. Series*, No. 13; *Corpus of Telangana Inscriptions*, No. 7, text lines 5 ff.; *Bhūratī*, Vol. XVIII (1941), Part II, pp. 189 ff. It is clear, therefore, that Prōla should have effected the conquest of Chakrakōṭa (*i.e.*, Chakrakōṭa) in the reign of this Chālukya king, evidently as a camp-follower of *Yuvarāja* Vikramāditya VI.

It may be contended that the advent of the Telugu-Chōḍas into Kōsala might have taken place during the invasion of that country by Rājendra Chōḷa I. This is not likely in view of the fact that the Telugu-Chōḍas of this period were on terms of enmity with the imperial Chōḷas, witness Telugu-Chōḍa Bhīma being killed by Rājārāja I, the father of Rājendra Chōḷa I, in c. 1000 A.C. (*Chōḷas*, Vol. I, p. 217). Later, a king of Pottapi (*i.e.*, a Telugu-Chōḍa) was killed by Virarājendra in c. 1067-8 A.C. (*ibid.*, p. 235). It seems best, therefore, to view the Telugu-Chōḍa advent into Kōsala as having taken place through Western Chālukya-Sinda agency.

 23 hitaṁ(tam) āyur-ārōgya-rājya-vivṛidhya(ddhy-a)rtha[ṁ*] śrī-Vaidyanātha[dēvasya-
 prīti]-

¹ Mr. Mazumdar read this as °k-āvē(va)nī-nātha.

² This epithet is evidently a corruption or alteration of *kumbara-paraghōshana* which occurs among the same string of *birudas* held by a Telugu-Chōḍa chief (No. 468 of 1923 of the Mad. Ep. Coll.)

³ Mr. Mazumdar read this title as [Va]ūra(dha)pura-var-ādhiśvara.

⁴ Whether this is to be restored as *pūṇḍarīkāksha* or *pūṇḍarīkākarsha* is doubtful. The latter seems to be more appropriate.

⁵ This is the Telugu honorific plural for *bhūpatēh*.

⁶ This is Telugu for *dēvasya*.

⁷ Read *samvatsarambulu*.

⁸ Mr. Mazumdar's reading is °śvaradēva-chūḍā-varaddhamāna-ji(vi)jaya-rā[jya]-samva[tsa]raṁ vūrṇa(?)-
kachūvarkamuṇḍam 33 śrī(di)-Māghē

⁹ The *u* sign may actually be a *kākapāda* to indicate that the letter *ma* was inadvertently omitted.

¹⁰ An *anusvāra* was incised and deleted above *sya*.

¹¹ Mr. Mazumdar read this as *Atrāṇḍēlā*.

¹² Mr. Mazumdar's reading is *Mēdhak-ākhyā-dvē*.

¹³ This word evidently stands for *āputraka*, i.e., escheat for failure of heirs. Cf. *nidhi-nikshēp-āputraka-dhana-daṇḍ-ōpajātaka-samētaḥ* in lines 21-22 of the Kumārisinhā plates. Mr. Ramadas wrongly reads °jātaka of the above passage as *ātaka* and offers a fanciful interpretation of the word. The expression *daṇḍ-ōpajātaka* literally 'what is derived from punishment' no doubt means 'money exacted from offenders as fines.'

No. 46—TWO NISHIDHI INSCRIPTIONS FROM SONDA

(1 Plate)

P. B. DESAI, OOTACAMUND

Sōndā in the Sirsi taluk of the North Kanara District, Bombay State, is a small hamlet with few residential buildings. A dilapidated fort, some deserted temples, a few monastic establishments and ruins scattered over a large area bespeak the eminence once enjoyed by this place. Besides being the headquarters of the Nāyaka chiefs who ruled over this tract during the period of the 16th to the 18th centuries, this was once, in the heyday of its glory, a busy commercial centre with its communications extending far into the inland on one side and to the foreign countries through the activities of the Portuguese and English traders on the other.⁴ The name of the place occurs in earlier records in various forms, viz., Sōdā, Sōde, Svādi, Sōdāpurī, Sudhāpurī, etc.

In addition to the *maṭha* founded by the Mādhva saint Vādirāja Tīrtha, Sōndā contains a Jaina *maṭha* of pontifical dignity, though in a decayed condition. This is known traditionally as the

¹ Mr. Mazumdar read this name as *Yōgēśvaradēvavarmā*. What he read as *yō* is definitely *śō* and the letter read by him as *gē* is *mē*. For similar forms of *m* see *varmā* in the same line and *maṇḍala* in plate C a, line 1, of the Sonepur plates of Kumāra Sōmēśvaradēva : above, Vol. XII, p. 240 and plate.

² The text is here metrically defective.

³ The mark of punctuation is superfluous.

⁴ *North Kanara District Gazetteer*, part II, pp. 52 and 349.

Akalaṅka and the Bhaṭṭākalaṅka *maṭha*¹ among the Jaina community of the Bombay-Karnāṭak area. At a distance of about a mile from this *maṭha* and in the midst of the forest is preserved a cemetery set apart for the interment of the deceased pontiffs of the *maṭha*. In this burial ground, arrayed in decent rows and constructed with characteristic designs stands conspicuous a large number of Jaina sepulchres known as *nishidhis*. On two of these constructions, which are more dignified and stand prominently at the commencement of a row are engraved the following two epigraphs which I copied in the course of my epigraphical survey of the Sirsi taluk in 1939-40. I am editing them below for the first time with the kind permission of the Government Epigraphist for India. These inscriptions will hereafter be alluded to as **A** and **B** for the sake of brevity.²

A is incised on the four sides of the first *nishidhi* construction, while **B** is inscribed on a slab fixed into the front side of the second *nishidhi* construction referred to above. The figures of a reclining seat and *kamaṇḍalu* are carved in the right and left corners at the top of **B**. The **orthographical** convention of doubling the consonant after *r* is followed in some expressions of both the records; e.g., *-āchāryya* and *svaryga-* occurring in lines 4 and 9 of **A** and 5 and 11-12 of **B**. Both the inscriptions are written in Kannaḍa **characters** and **language** which is of the post-Vijayanagara period. Except for the last two lines of **A**, which contain a Sanskrit verse in the *Anuṣṭubh* metre, the composition of the two records is in prose.

A is an epitaph announcing the death of a Jaina teacher, named Akalaṁkadēva, on Kārttika śu. 10, Wednesday, of the Śaka year 1530 and Plavaṅga. This teacher bore the following titles: *Rāya-rājaguru* (royal preceptor of kings), *Maṇḍalāchārya* (high-priest of the state), *Mahāvādā-vādīśvara* (supreme disputant in profound discussions), *Rāya-vādi-Pitāmaha* (god Brahmā among the royal disputants), *Sakala-vidvājjana-chakravarti* (paramount sovereign in the assemblage of the learned) and *Ballālarāya-jīvarakṣā-pālaka* (saviour and protector of life of the Ballāla king). He bore two more epithets, viz., *Dēsi-gaṇ-āgraganya* and *Samgītapura-simhāsana-paṭṭāchārya*, which show that he belonged to the Dēsi *gaṇa* of the Mūla *saṅgha* and adorned the pontifical throne of Samgītapura. The Sanskrit verse at the end states that the memorial vault (*nishidhi-maṇḍapa*) was caused to be erected by Bhaṭṭākalaṁkadēva, expounder of the Syādvāda doctrine. In the context of events it would not be unreasonable to assume that this Bhaṭṭākalaṁkadēva was a disciple of the deceased Akalaṁkadēva.

In regard to the date cited above, it may be noted that the Śaka year was current and the weekday was Tuesday on the specified *tithi*. Making allowance for this discrepancy it may be equated with 1607 A.C., October 20.

B again is an epitaph purporting to record the demise of another Jaina teacher, by name Bhaṭṭākalaṁkadēva, who expired in the second *ghaṭikā* after sunrise on Kārttika śu.10 of Śaka 1577, Jaya. This teacher also bore the titles, such as *Rāya-rājaguru*, etc., enumerated above in respect of Akalaṁkadēva. The expression *Dēsi* in line 4 might be an abbreviation of *Dēsi-gaṇ-āgraganya* occurring in **A** and as such it would indicate that this teacher also belonged to the Dēsi *gaṇa* of the Mūla *saṅgha*.

¹ At the time of my visit to the place I met the Svāmiji of the *maṭha* and he told me that it was called the Bhaṭṭākalaṅka *maṭha*. In response to my enquiry Prof. A. N. Upadhye, Rajaram College, Kolhapur, informed me that the *maṭha* was known as that of Akalaṅka and that this traditional name was quite popular (letter dated 28-8-1944). While editing the copper plate records from Sōndā, Prof. K. G. Kundangar observes that the *maṭha* took its name after its founders, Akalaṅka and Bhaṭṭākalaṅka; *Jaya Karnāṭaka* (Kannaḍa monthly), 1925-26, p. 13. Both these traditions are in support of the identification of the two Jaina teachers proposed in the article. But the same writer is not certainly correct when he says that the *maṭha* was founded in the 4th century A.C. As shown in the article, the *maṭha* must have come into existence only during the 16th century A.C.

² These inscriptions have been registered as Nos. 77, 78 of 1939-40, *An. Reds. on S. I. Epigraphy* for 1939-40 to 1942-43, Appendix E.

The date cited above is not verifiable as the week-day is not mentioned. However, we may note that the Śaka year was current, and thus the specified *tithi* would correspond to 1655 A.C., November 9, Thursday.

In order to understand the importance of these two teachers and their identification, we have to probe into the religious and political history of this region as gathered from other sources. During the period of the 14th to 17th century A. C., there flourished in the southern parts of the North Kanara District and the adjoining tract four principalities, viz., Nagire, Hāduvalli or Saṅgītapura, Bīḷigi¹ and Sōndā. The rulers of these chiefdoms came under the powerful influence of Jainism and the Jaina teachers who were responsible for this influence belonged to a particular monastic order. Two inscriptions² found in the dilapidated Ratnatraya Basadi (*i.e.*, Jaina temple) at Bīḷigi in the Siddāpur taluk of the district furnish valuable information about these monks.

There flourished an erudite Jaina teacher named Chārūkīrti Paṇḍita who founded a monastery at Śravaṇa Belgōḷa. He bore the titles, *Rāya-rājaguru*, *Maṇḍalāchārya*, *Mahāvādā-vādīśvara*, *Rāya-vādi-Pitāmaha*, *Sakala-vidvajjana-chakravartī* and *Ballāḷarāya-jīvarakshā-pālaka*. This teacher might have lived in the early part of the 12th century A. C., since, according to some inscriptions from Śravaṇa Belgōḷa, he earned the last-mentioned title by saving the life of the Hoysala king Ballāḷa I (1100-1106 A. C.). This teacher belonged to the Dēśiya *gaṇa* and Pustaka *gachchha* of the Mūla *saṅgha*.³ The subsequent teachers who were connected with the spiritual heritage of this preceptor adopted these titles in their *praśasti*. Śrutakīrti was a later descendant in the monastic lineage of Chārūkīrti Paṇḍita. The spiritual succession of Śrutakīrti as recounted in inscription No. I in the Ratnatraya Basadi at Bīḷigi is as follows :

The earliest date mentioning the last named teacher, Bhaṭṭākalaṅka, as known from the above epigraph is Śaka 1510 or 1587 A. C. So on a modest calculation of about 25 years per generation we can place Śrutakīrti I approximately in the beginning of the 15th century A. C. It may be

¹ This name is spelt as Bīḷigi and Bīḷagi also and Sanskritised into Śvētapura.

² I copied these epigraphs privately in 1938 and the above account of their contents is based on my own readings of their texts. These records have been published with many flaws in 1940, October-November issue of the Kannaḍa journal *Śaraṇa Sāhitya* whose editor states that he copied them in 1926. Their summaries have been published with some mistakes in the *Annual Report on Kannaḍa Research* for 1939-40, Nos. 88, 89. The late R. Narasimhachar referred to one of these inscriptions in his account of Bhaṭṭākalaṅka based on its copy found in the Madras Museum; *Karṇāṭaka Kavicharite*, Vol. II, p. 348. But it is now seen that that copy must have been defective in parts.

³ *Karṇāṭaka Śabdānusaṇa* (Bibliotheca Carnatica, 1923), Introduction, p. 5; Bīḷigi Ratnatraya Basadi inscription No. I.

noted in this connection that the principality of Hāḍuvalli or Saṅgītapura also came into being approximately at this period.¹ The chiefs of Saṅgītapura seem to have accepted the spiritual leadership of these preceptors from the beginning and extended their support to Śrutakīrti I in establishing a monastery of pontifical status in their capital. Hence, as we shall see in the sequel, these preceptors were designated the pontiffs of the Saṅgītapura throne (*Saṅgītapura-simhāsana-paṭṭāchārya*). The influence wielded by these preceptors over the rulers of Saṅgītapura is illustrated by the following assertion in the above epigraph. It states that Vijayakīrti I earned renown by securing the throne for Indrabhūpāla of Saṅgītapura.² In regard to Vijayakīrti II, the second epigraph from Bīḷigi observes that he became eminent from his seat at Saṅgītapura.³

We may reckon a few more facts about these teachers, indicating the sphere of their influence as gathered from the first inscription from Bīḷigi and a few other records. Vijayakīrti II caused to be constructed a well-planned town named Baṭṭakāḷa (modern Bhaṭkaḷ) on the west coast for his pupil Dēvarāya who may be identified as the namesake elder brother of the Hāḍuvalli chief Gururāya⁴ who lived approximately in the first quarter of the 16th century. Soon after this and by the middle of the 16th century, the Hāḍuvalli chiefs lost their entity as a political unit.⁵

It was about this time that the chiefs of Bīḷigi, another principality in the neighbourhood, were rising to power. The influence of these teachers is clearly discernible on these rulers during the next few generations. Thus we are told that Akalaṅka I and Chandraprabha illuminated the path of the Jina by confiding the spiritual truths to their pupils Narasiṃha and Timma. These two chiefs were the sons of Ghaṇṭendra I of the Bīḷigi family.⁶ This Narasiṃha's grandson Raṅgarāja was fervently devoted to Akalaṅka II and calls himself the foremost and favourite pupil of the latter.⁷ Raṅgarāja's son Ghaṇṭendra II was equally attached to Akalaṅka II and more so to Bhaṭṭakalaṅka. Arasappa Nāyaka II, the founder of Svādi or Sōndā, another chiefdom nearby, seems now to have come under the direct influence of these teachers, more so, probably on account of his matrimonial alliance with the Bīḷigi family.⁸

Epigraphic evidence is precise to prove that the chiefs of Sōndā accepted the religious leadership of the above-noticed teachers of Saṅgītapura and revered them as their own spiritual preceptors. A copper-plate inscription from Sōndā, dated Śaka 1490 or 1567 A. C., and issued by the Sōndā ruler Arasappa Nāyaka II, recounts the genealogy of his preceptors from Vijayakīrti II of the above account, who is characterised as the lord of Saṅgītanagara.⁹ In this epigraph the chief styles himself the favourite pupil of Akalaṅka II. In the light of the above facts, it is easy to see how and under what vicissitudes the teachers who were originally at Saṅgītapura, passed on from that place to Bīḷigi and thence to Sōndā. It is in the fitness of things to assume that a monastery of pontifical status was founded for his preceptor Akalaṅka II by Arasappa Nāyaka II in his capital at Sōndā. The above review thus lends support to the prevalence of the tradition noticed in the

¹ *An. Rep. on Kan. Res. in Bom. Prov.*, 1939-40, p. 47. The genealogy of the Hāḍuvalli chiefs set forth here commences with Sāḷuvēndra who might have lived about the closing part of the 14th century, as his son Mallirāja has Śaka 1332 or 1410 A.C. as his last date.

² This Indrabhūpāla may be identified with Indra in the genealogy of the Hāḍuvalli chiefs, who has the date Śaka 1394 or 1472 A.C.; *loc. cit.*

³ The passage in question reads as follows: *Tat-saṁtāna-kramē yātē Saṅgīt-ākhyā-purē bahau | dhīmān Vijayakīrti-āryaḥ paramāgama-pamditaḥ ||*

⁴ *Loc. cit.*, the genealogy of the Hāḍuvalli chiefs.

⁵ *An. Rep. on Kan. Res. in Bom. Prov.*, 1939-40, pp. 45-46.

⁶ *Jaya Karnāṭaka*, 1925-26, copper plate records of Svādi, No. 2; Madras Epi. Coll., C.P. No. 2 of 1940-41.

⁷ *Op. cit.*, copper plate records of Svādi, No. 2.

⁸ *Bīḷigiya Arasugala Vamśāvali* (Kannada work), verse 125. Arasappa Nāyaka II's daughter Viramāmbā was married to Ghaṇṭendra II of the Bīḷigi family.

⁹ *Jaya Karnāṭaka*, 1925-26, copper plate records from Svādi, No. 6.

beginning of this study, connecting the name of Akalaṅka and his disciple Bhaṭṭākalaṅka with the Jaina *maṭha* at Sōndā.

Akalaṅka II and Bhaṭṭākalaṅka were the most celebrated teachers of the line ; and the Bīḷigi epigraphs furnish the following information about them. They were held in esteem not only in the chiefdoms of the west coast, but were also renowned in other parts of the country on account of their profound learning and versatile scholarship. Well-versed in secular arts, a pleasing personality, of extraordinary ability and immaculate character, Akalaṅka II rose to eminence as the foremost among the circle of preceptors on account of his incessant practice of proclaiming and expounding the scriptures, tendered with affection. His disciple Bhaṭṭākalaṅka had mastered several branches of learning, was endowed with many good qualities and excelled in the art of exposition. Proficient in the treatises of his own school of philosophy as well as in those of others, constantly engaged in study and teaching, he proved himself to be an impressive figure, a critical scholar and a judicious advocate in the royal courts and in the assembly of learned men. It is stated at the end of the Bīḷigi inscriptions that they were written by Bhaṭṭākalaṅka. We can detect the personality of the learned author in these epigraphic compositions which evince scholarly treatment and literary style in its excellence.

A Jaina teacher named Bhaṭṭākalaṅka is the author of the *Karṇāṭaka-Śabdānuśāsana*, a scholarly treatise on Kannaḍa grammar, written in Sanskrit in the *sūtra* style of Pāṇini. "This work is not only more elaborate and exhaustive than the previous ones, but also more methodical in the treatment of the subject. It may be said to be to Kannaḍa what the *Aṣṭādhyāyī* is to Sanskrit and its learned commentary (written by the author himself) may in a way be compared to the *Mahābhāṣya* of Patañjali".¹ This work was completed in 1604 A.C. From the colophon of the work, it is gathered that the author's teacher was Akalaṅka who was learned and assisted him in its composition, that these preceptors belonged to the lineage of Chārūkīrti Paṇḍita and that they bore all the titles and epithets of the teachers of Saṅgītapura noticed above. Noteworthy among them is the characteristic title *Saṅgītapura-sinhāsana-paṭṭācārya* which is also applied to Akalaṅka in the first *nishidhi* inscription from Sōndā as seen above.

Judging from the evidence adduced so far, it may be safely concluded that the grammarian Bhaṭṭākalaṅka and his teacher Akalaṅka are identical with Bhaṭṭākalaṅka and Akalaṅka II of the line of teachers from Saṅgītapura. We may further recognise the identity of the same two teachers in the two *nishidhi* records from Sōndā under study. The intimate connection of the grammarian Bhaṭṭākalaṅka as well as of his preceptor Akalaṅka with Sōndā is attested by another authority also. This is Dēvachandra, an author of the last century, who states in his *Rājāvalīkathe* that the grammarian Bhaṭṭākalaṅka learnt all the sciences at Sudhāpura,² i.e., Sōndā, naturally under his teacher Akalaṅka.

Lastly, we may note that the above identification does not lead to any inconsistencies, although it might confer longevity upon the two teachers. The earliest date available for Akalaṅka II from an inscription³ is Śaka 1487 or 1564 A.C. and he died in 1607 A.C. according to A. This would show that he lived approximately over 60 years. Similarly Bhaṭṭākalaṅka was alive in 1587 A.C. and he passed away in 1655 A.C. according to B. So he might have lived approximately over 80 years.

¹ *Karṇāṭaka Śabdānuśāsana* (op. cit.), Intro. p. 7.

² *Ibid.*, p. 6.

³ Akalaṅka II figures in a copper-plate record as the preceptor of the Bīḷigi ruler Raṅgarāja. The epigraph refers itself to the reign of the Vijayanagara king Sadāśiva and is dated Śaka 1487, Raktākṣi ; *Jayī Karṇāṭaka*, 1925-26, copper-plate records from Svādi, No. 2.

ABSTRACT OF CONTENTS

Be it well ! On Kārttika śu. 10, Wednesday of the Śālivāhana Śaka year 1530 and Plavaṅga, the illustrious teacher Akalamkadēva, bearing the distinguished titles, *Rāya-rājaguru*, *Maṇḍalāchāryya*, etc., attained heaven, meditating on the feet of the Five Teachers.² May this vault erected in his memory be auspicious ! This memorial vault (*nishidhi-maṁṭapa*) was arranged (*i.e.*, caused to be erected) by Bhaṭṭākalamkadēva, expounder of the Syādvāda doctrine.

ABSTRACT OF CONTENTS

Be it well ! On Kārttika śuddha daśamī of the Śālivāhana Śaka year 1577 and Jaya, in the second *ghaṭikā* after sun-rise, the illustrious revered teacher Bhaṭṭākalamkadēva attained heaven, while he was absorbed in meditating upon the feet of the Five Teachers in the presence of the Four-fold Saṅgha.²

No. 47—TEKKALI PLATES OF MAHARAJA UMAVARMAN ; YEAR 9

(2 plates)

M. VENKATARAMAYYA, OOTACAMUND

This set of three copper plates was received for examination in 1934 by the Superintendent for Epigraphy, Mylapore, Madras, from the Deputy Tahsildar of **Tekkali**, Visakhapatnam District. It is registered as C. P. No. 13 of 1934-35 in the *Annual Report on South Indian Epigraphy*, 1934-5. The Superintendent for Epigraphy reports on page 52 of the said *Report*, on the charter as follows :

"The plates measure 6½" by 2¾" and have a ring-hole of about ½" in diameter near the left margin, through which passes the ring measuring 3½" in diameter. The ends of this ring are soldered into the back of an oval seal which bears a worn-out legend on its oval counter-sunk surface measuring about 1¼" by ¾". The ring had been cut when the plates were received by me. The first plate is engraved on the inner side only, while the other two plates have writing on both the sides, the second face of the third plate bearing only two lines of writing. The whole set including the ring and seal weigh 79 tolas and without these only 48 tolas. The plates are reported to belong to the Raja of Tekkali, who has published an inaccurate text of the inscription in the *Journal of the Andhra Historical Research Society*, Vol. VI, p. 53. The Raja does not mention the place, or history, of the discovery of the plates, but only states that a Karnam of Tekkali had these in his possession when they came to his notice."

The **seal** of the plates is very much worn out ; nevertheless traces of four letters, in a single line, are visible. Of these the last can be made out as *kta*. The Raja of Tekkali, however, reads the whole legend as *pitribhaktah* which is not clear in the photograph. It is not improbable that the legend might have been as read by the Raja, since we have three other instances of a similar legend which occurs on the seals of the Kōmarti plates³ and the Bobbili⁴ plates of Chaṇḍavarman and on the Chicacole plates of Nandaprabhañjanavarman.⁵

¹ Lines 10-13 are inscribed in the top portion of the slab.

² The Four-fold Saṅgha might be the Nāma Jina, Sthāpana Jina, Dravya Jina and Bhavya Jina, defined in the *Pravachana Sārādhāra ; Jaina Iconography* by B. C. Bhattacharya, p. 17.

³ Above, Vol. IV, p. 143.

⁴ *Ibid.*, Vol. XXVII, p. 39.

⁵ *Ind. Ant.* Vol. XIII, p. 48. Dr. Fleet, who edited this record, could not decipher the legend on the seal. This was, however, read by Dr. Hultzsch as *Pi[trihaktah]* ; above, Vol. IV, p. 143.

The four seals are now reproduced here, for the first time, for comparison.

The **characters** of our inscription resemble those in the first two grants cited above, all of which are engraved in the southern script. In some cases, like *m* and *v*, the letters of the present grant show a rounded appearance as compared with those of the Bṛihatprōshthā grant¹ and the Dhavalapēṭa plates of *Mahārāja* Umavarman,² in which they appear angular. In all these charters including the one under study, the characters bear remarkable affinity to one another especially in the marking of the serif which is deeply cut. On palaeographical grounds the script of the above two charters of Umavarman has been assigned to the first half of the fifth century A.C.³ Our record may also be placed in the same century on the same grounds. The Superintendent for Epigraphy, however, remarks about its script as compared with that of the Bṛihatprōshthā grant as follows : " From the more angular aspect of the script adopted in this inscription and also the more archaic form of certain letters and its orthographical peculiarities, this may have to be assigned to an earlier period. The forms of subscripts for *y* and *r* adopted in this inscription, resemble those found in later Kushāṇa epigraphs. The doubling of the consonant before the *rēpha* also suggests an earlier model like the Nāḷa inscriptions."³ It is difficult to agree with the line of argument adopted above, since it is not quite correct to compare these Kālīṅga grants which are in southern characters with the Kushāṇa records which are in northern characters.

As regards the **orthography** of the Tekkali plates there is nothing particular to remark. There are very few errors of composition or those committed by the scribe. A consonant after *r* is duplicated. The doubling of the consonant before a *rēpha* is found in *dharmma-kkrama* (line 9) and *vikkrama* (line 9). *Yuddhishthira* for *Yudhishthira* (lines 14-15) is evidently a mistake. There is only one instance of the use of *b* for *v* (*sambatsara*, line 16). The **phraseology** of the grant is in many respects similar to that obtaining in the allied Kālīṅga grants cited above except for a few differences. Thus, the passage *dharmma-kkrama-vikkramābhya(maiḥ) dānam=anupālanañ=ch=ēti ēsha khalu sa dharmmaḥ* may be compared with the following one in the Bṛihatprōshthā and other grants ; *dharmma-kkrama-vikkramāñām=anyatama-yōgād=avāpya mahīm=anūsāsātām pravṛittakam=īdan=dānañ sad-dharmmam=anupaśyadbhiḥ*, etc. Towards the end of the record and before the mention of the *lōkhaka* there is an interesting endorsement to the effect that the charter was written by the king in his own hand and was as such capable of destroying sins. It runs, *rājñā sva-hastalikhitaṁ śāsanaṁ pāpa-nāśanam*. Here the word *likhitam* is perhaps to be understood in the sense that the king attested the original deed of gift himself since the inscription says that the king himself was the executor (*svayam=ājñā*). Mention is made of another person, Kēśavadēva of Piṣṭapura, who is also stated to have written it. The latter evidently was the person who actually wrote the inscription on the copper plates which was later engraved over.

The **language** of the inscription is Sanskrit. Except the three imprecatory verses, the rest of the composition is in prose.

The **object** of the charter is to record the gift of a village called Astihavēra or Havēra⁴ as a tax-free *agrahāra* to a *Brāhmaṇa* Yaśasārman of the Kāśyapa *gōtra* by *Mahārāja* Umavarman who describes himself as *pitṛipādānudhyātāḥ*. The **date** of the grant is given in words as the seventh day of the dark fortnight of the month of Māgha in the ninth year (of the king's reign). The king himself was the *ājñā*, i.e., executor of the grant. The record is stated to have been written (*likhitam*) by the king himself. It is also recorded that Kēśavadēva, a resident of Piṣṭapura wrote (*likhitam*) the charter. As explained above, the king perhaps issued the original charter in his own hand and executed it, its copy having been reduced to writing on the copper plates by Kēśavadēva.

¹ Above, Vol. XII, p. 4 and plate.

² *Ibid.*, Vol. XXVI, p. 133 and plate.

³ *ARSIE*, 1934-35, p. 52.

⁴ See below p. 302, foot-note 2.

The order conveying the gift was issued from the victorious **Vardhamānapura**.

In the century to which *Mahārāja* Umavarman of the present Tekkali plates has been assigned there ruled in Kalinga another king of the same name, viz., *Kalingādhipati* Umavarman, already mentioned, who was the donor of the Brihatprōshthā grant and of the Dhavalapēṭa plates. That both may be identical seems at first sight plausible, but it was perhaps not so. In the first place there is a marked difference in the seals attached to their respective grants. Those of *Kalingādhipati* Umavarman have the legend in four lines ending with the name of the donor in the genitive case. The one attached to the present Tekkali plates has only a single line as legend which in all probability reads *pitribhaktaḥ*. The absence of the title *Kalingādhipati* among the titles of Umavarman of the present charter may be considered as another factor pointing in the same direction of their non-identity. Whether the Umavarman of the present Tekkali plates belonged to the same family as, if he was not identical with, his namesake of the records cited above cannot also be ascertained with the evidence at our disposal. On the other hand, there is a possibility of our Umavarman being in some way lineally connected with two other kings of Kalinga who flourished in or about the same century, viz., *Kalingādhipati* Chaṇḍavarman of the Bobbili¹ and the Kōmarti² plates and *Sakala-Kalingādhipati* Nandaprabhañjanavarman of the Chicacole plates.³ In all their grants the legend on the seals is the same, viz., *pitribhaktaḥ*. A common legend like this used by several kings on the seals of their charters would indicate that it was more than a personal epithet of a particular ruler, perhaps a cognomen indicating one family. We have a similar instance of a common legend adopted by the Eastern Chālukya dynasty, viz., *Tribhuvanāṅkuśa*. Although this occurs as a personal attribute of a number of kings of this dynasty, its adoption as a legend on the seals of their charters by different members of the family invests it with greater significance than that of merely indicating a particular ruler. Perhaps it gained importance as a common title of the family as a whole. Similarly, it may be said that the kings who used the legend *pitribhaktaḥ* were all of one family, whose dynastic appellation, if any, is not at present known. The origin of the legend can be traced to the personal epithet *pitripādānudyātaḥ* or *bappabhaṭṭarakapādabhaktaḥ* by which these kings are found to style themselves. While there were other rulers belonging to different dynasties, viz., the kings of the Māthara, Pallava, Śālaṅkāyana and Viśṇukunḍin families, who used the same epithet, none of them adopted it as a legend on their seals.

As stated above, king Umavarman of the present charter was not the overlord of the whole of Kalinga, as he does not bear the title *Sakala-Kalingādhipati* or even *Kalingādhipati*. He seems to have been ruling only a portion of the country from his capital at Vardhamānapura. I have stated elsewhere⁴ that *Kalingādhipati* Chaṇḍavarman of the Bobbili and Kōmarti plates should have

¹ Above, Vol. XXVII, pp. 39 ff. and plate.

² *Ibid.*, Vol. IV, pp. 142 ff. and plate.

³ *Ind. Ant.*, Vol. XIII, pp. 48 ff. and plate.

⁴ See article on the Madras Museum plates of Anantaśaktivarman, above, p. 233. The chronological position of another early king of Kalinga, viz., Viśākhavarman, who issued the Kōrōshaṇḍā plates (above, Vol. XXI, p. 23), remains uncertain. The script of this record resembles the characters of *Kalingādhipati* Umavarman's grants (Brihatprōshthā grant and Dhavalapēṭa plates) and those of the present Tekkali plates of *Mahārāja* Umavarman. Viśākhavarman does not bear the title *Kalingādhipati* and his charter is issued from Śrīpura. Neither the ring nor the seal of his grant is forthcoming to help us in deciding whether he was a *pitribhakta* king or not. To take a clue from his name Viśākhavarman, we might suppose that he was the son of an Umavarman, since Viśākha, i.e., Skanda, was the son of Umā, i.e., Pārvatī. If future discoveries substantiate this conjecture, it would appear that the Bappa-bhaṭṭāraka for whose heavenly bliss he made the gift of the village recorded in his Kōrōshaṇḍā plates (*asmad-bappa-bhaṭṭāraka-pādānām sura-lokād-aprachyutānām bhūyaḥ puṇy-āpyāyanāya*) is to be identified with one of the two kings of the name of Umavarman. If he was *Kalingādhipati* Umavarman of the Brihatprōshthā grant, it might be supposed that soon after his death and before Viśākhavarman could consolidate his power, *Kalingādhipati* Chaṇḍavarman wrested the Kalinga kingdom from the young prince and thus deprived him of his lordship over Kalinga as well as of the title of *Kalingādhipati*.

acquired the kingdom of Kalinga soon after *Kaliṅgādhipati* Umavarman had ceased to rule. Our Umavarman, who belonged to the same family as that of Chaṇḍavarman, must have been holding sway over a part of Kalinga sometime after Chaṇḍavarman, that is, in the third quarter of the 5th century. Of the three kings who belonged to this line of *pitribhakta* rulers, viz., Chaṇḍavarman, Umavarman and Nandaprabhañjanavarman, only Umavarman did not style himself as *Kaliṅgādhipati*. Since the characters of Nandaprabhañjanavarman's grant belong to a period later than those found in the inscriptions of the other two *pitribhakta* rulers, we may consider Umavarman of our grant as having preceded him but to have come after Chaṇḍavarman who immediately followed *Kaliṅgādhipati* Umavarman, whose family is not known. It would appear that owing to the causes unknown, Umavarman lost his hold on the whole of Kalinga. Some time later *Mahārāja* Nandaprabhañjanavarman restored the power of the family to its old position, since this king is found to assume the title *Sakala-Kaliṅgādhipati*. He was in his turn, superseded by another line of Kalinga rulers, viz., the Vāsishṭha family to which belonged Anantavarman, Lord of Kalinga, 'who acquired the kingdom by his own prowess' as recorded in his Siripuram¹ and Śruṅṅavarapukōṭa² plates. Thus, of the three *pitribhakta* kings, Chaṇḍavarman ruled the whole of Kalinga from his capital at Sīmhapura. His successor, Umavarman of the present plates, administered only a part of the country from his seat at Vardhamānapura. Nandaprabhañjanavarman, evidently the last ruler so far known of this line, again exercised sway over the whole of Kalinga from his seat (*vāsaka*) Sārapalli as recorded in his Chicacole plates. Since this place was only a *vāsaka* or camp, he might have had his capital elsewhere.

Of the places mentioned in the present grant, **Pisṭapura** is well-known. The others, **Vardhamānapura** and **Astihavēra** have been identified respectively with Vaḍama in the Palakonda taluk, Visakhapatnam District, and Atava in the Srungavarapukota taluk in the same District by the late Mr. C. R. Krishnamacharlu.³ These are situated at a distance of more than fifty miles from each other.

Some of the villages referred to in the early Kalinga grants have not been satisfactorily identified so far. In the following list, I have tried to indicate their modern names.

Reference.	Village mentioned in the inscription.	Modern name.	Taluk and District.
1. Above, Vol. XXVI, p. 333 (Dhavalapēta plates).	Kuttu[pu] in Mahēn-drabhōga.	Kudapasingi . . .	Golugonda Agency, Visakhapatnam District.
2. <i>Ibid.</i> , Vol. XXVII, p. 33 (Bobbili plates).	Tiritthāṇa . . .	Tāṇem . . .	Chipurapalle taluk, Visakhapatnam District.
3. <i>Ibid.</i> , Vol. IV, p. 142 (Kōmarti plates).	Kōhētūra . . .	Kottūru . . .	Srikakulam taluk, Srikakulam District.
4. <i>Ibid.</i> , Vol. XXI, p. 23 (Kōrōshaṇḍā plates).	Tampōyaka in Kōrā-sōdakapañchālī.	Tampa ⁴ near Korasandā	Parlakimedi taluk Ganjam District.
5. <i>Ind., Ant.</i> , Vol. XIII, p. 48 (Chicacole plates).	Sārapallivāsaka . . .	Sāripalle . . .	Vizianagaram taluk, Visakhapatnam District.

¹ Above, Vol. XXIV, p. 49.

² *Ibid.*, Vol. XXIII, p. 56.

³ *ARSIE*, 1934-5, part II, para 2. If the name of the latter village is to be taken only as Havēra, I am unable to locate it.

⁴ This identification has already been suggested by Mr. C. R. K. Charlu ; above, Vol. XXVII, p. 202.

No. 48—PURI PLATES (SET B) OF GANGA NARASIMHA IV*(1 Plate)*

D. C. SIRCAR, OOTACAMUND

Sometime ago, my friend Mr. Paramānanda Āchārya, Superintendent of Research and Museum, Government of Orissa, kindly sent me for examination a copper-plate inscription recently secured by him from Purī for the Orissa State Museum, Bhubaneswar. On examination, it was found to

¹ From impressions.

² Possibly we have to read *asti Havēra*-, treating *asti* as an indeclinable and *Havēra* as the name of the village. I owe this suggestion to Dr. B. Ch. Chhabra.

³ Read *saptamyām samvatsarē navamē*.

FOUR 'PITRIBHAKTA' SEALS

KOMARTI PLATES OF CHANDAVARMAN

BOBBILI PLATES OF CHANDAVARMAN

CHICACOLE PLATES OF NANDAPRABHANTANAVARMAN

TEKKALI PLATES OF UMAVARMAN

be the second of the two sets (A and B) of copper plates of the Eastern Gaṅga monarch Narasimha IV, published without facsimile by the late M. M. Chakravartī in *J. A. S. B.*, Vol. LXIV, 1895, Part I, pp. 128 ff. It was also found that considerable improvement in Chakravartī's reading and interpretation of the inscription, especially in the grant portion containing an early specimen of the Oriyā language, is possible. I am therefore re-editing the grant portion of the inscription incised on plates VI-VII.

Chakravartī found the inscription in the Śaṅkarānanda Maṭha at Purī, about half a mile to the south of the Jagannātha temple and close to the old palace of the Purī Rājās. It was originally incised on seven plates but the fifth one, together with the seal, is missing. That only six loose plates (without the missing fifth plate) came into the possession of the Maṭha is indicated by a modern inscription in Dēvanāgarī on the obverse of the first plate. It runs as follows :

- 1 idam tāmra-sāśana-saḍakam
- 2 śrīmata-parmahansa-parivrājakāchārja-Mōgavadhana-
- 3 piṭhādhiśa-jagadguru-damḍi-Bālabrahmānanda-Sara-
- 4 svati-svāmīnā padē arapitam.¹

The plates measure each 13.3 inches by 11.1 inches. The first and the seventh plates have inscription only on the inner side, while the other plates are inscribed on both the obverse and the reverse. The plates (with the exception of Plate VII which has no writing on the reverse) were consecutively numbered, the particular numerical figure being engraved on the left margin of the reverse of each plate. The figure for 1 is of the Telugu type, while those for 2 and 3 are of the medieval Bengali type, 2 re embling modern Telugu and English 3 and 3 the Dēvanāgarī form of the same numeral. The figure for 6 is interesting to note. The figures for 1, 2, 3, 5, 6 and 9 also occur in the text of the inscription (Plate VI B, lines 12, 21 ; Plate VII, line 3). The numbers of lines on the different plates are as follows : IB—25, IIA—24, IIB—24, IIIA—24, IIIB—25, IVA—24, IVB—25, VIA—24, VIB—28, VIIA—23. The six plates together weigh 851 *tolas*.

The characters of the inscription are Gauḍī influenced by Nāgarī, though a few letters (*e.g.* *r*) have forms approaching those of the letters in modern Oriyā. The engraving is carelessly done. A sibilant is often so formed that it is difficult to understand whether the engraver had the palatal or the dental in mind. In our transcript, we have sometimes ignored the forms of *s* looking like *ś* and *vice versa*. This is to avoid a large number of corrections in the transcript. The language of the versified portion of the inscription is Sanskrit ; but the grant portion in prose is predominantly Oriyā. The orthography often exhibits influence of local pronunciation.² The same proper name has sometimes been spelt differently (cf. Rāḍasōḍ=Rāḍha°=saḍ, Raktapaṭā=Rakata°, Vāragō=Vārōgō, Ōḍamvōlō=Ōḍamōlō).

The charter was issued by the imperial Eastern Gaṅga monarch Narasimha IV who is known to have ruled in 1378-1402 A.C.³ It contains no less than three dates, the first in 1395

¹ Read *idam tāmra-patra-shaṭkaṁ śrīmat-paramahansa-parivrājakāchārya-Bhōgavardhana-piṭh-ādhiśa-jagadguru-damḍi-Bālabrahmānandasarasvatīsvāmīnāṁ padēśhv-arapitam*.

² In Oriyā *ś* is usually pronounced as *s*. Note also the contractions *nra* for *nara*, *pti* for *pati*, *gōchrē* for *gōcharē*.

³ The latest definitely known date of the king is Śaka 1324 (=31st Aṅka or 25th regnal year). See *S. I. I.*, Vol. VI, No. 1016. He may not have been living in Śaka 1328 when his wife Pārvatī-mahādēvī made a gift in favour of the god Narasimha of Simhachalam (*ibid.*, No. 731). Subba Rao (*J.A.H.R.S.*, Vol. VIII, pp. 70 ff.) takes 1414 A.C. to be the last year of the king's reign as another of his wives, named Nīlādēvī, made a gift in favour of the same god in Śaka 1335 (*S. I. I.*, Vol. VI, No. 1072). But this is uncertain as the queen seems to have been a widow at the time of the grant. A recent suggestion that the king died in 1409 A. C. (cf. *J. O. R.*, Vol. XIX, p. 135) is based on a misunderstanding of the evidence of *S. I. I.*, Vol. V, No. 1205, which belongs to the reign of Bhānu III and not of Bhānu IV as is wrongly supposed.

A. C., and the second and the third respectively in the following two years, viz., 1396 and 1397 A. C.

The first five plates (including the lost fifth plate) as well as three quarters of the obverse of the sixth plate are occupied by the introductory part of the charter dealing with the genealogy of the royal family to which the issuer belonged and the achievements of the imperial Gaṅga rulers down to the issuer himself. The importance of this part has often been discussed by scholars on the basis of Chakravartī's transcript published more than half a century ago. In the present paper we are especially interested in the latter part of the document recording the grant made by Narasimha IV in favour of a Brāhmaṇa named Dēvarathāchārya who was apparently the priest in charge of the worship of a god named Ugrēśvaradēva.

The genealogical part of the inscription ends in line 19 on the obverse of plate VI. As one of the plates (Plate V) is lost, it is not possible to count the number of the lines in the inscription consecutively from the beginning. The end of the metrical part of the record dealing with Gaṅga genealogy is indicated by the words *śubham=astu*. The grant portion of the charter then begins with the date given in words as the expired Śaka year 1316. Line 20 says that the above year corresponded to the 22nd Aṅka year of king *Vīra-śrī-Narasimhadēva* (i.e., Narasimha IV of the imperial Gaṅga family) who was endowed with titles like 'the lord of the fourteen worlds'. The details of the date on which the charter was drawn up are given in the next line as Tuesday, the eleventh *tithi* of the bright half of the month of Vṛiśchika, i.e., the solar Mārgaśīrsha or Agrahāyana. The date is irregular for Śaka 1316 expired; but, for Śaka 1317 expired, it corresponds to Tuesday, the 23rd November, 1395 A. C.¹ This date is said to have fallen in the 22nd Aṅka year, i.e., the 18th regnal year of the Gaṅga king Narasimha IV who is believed to have ascended the throne about 1378 A.C. and ruled at least up to the year 1402 A.C. At the time of issuing the grant the *śrī-charaṇa*, i.e., the king, who purified (cf. *a-rajāḥ*) himself by offering worship (possibly to the family deity Purushōttama-Jagannātha²) was staying in the *bhītara-navara* of the *kaṭaka* (city or residence) of Vārāṇasī, i.e., the present Cuttack. In this inscription, as in the corresponding passage of some records of the king's ancestor Narasimha II (circa 1278-1305 A. C.), the word *viṛaya* has been used in its modified Oriyā sense of 'stay', etc. *Navara* is an Oriyā corruption of Sanskrit *nagara* and means a city, palace, etc. *Bhītara-navara*, which is the same as *abhyantara-nava(ga)ra* of some grants of Narasimha II, seems to refer to the king's stay in his palace at Cuttack. The following officers were then in the king's presence (lines 22-23): (1) *Mahāpātra* Kṛishṇānanda *Sāndhivigrahika*, (2) *Mahāpātra* Lāṇḍuratha *Āchārya*, (3) *Mahāpātra* Gōpīnātha *Sāndhivigrahika*, (4) *Pātra* Siddhēśvara *Jēnā*, (5) *Dvāraparikshā* Trivikrama *Sāndhivigrahika*, and (6) *Kināi Sēnādhyaksha*. Among the official designations, the word *pātra* indicates a minister and *mahāpātra* a minister of a higher rank. *Sāndhivigrahika* was a minister dealing with matters relating to war and peace. The word *jēnā* originally meant a prince of the royal blood, but later came to be a title of the nobility and ultimately a family name. The word *parikshā* (Oriyā *parichhā*) means a superintendent, governor, etc. *Dvāraparikshā* seems therefore to be the same as the *pratihāra* (officer in charge of the palace-gate). *Sēnādhyaksha* was a leader of the forces.

The last line (line 24) on the obverse of Plate VI says how the king (*śrī-hasta*; cf. *śrī-charaṇa* above) made a grant of land in favour of a Brāhmaṇa named Dēvarathāchārya in accordance with the *mudala* that had been settled before *Purō-śrikaraṇa* Viśvanātha *Mahāśāhāpati*. *Mudala* is a Telugu word meaning *ājñā* or order and is first noticed in the records of Narasimha II. In Oriyā,

¹ Cf. *Ind. Ant.*, Vol. XXV, p. 285.

² See *J. O. R.*, Vol. XVII, pp. 209-15. It is very probable that a substitute was installed after the original image of Purushōttama-Jagannātha, established in the Ganga palace at Cuttack by Anangabhimā III, had been carried away by Sulṭān Firūz Shāh of Delhi.

however, the word seems to be used in a modified sense to indicate an arrangement made according to order. That *mudala* and *ājñā* were not used in Oṛiyā exactly in the same sense is suggested by epigraphic passages using both of them. The Oṛiyā inscriptions of the Sūryavamśis have the following passages in a similar context : *ājñāṁ hōlā, Agnisarmā mudrāhastara gōcharē vōlā mululē, avadhārīta ā mṅā pramānē, avadhārīta āgyāṁ vōlā mudalē, samastāṅka mukāvīlārē āgāṁ hōlā, puja-avikāśē āgyāṁ hōlā, āgyāṁ vōlā hōlā*, etc.¹ We have to note also the expressions *Gatēśvara-dāsa-śrī-chandana-āg*, *avadhārīta ājñā-vōlā mudalē* and *avadhārīta-mulala-pramāṇē* occurring in the latter part of our inscription. The same modified sense of the word can also be traced in the *Mādālā Pāñjī*² in such passages as *śrī-navarē vijē kar mudala karāilē, śrī-pāda-mulalē, rājyaru-ē-manta mudala karāi*, etc. *Mahāsēnāpati* was a high military officer, apparently higher than the *sēnādhyaksha* mentioned earlier. *Śrīkaraṇa* indicates a scribe-accountant and *purō*, prefixed to it, may possibly connect the official with the *pura* or capital of the Gaṅga monarch, although it may also be connected with Sanskrit *purā* and point to a front rank among the *Śrīkaraṇas*. The word *purō* occurs in another grant of Narasimha IV as *pōrō*, while the *Mādālā Pāñjī* speaks of two officers of a Gaṅga king named Anaṅgabhīma as *Pōra-Pāñjīdhara-Parīkshā* Mithuni Paṇḍā and *Pōra-Śrīkaraṇa* Suruya-Puranāyaka.³

Line 1 on the reverse of Plate VI says that the land granted to Dēvarathāchārya measured one hundred *vāṭis*. It is further said (lines 1-5) that on Paṇḍitavāra (Wednesday), the 2nd of the solar month of Vriśchika (Mārgaśīrsha) and the seventh *tithi* of the dark half of the lunar month in the 23rd Aṅka year, the *śrī-charaṇa* (king), when he was doing *japa* (counting of beads) after having offered worship at the *kataka* (city or residence) of Dēvakūṭa and when a number of officials were in his presence, granted two villages covering one hundred *vāṭis* of land to Dēvarathāchārya. The details of the date show that it corresponds to Wednesday, the 22nd November, A.C. 1396, a year after the grant was originally made. The officers present on this occasion were : (1) *Pātra* Māhāmuni *Purōhita*, (2) *Dvāraparīkshā* Trivikrama *Sandhivigraha* (*Sāndhivigrahika*), the same as No. 5 of the first list of officials quoted above, (3) *Vuḍhālēṅkā* Sōmanātha *Vāhinīpati*, and (4) *Bhītara-bhaṇḍāra-adhikārī* Narahari *Sandhivigraha*. In the official designation *Vuḍhālēṅkā*, the word *vuḍhā* is the same as Sanskrit *vriddha* (Prakrit *vuḍḍhā*)=*mahā*, while *lēṅkā* means a Śūdra servant of a king or a deity. *Vāhinīpati* was a commander of the forces, possibly the same as *Sēnādhyaksha* mentioned in the first list quoted above. The designation *Bhītara-bhaṇḍāra-adhikārī* (*bhītara* being the same as Sanskrit *abhyantara*) suggests that there was another officer styled *Bahir-bhaṇḍār-ādhyakārīn*. The *Bhītara-bhaṇḍāra-adhikārī* was probably the officer in charge of the treasury or store-house in the inner part of the royal palace. On this occasion also the *mudala* or arrangement regarding the grant was made in the presence of the officer *Purō-śrīkaraṇa* Viśvanātha *Mahāsēnāpati*. According to this arrangement (lines 4-5 on the reverse of Plate VI), the one hundred *vāṭis* of land granted to Dēvarathāchārya were offered in the form of two villages situated in the Madanakhaṇḍa *vishaya* which formed a part of Kōshṭhadēsa consisting of eight *khaṇḍas* or divisions (like the said Madana-khaṇḍa). Madanakhaṇḍa is later referred to as Oḍamvōlō (or Oḍamōlō)-Madanakhaṇḍa. The two gift villages are called here Sāisōgrāmī-Mōkshēśvara and Dakṣhiṇa-Rāḍasōgrāma, although later the former has been referred to only as Sāisōgrāma and the latter sometimes as Rāḍha' or °saō. The first village was a part of Sāisōgrāma, known as Mōkshēśvara. Kōshṭhadēsa or Kōṭhadēsa is the name of a Pargana in the Puri District ; but the expression may also indicate an area in the king's private possession.

¹ See *J. A. S. B.*, Vol. LXII, 1893, Part I, pp. 91, 93, 96, 99, 100.

² Cf. *Mādālā Pāñjī*, ed. A. B. Mahānti, Cuttack, 1940, pp. 27, 28, 30. Unfortunately, Mr. Mahānti has absolutely nothing to say about the meaning of such words, in spite of the fact that they are not recognised even in the voluminous *Pranōḍa Abhidhāna* (pp. 2891) published in 1942.

³ *Op. cit.*, p. 28. Some of the officers known from our record are also mentioned in several other inscriptions of the time of Narasimha IV. Cf. *J. A. H. R. S.*, Vol. VIII, pp. 70 ff.

Lines 5-11 say how on Saturday, the Mina-saṅkrānti on the eleventh *tithi* of the dark fortnight in the same year (*ē-srāhi*), the villages Sāisō and Dakṣiṇa-Rāḍasaō (*i.e.* South Rāḍasaō) granted to Dēvarathāchārya were made the *ḍūli-bhūmi* or temple land of the god Ugrēśvaradēva of Kōshṭhadēśa. The date corresponds to Saturday, the 24th February 1397 A.C., *i.e.* about three months later. The king (*śrī-charaṇa*) was then staying at the *kaṭaka* of Nārāyaṇapura and, while coming back from that place after having offered worship, had beside him the officers : (1) *Vuḍhālēṅkā Sōmanātha Vāhinīpati*, the same as No. 3 of the second list, (2) *Bhuvanēśvara Sandhivigraha*, (3) *Lakṣmaṇānanda Sandhivigraha*, and (4) *Bhūtarā-bhaṇḍāra-adhikārī* Narahari *Sandhivigraha*, the same as No. 4 of the second list, which has been quoted and discussed above. The *mudala* is said to have been settled in the presence of *Dvāraparikṣhū* Trivikrama *Sandhivigraha*, known from both the first and the second lists quoted above, and also of *Āmi-Purō-parikṣha-Mahāpātra* Gatēśvaradāsa Śrīchandana. The word *Āmi* in the official designation of Gatēśvaradāsa who had the title *Śrīchandana* (that came to be a title of nobility), seems to be the same as Arabic *Amīn* probably indicating an officer of the revenue or judicial department. This suggestion cannot be regarded as improbable in view of the use of words like *mukāvilā* (Arabic *muqābil*, Persian *muqābilā*) in the records of the Śūryavamśis, quoted above. The expression *ājñā-vōlā-mudalē* (literally, "according to the arrangement made in accordance with the words of the order") may suggest that the said arrangement was made by Gatēśvaradāsa on behalf of Trivikrama. The gift land (*śāsana*), having the boundaries fixed on all the four sides and including the temple (of Ugrēśvaradēva), was endowed with a *paṭā* or deed (lines 10-11). Thus, although originally Dēvarathāchārya, who seems to have been the priest of the god Ugrēśvaradēva, was intended to be the donee of one hundred *vāṭis* of land, the god himself was ultimately made the donee of the above land as well as of the land around the temple.

Lines 11-20 describe the first of the three plots of the gift land. It was the village of Sāisō situated in Oḍamvōlō-Madanakhaṇḍa. Its income to go to the king's revenue department (*kōṭha-vyāpārara bhāga*) is given in words as 322 *māḍhas* but in figures as 322/6 in which 6 indicates a fraction (*gaṇḍā*?) of the *māḍha*. *Māḍha* now indicates the weight of half a *tola* and the coin of this name referred to in the record was either of gold or silver of the said weight. It appears, however, that, in lieu of land, actually the revenue of the village called Sāisōgrāma, amounting to a little above 322 *māḍhas* possibly of silver was granted. The contraction *kai*, put after the amount of money in this case, is also noticed in the latter part of the inscription in lines 21 (*saē-satāisa-māḍha 127 kai*) and 26 (*triśa-vāṭi 30 kai*). It may have the meaning of the usual expression *aṅkēn-ūpi* which, however, is placed before the figures. Possibly it is a contraction of Sanskrit *kēvala* meaning 'only.'¹ The grant seems to have been made with *vriddhi* and *avadāna*. In Oriyā the word *avadāna* is used in the sense of a gift.² Thus the passage *vriddhi-avadāna madhya kari* may indicate "together with the power to improve and alienate the land." But it is better to suggest that the amount of income quoted included *vriddhi* and *avadāna*. In that case they would mean 'supertax' and 'tax' respectively.³ The record next enumerates the boundaries of the above village according to the determination of Thamaṭhi-nāēka(nāyaka) who was the *paṭihasta* (*i.e.* *pratihasta* or representative) of *Purō-śrīkaraṇa* Viśvanātha *Mahāsēnāpati*. The eastern boundary started from parts of the road to Chandraprabhā lying to the west of the *śāsana* (gift village) of Bhagavatīpura and ran up to the Hijala tree near or on the tank of or at Pōḍāpōḍā to the east of

¹ I am doubtful whether this *kai* is the same as the accusative-dative suffix *ku* found in Pl. VI B, l. 14, Pl. VII, l. 4.

² Cf. *ē-avadānamāna ē-bhōga-dēśa yē karaṇi sē Jagannāthanka drōha karaṇi* (J.A.S.B., Vol. LXII, 1893, Part I, p. 91).

³ For *vriddhāna* or *avadāna* meaning 'tax' in an Orissan record, see *Journ. Bomb. Hist. Soc.*, Vol. VI, p. 107, to which my attention was drawn by Mr. K. B. Tripathi.

Vāṅgarisōgrāma. The northern boundary began with parts of the road to the north of the house of Chidichidi lying to the south of Vāṅgarisōgrāma and of the three-pronged cattle track going to the house of the Brāhmaṇas and ended in half of the waters (*udhā-sōi* for Sanskrit *ardha-srōtas*) of the river Vāiṅgaṇī (later also called Vāiṅgaṇīā). The western boundary began with half of the waters of the Vāiṅgaṇī river to the east of Rāḍasaōgrāma and ended with parts of the cattle track going to Kuchiāgāi to the south of Āmvatōḥā on the river bank of Gōpīnāthapura on the further side (of the river Vāiṅgaṇī). The southern boundary began with Harāgaū to the north of Gōpīnāthapura and ran up to the northern bank of the river (Vāiṅgaṇī) and to parts of the three-pronged cattle track going to the *sūsanas* (gift villages) of Bhagavatīpura and Gōpīnāthapura. In all (*gā*), this was one village with fixed boundaries on all the four sides.

Lines 20-26 describe the second plot of land consisting of the village of Rāḍasaō (*i.e.* Dakṣiṇa-Rāḍasō) situated in the same *viśaya*. The grant was made with *vriddhi*, *saikā* and *avadāna*. The terms *vriddhi* and *avadāna* have been discussed above; the meaning of *saikā* is uncertain. It may stand for Sanskrit *śatikā* and indicate a tax collected on the basis of a hundred articles of a kind. The income of the village is given both in words and figures as 127 *māḍhas*, probably of silver. This income is qualified by a passage which seems to suggest that it was being enjoyed by the king's second queen (*majhi-ghara*) for worshipping the god Puruṣhōttama. The eastern boundary of the said gift village started with parts of the waters of the Vāiṅgaṇīā river to the west of Sāisōgrāma and ran up to parts of the road going to Rakatapaṭā (or Raktapaṭā) to the south of the temple land (of Ugrēśvaradēva). The northern boundary began with parts of the road to Rakatapaṭā to the south of the temple land and ended in parts of the waters of the Vārōgō (or Vārāgō) river. The western boundary started from parts of the waters of the Vārāgō river to the east of the Vijayalakshmīpura *sūsana* (gift village) and ended in parts of the cattle track below the embankment called Sudunāghāi in the Gōpīnāthapura *sūsana*. The southern boundary seems to have begun with parts of the cattle track on the river bank to the north of the Gōpīnāthapura *sūsana* and to the west of Āmvatōḥā and ended in parts of the waters of the Vāiṅgaṇīā river. In all (*gā*), it was one village with settled boundaries on all the four sides. As in the case of Sāisōgrāma, only the income of the village seems to have been granted to the donee.

The third piece of the gift land, situated in the same *viśaya*, is described in lines 26 ff. It consisted of 30 *vāṭīs* of land apparently around the temple of Ugrēśvara. The eastern boundary of this land, called a *grāma* without mentioning its name, ran from the Vāiṅgaṇīā river to the west of Vāṅgarisōgrāma to parts of the cattle track on the river bank to the east of Vāliāgrāma. The northern boundary ran from the Vōhāla road (possibly indicating a road marked by a Vōhāla tree) at the head of a field to the south of Vāliāgrāma to parts of (the waters of) the Vārāgō river. The western boundary seems to have started from parts of the waters of the Vārāgō river to the east of the Vijayalakshmīpura *sūsana* and ended in a point which is left out owing to inadvertence. The southern boundary ran up to parts of the road going to Rakatapaṭā to the north of Rāḍhasōgrāma. Line 2 on Plate VII says that the above land was in all (*gā*) one *grāma* having fixed boundaries on all the four sides. The next line says that the gift altogether consisted of three *grāmas* of which the *jīta*¹ or income was 449/5 *māḍhas* and the land measured 30 *vāṭīs*. It may be pointed out that 322/6 *māḍhas* and 127 *māḍhas* would make actually 449/6 *māḍhas*.

The above gift land was granted, according to lines 3-5, to Dēvarathāchārya to last as long as the moon and the sun would endure by means of the deed of gift, together with (*madhya kari* water, land, fish, tortoise, tree and forest and with the temple of Ugrēśvaradēva and the land around it. Lines 5-8 say partly in repetition of what was said above that Narasimhadēvavarman

¹ From Telugu-Kannaḍa *jīta* (from Sanskrit *jīvita*), 'pay, wages'. The *Mādala Pāñji* (*op. cit.*, p. 29) also uses *jīta* in the sense of revenue-income.

of the Ātrēya *gōtra* granted the two villages of Sāisō and Dakṣiṇa-Rāḍasōō, situated in the Ōḍamōlō-Madanakhaṇḍa *viśhaya* and having the boundaries specified above, to the Brāhmaṇa Dēvarathasārman of the Ātrēya *gōtra*, a student of the Kāṇva branch of the Yajurveda, as a permanent rent-free holding, together with water, land, fish, tortoise, tree, forest, sand and *bhiṭā* (homestead land). It is interesting to note that the Gaṅga king adopts the Kshatriya name-ending *varman* as his ancestor Bhānu II does in his Puri plates.¹ The *Tārīkh-i-Firūzshāhī*,² while describing Sulṭān Firūz Shāh's invasion of Jājnagar (*i.e.*, the Gaṅga kingdom of Orissa) during the reign of Bhānu III, speaks of the Rāis of that country (*i.e.*, the Gaṅga kings) as Brāhmaṇas. It thus appears that the Gaṅga monarchs claimed variously to be Brāhmaṇas or Kshatriyas of the Ātrēya *gōtra*, although basically they must have been Dravidians. As I have shown elsewhere the claim to the Ātrēya *gōtra* was essentially connected with the genealogy of the Gaṅga family, fabricated by the court-poets of Anantavarman Chōḍagaṅga.³ According to lines 8-9, the *Tāmrādhikārī* (the same as the *Sāsanaadhikārī* or keeper and writer of records), Naraharī *Sandhikigraha*, appears to have received as his perquisite one *vāṭī* of land out of the gift land, according to an arrangement approved of by the respectable people of the villages. The next line says how the *Tāmrādhikārī* (engraver of the plates), Gurudāsa *Sēnāpati*, received half of the area of land received by the *Tāmrādhikārī*. Gurudāsa, however, appears to have been too big an officer to engrave plates and it is possible to think that he got the work done by a coppersmith.⁴ The charter proper is followed in lines 10-18 by nine of the usual imprecatory and benedictory verses. The above verses are followed by three new stanzas in lines 18-23. The text of the verses is extremely corrupt.

A number of geographical names are mentioned in the inscription. The different orders of the king in regard to the grant recorded here were issued when he was staying at Vārāṇasī (modern Cuttack), Dēvakūṭa and Nārāyaṇapura. Of the three plots of gift-land, the first consisted of Sāisōgrāma (also once called Sāisōgrāmi-Mōkshēśvara) and the second of the South Rāḍasōōgrāma (also called Rāḍha² and 'saōgrāma), both situated in the *viśhaya* called Kōshṭhadēśa-Madanakhaṇḍa or Ōḍamōlō (Ōḍamōlō)-Madanakhaṇḍa, while the third plot consisted of 30 *vāṭīs* of land belonging to the temple of the god called Kōshṭhadēśa-Ugrēśvaradēva. In describing the boundaries of Sāisōgrāma, mention has been made of Bhagavatīpura-śāsana, Chandraprabhā, Vāṅgarisōgrāma, Vāṅgaṇī-nadī, Rāḍasōō, Gōpīnāthapura-śāsana, Āmvatōṭā, Kuchiāgāi and Harāgaū. In the description of the boundaries of Dakṣiṇa-Rāḍasōōgrāma, mention is made of Sāisōgrāma, Vāṅgaṇī-nadī, Raktapaṭā, Vāragō (or Vārōgō)-nadī, Vijayalakshmīpura-śāsana, Gōpīnāthapura-śāsana, Sudunāgbhāi and Āmvatōṭā. In connection with the boundaries of the third plot of land, are similarly mentioned Vāṅgarisōgrāma, Vāṅgaṇīyā-nadī, Vāliāgrāma, Vāragō-nadī, Vijayalakshmīpura, Rāḍasōō and Raktapaṭā. The three plots of land were adjacent to one another. M. M. Chakravartī located the villages approximately at 85° 56' 45" long. by 20° 10' 17" lat. on the left side of the Bhārgavī river and close to the P. W. D. Bungalow at Khirkhia. The Survey of India sheet map No. 73 H 3 B shows, between the rivers Bhārgavī and Dhanuā, the locality called Ugreswar Deuli having the Bhārgavī in the west, Banguras (Vāṅgarisō) Śāsan in the north, Gōpīnāthpur towards the south and Bhagavatīpur towards east-south-east. As a result of the grant under discussion, the old names, *viz.*, Sāisō and Rāḍasōō, appear to have given place to the new name, *viz.*, Ugrēśvara-dēulī, suggested by it.

¹ From the original plates and their impressions.² Sanskrit *Vriśchika-śukla-aikādaśyām*.³ Sanskrit *abhyantara-nagarē*.⁴ Oriyā *māhā* stands for Sanskrit *māhā*.⁵ The letters *gra* and *ka* had been omitted originally but were later inserted, the former below the line and the latter compressed between the preceding and following letters.⁶ The reading may be *mudrayā*. In that case, *mudrā* is used for *mudala* found elsewhere in the same context.⁷ Sanskrit *utsrījya*.⁸ In the left margin. This has a different form than that of 6 at the left margin of the reverse of Plate VI of the Kendupatna plates (set I) of Narasimha II (*J. A. S. B.*, Vol. LXV, 1896, Part I, Plate XVIII).⁹ The letter *mī* had been originally omitted and was later imperfectly formed between the preceding and following letters. The word *bhūmi* is, however, unnecessary in the context.¹⁰ Sanskrit *Vriśchika*. The letter *dvi* has really been written with *d* having both medial *i* and *u*.¹¹ This *vi* is redundant. *Thāu*=*ētēshu sthītēshu* of Plate VIA, lines 23 24.¹² Sanskrit *mahāsēnāpati*.

¹ Better read *dēulī-bhūmi* | ; cf. line 22 below. But the text as it is may also be justified ; cf. line 26 below.

² The letter *thē* is redundant.

³ I prefer *hiḍala* to *dei-jala* at the suggestion of Mr. K. B. Tripathi.

⁴ The name of the river is unnecessarily repeated.

⁵ Possibly *ādi kari* is intended.

⁶ I.e., *Dakṣhiṇa-Rāḍasaōgrāma*.

⁷ The space expected to be covered by the name of the river referred to is left blank with the only exception of small stroke. Apparently it was intended to supply the name later.

⁸ Possibly we have to add the expression *ādi kari* after *adha*.

¹ The difference in the forms of some letters on this plate from those of the previous lines may suggest that this plate was engraved by a different person. There are numerous errors in the writing on this plate.

² The *daṇḍas* are unnecessary.

³ It seems that the reading intended was *ādi kari . . . paryantēkē sīmā*. Thus some further indications regarding this boundary appear to have been inadvertently omitted. In *adhā*, *dh* looks like *dhdh* which is the form of *dh* in the Kalinga script. As to *kṣi* (*śchi*), it may be pointed out that *kṣh* is often written for *chh* in Oriyā inscriptions.

⁴ Possibly *sīmā-samākrānta* was intended as in other places.

⁵ Read *sāndhivigrahikasya*. The *daṇḍas* are superfluous.

⁶ Possibly the reading intended is *ēk-āmsaḥ* or *ēkā vāṭi*.

⁷ The metre of this verse and the following four verses is *Anuṣṭubh*.

⁸ Read *dānāch=chhrēyō*.

⁹ Read *kōṭara-vāsinaḥ*.

No. 49—METHI INSCRIPTION OF YADAVA KRISHNA ; SAKA 1176

(1 Plate)

P. B. DESAI, OOTACAMUND

Sri. N. Lakshminarayan Rao, officiating Government Epigraphist for India, copied this inscription¹¹ in the course of his official tour in November 1949 at the village of **Methi** which is about 30 miles from Dhulia, the headquarters of the West Khandesh District, Bombay State. As a member of the office of the Government Epigraphist for India, I had an opportunity of studying the epigraph and I edit it here¹² with the kind permission of the above authority.

¹ The *danḍa* is superfluous.

² The letter *ma* is imperfectly formed.

³ Metre : *Vasantatilaka*.

⁴ Metre : *Anushtubh*.

⁵ Metre : *Vasantatilaka*.

⁶ Read *vichishu* for the metre's sake.

⁷ Metre : *Sārdūlavikrīḍita*. The language of the third foot of this verse is faulty.

⁸ Read *viśvataś*.

⁹ Metre : *Sragdharā*.

¹⁰ The intended reading seems to be *sarva* or *bhūta*.

¹¹ It is registered as A. R. No. 326 of 1949-50 of the Government Epigraphist's office collection.

¹² The inscription has been published in the Marathi journal *Samśōdhaka*, Vol. VI, No. 3 (1937, October), pp. 214-17. But the published text contains misreadings and the study lacks scientific treatment.

The inscription comprising 13 lines is engraved on the lintel of the entrance to the central hall of the Vishṇu temple near Haribā's well, popularly known as the Anantaśayana temple. The inscribed area measures 59" long and 12" broad. The record is in a good state of preservation. The characters are Nāgarī of the 13th century A.C., being normal for the period. The average height of the letters is $\frac{3}{4}$ ".

The *prishṭhamātrās* are used to denote the medial *ai* and *au* in general. The occasional use of *v* for *b* and *vice versa* may be noted ; e.g., *Vrahmā* for *Brahmā* in line 1 and *sarbē* for *sarvē* in line 2. Noteworthy also is the substitution of *sh* for *kh*, as in *Viśāsha* for *Viśākha* in line 2 ; and *vice versa* as in *ēkhā* for *ēshā* in line 13. The orthographical convention of doubling the consonant after *r* is not generally followed except in a few cases, e.g., *varṇanāṁ* in line 7 and *utkīrṇā* in line 13. There are a large number of clerical errors, the majority of which constitute the improper use of the *visarga* : e.g., the *visarga* is used superfluously in the following cases, *namaḥ-sribhu°* in line 1 and *athaḥ* in line 7 ; the same is wrongly omitted in the following instances, *Rudrā* for *Rudrāḥ* in line 1 and *viśvarūpa* for *viśvarūpaḥ* in line 2. *Nṛisimha* is written as *Nṛisimgha* in line 8.

The language is Sanskrit and the composition is faulty in many places. The words *muni* and *bhūmi* are spelt as *muni* and *bhūmi* for the sake of metre in lines 2 and 4. The expression *chārīma* in the compound *chitra-charitra-chārīma-chamatkārāḥ* (1.5) is obscure. The form *yaśasya-* is incorrectly used for *yaśasya-* (1.7). Metrical flaws may be detected in the use of the proper names Dhāḍipaka and Vēsugi in line 4. Such defects have been corrected in the body of the text and in the foot-notes. The major part of the record comprising lines 1-8 and 12-13 is composed in verse and the rest in prose. The verses are duly numbered and each half is denoted by a *daṇḍa*. The poetry is not of high order.

The epigraph commences with an invocation to god Vāsudēva. God Vishṇu and his universal form (*viśvarūpa*) are praised in the next two verses (vv. 1-2). Then comes the date and a brief statement of the gift (v. 3). The genealogy of the princes who were born in the lineage of Krishna, i.e., the Yādavas of Dēvagiri, is summarised in the two following verses (vv. 4-5). Verse 6 is devoted to the eulogy of Krishna, the reigning king of this family, who is said to be brave, diplomatic and handsome. This ruler made a free gift of the village Kurukavāṭaka. Half the income derived from this was to be utilised for the daily worship and offerings, etc., of the god Bhadrachari and the remaining half to be bestowed upon the Brāhmaṇas engaged in the performance of sacrifices (vv. 7-8). In the next verse is described the temple of Bhadrachari who appears to be identical with god Nṛisimha (v. 9). Then follows a list of particular Brāhmaṇas who were beneficiaries of the endowment (lines 8-11). A person named Gaṅgādhara is said to have made over houses, land and money, possibly for the convenience of the Brāhmaṇas (v. 11). Verses 12-13 are imprecatory. Verse 10 contains a reference to a person named Siddha Sārasvata of the Kāśyapa family who appears to have cut the stone suitably for inscribing the record. In the last verse which is however left unnumbered, it is stated that the god's image was fashioned with due dimensions according to the prescribed code and that the record (*praśasti*) was incised by the sculptor Hēmadēva¹ (v. 14).

The date expressed in chronogram is stated thus : Śaka 1176, Ananda, Viśākha (i.e., Vaisākha), śu. Jayanī, Sōma. Jayanī appears to be the name of the Ēkādaśī or the eleventh day of the fortnight. As such if we equate Jayanī with the 11th *tithi*, the date would regularly correspond to 1254 A.C., April 29, Wednesday, if we treat Sōma of the original as a mistake for Saumya. It is to be noted in this connection that all the twenty-four Ēkādaśīs of the Hindu

¹ This Hēmadēva has been identified with the famous minister and scholar Hēmādri by Mr. Kulkarni, *ibid.* This is ridiculous.

calendar are given specific names, such as Kāmadā (Chaitra śu. 11), Varūthinī (Chaitra ba. 11), etc., though this particular name is not found in the list given by Swamikannu Pillai.¹

The genealogy of the Yādava kings of Dēvagiri is recounted in a cursory fashion and mutual relationship of the princes enumerated in the series is not explained. There is a remark, however, at the end of the account to the effect that they were born in succession. These names are as follows : Dṛiḍhaprahāra, Sēunna I, Dhāḍipaka, Bhillama I, Rāja I, Vādugi, Bhillama II, Vēsugi, Bhillama III, Sēunna II, Rāja II, Mālugi, Kṛishṇa I, Bhillama IV, Jaitra I, Siṁghaṇa, Jaitra II, Kṛishṇa II. Dṛiḍhaprahāra is prefixed by the expression *vajra*, obviously for the necessity of metre. Sēunna again is a metrical modification for Sēūṇa.

A comparison of the above genealogy with the genealogical accounts of this family as compiled by the late Dr. R. G. Bhandarkar² and Dr. Fleet,³ reveals the following facts. The three generations of Vādugi II, Vēsugi II and Bhillama IV, that intervened between Bhillama III and Sēūṇachandra II in the account of Bhandarkar are omitted in our list. Rāja II of our list, which appears to be a new name, has perhaps to be identified with Siṁghaṇa of Bhandarkar. Further, Kṛishṇa I of our epigraph may reasonably be equated with Karṇa⁴ of Fleet's statement. It has however to be noted that neither of these names figure in the genealogy of Bhandarkar. Mālugi and Mallugi are identical. Some more names in Bhandarkar's account are omitted in our list.

We may briefly notice here a few historical facts about some of these Yādava princes in the light of epigraphical discoveries made during the past decades. Firstly we have the Āsvi plates⁵ from the Ahmadnagar District, dated in Śaka 1020 or 1098 A.C. This record gives the genealogy of the Yādava family and introduces Mahāmaṇḍalēśvara Irammadēva as a subordinate of the Western Chālukya ruler Vikramāditya VI. The epigraph contains errors committed by the engraver, which seem to have been increased by its unscientific editing.⁶ We may equate this Irammadēva with Parammadēva,⁷ elder son of Sēūṇachandra II, figuring in the genealogy of Bhandarkar. The Āsvi inscription further states that this Yādava prince vanquished the invincible Bhuvanaikamalla, who must be Sōmēśvara II of the Western Chālukya family, and secured the kingdom for Paramardhin, i.e., Vikramāditya VI. A similar achievement, viz., helping Vikramāditya VI against his enemies and establishing him in the sovereignty of Kalyāṇa, is attributed to Sēūṇachandra II.⁸ From this it is gathered that both Sēūṇachandra II and his son Parammadēva were staunch supporters of the Chālukya prince and played a prominent role in his struggles for kingship.

The disclosure made by the present epigraph by furnishing the name of Kṛishṇa I as the father of Bhillama IV (Bhillama V of Bhandarkar) and his identity with Karṇa of the Gadag inscription

¹ *Indian Ephemeris*, Vol. I, part I, pp. 59-65. It may be noted that Vaiśākha śu. 11 is called Mōhinī according to this authority. If the above assumption be correct, different names appear to have been in vogue for these *tithis* at different times.

² *Bom. Gaz.*, Vol. I, part II, p. 236.

³ *Ibid.*, p. 519.

⁴ The confusion between Kṛishṇa and Karṇa may be noticed in other cases also. For instance, among the Southern Kalachuris, Jōgama's father is referred to both as Kṛishṇa and Karṇa; above, pp. 24-25. This confusion must be due to the influence of Prakrit, particularly the southern speeches, wherein both Kṛishṇa and Karṇa yield the common form Kanna or Kaṇṇa and Kannara; cf. above, Vol. XV, p. 318.

⁵ *Bhārata Itihāsa Samśōdhaka Maṇḍala Quarterly*, Vol. III, No. 1.

⁶ In regard to the defects in editing the following may be pointed out : i) No facsimiles of the plates are published. ii) The name of the Yādava feudatory is read as Iramma in line 30 and Ārama in line 42. iii) This Iramma is regarded as the successor of Bhillama, whereas it is clear from lines 25-30 that he was the son and successor of Sēūṇendu or Sēūṇachandra.

⁷ I am inclined to believe that the original name is Paramma and that it is incorrectly read as Iramma and Ārama; for the latter would be a strange name for a prince.

⁸ *Bom. Gaz.*, Vol. I, part II, p. 515.

are important ; for it is thus established beyond doubt that Bhillama was the grandson of Mallugi or Mālugi and not his son as described by Hēmādri. The reason for this omission by Hēmādri might be due to the fact that Kṛishṇa or Karṇa died young and did not rule.¹

It would be worth while to make an attempt to identify some of the historical personages mentioned in the introductory verses (5-10) of Jalhana's *Sūktimuktāvali*,² which may be summarised as follows. Dādā, a commander of the elephants under Mallugi, overawed the troops of Vijjaṇa. After the demise of Dādā, his four sons, Mahīdhara, Jalha, Sāmba and Gaṅgādhara, upheld the authority of Mallugi. Mahīdhara harassed Bijjaṇa's forces with the prowess of his mighty arms. He appears to have encountered Bijjaṇa's army for a second time and lost his life on the field of battle. Mahīdhara was succeeded by Jalha who helped Bhillama in attaining undiminished royalty.

These events, it may be noted, refer to a period of about a generation prior to the age of Bhillama, the virtual founder of Yādava sovereignty. As we shall see presently, Bhillama commenced his reign from 1185-86 A.C. Hence we may place the above incidents approximately between 1160 and 1180 A.C. Now it was during these years that the Kalachuris rose to power in Karnāṭaka under Bijjala and set up their independent rule. Hence we are justified in identifying Vijjaṇa and Bijjaṇa of the above account with the Kalachuri usurper.

Coming to the reign of Bhillama, a good many points deserve consideration. Firstly, we may consider the commencement of his reign. Different records yield different dates for the initial year of his reign, which varies from 1185-86 to 1187-88 A.C. But two epigraphs, one from Nimbāl³ and another from Muttigi⁴ in the Bijāpur District, citing the cyclic years Plavaṅga and Paridhāvi as the 3rd and the 8th year respectively, prove that the initial year was Viśvāvasu which may be equated with 1185-86 A.C. Secondly, we may examine the early stronghold of Bhillama and of the Yādava family. This seems to have been in the Bijapur District, although, according to Hēmādri,⁵ he founded the town of Dēvagiri which became the capital of his family. The Nimbāl inscription mentioned above states that Bhillama was ruling the kingdom in 1187 A.C. from a place called Taḍavalage which is the same as modern Taḍvalgā in the Inḍi taluk of the Bijapur district.⁶ Two years later, i.e., in 1189 A.C., he figures as ruling from another place in the same district, by name Tenevalage⁷ which may be identified with the present day Teligi in the Bāgalkōṭ taluk. No inscription connecting Bhillama with Dēvagiri has been discovered so far. But we have the evidence of at least three inscriptions⁸ of the reign of Jaitugi showing that he was in the capital of Dēvagiri in the years 1192 and 1196 A.C. The earliest epigraphical allusion to Dēvagiri as the Yādava capital was noticed by Fleet in an inscription of 1210 A.C. of the reign of Siṅghaṇa.⁹ But this statement now requires revision as pointed out above. The fact appears to be that though Bhillama selected Dēvagiri as his capital and started new constructions, he could hardly settle therein and the work was completed in his son's time by 1192 A.C.

¹ At this point Hēmādri simply passes over and observes that the fortune of the Yādava family discarded the king's sons and courted the arms of Bhillama, enamoured by his excellence ; *Bom. Gaz.*, Vol. I, part II, p. 271, verse 37. It may be gathered from this that Bhillama, being the son of a junior prince, was not the rightful claimant and that he rose to eminence from obscurity by dint of his ability.

⁵ *Bom. Gaz.*, Vol. I, part II, p. 272, verse 39.

⁶ Above, pp. 96-97.

⁷ *Bom. Gaz.*, Vol. I, part II, p. 520. This place has not been identified by Fleet.

⁸ B. K. collection, Nos. 43 of 1936-37, and 157 of 1933-34 ; *Arch. Sur. An. Rep.* for 1929-30, p. 175.

⁹ *Bom. Gaz.*, Vol. I, part II, p. 520.

The third point that requires scrutiny is the end of Bhillama's reign. According to Bhandarkar,¹ Bhillama was succeeded by his son Jaitugi in Śaka 1113 or 1191 A.C. and it has been suggested by Fleet² that Bhillama lost his life in the decisive encounter against Vira-Ballāla that took place in the latter part of that year. But epigraphic evidence is now precise to show that neither of these views is accurate. The above noted inscription from Muttigi³ in the Bāgewādi taluk of the Bijāpur District refers itself to the 8th regnal year of Bhillama and cites the date Paridhāvi, Śrāvaṇa śu. 15, Thursday. In another epigraph from Hipparagi⁴ in the Sindagi taluk of the same district, dated Śaka 1115, Paridhāvi, Bhādrapada ba. madhyāshṭakī, Monday, Kanyāsaṅkramaṇa, Bhillama figures as making the gift of a village to a local temple. A third epigraph from Kaḍlēvād⁵ in the same taluk refers itself to the reign of Jaitugi and is dated Śaka 1114, Paridhāvi, Pushya ba. 10, Sunday, Uttarāyaṇa-saṅkrānti. The dates of these three inscriptions are not quite regular; however we may approximately⁶ equate them with July 26, September 1 and December 31 of 1192 A.C. respectively. Now it is easy to see that Bhillama was alive and active on the first two of these dates and that he must have died and was succeeded by Jaitugi between the last two dates.⁷

The fourth point worth examination is in regard to the identification of some of the adversaries of Bhillama. In verse 12 of Jalhana's *Sūktimuktāvali*, which praises the prowess of Bhillama, it is said that he frightened the forces of Mailugi. This Mailugi was in all probability a little known son of the Kalachuri usurper Bijjala. He is also called Mallugi and Mallikārjuna. He figures in three inscriptions of his father's reign⁸ and three more refer to his own reign.⁹ It is gathered from the latter that he ruled for two years, 1175-76 A.C., in between the reigns of his brothers, Rāya-Murāri Sōvidēva and Saṅkama, from his headquarters at Māsanūr¹⁰ in the Shōlāpur District. It is quite likely that the two ambitious chiefs, Bhillama and Mailugi operating in the contiguous regions of the Bijāpur and Shōlāpur Districts, came into conflict with each other.

The last two lines of verse 38 in the Introduction to Hēmādri's *Vratākhaṇḍa*,¹¹ containing allusions to Bhillama's exploits, read thus :

Yō vā Maṅgalavēṣṭakam kṣhitipatim Śrī-Billaṇam jaghnivān |
Kalyāṇa-śrīyam=apy=avāpya vidadhē yō Hōsalēṣam vyaṣum ||

The text of the first of these lines appears to be faulty in the light of the following facts which also help us to suggest suitable correction. Maṅgalavēṣṭaka is no doubt identical with the modern town Maṅgalavēḍhe near Paṇḍharpur. No king bearing the name Billaṇa is known to have ruled from this place. On the contrary considerable epigraphic evidence is available¹² to show that this

¹ *Ibid.*, p. 238.

² *Ibid.*, pp. 504 and 519-20.

³ B. K. coll., No. 108 of 1929-30.

⁴ *Ibid.*, No. 30 of 1936-37.

⁵ *Ibid.*, No. 43.

⁶ I have considered the cyclic year, the month and the *tithi* as the substantial parts of the dates, ignoring the other details. I have assumed *madhyāshṭakī* of the second record as equivalent of *ashṭamī*.

⁷ Compare *Arch. Sur. An. Rep.* for 1929-30, p. 172 and 1936-37, p. 109.

⁸ B. K. coll., Nos. 50 of 1938-39, 63 of 1936-37 and 120 of 1933-34.

⁹ B. K. coll., Nos. 96 of 1936-37 and 81 of 1937-38; *Arch. Sur. An. Rep.* for 1929-30, p. 175. This prince's rule is also referred to in the following three epigraphs of subsequent reigns: *Ep. Carn.*, Vol. VII, Sk. 197; Vol. XI, Dg. 44; *Sources of Med. His. of Dekkan*, Vol. II, p. 50.

¹⁰ B. K. coll., No. 96 of 1936-37. I have discussed at length the identity of this place in my lectures on the Kalachuris of Karnāṭaka delivered in February 1951 under the auspices of the Kannaḍa Research Institute, Dhārwar. Māsanūr figures prominently in the literary work *Rēvaṇasiddhēśvaradēvara Raḡale*. These lectures are under publication in the Journal of the Kannaḍa Literary Academy, Bangalore.

¹¹ *Bom. Gaz.*, Vol. I, part II, p. 271.

¹² Compare above, p. 27, n. 8. I have dealt with this subject exhaustively in my lectures on the Kalachuris referred to above.

place, the ancient name of which was Maṅgaḷivēḍa or Maṅgaḷavāḍa, was the ancestral seat and an important stronghold of the Kalachuris of Karnāṭaka right from the beginning until their last days. It was the secondary capital of the Kalachuri rulers even during the period of their usurpation and the later members appear to have resorted to this place after the overthrow of the Kalachuri regime. Now among the Kalachuris more than one prince is known to have borne the name Bijjala and an epigraph from Saṅkh,¹ in the Jath taluk of the Southern Satara District, discovered recently, reveals that a prince by name Vira-Bijjala, son of Rāya-Murāri Sōvidēva, was administering this area at least till 1192 A.C., November 20. It was very probably this Vira-Bijjala who was worsted by Bhillama. In this connection a word of explanation seems necessary in regard to the interpretation of the word *jaghnivān* in the above citation. It may be taken to mean 'struck' and not 'killed'; for it is seen from the epigraphic evidence adduced above that Bhillama and Vira-Bijjala were both alive until the latter part of the year 1192 A.C. and that the former might have predeceased the latter by a few days. This interpretation is further justified by another word occurring in the above passage, *viz.*, *vyasu*, which cannot be interpreted in its literal sense as 'lifeless'; for the fact that no Hoysaḷa king² was slain by Bhillama would go contrary to such an interpretation. In the light of the above discussion the text of the first line in the above citation with its suggested correction will be as follows :—

Yō vā Maṅgalavēṣṭaka-kṣhīṭipatim Śrī-Bijjaṇam³ jaghnivān |

Proceeding to the reign of Siṅghaṇa a very large number of epigraphs has come to light. It is seen from these that a great amount of divergency prevails in regard to the reckoning of the initial year of his reign which varies from 1197 to 1210 A.C. We have therefore to conclude that Siṅghaṇa was actively associated with his father in the administration of the kingdom long before the latter's demise, although he must have assumed sovereignty independently in 1210 A.C. only after the event.⁴

Siṅghaṇa is known to have been succeeded by his grandson Kṛishṇa actually in 1247 A.C.; but there are inscriptions which show that he was associated with his predecessor's rule one or two years prior to this date.⁵ Inscriptions of Kṛishṇa are found in the Districts of Belgaum, Bijāpur, Dhārwar and Bellāry and further south in the Mysore State. It is seen from this that he held under his control major part of the regions conquered by his grandfather in the course of his triumphant southern expedition. Kṛishṇa himself, as known from other sources,⁶ directed military expeditions against his enemies though the present epigraph is silent about them.

We may incidently note that besides the four major dynasties of Yādava extraction that ruled over the areas of Karnāṭaka, *viz.*, the Rāshṭrakūṭas⁷, the Hoysaḷas, the Yādavas of Dēvagiri

¹ B. K. coll., No. 108 of 1940-41. The date of this inscription is irregular and its approximate Christian equivalent only is used here.

² Dr. Bhandarkar suggested that the Hoysaḷa king Narasiṃha was put to death by Bhillama. This suggestion is unjustified as Narasiṃha was dead as early as 1173 A.C.; *Bom. Gaz.*, Vol. I, part II, p. 238 and *Historical Inscriptions of Southern India*, p. 351. One more instance requiring similar interpretation would be the expression *uchchādyā* occurring in the Gadag inscription of Vira-Ballāḷa. It has to be translated as 'having defeated' and not literally as 'having destroyed.' Compare *Ind. Ant.*, Vol. II, pp. 300 and 303 and above, Vol. III, p. 218.

³ According to another reading Billāṇam would be substituted by Vajriṇam. In this case Vajrin may be taken to be the Sanskritisation of Bijjaṇa. Compare above, p. 28, n. 1.

⁴ The following inscriptions among others would yield 1197 A.C. as the initial year of Siṅghaṇa's reign: B. K. coll., Nos. 68 of 1928-29, 89 of 1929-30; also compare *Arch. Surv. An. Rep.* for 1929-30, p. 172. B. K. Nos. 181-82 of 1933-34 yield 1198 A.C. as his initial year.

⁵ A. R. No. 426 of 1926 and B. K. No. 50 of 1933-34 mention Kilaka as the third year of Kṛishṇa's reign. This shows that Parābhava or 1246 A.C. was the first year.

⁶ *Bom. Gaz.*, Vol. I, part II, p. 527; above, Vol. XXV, p. 204.

⁷ The following inscriptions among others refer to the Yādava lineage of the Rāshṭrakūṭas: *S. I. I.*, Vol. IX, part I, No. 68; Vol. XI, part I, No. 9.

and the Mahārājas of Mysore, there flourished a few more minor chiefs of the same lineage, though they never rose to eminence. Some of them deserve brief notice here. One was *Mahāsāmanta* Kuppeyarasa of the Yādava family¹ who was administering in the area of the Gadag taluk and the Muṇḍargi *pēṭhā* of the Dhārwar District as a feudatory of the Rāshtrakūṭa monarch Amoghavarsha I in 865-68 A.C. He bore the title *Āhavāditya*. Another chief named Kuppādēva who apparently belonged to the family of Kuppeyarasa, bearing the designation *Mahāsāmanta* and claiming descent in the Yādava family, figures as a subordinate of Rāshtrakūṭa Kṛishṇa II about thirty years later. A part of the Bellāry District was also under the rule of this chief who had his capital at modern Mēvuṇḍi in the Muṇḍargi *pēṭhā*.² From Kakkūru in the same *pēṭhā* comes an inscription³ of 1113 A.C., which introduces Mahāmaṇḍalēśvara Permāḍiyarasa of the Yādava family, as a subordinate of the Western Chālukya king Vikramāditya VI. It is easy to surmise that his chief was a later scion of the family of Kuppeyarasa. This Permāḍiyarasa who was administering the tract of Māsavāḍi, bore the title *Dvārāvātipuravarādhīśvara* which is met with in the *prasasti* of the Hoysaḷas and that of the Yādavas. Another family of feudatory chiefs of the Yādava extraction appears to have functioned in the area of the Bijāpur District. This is gathered from an inscription at Bidarkundi⁴ in the Muddebihāl taluk of the district, which is dated in 1032 A.C. and mentions Nāgavarmarasa bearing the title *Yādava-Nārāyaṇa* as a subordinate of Jagadēkamalla I of the Western Chālukya dynasty. It is noteworthy that the title *Yādava-Nārāyaṇa* occurs conspicuously in the *prasasti* of the Yādavas of Dēvagiri.

The Brāhmaṇas who were beneficiaries of the endowment are twentyfive in number as mentioned in the present record. They belonged to the following fifteen *gōtras*: Agasti, Bhāradvāja, Bhārgava, Kāḍva, Kāśyapa, Kaṇḍinya, Kauravya, Kausika, Kṛishṇātra (Kṛishṇātrēya), Lōhita, Śāṇḍilya, Sāṅkara, Vachchhapurōdha, Vachchhī, and Vātsyāyana. Some of these names are not given in their proper forms in the original and they have been corrected here. But still there are certain discrepancies. For instance, Kāḍva appears to be a mistake for Kāṇḍva, *i.e.*, Kāṇva; Vachchhapurōdha and Vachchhī seem to bear connection with Vatsa or Vaksha.⁵ The gift village Kurukavāṭaka may be identified with modern Kurukavāḍē, a village not far away from Mēthi.

TEXT*

[Metres : Verses 1, 7-8 and 11-14 *Anuṣṭubh*; vv. 3-5 and 9 *Śārdūlavikrīḍita*; vv. 2 and 6 *Sragdharā*.]

¹ The composition of this chronogram is incorrect and the inaccuracy is evidently due to the exigency of metre. The correct form should be *rasa-muni-samkhyāka-rudraiḥ*.

² Sandhi is necessary here and as such the expression should read *śatair=ānandē*.

³ Read घाडीपको or घाडिप्पको if the metre is to be honoured.

⁴ Read वेसूगि to honour the metre.

⁵ Read भूमिभृ- correctly though it violates the metre. [भूमी, though uncommon, is not wrong.—Ed.]

⁶ Read इति. There appears to be some correction about the letter *va* in the original.

⁷ The expression अश्रोत्रं appears to denote here, 'not owned by a *śrōtriya*, i.e., Brāhmaṇa, learned in the Vēdas.'

⁸ Read यशस्यायनं.

¹ The construction of this verse is faulty.

² The names of the donees are mentioned without the Sanskrit case-endings and in such forms as were in vogue, e.g., Upādhyā, Gāṅgaiyā, Ātā (probably a corruption of Ananta). Some of the *gōtra* names also are not properly spelt.

³ There is an *anusvāra* above this letter, which may be ignored.

⁴ A blank space for about 6 letters is left out before this name. This should have contained the name of the *gōtra* of the individual.

⁵ The metre of this verse is corrupt. Perhaps it was intended to be in the *Upajāti* metre. The sense also is not quite clear.

⁶ Better read घटिता त्वियम्.

No. 50—TWO INSCRIPTIONS FROM KELGA

D. C. SIRCAR, OOTACAMUND

The late Mr. B. C. Mazumdar published in this journal, Vol. XII, pp. 237 ff., a paper entitled 'Sōnpur Plates of Kumāra Sōmēśvaradēva'. The plates were found buried in a field in the village of Kelgā in the Uttara-tīra division (*i.e.*, the 'Northern Bank' division lying to the north or left of the Mahānadī) in the old Sonepur State in Orissa. There were altogether four copper plates strung on a copper ring to which a brass seal of the shape of a double-petalled lotus was found soldered. The ring was, however, found cut out and Mazumdar believed that two of the four plates were forged and substituted in the original document at a later date. Three of the plates, marked A, B and C by Mazumdar, were found to be of the same size and were supposed to bear fragments of a partially forged charter of the Sōmavamśi prince Sōmēśvara, while the fourth plate, slightly smaller in size than the other three plates and marked D by Mazumdar, was supposed to record a forged supplementary grant in favour of the son of the donee of Sōmēśvara's charter. Mazumdar suggested that Sōmēśvara's charter consisted originally of four plates engraved on one side only, but in the place of the second and the fourth plates—now missing, two plates engraved on both sides were substituted, and one concluding line was attempted unsuccessfully to be engraved on the reverse side of the plate which was originally the third plate. He further observed, "When the original grant was first tampered with, the ring was cut open, and the plate C and another new forged plate (subsequently removed) must have been put in." The reasons for these changes or forgery are not of course now apparent. In a note on the above observations of Mazumdar, the late Dr. Sten Konow, the then editor of the *Epigraphia Indica*, suggested that probably the original charter was written on three plates of which one, inscribed on both the sides, was missing. This was because Mazumdar's suggestion regarding all the four plates being originally written on the obverse only was palpably improbable.

The said plates are now preserved in the Asutosh Museum of Indian Art attached to the University of Calcutta, and I had an opportunity of examining them through the kindness of Mr. D. P. Ghosh, Curator of that Museum. On a careful examination of the plates, it is found that the observations on them, referred to above, are mostly wrong. It was an unfortunate mistake to believe that Sōmēśvara's charter is incomplete and partially forged. There is absolutely no doubt that the three plates of equal size, marked A, B and C by Mazumdar, form a complete charter issued by the Sōmavamśi Sōmēśvara, although they were wrongly arranged. Mazumdar's C is actually the second or middle one of the three plates on which the whole document was engraved. Both Mazumdar and Sten Konow failed to realise that the inscription on the obverse of Plate B (really Plate III) is a continuation of that on the reverse of Plate C (actually Plate II). This is because the last word of the last line on the reverse of Plate C (Plate II) was read as *prativastavyam* and the first three letters of the first line on the obverse of Plate B (Plate III) as *vibhiś=cha*, without noticing that, after *prativastavyam*, the letter *bhā* was really engraved so that the last letter on the reverse of Plate C (Plate II) and the first three *aksharas* on the obverse of Plate B (Plate III) have to be read continuously as *bhāvibhiś=cha*. In other records of the Sōmavamśi kings also the word *prativastavyam* is found to be followed by the expression *bhāvibhiś=cha*, although the word *iti* was usually put between them.¹ The suggestion that the original document was written on one side each of four plates is therefore entirely wrong. The charter is a three-plate record, called *tri-phalī-tāmrāśāsana* in Sōmavamśi documents. The first plate is engraved only on the inner side. The second and third plates have writing on both the sides, although the reverse of the third plate contains only one line of inscription.

¹ See above, Vol. III, p. 343 (text, line 23) . p. 348 (text, line 16) . p. 353 (text, lines 40-41) . p. 357 (text, line 46) . Vol. XI, p. 94 (text, line 17) . p. 97 (text, line 21) ; *I. H. Q.*, Vol. XX, p. 247 (text, line 24) . p. 248 (text, lines 17-18), etc., etc.

The smaller plate, marked D by Mazumdar, is obviously the second or middle plate of another *tri-phalī-tāmra-sāsana*. This part of the incomplete inscription records a grant in favour of the son of the donee of Sōmēśvara's charter. There is no evidence in support of Mazumdar's contention that this incomplete charter is a forgery. As the donee of this grant was the son of that of Sōmēśvara's charter, it is possible to think that, for some reason unknown to us, the son took out the plate recording a genuine grant in his favour from a *tri-phalī* charter and kept it in another similar document by the side of the latter's second or middle plate recording a grant in favour of his father. The third plate of the record may have been considered unnecessary as it no doubt contained only some imprecatory and benedictory verses with or without the date. If the grant was received from the same ruler, *viz.*, Sōmēśvara of the Sōma-*vaṃśa*, the first plate must have contained matter similar to that on the first plate of the father's grant and may have been considered unnecessary, wrongly of course, on that account. The nature of the draft, which is not exactly the same as in other similar records, as well as the fact that it is part of a different record and is neither complete in itself nor fits in Sōmēśvara's grant in the father's favour would suggest that the document is genuine. The large number of mistakes in the language need not be taken as an evidence of the spurious nature of the grant, as many other early-medieval Orissan records including Sōmēśvara's charter itself are by no means free from errors.

Among other errors of Mazumdar, reference may be made to his reading *Kṣalī-rājya**-*khaṇḍīya* (believed to speak of the Kōśala country) in line 9 of the inscription. The correct reading of the passage is no doubt *Kṣalōgā-khaṇḍīya*. The name of this Kṣalōgī *khaṇḍa* is apparently preserved in that of modern Kelgī, the find-spot of our record. Sten Konow's suggestion that modern Kelgī represents the ancient Kamalapura seems to be wrong. As regards the emblem on the seal attached to the charter, no photograph of which was published, Mazumdar says: "On the top surface there is a seated figure with the right arm outstretched to the knee, within the enclosure of a blossoming creeper. The figure seems to represent a goddess, and, if so, she is the representation of Lakshmi. I may state, however, that the posture indicating peaceful meditation is hardly consistent with the figure of any goddess." The representation is, however, of the seated Gaṇa-Lakshmi as on the seals attached to other charters of the Sōmavaṃśī kings. The two figures of elephants were wrongly regarded by Mazumdar as the representation of creepers. In view of the numerous errors that crept into Mazumdar's article on these plates, they are re-edited in the following pages.

A. Plates of Sōmēśvaradēva

The plates on which the charter is incised have been described by Mazumdar. The palaeography and orthography of the inscription resemble closely those of other Orissan epigraphs of about the twelfth century A. C. and does not call for special notice. The medial signs of *u*, *ū*, and *ri* are often undistinguishable. The language is Sanskrit; but it is full of errors and is greatly influenced by the local dialect.

The charter was issued from Suvarṇapura, *i.e.*, modern Sonepur. The inscription records a grant of the village of Attēṇḍā in the Kṣalōgā *khaṇḍa* (sub-division) of the Uttaravallī *viśaya* (district), made by the Sōmavaṃśī prince Sōmēśvara in favour of the Brāhmaṇa, *Bhaṭṭaputra* Udayakaraśarmaṇ, who was the son of *Bhaṭṭa* Vidyākara, grandson of *Bhaṭṭa*¹ Jayakara and great-grandson of *Bhaṭṭaputra* Lakshmidhara, and belonged to the Kumārahārīta *gōtra* having five Brāhmaṇa who was himself learned, while his son who was not himself learned may have been called *Bhaṭṭaputra*. The Brāhmaṇa donee was a student of the Mādhyandina-Kāṇva branch of the

¹ Jayakara is called *Bhaṭṭaputra* in the fragmentary grant edited below.

Yajur-vēda. He was an inhabitant of Kamalapura, although his family hailed from Mahuvāli in the Sāvatha (Śrāvasti) *maṇḍala*. The grant was made on the occasion of an auspicious day in the month of Māgha in the first regnal year of Sōmēśvara at the request of *Nāyaka* Māhipati and *Bhaṭṭa* Aniruddha, both of whom appear to have been called *Mahāsandhivigrahin* (minister for war and peace) and *Rāṇaka* (title of a subordinate ruler). The king's order regarding the grant was addressed to the village folk including Brāhmaṇas, *Bhōgins* and *Bhōgi-rūpas* as well as to the officials including the *viśaya-pati* (ruler of a district), *khaṇḍa-pati* (ruler of a sub-division of a district) and *dāṇḍapāśika* (police inspector). The word *bhōgin* may indicate 'a village headman' or 'an *ināmdār*'; but the expression *bhōgi-rūpa*, which seems to mean 'one who is a *bhōgin* partially or outwardly', possibly supports the second of the two meanings of *bhōgin* suggested above. A *bhōgi-rūpa* may indicate one who is a mere title-holder but is not in actual possession of the land in question.

The list of privileges to be enjoyed by the donee included, besides the ordinary ones noticed in many charters, the *suvarṇa-daṇḍa*, *ahi-daṇḍa*, *vartma-daṇḍa*, *vandāpanā*, *nijayavinilāpanā*, *triṇ-ōḍaka*, *śāsan-ārdhika*, *chara-balivarda*, *ārthāruvā*, *pratyarthāruvā*, *palāti-jīvya*, *ādattā*, *ātura-vaddi*, *gō-gauḍa* and *khaṇḍapāliya*. Although some of the expressions are not entirely unintelligible, the real significance of the privileges indicated by all these expressions is difficult to determine in the present state of our knowledge. Many of these are also known from some other inscriptions.¹

Sōmēśvaradēva, the donor of the grant, is described as belonging to the Sōma-kula and as a devout worshipper of Mahēśvara (Śiva). Although he enjoyed the imperial titles, *Paramabhaṭṭāraka* and *Paramēśvara*, he calls himself *Kumārādhirāja* (also *Kumāra*) instead of the expected *Mahārājādhirāja*. The epithet *Paśchima-Laṅkā-ādhipati* indicates that Sōmēśvaradēva was originally the governor of *Paśchima-Laṅkā* (literally, 'the western island'), situated somewhere in South Kōsala, under the Sōmavamśi king of that country. The title *Kumārādhirāja* reminds us of the similar title *Mahākumāra* adopted by some rulers of the Paramāra family.² The uncertain political condition which necessitated the adoption of the title *Mahākumāra* by some Paramāra rulers is hinted at in epigraphic passages like *śrīmaj-Jayavarmadēva-rājyē vyatītē nija-kara-dhṛita-karavāla-prasād-āvāpta-nij-ādhipatya.... mahākumāra-śrīmal-Lakshmīvarmadēva*, "the *Mahākumāra*, the illustrious Lakshmīvarmadēva, who obtained sovereignty of his own by the favour of the sword which he carried in his hand, when the rule by the illustrious Jayavarmadēva had passed away", *śrī-Jayavarmadēva ity-ēta-smāt prishṭhatama-prabhōh prasād-āvāpta-nij-ādhipatya.... mahākumāra-śrī-Hariśchandrādēva*, "the *Mahākumāra*, the illustrious Hariśchandrādēva, who obtained sovereignty of his own by the favour of the last ruler, before mentioned, the illustrious Jayavarmadēva", etc. It is very interesting to note that the Sōmavamśi *Kumāra* or *Kumārādhirāja* Sōmēśvara is similarly said to have issued the charter after the end of the rule of Abhimanyu who had been installed in the Kōsala kingdom that is said to have been presented to him by Uddyōtakēśarin. The Sōmavamśi king Mahābhavagupta IV Uddyōtakēśarin, who was the son of Mahāśivagupta III Yayāti Chaṇḍihara and grandson of Abhimanyu (who did not rule), is known from his Balijhari plates.³ Our inscription represents Uddyōtakēśarin as *Mahābhavagupta-pād-ānudhyāta*. It is apparently a mistake for *Mahāśivagupta-pād-ānudhyāta* which is used in the same context in the Balijhari plates (cf. lines 29-33). While discussing the history of the Sōmavamśis of Kōsala (South Kōsala) and Utkala, we have suggested

¹ Cf. Balijhari plates, *J. B. O. R. S.*, Vol. XVII, pp. 1 ff. Unfortunately there are numerous errors in the published transcript of this inscription. *Triṇ-ōḍaka* and *khaṇḍapāla* are mentioned in some Orissan records in connection with land that was declared as a rent-free gift but was subject to payment of certain taxes. See above, Vol. XII, pp. 156 ff., line 20; Vol. XXIV, pp. 15 ff., lines 33-34; *J. A. S. B.*, N. S., Vol. XII, pp. 292 ff., lines 32-33; *J. R. A. S.*, 1952, pp. 6 ff. *Gauḍa* is the same as *gōkuṭa* meaning 'a cowherd'.

² Ray, *Dynastic History of Northern India*, Vol. II, pp. 889 ff.; *I.H.Q.*, Vol. XXII, pp. 304-05.

³ *J. B. O. R. S.*, Vol. XVII, pp. 1 ff.

elsewhere¹ that Uddyōtakēśarin, who ruled about 1060-85 A.C., possibly during the later part of his reign, made Abhimanyu, apparently a prince of his own family, a sub-king of that part of his dominions that lay in Kōsala, while he himself ruled in Utkala where we have his records at Bhuvanēśvar and the neighbourhood. This arrangement may have been made to check the Kalachuri as well as Chhindaka-Nāga and Telugu-Chōḍa encroachment in Kōsala and Gaṅga encroachment in Utkala.² As to the extirpation of Sōmavaṁśi rule (especially of Abhimanyu's reign) from Kōsala, it may be pointed out that the Chhindaka-Nāga king Sōmēśvara (*circa* 1090-1110 A. C.) of Bastar and Yaśōrāja I, a Telugu-Chōḍa feudatary of the Chhindaka-Nāgas, claim to have conquered Kōsala. Yaśōrāja's great-grandson Sōmēśvara II, called 'lord of the whole of Kōsala', actually issued his Kumārisinhā³ and Patna Museum plates⁴ from Suvarṇapura. The position of Sōmēśvara and Abhimanyu, mentioned in our record, in the genealogy of the Sōmavaṁśis cannot be determined; but the latter may have been a grandson of Abhimanyu (grandfather of Uddyōtakēśarin) and a brother or cousin of Uddyōtakēśarin. Like the Telugu-Chōḍa Sōmēśvara II who issued charters from Sonapur, the Sōmavaṁśi Sōmēśvara who issued the charter under discussion from the same city, seems to have flourished about the early years of the twelfth century. That the Sōmavaṁśi Sōmēśvara was a contemporary of his Telugu-Chōḍa namesake may be suggested by the influence of the latter's records on passages like *Sōma-kula-kīṇila-kalikā-vikāśa-bhāskara* and *śrī-Sōmēśvaradēva-pūṭāḥ kuśalinaḥ*. In the Sōmavaṁśi style, the passages would have been *Sōmakula-tilaka* and *śrī-Sōmēśvaradēvaḥ kuśalī*. It is possible to suggest that the Sōmavaṁśi Sōmēśvara of our record struggled with and was overthrown by the Telugu-Chōḍa Sōmēśvara II. The greatest achievement of Kalachuri Jājalladēva (1114 A. C.) is described as a victory over a certain Sōmēśvara in one record and as a victory over Bhujabala of Suvarṇapura in another.⁵ This seems to suggest that Bhujabala or Bhujabalamalla was a *virula* of Sōmēśvara who was a ruler of Suvarṇapura (Sonapur). This Sōmēśvara, defeated by the Kalachuris established in the western part of South Kōsala, may be either the Sōmavaṁśi Sōmēśvara of our record or the Telugu-Chōḍa Sōmēśvara II of the Kumārisinhā and Patna Museum plates. But his identification with the former seems preferable. From the record under review we learn that, like the imperial Gaṅgas, the Sōmavaṁśis claimed to have belonged to the Ātrēya *gōtra*.

Of the geographical names mentioned in the inscription, Kēśalōgā and Suvarṇapura are of course modern Kelgā and Sonapur respectively. The district called Uttaravalli seems to be what is now called Uttara-tira referred to above. The village of Attēṇḍā must have stood in the vicinity of Kelgā. The donee's family hailed from the village of Mahuvāli in Śrāvastī which was the area round modern Set-Mahet on the borders of the Gonda and Bahraich Districts of the Uttar Pradesh. The village of Kamalapura, where the donee was settled, seems to have been a locality in South Kōsala.

B. Stray Plate of a Second Grant

The stray plate inserted in Sōmēśvara's charter, as already noticed, forms part of an incomplete charter in favour of the son of the Brāhmaṇa Udayakara, donee of the previous grant. It abruptly begins with a reference to the village folk living on the four sides apparently of the gift land, to whom the royal order seems to have passed through a person named Shashthī-gābhura. The gift land is next mentioned as Paviśagrāma together with two *khaṇḍa-kshētras* (plots of land) called Gudhvamāla and Kahapura belonging to Vuravuḍā-grāma situated in the Rōṅgaḍā *maṇḍala*. The land was apparently situated in a forest, as the privileges of the donee included his right to enjoy *hasti-danta* (ivory), *vyāghra-charma* (tiger's skin) and various animals (*nānā-vanachara*). Among trees specified in this connection are tamarind and palmyra.

The donee was the Brāhmaṇa, *Bhaṭṭaputra* Ābhābhakaraśarman, who was the son of *Bhaṭṭaputra* Udayakara (donee of Sōmēśvara's charter edited above), grandson of *Bhaṭṭa* Vidyākara and great-grandson of *Bhaṭṭaputra* Jayakara. As in Sōmēśvara's charter, the donee is said to have belonged to the Kumāra-hārīta *gōtra* having five *pravaras* and to have been a student of the Mādhyandina-Kāṇva Śākhā. His family is likewise described as having hailed from Mahuvālī in the Sāvatha (Śrāvasti) *maṇḍala*, although he was, like his father, an inhabitant of Kamalapura.

¹ The *danḍas* are superfluous.

² Instead of *sata-puru*⁰ (i.e., *sat-puru*⁰) read *puru*⁰ for the sake of the metre.

³ This line has suffered from corrosion. There appear to be traces of a few letters after this; but I am unable to decipher them. The details of the date of the grant are possibly given here.

The above grant portion of the record is followed by a passage introducing the imprecatory and benedictory verses. This part closely resembles the corresponding portion of such other Orissan epigraphs as the two Baudh plates¹ of the Bhañja king Raṇabhañja of Khññjali-*maṇḍala*, who flourished about the third quarter of the tenth century.

The charter may have been granted by the Sōmavañśī Sōmēśvara or by his Telugu-Chōḍa namesake who ousted him from Suvarṇapura. The villages Paviśa and Vuravuḍā and the district called Rōṅgaḍā-*maṇḍala* cannot be satisfactorily identified.

No. 51—TWO PLATES FROM KANAS

(2 Plates)

D. C. SIRCAR, OOTACAMUND

The village of **Kanās** lies about ten miles away from the Delang station of the Bengal-Nagpur Railway in the Puri District of Orissa. The village is celebrated for an ancient Maṭha or monastery under a Mahant Mahārāj. Some time ago Pandit Sadāśiva Ratha Śarmā of Puri, who is a Research Assistant of the Utkal University, Cuttack, secured on loan two copper-plate inscriptions in the possession of the Kanās Maṭha and gave them for decipherment to Pandit Satyanārāyaṇa Rājaguru who was formerly Research Assistant of the Kalinga Historical Research Society, Balangir, and is now Assistant Curator of the Orissa Museum at Bhubaneswar. Pandit Rājaguru made an attempt to decipher one of the two records and published the results of his study in the *Journal of the Kalinga Historical Research Society*, Vols. II, No. 4 and III, Nos. 1-3, January 1950, pp. 261-66. As the text of the inscription published by Pandit Rājaguru appeared to me inaccurate and unsatisfactory, I was eager to examine the original plate. Both the plates in the possession of the Collector of the Puri District in December 1950. The results of my study of the two inscriptions, one of which is as yet unknown to scholars, are published in the following pages.

¹ In this place usually we have *tathā ch=ōktam dharma-śāstṛ ē* | The passage *tasy=āgrē*, etc., is only a part of an incomplete verse.

² Read *Phāla-kṛishṭām mahim dadyat sa-bīja-śasya-mēdinīm* | *yāvat sūrya-kṛit-ālōkas=tāvat svargē mahīyatē* ||

⁵ The *daṇḍas* are unnecessary.

⁶ Read *jātāḥ sa nas=trātā*.

⁷ The second half of this verse is omitted.

⁸ Read *Mā bhūd=a-phala-śānkā tē para-datt-ēti pārthiva* |

⁹ The second half of the verse seems to have been engraved on another plate.

A. Plate of Lōkavigraha-bhaṭṭāraka ; Gupta year 280

This is a **single plate** measuring 4.85 inches by 2.5 inches and having writing on both obverse and reverse. There is a projection in the middle of the left end of the plate, to which a **seal** was originally soldered. Of this seal, however, nothing but a small lump of bronze protruding through a hidden hole on both the obverse and reverse of the projection now remains. There are eleven lines of writing on the obverse of the plate and ten lines on the reverse. The size of the letters is small. The preservation of the writing, especially on the obverse of the plate, is extremely unsatisfactory as some of the letters have completely peeled off. The weight of the plate, together with the lump representing the original seal, is 15 *tolas* only.

In point of **palaeography** and **orthography**, the inscription closely resembles the Sumaṇḍala plate of Pṛithivīvigraha-bhaṭṭāraka edited by me in the pages of this journal,¹ and hardly anything calls for special mention. The tail of letters like *k* and *r* is short and not lengthened considerably downwards as is usually the case. The sign of interpunctuation is usually a short horizontal or slightly curved stroke. Full-stop is sometimes indicated by two such strokes (cf. line 19), not differing much from the sign for the *visarga* ; but often the usual double *daṇḍa* has been employed, although the head of the first of the two *daṇḍas* is considerably curved towards the left (cf. lines 15, 21). The **language** of the inscription is Sanskrit, and, with the exception of two of the usual imprecatory verses at the end, the record is entirely written in prose.

The **date** of the charter engraved on the plate as given in words in lines 2-3 reads : *pravartamānē Gupta-kāla-samva(samva)tsarē aśīty-uttara-śata-dvayē*. It is quoted in line 15 as *Samvat 200 80 Phālguṇa(na)-di 5*. Thus the **date of our record is the fifth day of the month of Phālguṇa in the year 280 of the Gupta era corresponding to 599-600 A.C.**

The inscription records the grant of a village called Ūrddhvaśṛiṅga situated in the Uṭīda or Muṭīda *vishaya* (district) in Dakṣhiṇa-Tōsalī. The grant was made by the royal officers (*vinīyuktakāh*) of the said *vishaya*, including such officers as the *vaiśvāsika*, *vishayapati* and *aṁsa-bṛihadbhōgika*, when *parama-dēvat-ādihidaivata-śrī-Lōkavigraha-bhaṭṭāraka* was ruling in Tōsalī comprising eighteen forest states (*Tōsalyām s-aśtādaś-āṭavī-rājyāyām*). The declaration regarding the grant was addressed to the present and future enjoyers of the share of the produce (*bhāga-bhujah*) such as the officers of the *mahāsāmanta-mahārāja*, *rājaputra*, *kumārāmātya*, *uparika*, *tad-āyuktaka*, *vaiśvāsika*, *vishayapati* and *aṁsa-bṛihadbhōgika*. Of the officials, *aṁsa-bṛihadbhōgika* seems to be the same as *bhōgika* or *bṛihad-bhōgika* of other inscriptions, and *vaiśvāsika*, not usually found in charters,² may indicate a privy councillor or one in charge of secret and confidential communications. Having ascertained that the village in question had in it no land uncultivated for a long time (*chira-khila-śūnya*) and that its land possessed many qualities (*anēka-guṇa*), the officers granted it, with a view to gaining *dharma*, *artha* and *kāma*, with the permission of the *paramadēvatādihidaivata-śrī-paramabhaṭṭāraka*, no doubt referring to Lōkavigraha-bhaṭṭāraka. The grant was made according to the principle governing permanent endowments to last as long as the moon and sun endure (*ā-chandr-ārka-sama-kāliy-ākshaya-nīvi-dharmmeṇa*) with the determination of the four boundaries. The purpose of the grant was the institution of *bali*, *charu* and *sattra* at the *maṭha* of the illustrious Maṇināgēśvara-bhaṭṭāraka of Chaikāmbaka or Ēkāmbaka and the maintenance of the Brāhmaṇas of different *gōtras*, who were students of the Maitrāyaṇīya branch of the Yajur-vēda. It is interesting to note that the Brāhmaṇa students of the Maitrāyaṇīya school, associated with the *maṭha* of Maṇināga-bhaṭṭāraka, are also mentioned in the other charter edited below. The word *maṭha* seems to indicate here 'a temple endowed with a monastery or college'. The grant under

¹ Above, Vol. XXVIII, pp. 79 ff.

² The designation *pañchakaraṇopari[ka*]-vaiśvāsika-bṛihadbhōgin* is found in lines 53-54 of the Bānpur plates of Dharmarāja to be edited by me in this journal. Cf. also Lüders' List, Nos. 125(Q), 127, 128, 141.

review was *anusṛita* (possibly meaning 'endorsed') among others by the *Vaiśvāsika* Bhavanāga, *Vishayapati* Śrīdatta, *Amsa-brihadbhōgika* Suḍumāka and *Karaṇika* Nāgadatta.

It seems that Prithivivigraha who, according to the Sumaṇḍala inscription, was governing the Kalinga *rāshṭra* as a viceroy of the imperial Guptas in the Gupta year 250 and Lōkavigraha who was ruling independently over the Tōsali country (comprising the northern part of ancient Kalinga and also Utkala) in the Gupta year 280, belonged to the same family which may be called the Vigraha dynasty of Orissa. It is clear that all vestiges of imperial Gupta influence in Orissa disappeared before the date of our record. It is also clear now that the history of Orissa in the second half of the sixth century was characterised by the rivalry between the Vigrahas and the royal house of the Mānas represented by king Śambhuyaśas of the Mudgala or Maudgalya *gōtra*, who is known to have been ruling over Uttara-Tōsali in the Gupta year 260¹ and Dakṣiṇa-Tōsali in the year 283,² side by side with the Vigrahas. The expansion of the rule of Śambhuyaśas over South Tōsali before the year 283 suggests the discomfiture of the Vigrahas at the hands of the Mānas. This struggle between the Vigrahas and Mānas seems to have facilitated the conquest of Orissa probably from the Mānas by king Śaśāṅka of Gauḍa sometime before the Gupta year 300.³

Of the geographical names mentioned in the inscription, **Tōsali** was originally the name of the chief city of Kalinga identified with modern Dhauli near Bhubaneswar in the Puri District. It seems that with the foundation of the kingdom of the Gaṅgas who claimed the title "lord of Kalinga or Triakalinga" with their capital at Kaliṅganagara (modern Mukhalingam in the Chicacole or Śrīkākulam District), the rulers of northern Kalinga felt the necessity of applying the new name to their dominions. The country of Tōsali comprised not only northern Kalinga but also ancient Utkala and thus often included the western part of the Midnapur District in the north-east and the eastern fringe of the Ganjam District in the south-west. Dakṣiṇa-Tōsali or South Tōsali roughly corresponded to northern Kalinga (modern Puri District with parts of Cuttack and Ganjam) and Uttara-Tōsali or North Tōsali to the Utkala country (modern Balasore District with parts of Cuttack and Midnapur). The description of Tōsali as comprising eighteen forest states in our record seems to be the earliest reference to the tradition of the so-called *Aṭhara-gaḍa-jāta* of Orissa.⁴ The *vishaya* of **Utida** or **Muṭida** and the village of **Ūrdhvaśṛiṅga** cannot be satisfactorily identified. **Chaikāmbaka** or **Ēkāmbaka**, where the *maṭha* of the deity Maṇināgēśvara was situated, is also difficult to locate. I am not sure if the *maṭha* can be identified with the present Kanās Maṭha. If, however, the name is really Ēkāmbaka, it may possibly be regarded as a variant of Ēkāmbra (or Ēkāmraka) which is an old name of modern Bhubaneswar. The name of Maṇināga, son of Kadrū, is famous in the Puranic literature.⁵ That the Maṇināga cult was popular in Orissa is proved by the existence of the Maṇināga hill at Raṇpur in Orissa as well as of the goddess Maṇināga-Durgā worshipped there. Whether, however, the Maṇināga-maṭha was situated at Raṇpur cannot be determined in the present state of our knowledge. Maṇināgēśvara may also indicate a *śiva-liṅga* installed

¹ See the Patiakella plate (above, Vol. IX, pp. 287 f.).

² Cf. the Soro plate A (above, Vol. XXIII, pp. 201-02).

³ See the Ganjam plate (above, Vol. VI, pp. 143 ff.). Mr. S. N. Rajaguru's views regarding Śaśāṅka (*J. A. H. R. S.*, Vol. XIX, pp. 119 ff.) are not worthy of serious consideration.

⁴ For another early tradition regarding the eighteen forest kingdoms including the Dabhālā kingdom, see the Khoh plate of Saṁkshōbha (*Select Inscriptions*, p. 375). For the traditions regarding countries or kingdoms comprising eighteen forts, see P. Acharya in *Proc. Ind. Hist. Cong.*, 1949, pp. 282-84. For the use of 'eighteen' vaguely indicating a multitude, see *Pali Dictionary*, P.T.S., s.v. *aṭṭha*. Cf. the epithet 'lord of all the Gōndramas or of 18 Gōndramas' in many early records of Orissa.

⁵ Vide *Skanda Purāṇa*, Āvāntyakhaṇḍa, Rēvākhaṇḍa, chapter 72. The cult of Maṇināga was popular in various other parts of India. For the Maṇināga-tīrtha at Rājagriha, see *Mahābhārata*, III, 84, 106 ff. Maṇināga seems to have been identical with the Yaksha Maṇibhadra widely worshipped in ancient India. See above, Vol. XVIII, p. 159; *A. S. R.*, 1915-16, Part II, p. 106; *J. N. S. I.*, Vol. XII, pp. 179 ff., etc.

TWO PLATES FROM KANAS
A. PLATE OF LOKAVIGRAHA-BHATTARAKA; GUPTA YEAR 280

Obverse

Reverse

by a person named Maṇināga ; but the mention of the same deity as Maṇināga-bhaṭṭāraka in the Kanās plate of Bhānūdatta, edited here, seems to go against such a conjecture. It is also not quite clear why only Brāhmaṇas of the Maitrāyaṇīya school were associated with the *maṭha* of the said deity.

³ Or, °lyām Muṭida°.

⁴ Or, ḥh=Aikāmvakīya.

⁵ The *danḍa* is unnecessary.

⁶ This *danḍa* and the following ones in the next two lines are used as the hyphen is done in English.

⁷ The word may be *drāṅga-pāla*, the same as *drāṅgika* of some inscriptions.

B. Plate of Bhānudatta ; Regnal Year 5

The inscription is engraved on both sides of a **single plate** measuring 5.8 inches by 4.1 inches. There is a projection, with a hole in it, in the middle of the left end of the plate, to which a **seal** must have been originally fixed. The seal is now lost. There are eleven lines of writing on the obverse and eight lines on the reverse. The preservation of the writing is very poor as both sides of the plate have suffered considerably from the effect of corrosion. The plate weighs $43\frac{1}{2}$ *tolas*.

As regards **palaeography, language and orthography**, the inscription under discussion closely resembles the Soro (D)¹ and Balasore² plates, as all the three charters were issued by the same ruler. Very little in these respects, therefore, calls for any special remark. The medial *i* is sometimes joined with the following mark of interpunctuation (cf. lines 13, 19) as in the Sumaṇḍ-ala plate³ and some other inscriptions. The charter is dated in the fifth regnal year of a subordinate ruler named **Bhānudatta** who, as will be seen below, **flourished sometime between 619 and 643 A.C.** The actual date given is the **24th day of Āśvā** (i.e., **Āśvayuj or Āśvina**).

The charter was issued from a locality called **Andhasubhiksha** by the *mahāpratihāra-mahārāja-mahāsāmanta śrī-Bhānudatta* whose feudatory position is further indicated by the epithet *parama-daivata-śrī-paramabhaṭṭāraka-pād-ānudyāta*. Bhānudatta's reverential declaration regarding the grant was addressed to the *mahāsāmanta-mahārāja, rājaputtra, kumārāmātya, uparika, vishayapati, tad-āyuktaka, dāṇḍavāsika* (i.e. *dāṇḍapāsika*), *sthānāntarika* and other officers and also persons like the *chāṭas* and *bhaṭas*, both of the time being and of the future, who were or would be associated (*samupāgata*) with the *vishaya* or district called **Uttamālōka**. The village, granted by Bhānudatta by the *tāmra-paṭṭa* for so long as the moon and sun endure and described as *chira-khila-śūnya*, was **Kumvukīrikshilāka** in the said *vishaya*. The grant was made for the increase of the merits of the *śrī-parama-bhaṭṭāraka-pāda*, i.e., the unnamed overlord of Bhānudatta. It was made theoretically in favour of the deity Mañināga-bhaṭṭāraka of Chaikāmvakā or Ēkāmvakā,⁴ but actually in that of the Brāhmaṇas who resided in the *maṭha* of the god and were students of the Maitrāyaṇīya school of the Yajurveda. People are requested not to stand in the way of the donees enjoying the gift land, but to protect the grant owing to respect for the religious merit of Bhānudatta's overlord. The charter was written (i.e., its draft was prepared) by the *sāndhivigrahika* Gōvinda. The plate was heated (for the purpose of fixing the seal) by the *pēḍāpāla* Pratishṭhita. The designation *pēḍāpāla* is found sometimes in the form *pēṭakapāla* and apparently means an officer who was in-charge of the boxes containing documents like the one under notice. He was therefore associated with the records office and was possibly under the officer called *pusta-pāla* or *pustaka-pāla* in some inscriptions.⁵ *Pēḍāpāla* Pratishṭhita of our record is apparently no other than the *pēḍāpāla* Pratishṭhitachandra mentioned in the two other charters of the same ruler, referred to above. The plate was engraved by a person named Śivanandana.

All the three charters of Bhānudatta so far discovered are couched in similar language. Like the Balasore plate, which, however, calls its issuer Bhānu instead of Bhānudatta, our record describes the ruler as a *mahāpratihāra-mahārāja-mahāsāmanta*, although the Soro plate (D) uses the designation *mahāpratihāra-mahārāja*. All the three charters are dated in the fifth regnal year of Bhānu or Bhānudatta and were heated by the *pēḍāpāla* Pratishṭhita or Pratishṭhitachandra. They refer to the overlord of Bhānudatta without specifically mentioning his name. This seems to

¹ Above, Vol. XXIII, p. 203.

² Above, Vol. XXVI, pp. 239-40; *I.H.Q.*, Vol. XI, pp. 611 ff.

³ See above, Vol. XXVIII, pp. 79 ff.

⁴ The name seems to have been spelt also as ending in *ka*.

⁵ In the records of the Bhauma-Karas, *pusta-pāla* and *pēḍā-pāla* are often separately mentioned, the latter apparently as a small official.

suggest that Bhānudatta's status as a ruler was gradually approaching that of a semi-independent feudatory of an imperial personage.

The four copper plates¹ from Soro in the Balasore District belonging to Śambhuyaśas, Sōmadatta and Bhānudatta, as well as the Balasore plate of Bhānu referred to above, suggest that the Sarēpha or Sarēph-āhāra district (i.e., the region round modern Soro in the Balasore District), said to be in Uttara-Tōsalī or in the Ōdra *vishaya* as well as in Uttara-Tōsalī, was under the independent king Śambhuyaśas of the Mudgala or Maudgalya *gōtra* and possibly of the Māna family in the Gupta year 260 (579 A.C.), then under a feudatory ruler named Sōmadatta in his fifteenth regnal year and lastly under Bhānudatta in his fifth regnal year. The village of Vahirvāṭaka in the Soro district, granted by Sōmadatta in his fifteenth regnal year to the Brāhmaṇas Dhruva-mitrāsuvāmin and Āruṅamitrāsuvāmin of the Vātsya *gōtra* and Vājasanēya *charaṇa*, was regranted by Bhānudatta in his fifth regnal year to the above two Brāhmaṇas as well as to two others of the same family, viz., Priyamitrāsuvāmin and Vātamitrāsuvāmin, apparently on the latter's representation and not long after the date of Sōmadatta's grant. Sōmadatta and Bhānudatta very probably belonged to the same family of the feudatory Dattas who were, however, not subordinate to the ruling dynasty represented by Śambhuyaśas. The two Midnapur plates² show that Daṇḍabhukti in the western part of the Midnapur District of West Bengal was being ruled in the eighth regnal year of Śaśāṅka, king of Gauḍa, by *Mahāpratihāra* Śubhakirtti, but that the same *maṇḍala* together with the *dēśa* or territory of Utkala was under the rule of the *sāmanta-mahārāja* Sōmadatta in the nineteenth regnal year of the same monarch. Thus Sōmadatta was a feudatory of Śaśāṅka of Gauḍa who is known to have been ruling in the first quarter of the seventh century at least from 605 to 619 A.C. In 619 A.C. Śaśāṅka's suzerainty was acknowledged by the Śailōdbhavas in the Kōṅgōḍa country about the eastern fringe of the Ganjam District. This points to the expansion of Gauḍa rule over both North and South Tōsalī. The rule of Sōmadatta in Utkala or Uttara-Tōsalī as a vassal of Śaśāṅka points to the extirpation of the supremacy of the Mānas at least from that region before the nineteenth regnal year of the Gauḍa monarch. But the two Soro inscriptions of Sōmadatta, unlike the Midnapur plate of his time, are dated in the fifteenth year of his own reign and not in the regnal reckoning of his overlord Śaśāṅka. The same is the case with the charters issued by Bhānudatta who was probably Sōmadatta's successor in Utkala, Ōdra-vishaya or Uttara-Tōsalī. The dating of these charters in the regnal reckoning of the feudatories with a rather vague mention of the *parama-bhaṭṭāraka* or overlord seems to suggest that they were issued after the defeat of Śaśāṅka or his successor at the hands of Harshavardhana of Kanauj and his friend Bhāskaravarman of Kāmarūpa between 619 and 643 A.C.,³ when the hold of the Gauḍa emperor on the feudatories must have begun to decline. The Dattas of Uttara-Tōsalī, who then became rather nominal feudatories of the emperor of Gauḍa, appear to have been extirpated by Harshavardhana who led an expedition in Orissa about 643 A.C. and probably put the Bhauma-Kara rulers of Jajpur to power in the above region. Thus after the decline of imperial Gupta rule in Orissa, we find the Vighrahas and Mānas struggling for power with each other before they were swept away by the Gauḍas. It is probable that the Vighrahas were ousted by the Mānas who were themselves extirpated by the Gauḍas. The defeat of the Gauḍa monarch by the Kanauj-Kāmarūpa confederacy led to the weakening of his hold on Orissa. Harshavardhana, who now considered the Gauḍa king as one of his subordinate allies, may have subdued Orissa ostensibly on the latter's behalf. But his death in 647 A.C. led to the emergence of the Bhauma-Karas as an imperial power in that country. The rulers on the throne of Kārṇasuvarṇa, capital of Gauḍa, were apparently unable to regain their hold on Orissa.

¹ Above, Vol. XXIII, pp. 201-03.

² *J.R.A.S.B.*, Letters, Vol. XI, pp. 7-9; *Pravāsī* (Bengali), B. S. 1350, pp. 291 ff.

³ The later limit may be 637 A.C. About this time, the Chinese pilgrim Hiuen-tsang visited Eastern India. His accounts appear to suggest that Śaśāṅka was dead and Gauḍa was humbled before his visit to that region.

Of the geographical names mentioned in the present record, Chaikāmvakā or Ēkāmvakā has already been dealt with in connection with the Kanās plate of Lōkavighraha. Andhasubhiksha, whence the charter was issued, cannot be satisfactorily identified. I have also not been able to locate the village of Kumvukīrikshilāka and the district of Uttamālōka. The name of the village looks like a compound of the names of two localities.

EPIGRAPHIC NOTES

D. C. SIRCAR, OOTACAMUND

1. *Phērava Grant of Sāmantavarman*

The above copper-plate inscription, dated in the Gaṅga year 185 (681-83 A. C.), has been edited by Dr. R. C. Majumdar.¹ The Gaṅga king Sāmantavarman who issued the charter belonged to a branch line of the Gaṅga house, which ruled from a city variously called Śvētaka, Śchētaka, Śvēta, Śvētka and Sēta. Dr. Majumdar places the kingdom of the Gaṅgas of Śvētaka "in the northern part of the Ganjam District."²

Another member of the same branch of the Gaṅga family was Rāṇaka Jayavarman, known from one of his copper-plate charters,³ which was found somewhere in the northern part of the Ganjam District. This grant of Jayavarman is known to have been registered with a seal by a lady styled Trikaṇḍa-mahādēvī. On this point Dr. Majumdar says, "It is significant that the grant of Rāṇaka Jayavarman was registered (*lāṇchhita*) by the Trikaṇḍa-Mahādēvī. This shows that Trikaṇḍa was included in the kingdom, and may even be taken to indicate that the kingdom was also sometimes known by that name. As I have suggested elsewhere,⁴ Trikaṇḍa probably designates the hilly tracts, lying to the west of Kaṇḍa and separating it from the Central Provinces."⁵ Dr. Majumdar seems to take *Trikaṇḍamahādēvī* as a designation. To me, however, it appears to have been the personal name or a secondary name of one of the queens of Rāṇaka Jayavarman, who was endowed by the king with an amount of administrative power. This seems to be suggested by some records of the Bhaṇjas of Khinjalimaṇḍala, who originally ruled from Dhṛitipura and later from the city of Vaṇḍulvaka in the northern part of the Ganjam District, as well as by some of the Śvētaka Gaṅgas themselves.

The Ghumsur plates⁶ of Nēṭṭabhaṇja Kalyāṇakalaśa were *lāṇchhita* or registered by the *Vārgulika* Vāchchhika. Two other charters of the same king⁷ were similarly *lāṇchhita* respectively by Māmmā and Jachchhikā, who appear to have been female officials of the Bhaṇja ruler. It is extremely interesting to note in this connection that two charters of another member of the same ruling family,⁸ called Vidyādharaḥhaṇja surnamed Amōghakalaśa and Dharmakalaśa, are said to have been *lāṇchhita* by Trikaṇḍa-mahādēvī together with the *mantrin* Bhaṭṭa-Kēśavadēva and the *Vārgulika* Chāchhika in one case and by the same Trikaṇḍa-mahādēvī together with Tējadika and the *mantrin* Bhaṭṭa-Stambhadēva in the other. Since, however, these records come from the northern part of the Ganjam District, like those of the Gaṅgas of Śvētaka, Dr. Majumdar may be inclined to explain the mention of Trikaṇḍa-mahādēvī in the above two records in the same way as he has done in connection with the inscription of Rāṇaka Jayavarman. But some other inscriptions of the Bhaṇjas of Vaṇḍulvaka seem clearly to go against his suggestion.

The Chakradharpur plates⁹ of Nēṭṭabhaṇja Kalyāṇakalaśa are known to have been *lāṇchhita* by Śrījayamahādēvī or śrī-Jayamahādēvī together with the *Vārgulika* Puṇḍarika and the *mantrin* Bhaṭṭa-Bāpuka. There is hardly any doubt that Śrījayamahādēvī or śrī-Jayamahādēvī was the personal name of one of the queens of Nēṭṭabhaṇja Kalyāṇakalaśa, who was endowed with the

⁸ *Ibid.*, Nos. 1500, 1501.

⁹ *Ibid.*, No. 1502.

power of registering royal charters. Since the name of the registering Mahādēvī (queen) in this case cannot reasonably be associated with any geographical area like Trikaṅga, Trikaṅga-mahādēvī should also better be taken as the personal or secondary name of a queen of Vidyādharaḥaṇja surnamed Amōghakalaśa and Dharmakalaśa. The same personal or secondary name was apparently also borne by one of the queens of the Gaṅga Rāṇaka Jayavarman of Śvātaka, who is known to have registered a grant of her husband.

The above suggestion is supported by some other inscriptions of the Gaṅgas of Śvātaka and the Bhaṇjas of Vaṇḍulvaka. The Svalpavelura grant¹ of Gaṅga Anantavarman of Śvātaka was registered by the Mahādēvī Śrīvāsa-bhaṭṭārikā, while the Ganjam plates² of the Śvātaka king Prithivīvarman were registered by his Mahādēvī whose name is not mentioned. A grant of king Nēṭṭabhaṇja Tribhuvanakalaśa of Vaṇḍulvaka, which was recently examined by me and is being published in this journal, was similarly registered by Śrījīvalōka-mahādēvī or śrī-Jīvalōka-mahādēvī, no doubt a queen of the Bhaṇja ruler.

Since Trikaṅgamahādēvī looks like personal or secondary names such as Gāndhārī, Kaikēyī, Mādri, Pāṇchālī, Vaidarbhī and Vaidēhī of the epics, it is possible to regard the queens bearing that name to have been born in the Trikaṅga country. An exactly similar name, derived from that of the mother-land of the queen, would be Kōsaladēvī³ who was the daughter of the Kōsala king Mahākōsala and the queen of the Magadha monarch Bimbisāra. Thus the name Trikaṅga-mahādēvī borne by the queens of Jayavarman of Śvātaka and Vidyādharaḥaṇja surnamed Amōghakalaśa and Dharmakalaśa of Vaṇḍulvaka does not appear to help us in locating the Trikaṅga country in the land comprising the northern part of the Ganjam District of Orissa.

2. Koni Inscription of Prithivīdēva II

The Koni inscription of king Prithivīdēva II (circa 1138-58 A. C.) of the Kalachuri dynasty of Ratnapura has been published by Professor V. V. Mirashi.⁴ The record is dated in the Kalachuri year 900 (1148 A. C.). The object of the inscription is to record, along with certain grants of land, the construction of a *pañchayatana* temple of Śiva by one Purushōttama who was the *Sarvādhipāṇin* of Prithivīdēva's father and predecessor Ratnadēva II (circa 1120-38 A. C.).

Verse 26 of the above record, as read by Professor Mirashi, describes the achievements of Purushōttama in the following words:

Khimmiṇḍi-maṇḍala-harat-Ta(s=Ta)lahāri-hāri karttā='tha Daṇḍapura-daṇḍana-chaṇḍa-vā(bā)huḥ,

Khijjīṅga-bhaṇḍa-chaturō Haravōhu-hantā yō Daṇḍabhukti-pati-tarjjana-durjjaya-śrīḥ.

Professor Mirashi translates the verse as follows: "He (i.e. Purushōttama) captured the Khimmiṇḍi maṇḍala and made the Talahāri (maṇḍala) attractive. He had a fierce arm in subduing Daṇḍapura and was clever in overcoming Khijjīṅga. He killed Haravōhu (and) his valour was invincible in threatening the lord of Daṇḍabhukti." In the introductory remarks also the Professor says in regard to the verse in question that Purushōttama "conquered the Khimmiṇḍi Maṇḍala, made the Talahāri Maṇḍala attractive, punished Daṇḍapura, subjugated Khijjīṅga, killed Haravōhu and threatened the ruler of Daṇḍabhukti." It will, however, be seen that the verse is designed to enumerate certain victorious achievements of Purushōttama. Therefore, "making the Talahāri maṇḍala attractive" can hardly be regarded quite in line with the conquests enumerated in the verse. In my opinion, *Talahāri-hāri* apparently means "one who plundered, subdued or captured Talahāri."

¹ Above, Vol. XXIV, p. 136.

² *Ibid.*, Vol. IV, p. 201.

³ Cf. Malalasekera, *Dictionary of Pali Proper Names*, s. v.

⁴ Above, Vol. XXVII, pp. 276 ff. and plate.

It is known from the Ratanpur inscription¹ of the Kalachuri year 866 (1114 A.C.) that Kalachuri Jājalladēva I, grandfather of Prithvilēva II, levied annual tribute from a number of countries including Khimiḍī (Khimmiṇḍī), Talahāri and Daṇḍakapura (Daṇḍapura). It is thus possible to think that in his youth Purushōttama served as a general of Jājalladēva I and helped the latter in conquering the countries in question. In Hiralal's *Inscriptions in the C. P. and Berar*,² Talahāri has been located about the northern part of the Janjgir Tahsil to the south of Ratanpur. The rulers of this tract are mentioned in several records.

There is again a mistake in Professor Mirashi's reading of verse 26 quoted above. As Pandit L. P. Pandeya has rightly pointed out,³ what Professor Mirashi reads as *Haravōhu-hantā* is actually *Haravōṅga-hantā*. The correctness of Pandit Pandeya's reading is clear from a comparison of the fourth *akshara* in the above expression with the form of *ṅga* in *Khijjīṅga-bhaṅga* as well as with that of *hu* in *vā(bā)hu*, both occurring in the same verse. It may also profitably be compared with other uses of *ṅga* and *hu* in the record, e.g. in *Khaṭvāṅg-ō* (line 1), *tuṅgarāṅgat* (line 2), *vā(bā)hu* (line 22), etc. Moreover, *Haravōhu* as a name is unknown in the Indian languages, while *Haravō(bō)ṅga* is not only a recognised Hindī word, but is also known to be used as the name of a royal personage in a Hindī literary work. According to Hindī lexicons⁴, the word *harabōṅga* (*harbōṅg*) means *gambhār*, *akkhar*, *mūrkh*, i.e. a rustic or a fool. As a personal name, it can very well be compared with Bengali *Bōkā* or *Bakkēśvar* (from Deśi *vōkkaḍa*, 'a goat') meaning 'a fool'. In this connection, Pandit Pandeya refers to the manuscript of a Hindī work, entitled *Khaṛibōli Gadyamē Chār Kahāniyā*, preserved in the India Office Library, London. The title of one of the four *kahānīs* in the above work is *Insāf Rājā Harbōṅgkā* (literally 'king Harbōṅg's justice').⁵ There is thus little doubt that Purushōttama, who was an officer of the Kalachuri kings of Ratnapura, claims to have killed in battle a warrior or ruler named Harabōṅga (*Harbōṅg*), not Haravōhu as Professor Mirashi reads, although it is difficult to identify the person in the present state of our knowledge.

3. Madanpur Plate of Śrīchandra, Year 46

Dr. R. G. Basak has edited the above inscription of king Śrīchandra belonging to the Chandra dynasty of Bengal.⁶ He has assigned the record to the 44th regnal year of the Chandra king. But what has been read as 44 in line 42 of the inscription is really 46.

As regards verse 5 of the copper-plate grants of Śrīchandra, which describes his father Trailōkyachandra, Dr. Basak observes, "The most important epithet of Trailōkyachandra, as we find in this verse, *ādihārō Harikēla-rāja-kakuda-chchhatra-smitānām śriyām*, read along with *yaś=chandr-ōpapadē babbhūa nṛipatir=dvīpē*, conveys the fact that at first he was a king of Chandra-dvīpa and later became 'the repository of the Fortune (*goddesses*) whose smile was the (*white*) umbrella, the symbol (*of royalty*) of the king of Harikēla'. Bereft of rhetorical figurativeness, the epithet leads one to believe that Trailōkyachandra acquired the royal fortunes of the Harikēla kingdom. The interpretation put on this phrase by the late Mr. N. G. Majumdar and quoted by Dr. R. C. Majumdar in the *Dacca University History of Bengal*, Vol. I, does not stand scrutiny."⁷

¹ Above, Vol. I, p. 36, verse 23.

² See 2nd edition, pp. 107, 128.

³ Cf. Mādhurī (Hindī), Lucknow, August, 1949, p. 5.

⁴ Cf. *Bhṛṅgaśāstra Adarśa Hindī Śabda-Kōṣha*, Banaras, s. v.

A tradition regarding a crazy king named Harbōṅg who ruled over the Jhusi region near Allahabad is recorded in the Bengali work *Tripurār Smṛiti* (Calcutta, 1927-28, p. 41) by S. C. Devavarman of the Tripurā royal family. Like a similar madcap of Bengali folklore, named Rājā Bhavachandra or Habuchandra, king Harbōṅg of Jhusi is said to have ordered throughout his kingdom the sale of all articles of merchandise according to the same measurement and price.

⁶ Above, Vol. XXVIII, pp. 51 ff. and Plate.

⁷ Ibid p. 54.

The late Mr. N. G. Majumdar explained the passage, *ādhārō*, etc., as 'the support of the Fortune goddesses of other kings smiling at (*i.e.* joyful on account of) the umbrella which was the royal insignia of Harikēla'.¹ Dr. R. C. Majumdar, observes on the above views of Dr. Basak and the late Mr. Majumdar, "According to the first interpretation, Trailōkyachandra was the *de facto* if not *de jure*, ruler of Harikēla, while, according to the second, he was both *de facto* and *de jure* king of Harikēla, with a number of other rulers subordinate to him. The latter view seems preferable. Thus Trailōkyachandra added Chandradvīpa and Harikēla to his paternal dominions'.² In my opinion, the real import of the passage in question has escaped the notice of all the three scholars referred to above.

I am inclined to interpret the passage *adhārō Harikēla-rāja-kakuda-chchatra-smitānām śriyām* as 'the mainstay of the Fortune goddesses whose smiles are represented by the white umbrella that is the symbol of royalty of the Harikēla king'. The passage thus says that Trailōkyachandra was the support of the royal fortune of the king of Harikēla. Its real import is apparently that the Chandra king Trailōkachandra of Chandradvīpa was a feudatory or ally of the king of the Harikēla country. There are instances in epigraphic literature of a feudatory's representation as the mainstay of the overlord's kingdom or fortune. Thus the rulers of the Parichchhēdin family, who were feudatories of the Eastern Chālukya monarchs, are mentioned in inscriptions as *Vēṅgi-Chālukya-rājya-mūla-stambha*, *i.e.*, 'the main support of the kingdom or royalty of the Chālukyas of Vēṅgi'.³ In my opinion therefore Trailōkyachandra was not a king of Harikēla, but was the ruler of Chandradvīpa, *i.e.*, Bāklā-Chaddradvīpa in the present Buckergunje District, owing allegiance to or allied with the king of the country called Harikēla.

As pointed out by Basak, the lexicographer Hēmachandra identifies the Harikēla or Harikēli country with Vaṅga in the passage *Vaṅgās=tu Harkēlayaḥ* (or *°kēliyāḥ*) in his *Abhidhāna-chintāmaṇi*. But undoubtedly an earlier tradition regarding the location of that country is preserved in Kēśava's *Kalpadrūkōśa* which says *Śrīhaṭṭō Harikēliḥ syāch=Chhrihaṭṭō=pi kvachid=bharē*.⁴ This shows that Harikēli or Harikēla was originally the name of the Śrīhaṭṭa (modern Sylhet) region but that the name was later applied in a wider sense to Vaṅga apparently as a result of the expansion of a kingdom that had its headquarters in the Sylhet area. The expansion of the Harikēli kingdom is actually suggested by the Chittagong plate of Kāntidēva⁵ who was a ruler of Harikēla-maṇḍala in the eight or ninth century A.C. Kāntidēva seems to have been originally a petty ruler of Harikēlā, or Harikēla Harikēli in the Sylhet region; but he appears to have later acquired a wide kingdom which had its capital at Dēvapārvata near modern Comilla in the Tippera District.⁶ Trailōkyachandra who flourished about the middle of the tenth century seems to have owed allegiance to the line of Harikēla kings represented by Kāntidēva.⁷ Śrīchandra, son of Trailōkyachandra, was the first independent monarch of the Chandra dynasty. He appears to have thrown off the yoke of Harikēla and extended Chandra power over wide areas of south-east Bengal at the expense of the erstwhile overlords of his family. The rise of Śrīchandra as an independent monarch may have been facilitated by a possible struggle between the Pālas and the kings of Harikēla as suggested by the discovery of an image inscription dated in the first regnal year of Gōpāla II (circa 940-60 A.C.) at Mandhuk within the Chāndinā Police Station of the Tippera District.⁸ That Śrīchandra, who ruled about the second half of the tenth century, had himself

⁷ His comparison with Dillipa in the stanza in question scarcely proves his independent status Cf. *I.H.Q.*, XXIV, p. 73.

⁸ Verendra Research Society's Monograph, No. 8, 1950, pp. 4-6; *I.H.Q.*, Vol. XXVIII, pp. 51 ff.

to struggle with the Pālas is possibly indicated by the discovery of the Bāghaurā¹ and Nārāyaṇpur² inscriptions, dated respectively in the third and fourth regnal years of Mahīpāla I (circa 988-1038 A.C.) in the same District. Verse 12 of the Bāṅgarh plate³ of Mahīpāla I also says that he recovered his paternal dominions that had passed to usurpers. The temporary nature of Mahīpāla's success against the Chandras in East Bengal is, however, demonstrated by the Kulkuri (regnal year 12)⁴ and Betkā or Pāikpārā (regnal year 23)⁵ inscriptions of Gōvindachandra who was probably the successor of Śrīchandra. He is no doubt the king Gōvindachandra of Vaṅgāladēśa (originally the name of Chandradvīpa, which was later applied to the extensive dominions of the Chandras in south-east Bengal), who came into conflict with the generals of Rājendra-chōḷa shortly before 1023 A.C.⁶ Another later member of the same family was Layahachandra or Laḍahachandra.⁷

The designation *Mahātantrādhyaḥksha* occurs in the list of officials and subordinates to whom the king's order regarding the grant recorded on the Madanpur plate was addressed. Dr. Basak says, "The term *Mahātantrādhyaḥksha* undoubtedly refers to the highest priest in charge of the religious rites which were performed on the king's behalf in accordance with the injunctions of the *śrutis* and the *smritis*." But the *Tantrādhyaḥksha* may be the same as the *Tantrapāla* of other inscriptions, who had apparently nothing to do with the office of the *Tāntrika* or priest. The Partabgarh inscriptions⁸ refer to a *Tantrapāla-Mahāsāmanta-Daṇḍanāyaka* who served the Gurjara-Partihāra emperor Mahēndrapāla II. The official designation *Tantrapati*, literally the same as *Tantrādhyaḥksha*, is also known from the *Rājatarāṅgiṇī* (VIII, 2422) and Maṅkha's *Śrīkaṇṭha-charita* (III, 50). Maṅkha says that his brother received 'the garland of the office of the *Bṛihattantrapati*' from king Sussala of Kashmir. Jōnarāja in his commentary on the above verse explains *Bṛihattantrapati* as *Dharmādhikārin*, i.e., 'a judge'.⁹ It may be mentioned in this connection that the *Tantrins*, so often mentioned in the *Rājatarāṅgiṇī*,¹⁰ were also absolutely unconnected with *tāntrika* or priestly rites and represented a military tribe or tribal caste. Dr. Basak's interpretation of the designation *Mahātantrādhyaḥksha* therefore appears to be doubtful.

The few lost *aksharas* at the beginning of line 21 of the Madanpur plate may be restored as *gaṇḍā°*. The area of land granted by the charter thus seems to be *gaṇḍ-āshṭ-ādhik-āshṭa-drōṇa*, i.e., eight *drōṇas* (*drōṇavāpas*) and eight *gaṇḍās*.¹¹

4. Kulkuri and Betkā Inscriptions of Gōvindachandra

The above inscriptions have been edited by the late Dr. N. K. Bhattasali in this journal, Vol. XXVII, pp. 24 ff., and Plates. The author quotes only partially my views on both the inscriptions published in the Bengali journal *Bhāratavarsha* and is totally silent about my articles in English on the former epigraph in the *Journal of the Assam Research Society*, Vol. X, 1943, pp. 63 ff., and on the latter in the *Indian Culture*, Vol. VII, 1941, pp. 405 ff. It is gratifying to me

¹ Bhandarkar's List, No. 1624.

² *Ind. Cult.*, Vol. IX, pp. 121-25.

³ Above, Vol. XIV, pp. 326 ff.

⁴ *Ibid.*, Vol. XXVII, pp. 24 ff.

⁵ *Ind. Cult.*, Vol. VII, pp. 26 ff.

⁶ See above, Vol. IX, pp. 229-33.

⁷ Bhandarkar's List, No. 1519. The correct form of this king's name seems to be Laḍahachandra and, considering the peculiarity of the name, he may be taken to be none other than the homonymous poet known from the Sanskrit anthologies (see Kieth, *A History of Sanskrit Literature*, p. 204).

⁸ Above, Vol. XIV, pp. 176-88.

⁹ See Stein, *Rāj. tar.* (translation), Vol. II, p. 188.

¹⁰ *Ibid.*, note on Chapter V, verse 248.

¹¹ See *I.H.Q.*, Vol. XXVI, pp. 309 ff.

to find that the Government Epigraphist for India has supported my reading and interpretation of the Kulkūṛi inscription against those of the late Dr. Bhattasali.¹ If, however, my views were fully quoted, it would have been clear that the interesting points raised in the editorial notes on the Kulkūṛi inscription had already been offered by me. "The correct reading of the passage", I observed in this connection, "is, in my opinion, °*Lakṣmī(shmī)dina-kārī(ri)ta-Bhaṭṭāraka[l*]*, 'the Sun-god caused to be made by Lakṣmīdina.' the word °*dina* may be the same as Sanskrit *dīna* or Prakrit *dinna*=Sanskrit *datta*. Attention has also been drawn to such North Indian personal names as Rāmdīn."²

The first word of line 2 of the Betkā (or Pāikpārā) inscription has been read by Dr. Bhattasali as *Bārajika* which he equates with *Bārajika* supposed to be the original of the name of the modern Bāraī (betel-leaf grower) caste of Bengal. I read the word as *Rārajika* which was explained as indicating an inhabitant of a locality called Ralaja. Considering, however, the similar forms of *v(l)* and *r* in some cases in the epigraph in question³ the reading *Bārajika* seems equally possible. It is, however, extremely doubtful whether the form *Bārajika* may be expected in an eleventh century record of East Bengal as standing for *Bārajika* and modern *Bāraī*. The Prakritic feature substituting *r* by *l* is never met with in the Sanskrit inscriptions of Bengal. It is also not a regular feature of Bengali phonetics. The word *Bāraī*, as well as *baraj* (betel-leaf plantation) with which it is associated, is never used in Bengali with *l* in the place of *r*.⁴ This is also clear from the attitude of some philologists who derive Bengali *baraj* from Arabic *burz*.⁵ That *r* of the word *baraj* as well as its derivations was pronounced in early-medieval Bengal is moreover clearly indicated by the repeated use of the same word as *baraja* in the Sāhitya Parishad plate of Viśvarūpasēna,⁶ as well as the word *bārayī* (i.e., *bāraī*) in the village name *Bārayipadā* (literally, 'the habitation of the *Bārayis* or *Bāraīs*) in line 42 of the Madanpārā copper-plate inscription of the same king.⁷ I therefore think that the expression *Rārajika* or *Bārajika* in Gōvindachandra's Betkā (Pāikpārā) inscription is actually derived from a locality and has nothing to do with the Bāraī or Bārui caste.

5. Tekkali Plates of Anantavarman, Gaṅga Year 358

Mr. R. K. Ghoshal has edited the above inscription in this journal, Vol. XXVI, pp. 174 ff. In my opinion there are several errors in Mr. Ghoshal's transcript of the record. An archaic form of Telugu *dh* has been read as *dhdh* or *dhv* in all the cases. This form of *dh*, however, occurs in inscriptions like C. P. No. 7 of 1918-19 published in *J.A.H.R.S.*, Vol. VIII, pp. 185 ff.; cf. *nagarādhi°* in line 2, °*dhārasya* in line 3, *rājādhi°* in line 7, *vuddhvā* in line 21, *vasudhā* in line 22 and *dharā* in line 24. This particular form of the letter may be compared with the later form of it found in epigraphs like C. P. No. 8 of the same year (*op. cit.*, pp. 188 ff.; cf. *nagarādhi°* in line 2, °*dhārasya* in line 4, °*dhāra* in line 11, etc.). What have therefore been read by Mr. Ghoshal in the Tekkali plates as *nagarādhdhi°* (line 2), *dhvaṣṭa* (line 11), *dhviguṇa* (line 13) and *dhvāta* (line 15) should actually be read as *nagarādhi°*, *dhaṣṭa*, *dhiguṇa* and *dhāta* respectively. Similarly, what

¹ Above, Vol. XXVII, p. 25, note 2.

² *Journal of the Assam Research Society*, Vol. X, pp. 63-4. It may also be pointed out that Dr. Bhattasali was at first not inclined to agree with my reading of the date of the Betkā (Pāikpārā) inscription as the year 23 which, however, he ultimately accepted (without any remarks) in his article published above.

³ Cf. *r* in *Pārādāsa* (line 2) and the first *v* in *Vāsudēva* (line 3).

⁴ Cf. J. M. Das, *Bāngalā Bhāṣhār Abhidhāna*, s. v., quoting Mukundarāma's *Chañḍīmāṅgala* (sixteenth century).

⁵ *Loc. cit.*; but the derivation is no doubt wrong as the word is found in an inscription of a Sēna king who flourished about the first quarter of the thirteenth century (see below, note 6).

⁶ *Inscriptions of Bengal*, Vol. III, pp. 143-8 (lines 45, 46, 59, 68 of the text). The word *bārajika*, probably in the sense of modern *Bāraī* occurs in the Sobharampur plate) of Dāmōdaradēva (see below, Vol. XXX, p. 188).

⁷ *Ins Beng.*, *op. cit.*, p. 138.

Mr. Ghoshal had read, without noticing the peculiarity of the letters of the later Kalinga alphabet, as *chudā* (line 5), *sakhōbha*, *sanda* (line 8), *chūḍḍaṇi-prabha* (line 9), *dāñcha* (line 12), *tyōga* (line 13), *gaṅgā* (line 15), *gagēya* (line 22), *acham*, *bbuvati* (apparently a misprint for *bhuvati*, line 26) and *dachyatē* (corrected to *pachyatē*, line 29) should be read in my opinion respectively as *chudhā*, *sakhōbha*, *savda*, *chūḍḍhaṇiprabhā*, *datra*, *tyaga*, *gāṅgā*, *gāgeya*, *akhaṭha*, *bharati* and *pachyatē*. *Svasty* for *Svastyā* (line 1), *śād* for *śāda* (line 24; see the same also at p. 174, note 5) and *sadata* for *śadata* (line 27) may, however, be due to misprints.

Medial *u* has often been wrongly read by Mr. Ghoshal as *ū*; cf. *sūtra* (line 4), *bhūtō* (lines 13-14), *sūnu* (lines 16 and 18-19), *pūrvva*, *sūrjya* (line 17), *bhūmi* (line 27), etc. In line 13 *sa[m*]pad-ādihāra* has been unnecessarily corrected to *sampadām=ādihāra*. The correction of *adhivāsaka* to *vāsaka* (cf. line 2) is equally unnecessary. In line 23, what has been read by Mr. Ghoshal as *vijutya* is clearly *vijaya*. He did not notice that the engraver had at first omitted the letter *ja* and incised the following two letters, *ya* and *ra* (of *rājya*). After having engraved *ra*, he found out the mistake and corrected *ya* to *ja* and *ra* to *ya*.

Mr. Ghoshal's reading and interpretation of the passage describing the gift land in lines 19-21 of the inscription have been considerably improved upon in an editorial note. I am, however, inclined to read the passage as *upājitaṁ Vāṣiṇicharaṇa-gramō Yaroku-kuṭuvina dvai-sada-hala-bhūmi* for Sanskrit *upārjitā Vājasanēyicharaṇa-grāmē Yarōku-kuṭumbinō dvi-sata-hala-bhūmiḥ*. The donee of the grant thus acquired (probably by purchase)¹ 200 *halas* of land that had been in the possession of an agriculturist householder named Yarōku in the village called Vājasanēyicharaṇa.

In lines 24-25, Mr. Ghoshal reads *likhitam=idam Māṭṛisiri-śamatēṇa*, 'this is written by *Sāmanta Māṭṛisiri*'. Since, however, the letter read as *tri* is clearly *tyē*, I am inclined to read the passage as *likhitam=idam[m=a*]mātyē[na*] siri-Sāmatēṇa (Śrī-Sāmantēṇa)*, 'this is written by the *amātya śrī-Sāmanta*'. For *Sāmanta* as a personal name, we may refer to Bhandarkar's List, Nos. 344, 448, 2041, etc. The name may be compared with others such as *Sāmantasēna*, *Sāmanta-simha* and *Sāmantavarman*, found in numerous inscriptions.
